Business Cards imprinted in Braille

A Member referred to the Executive Director of Mansion House and Central Criminal Court's business cards being imprinted in Braille. He questioned whether all the City Corporation's business cards should do the same. The Chairman advised that the matter should be referred to the Chief Commoner to be looked at in consultation with the Members Privileges Sub-Committee.

Reference was made to the Director's title being 17 words long and the need for a shorter title to be established. Members questioned the need for "Executive" to be part of the title particularly as all the other Chief Officers were simply entitled "Director".

RESOLVED – That consideration of whether business cards should be imprinted in Braille be referred to the Chief Commoner to be looked at in consultation with the Members Privileges Sub-Committee.
