

key

- ◆ borough performance
- average performance
- lower performing 25%
- middle performing 50%
- higher performing 25%

relative performance is:

- quite below average
- quite above average
- significantly below average
- significantly above average

Guidance notes

a. The diamond represents performance for your chosen borough. To the right of the black bar represents better than average performance, to the left represents lower than average performance.

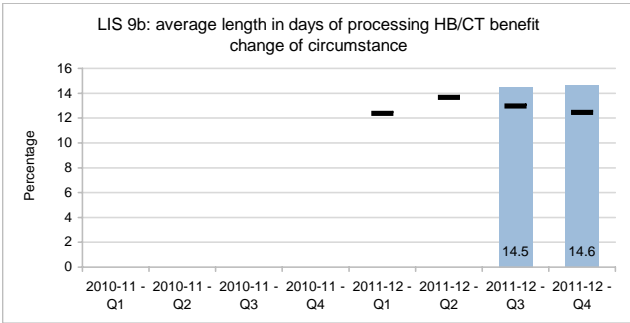

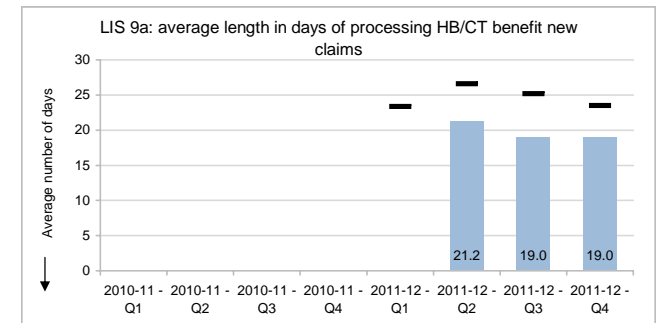

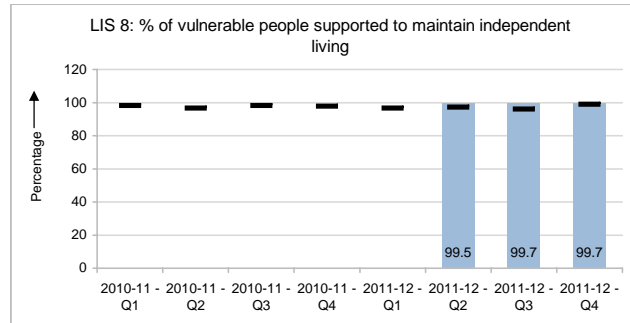

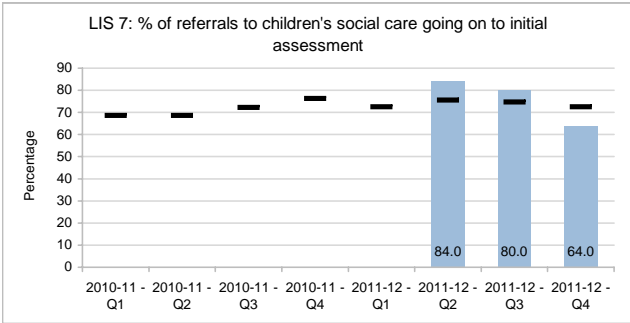

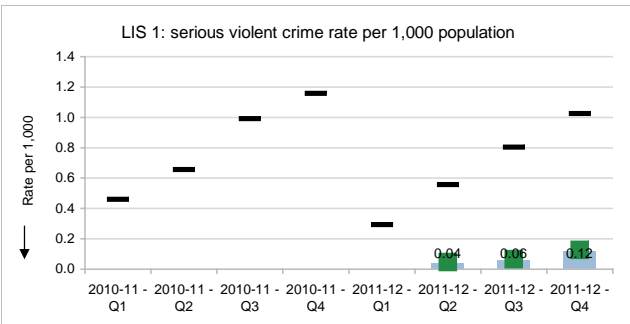

b. Lower than average performance does not necessarily imply poor performance, and vice versa

c. If performance for your chosen borough is significantly different to the average, this is highlighted with a dark red or green dot next to the value. If performance is less significantly different this is highlighted with a lighter dot. Traffic lights are calculated by excluding the top and bottom 5% of values to reduce the effect of outliers. *LIS 7 does not have traffic lights.

