A Proposed aerial axonometric - showing St Paul's Height Limitations infringements
PL_10 / New additions shown coloured

B Proposed aerial axonometric
PL_10 / new additions shown coloured

Millennium Bridge House

C Existing view from South - showing St Paul's Height Limitations infringements
PL.07

C Proposed view from South - showing St Paul's Height Limitations infringements
PL.10
New additions shown coloured

Millennium Bridge House

Elevation 3 : West Elevation (Along Peter's Hill)

Elevation 5 : West Entrance (Southern Return)

Elevation 6 : West Entrance (Northern Return)

Millennium Bridge House

Proposed north elevation

Millennium Bridge House

Proposed east elevation

Millennium Bridge House

Section AA: North to South (Lambeth Hill Entrance)

Proposed Section DD: Looking West Through Western Atrium

Proposed section AA & DD - Looking west

Millennium Bridge House

Proposed Section EE - Looking North through Peter's Hill Entrance

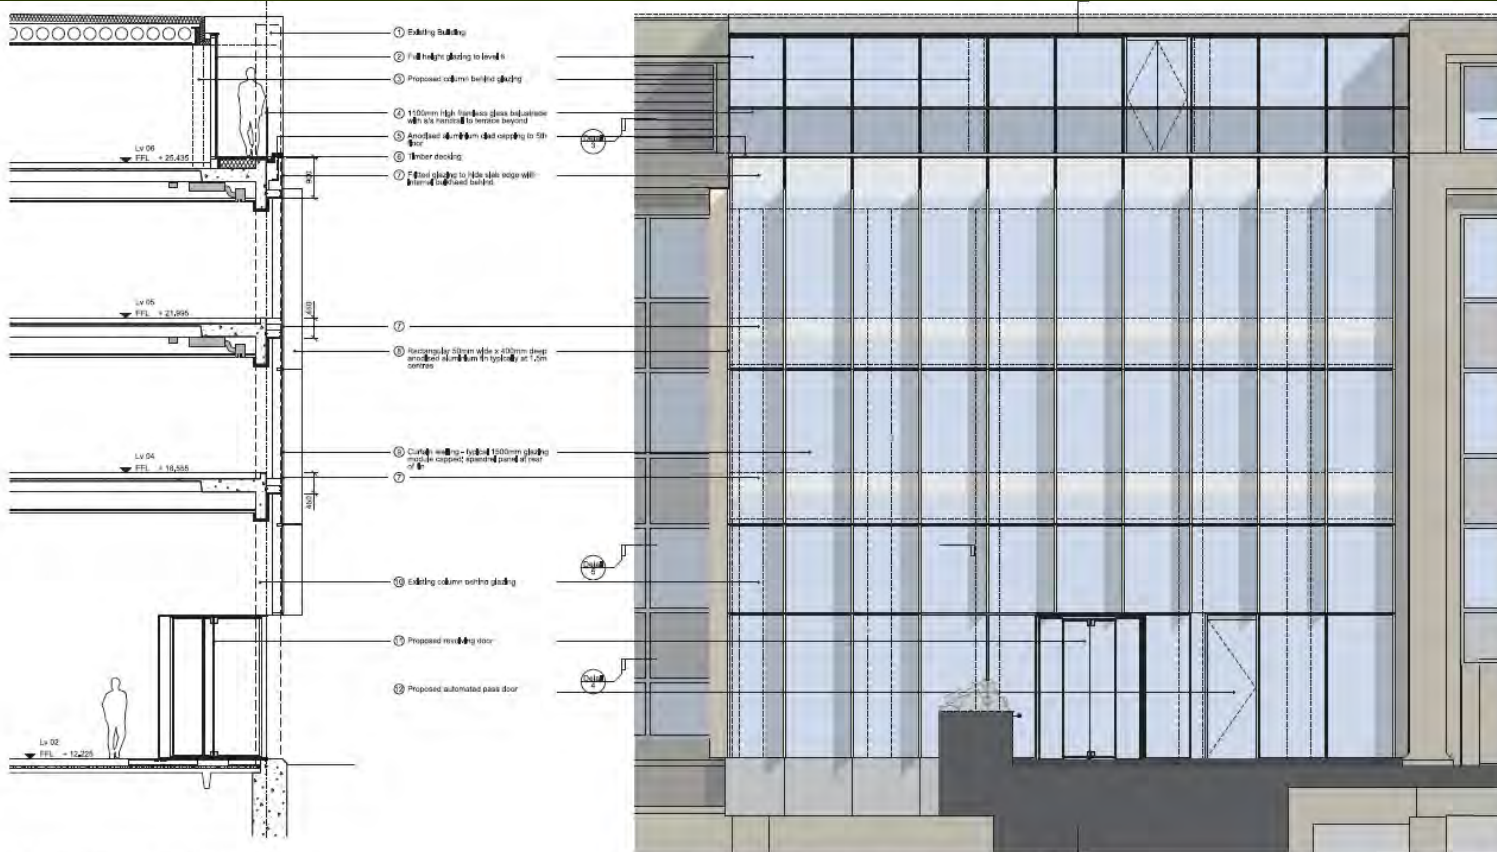

Proposed section EE - Looking north through Peter's Hill entrance

Millennium Bridge House

Proposed Lambeth Hill entrance - Plan & section

Millennium Bridge House

Detail 1: Section through North Elevation Lambeth Hill Entrance 150

Detail 2: North Elevation - Lambeth Hill Entrance 150

Detail 3: Floor Plan Detail North Elevation Lambeth Hill Entrance 125

Detail 5: Level 02 Lambeth Hill Entrance 150

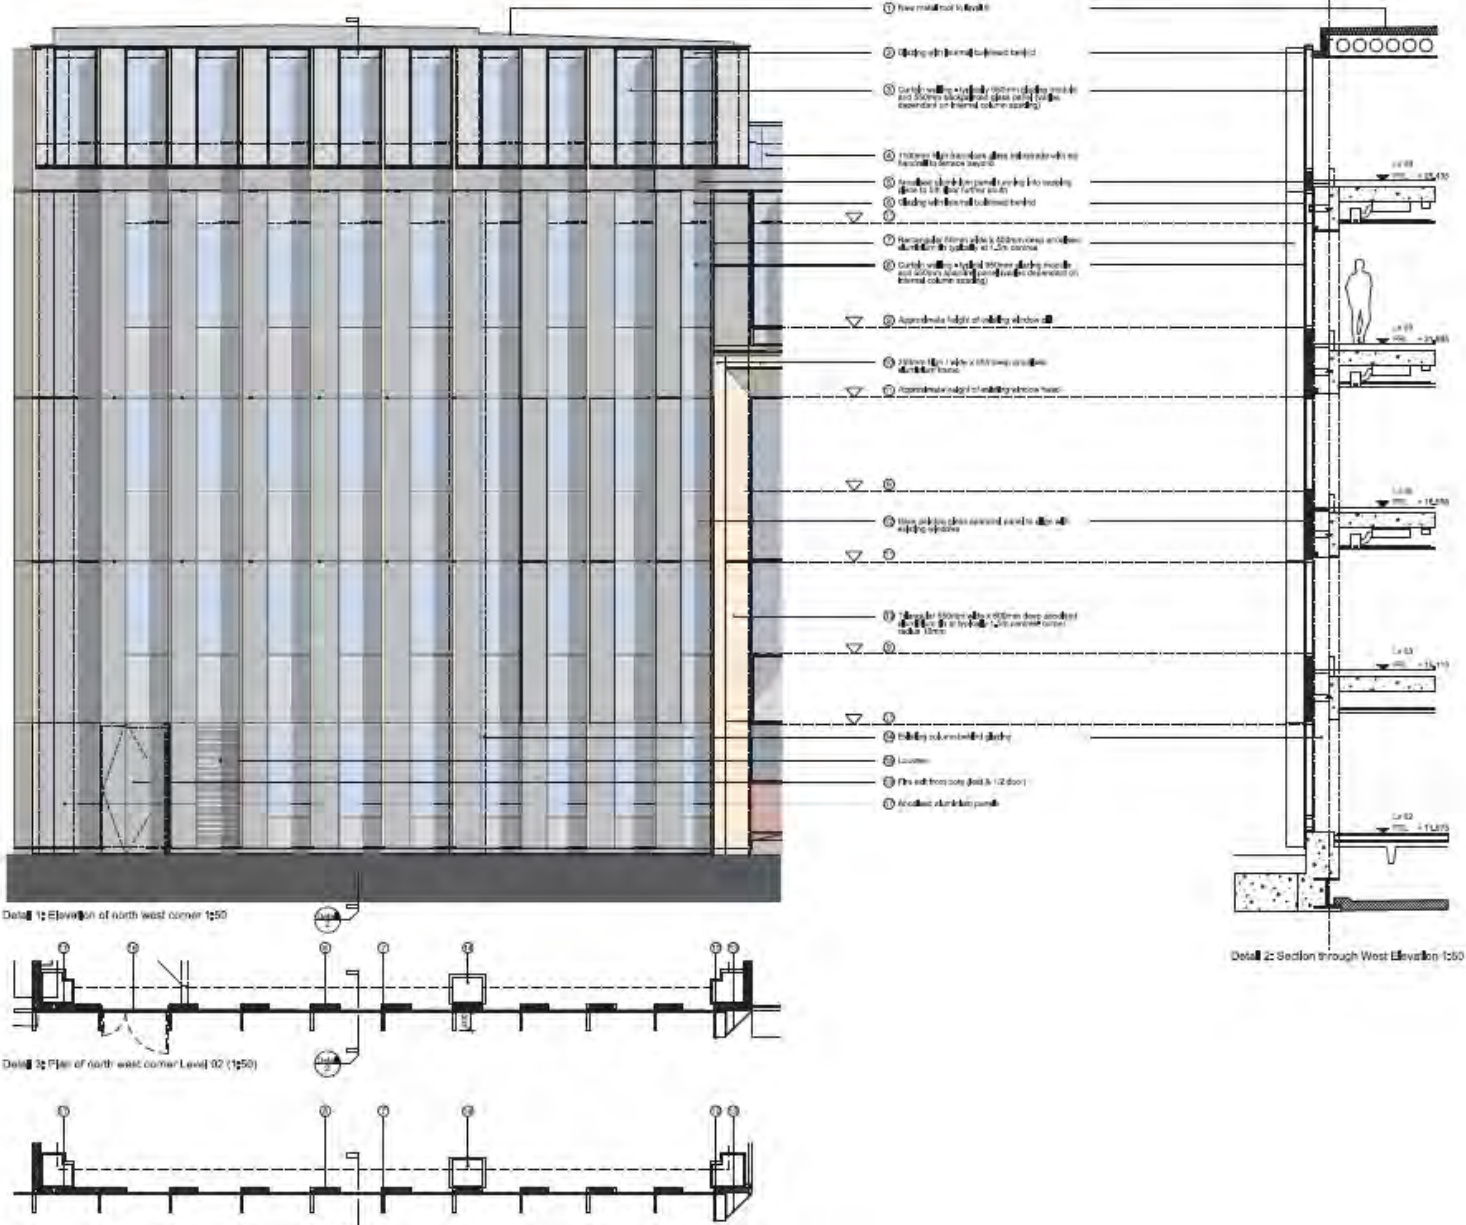

Proposed detailed part elevation - North elevation, Lambeth Hill entrance

Millennium Bridge House

Proposed detailed part elevation - North elevation

Millennium Bridge House

Proposed detailed part elevation – West elevation

Millennium Bridge House

Detail 1: Elevation of West Entrance 1200

- ① 1150mm (45") thick glass infill panel with 6mm laminated to service below
- ② Glazing with thermal insulation backing
- ③ Horizontal 20mm wide x 400mm deep glass shelf (top of 20mm spacer) with 6mm deep (or 100mm wide) to width of wind entrance only
- ④ Horizontal 20mm wide x 400mm deep glass shelf (bottom of 20mm spacer) with 6mm deep (or 100mm wide) to width of wind entrance only
- ⑤ Level of wind entrance only (20mm glass shelf) to match floor level of wind entrance
- ⑥ Glazing with thermal insulation backing
- ⑦ Horizontal glass panel and panel
- ⑧ Floor slab + 100mm concrete + 100mm concrete
- ⑨ Proposed floor slab
- ⑩ Level of wind entrance only (20mm glass shelf) to match floor level of wind entrance
