Virtual School for looked after children: Annual Report	
for Academic Year 2019-2020	
Report of:	For Information
Andrew Carter, Director of Children's and Community	
Services	
Report author:	
Andrew Russell, Virtual School Headteacher	

Summary

Background and context:

This report presents an overview of the activities and impact of the City of London Virtual School for the academic year <u>September 2019 to July 2020</u>. Compared with other Virtual Schools across England, the City of London Virtual

School is very small and almost all the learners arrived in the City as refugees seeking asylum with very limited English language skills. The vast majority are males aged between 17-19. Some are still waiting for their legal status to be confirmed whilst they are on their education journey with us.

A small cohort means a small VS team – just the VS Headteacher (VSHT) for two days a week. The VSHT is part of the Children's Senior Management Team, with influence in both the Education and Social Care parts. The VSHT also sits on the board of the National Association of Virtual School Headteachers.

Covid-19 has had a huge impact on the learners and the work of the VS. This continues to be the case. The pandemic necessitated a rapid shift to on-line learning, a move which was only partially successful. KS4/5 learners spent only half their time engaged in on-line learning. Overall, on-line learning does not fully meet the needs of looked after children sufficiently.

Highlights

The City of London VS continues to maintain the high standards reported by Ofsted in March. The majority of learners are well supported and make good progress. Challenges in measuring the progress and attainment for this unique group of learners has been greatly hampered by Covid. Progress is measured individually, comparing a learner's attainment at the beginning of the year with their attainment at the end. Almost all learners show good progress across the year.

Overall engagement with education has been higher than the previous year at 92% with instances of consistently high attendance. No looked after children or care leavers have been excluded this year.

There is good partnership work in place to ensure that young people remain in education, employment or training. This work remains a priority for the coming year. The VSHT role in national fora for children looked after directly benefits the work of

the City of London Virtual School. An effective new partnership has started between the VSHT and an experienced headteacher and Ofsted inspector, acting as an independent 'School Improvement Partner' to provide an extra layer or support and challenge.

Challenges in the year included the planned expansion of enrichment and improving looked after children's much needed IT skills. More optimistically, the VSHT has firm plans in place for the coming to take these matters forward

Despite disruptions, PEP activity has remained at a good level and quality. Indeed, the PEP process has provided a focus to plan on-line learning.

Priorities for next year

The focus this year will be to continue to develop the effectiveness of PEPs both online and face to face. Setting up a procedure to provide IT support will also be a priority. The VSHT will continue to adapt and develop links with City schools to provide enrichment opportunities for a wide range of learners as well as improving the offer around career progression pathways.

Recommendation

Members are asked to:

Note the report.

Main Report

1. Background and the role of Virtual School

This report presents an overview of the activities and impact of the City of London Virtual School for *the academic year September 2019 to July 2020*.

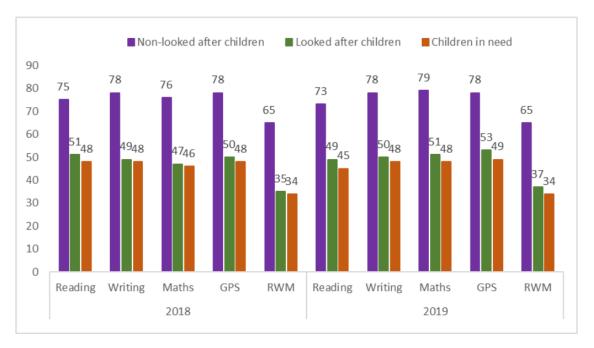

The Virtual School supports all children in care and relevant care leavers regardless of their length of time in care. The age range for this year covers children in secondary school through to those in college and university.

Every local authority has a responsibility to promote the educational achievement of children looked after. In February 2018, the government released updated guidance 'Promoting the Education of Looked After and Previously Looked After Children' which reinforces the local authority's duty to safeguard and promote the welfare of children looked after and previously looked after, and promote the child's educational achievement, wherever they live or are educated.

There is a clear ambition, at national and local level, to narrow the attainment gap between children looked after and their non-looked after peers. The attainment gap remains high, nationally as this data shows:

[Note, data for 2020 will not be published until March 2021 Please also note there are no children in the care of the City of London in this national data as we have not had any taking KS2 or KS4 exams this year.]