d. ** This denotes there are fewer than 16 returns for that indicator

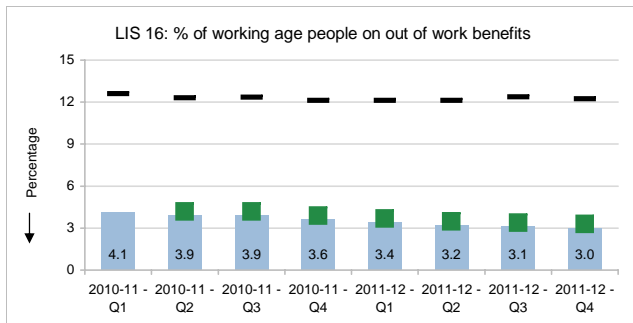

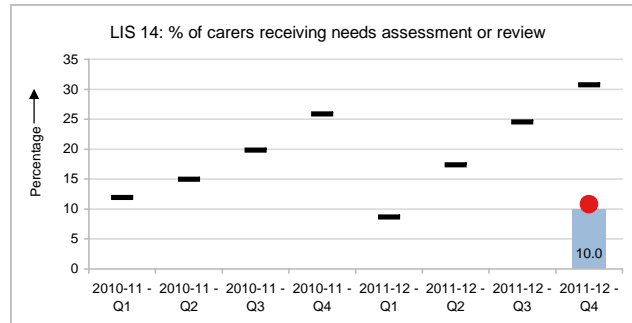

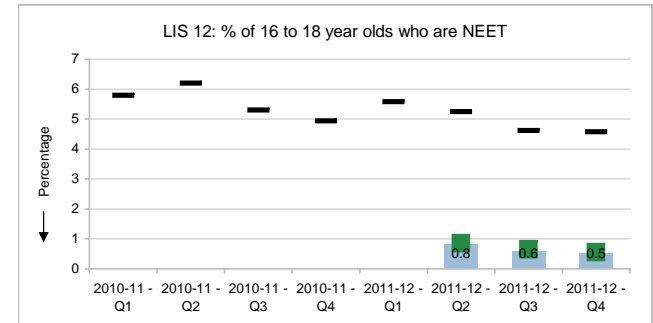

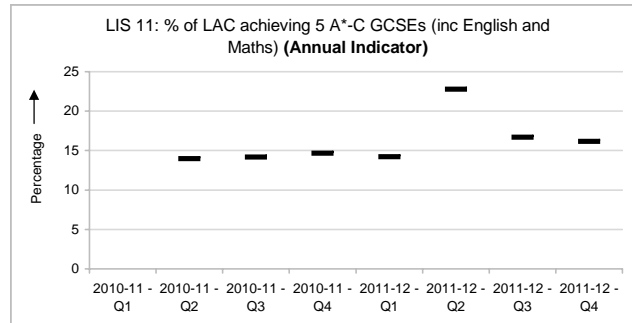

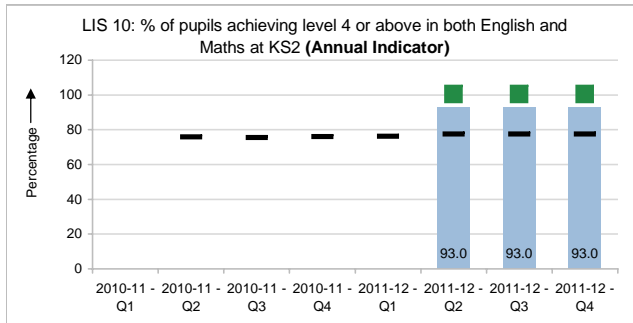

Risk and vulnerability

■ Borough value — London average
○ Relative performance quite below average ■ Relative performance quite above average
● Relative performance significantly below average ■ Relative performance significantly above average
↑ Arrow shows direction for better performance

All 2010-11 - Q1 values do not have traffic lights due to data quality issues

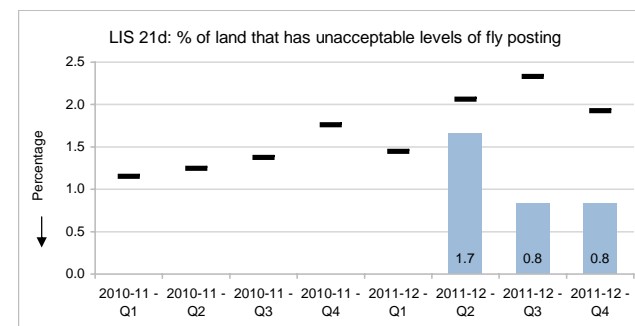

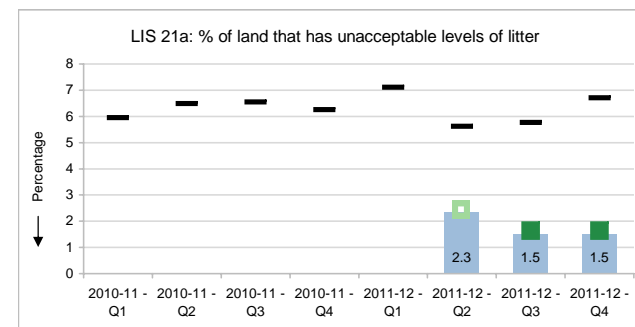

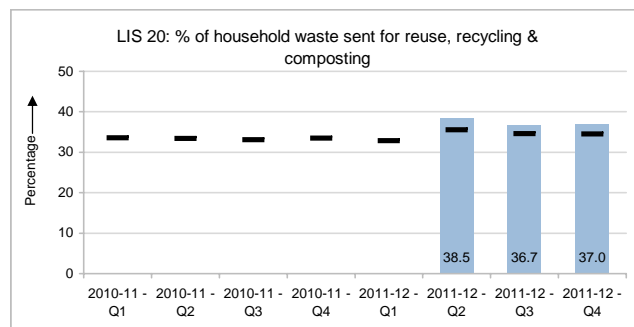

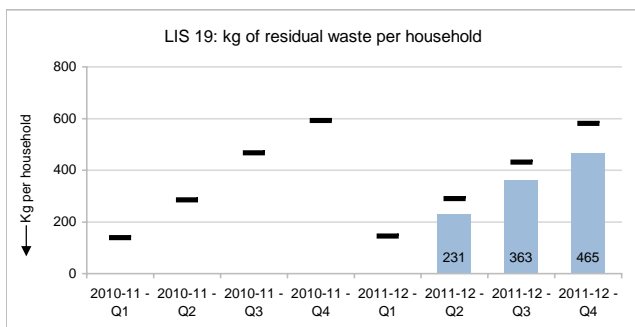

- Borough value
- Relative performance quite below average
- Relative performance significantly below average
