- Appendix 1 – Picture of a deployed Spit Guard Pro (Kit Design) taken from the Kit Design website

The screenshot shows the Kit Design website's product page for the Spit Guard Pro. The website has a dark header with the Kit Design logo and navigation links: HOME, ABOUT US, CASE STUDIES, OUR PRODUCTS, and CONTACT US. Below the header, a secondary navigation bar lists product categories: EQUIPMENT VESTS, SPIT GUARD PRO (highlighted), HARNESSSES, CYCLE WEAR, and TACTICAL. The main heading is 'Spit Guard Pro'. Below it, a descriptive text states: 'The only medically certified CE93/42/EEC product. Guaranteed protection from spitting restrained individuals, with no associated health or safety risks.' To the left of a large image of a man wearing the device, there is a list of bullet points: '• The only medically certified CE 93/42/EEC product', '• Guaranteed protection from spitting', and '• No associated health risks'. Above this list is a small diagram showing the device being put on and removed. Below the list are two smaller images: one of a man wearing the device and one of a woman wearing it. The large image on the right shows a man wearing the device, which is a clear, inflatable shield that covers the mouth and nose, with a strap around the back of the head.