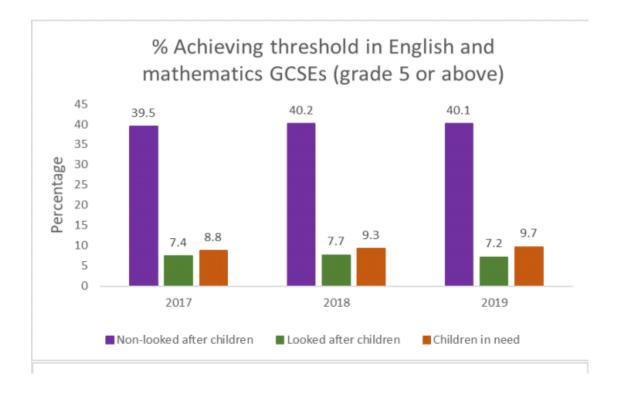

Outcomes at KS2 (end of Primary / Year 6) – National Data (there is no City data as there are no children in care at this age)

Source: CLA-NPD, CIN-NPD

As shown above, in 2019, 37% of looked after children reached the expected standard in the headline measure reading, writing and maths, which is much lower than the 65% for non-looked after children. However, 58% of looked after children at the end of key stage 2 have a special educational need (SEN) identified, as do 49% of children in need. In comparison, only 18% of non-looked after children have a SEN.

Outcomes at KS4 (end of Secondary / Year 11) – National Data (there is no City data as there are no children in care at this age)

Again, it is very clear that there is a large attainment gap between 'all children' and Looked after Children (and Children in Need).

Looked-after and previously looked-after children start with the disadvantage of their precare experiences and, often, have special educational needs. Virtual Schools have a key role to ensure these children have the maximum opportunity to reach their full educational potential - an important part of why this role was made statutory. The City of London Virtual School is responsible for ensuring that children looked after and care leavers fulfil their potential at all stages of their learning journey so that they can go on to be successful in higher education, apprenticeships and employment.

The City of London Virtual School strives to achieve this by:

- Co-ordinating and quality assuring all Personal Education Plans (PEPs).
- Monitoring and challenging schools and colleges to make effective use of additional resources such as the Pupil Premium for Looked After Children.
- Tracking the academic progress, attendance and exclusions of Looked After Children.
- Ensuring Special Educational Needs or Disability (SEND) needs are identified and supported appropriately, including applications for statutory assessment if necessary.
- Ensuring effective transition between schools, colleges, Higher Education or specialist providers and between such providers when a learner moves top a new placement.

The City of London Virtual School has only one member of staff, the Virtual School Headteacher, (VSHT) Andrew Russell. He is a former secondary school Headteacher and has been the Virtual School Headteacher in two other London boroughs. He works two days a week, term time only. Outside of this work Andrew works with the National Association of Virtual School Headteachers (NAVSH) planning and organising their annual national conference He is also a mentor / coach working with other Virtual School Headteachers as well as leading training with school staff and foster carers. This training specialises in promoting the education achievement of young people in care as well as training about how to overcome the impact of trauma and attachment on behaviour and achievement in school. This work has direct benefits on the work of the City of London Virtual School.

The wider team that supports the education of young people in care also includes:

- Six social workers and their Team Manager
- Lead Education Advisor
- Looked After Children's nurse
- City & Hackney Children's Health (CAMHS)
- Information, Advice and Guidance Advisor, Prospects
- Children in Care Council (CICC) Coordinator
- Two Independent Reviewing Officers (IROs)
- Head of Adult Learning, City of London Corporation

2. Governance and organisation

The VSHT is part of the senior leadership structure in the People's Directorate. This brings the added value of bridging the two key areas of Education and Social Care under a single

management structure. The VSHT has a standing item in the Children's Senior Management Team (CSMT) meetings. The VSHT also meets directly with the DCS regularly.

The VSHT reports into the Safeguarding Sub Committee which acts as the Corporate Parenting Board and provides additional scrutiny and challenge.

One development this year came at the request of the VSHT. This was to have a 'School Improvement Partner' as an independent person to provide challenge and support. This relationship started in the summer term of 2020 with the first formal meeting in the Autumn of 2020. This partner will regularly report to the Assistant Director (People). The relationship has started very positively.

3. Cohort characteristics

The nature of the City of London Virtual School cohort is unique compared with other local authorities and London boroughs. It is very small which means it is dynamic – any changes have a big impact. One learner in a cohort of around 30 learners can change statistics by 3%. Compare this with a 'normal' Virtual School cohort of 300 learners where one makes a difference of 0.3% in the statistics.

At the end of the 2019-20 academic year, the demographic of the cohort was:

Key Stage	Number on roll	Number in school / college / uni	Tuition class	Working or training	NEET	Missing
EYFS	0	0				0
KS1	0	0				0
KS2	0	0				0
KS3	0	0				0
KS4	9	5	3		0	1
KS5	24	19	3	1	1	0
18-25	23	17	0	2	4	0
Total	56	41	6	3	5	1

Arrivals since start of academic year = 9 (22 the previous year)

- NEET = Not in education, employment or training
- The '18-25' group = Care Leavers
- Of the 56 young people above, 52 are male. This is very different to an average Virtual School. [Update September 2020 we now have two new girls in care.]
- Of the 56 in the cohort, 53 (94%) came to the UK as refugees. The majority arrive with almost no English and initially study ESOL at Entry Level 1. This is a much higher percentage than all other local authorities.
- Missing many of the cohort arrive in debt to people traffickers. Once they are here, some disappear because they must go away to pay off the debts owed. This can often be against their own will.

