Guidance notes

- The diamond represents performance for your chosen borough. To the right of the black bar represents better than average performance, to the left represents lower than average performance.
- Lower than average performance does not necessarily imply poor performance, and vice versa.
- ** This denotes there are fewer than 16 returns for that indicator.
- Please note that the national comparator measure does not necessarily relate to the same time period as borough data.
- (a) this denotes that for data presourced by London Councils, the borough submitted their own data instead.
- f. Blue font indicates a presourced data item from an existing data publication.
