Workflow to Gateway 4 in September/October 2020.

Outline Workflow from Gateway 4

Detailed design of Chosen arm closures and how the rest of the junction operates

POST GATEWAY 4

- Detailed design on the functionality and public realm aspects for the agreed arm closures.
- Work on enhancing the mitigation measure for journey times
- Work on mitigation measures to reduce the negative impacts on protected groups.
- Working up the operating scenarios of the 'open' arms for consultation
- Preparation for consultation
- Public consultation period
- Review of responses and identify design changes/decisions
- · Final Traffic modelling audit of preferred scheme
- Final scheme submission for approvals from TfL in terms of TMAN

Evaluation of options and operating scenarios will be carried out in compliance with the City of London's traffic authority responsibilities for traffic movement and efficient use of the road network