The majority have Arabic as their first language, but we have many other first languages in the cohort, including:

Pushto	Amharic	Farsi	Tigrinya	
Vietnamese	Dari	Oromo	Albanian	

In some cases, we have an interpreter present in meetings. During the year it is pleasing to see the need for interpreters reduces as the young people improve their skills in English.

As well as limited skills in English, the UASC young people arrive with varying amounts of education in their home countries. A few have had almost no formal education. Others have only had 3-4 years. Others might have had more. In all cases however, we must focus on their English skills first so they can then progress onto vocational courses.

In most local authorities, the majority of the Looked After Children live within the local area. This is not the case in the City of London. 95% of the cohort live outside the City, scattered across London with a cluster in Luton.

This has several impacts on the work of the Virtual School. Education provision must be sourced from the local area and meetings will be held locally therefore involving a lot of travel. It makes it harder to gather the cohort together locally for activities and events such as the celebration event. The VSHT attends almost all the Personal Education Plan (PEP) meetings wherever the young person lives. This is a key commitment to our young people. Covid has had a huge impact on PEP meetings – see the section later in this report.

4. Attainment and Progress

The VSHT monitors attainment and progress throughout the academic year. This is usually through the PEP meetings which take place every term. I also gather end of year attainment data directly from schools and colleges. For young people who have extra tuition and those in our tuition class, we receive monthly reports from the tutors.

Measuring attainment and progress in this unique cohort is very different from other schools and Virtual Schools where attainment can be tracked from one Key Stage to another and compared with national statistics. In this current cohort there are no young people with a previous Key Stage result so I can't compare them with the national cohort. In addition, there is no national comparative data for ESOL attainment. So, attainment can be measured when the learners take assessments, but progress can only be measured individually, comparing a learner's attainment at the beginning of the year with their attainment at the end. In PEP meetings this is a question asked of the school or college often in the context of 'is the learner making expected progress to reach their end of year target?'

Only two in the cohort were in a school five days a week at the start of the year. The majority are in colleges local to where they live studying a variety of courses. More recent arrivals have individual tuition until they can start a school or college in September. Another group attend a tuition class that we set up locally which runs five days a week – an increase on last year when it was three days a week.

The table below shows the rates of progress for the whole cohort, however long they have been with us and includes those Looked After and Care Leavers. The progress measure is based on attainment results and feedback from schools and colleges and the tutors. It is based on the expectation for each individual as it is not possible to relate progress to any national data with this group. The data has been severely impacted by Covid which meant that most end of year assessment data was diminished.

Making Expected Progress	%
Too recently arrived / too little data	2%
Limited data from school / college (Covid)	50%
Below expected	15%
Expected	33%
Above expected	0%

5. Attendance

With such a diverse cohort, making sense of attendance data is a challenge. We use a company called Welfare Call to contact schools and colleges daily to monitor the attendance of 24 of the cohort. Once lockdown started it became much harder to gather meaningful data on how fully engaged the learners were with their online learning. The VSHT and social workers contacted carers and key workers weekly to find out how well the learners were engaging with their online learning. 23 of the KS4/KS5 cohort were engaging for at least 50% of the time with their online learning.

These are the attendance figures for the half year to the February half term, after which lockdown started:

Total attendance 2019-20 (half year)	91.7%
Total attendance 2018-19 (full year)	88.25%

It is worth noting that 15 of the cohort have attendance above 90% - an increase on the figure of 9 last year.

It is impossible to accurately analyse the attendance against previous years due to the huge change once lockdown started.

6. Exclusions

There were no exclusions or behaviour issues reported this year.

7. The City tuition class

Following the success of the tuition class in the previous year, plans were set to run the class again. At the beginning of the school year new arrivals can be placed into local colleges. As the school year progresses it gets harder to join courses at college. The demand this year wasn't as high as last year, so I decided to run the class with some learners from the Islington Virtual School joining City learners. I charged them for this service, £50 per week per learner. We had two learners from Islington and initially three from the City.

Working with the head of the adult education service we created the class at the Golden Lane Community Centre again. This year I wanted to run a daily class instead of the three days a week we ran last year. Another change this year was that we planned for the learners to stay on the course through to the end of the school year to get them ready to start colleges in September.

The class started in January with two tutors sharing the weekly sessions. In March lockdown meant the class had to move online. This took a few weeks to arrange as we had to get laptops for the learners and get everyone proficient at using Zoom. Moving online was never a 100% satisfactory replacement for the face to face classes. The tuition class caters for the most recent arrivals with limited English language skills and limited experience of using IT kit. Even once they were set up and able to connect, some learners were unreliable in logging into classes consistently and on time.

8. Enrichment

The successful enrichment project with the City of London School in 2019 was planned to be repeated in the summer of 2020. Unfortunately, like many things, this was cancelled due to the lockdown. Plans are being made to develop and expand the range of enrichment opportunities for the new academic year.

9. PEPs

One of the main ways of engaging with education settings is through the termly PEP (Personal Education Plan) meeting. These take place when the young person arrives or comes into care to the City of London. An initial PEP is carried within two weeks of coming into care. This is followed by termly reviews, three times a year. If there is a change of education setting there will be another PEP within two weeks of the move. PEPs took place as normal until lockdown in March. After that they were done using a specially designed form emailed to the key participants. This form focussed on the wellbeing of the student and their engagement with the online learning.

Since changing the PEP forms and process last year the quality of the PEPs has improved. There is still room for more improvement to ensure that each social worker (and school) understands what makes a good SMART target and to ensure they chase up all the actions that were agreed in the meeting.

PEPs cover students aged 3-18. For students older than 18 the VSHT monitors the education section of the Pathway Plans, giving feedback and coaching to social workers around targets, where necessary.

10. Budget

The operating budget for the Virtual School is £14,000 (not including the VSHT salary). In addition, there is a variable amount of Pupil Premium for Looked After Children. This is determined by the number of young people in care aged 4-16 in January each year. This year the additional figure was just over £9,000.

The vast majority of this is spent on tuition – either individual or the local tuition class. Some also goes on resources. This year extra laptops were purchased before the Department for Education scheme was able to be used.

11. Celebration event

Due to lockdown it was not possible to run the event this year.

12. Ofsted

Ofsted carried out an inspection of Children's Services in March 2020. The report was very positive regarding the work of the Virtual School. These are the relevant paragraphs:

- 22. The virtual school is creative, relentless and effective in its work with other professionals and external partners to ensure that the growing cohort of children in care do well. Children make good progress in their learning and grow in confidence. This is due in no small measure to the careful and timely attention paid to their individual needs and the excellent support they receive, for example at the weekly local tuition and enrichment classes. This paves the way for meaningful engagement with education, employment and training opportunities. The majority have good attendance at all education and enrichment classes, and they engage in their learning. The low drop-out rate in college reflects the secure grounding they have had, the effective support they receive and their own commitment to learning.
- 23. Children enjoy a rich range of opportunities which open the doors to the arts, culture and sport. Some opportunities are noteworthy, such as the joint project with boys from a local independent school. This has had a palpable impact on both groups of children, who get to learn from each other's experiences and cultures. Personal education plans are of good quality and are purposeful. The vast majority of care leavers are in education or employment, and the local authority is ambitious for them and supports those who wish to attend university.

13. COVID

The impact of Covid-19 and the subsequent lockdown on the Virtual School and the learners has been mentioned above. In summary:

Before lockdown	During lockdown	VS actions	
All learners	All learners at	 Ensure learners have access to laptops / 	
attending school or	home accessing	purchase laptops as required	
college	lessons online	 Work with DfE to order required laptops 	
		 VSHT deals with numerous issues relating to DfE 	
		laptops (logins / access to software etc)	
		 VSHT contacts learners by text to check in with them about their learning. 	
		 Regular emails to key workers to encourage 	
		engagement with online learning	
Tuition class at	Tuition class	 Work with class tutors to ensure they can deliver 	
Golden Lane	closed and	lessons to learners	
Community Centre	moves online		
PEP meetings were	PEP meetings	 Design a new proforma and process for 'virtual' 	
taking place in all	became 'virtual'	PEPs	
schools and		 Chasing social workers to complete PEP 	
colleges		paperwork and upload PEPs	
Enrichment project with City of London		Cancelled	
School			
Celebration event		Cancelled	
Refugee week activity was planned		Postponed to 2020/21	

14. Priorities for 2020-21

Celebration event: This had to be cancelled for the 2019-20 academic year due to the national lockdown. It is a priority to run the event this year, either online, or preferably face to face if it is later in the year.

PEPs: Investigate implementation of an electronic PEP platform and VS Information Management System

Data: Effective data collection and reporting-develop an improved dashboard.

IT: Investigate a qualification young people can take as well as extension courses on programming.

Covid: Identifying the vulnerabilities of this cohort related to the impact of Coronavirus.

Career Information Advice and Guidance: Ensure that the cohort receives aspirational advice from all partners.

Enrichment: Seek ways to expand the enrichment programme both within the partner school and geographically to cover more learners.

Projects: Consider how to promote COL led best practice projects

Andrew Russell, Virtual School Headteacher

Andrew.russell@cityoflondon.gov.uk
