The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025.
The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to close scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community.
They propose to restore the Listed Holland House[1] and turn it over to various uses which are claimed to be of community benefit. Whilst the restoration of this building is to be welcomed, the claims about the community value of the uses must be viewed with great scepticism.
The existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and providing good service for many more years. Unnecessary demolition simply squanders the energy embodied in the building.
The proposed building would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole.
The City Corporation is being disingenuous: claiming to recognise the importance of the synagogue, yet simultaneously facilitating this monstrous development. We are entitled to expect much higher standards from Britain's most prestigious local authority.

If possible, it would be very helpful if you would copy your response to us (or at least tell us you have made one), so we can keep track. This can be done by emailing Rabbi Morris at rabbimorris@sephardi.org.uk or posting material to him at Bevis Marks Synagogue, London, EC3A 7LH.Your support will be very much welcomed.

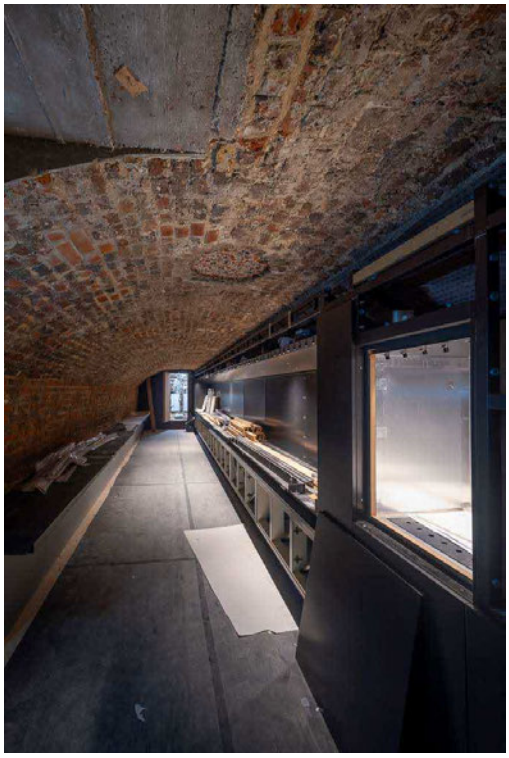
Bevis Marks Synagogue Heritage Foundation Update

Dear Friends,

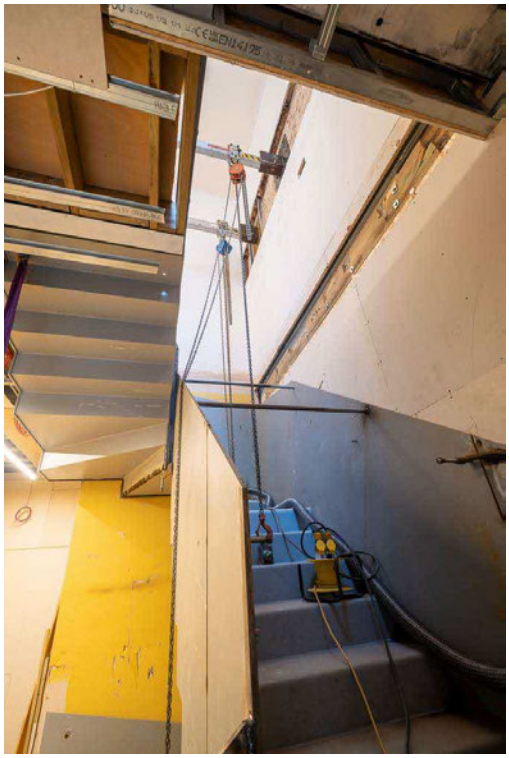
We are delighted to share the news that His Majesty King Charles III has confirmed he will be retaining the Patronage of The Bevis Marks Synagogue Heritage Foundation.

The news was confirmed following a thorough analysis of over one thousand organisations and to mark the first anniversary of Their Majesties' Coronation.



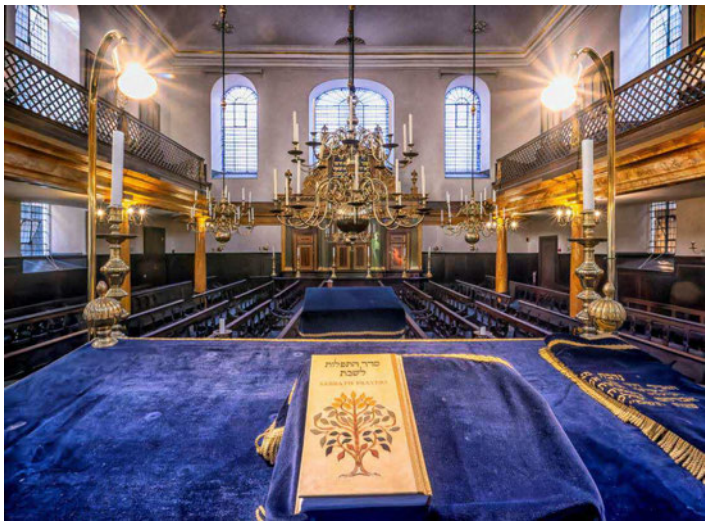
Melody Salem, Chair of Bevis Marks Synagogue Heritage Foundation commented:
"This is a remarkable honour and a testament to the significance of the work of Bevis Marks Synagogue Heritage Foundation. I would like to thank our staff, volunteers and supporters - past and present - for their ongoing hard work and commitment which has been instrumental in reaching this milestone."

In other news...



Today (15 May) is the last date to submit your objection to the proposed development of a 45-storey tower at 31 Bury Street. The proposal fails to respect the immense heritage of the synagogue site and would have a disastrous impact on Bevis Marks Synagogue as a living Jewish congregation, as well as the Dangoor Heritage and Education Visitor Centre. If you haven't already done so, you can submit your response to the application by following this link

Work on site continues as we prepare to open the Dangoor Visitor and Education Centre to visitors later this year. Please see below for a few images.



Below: Glass showcases ready to be installed in the George Weisz Treasury

Below: the staircase has been installed to take visitors down to the basement area

Below: new lighting has been installed on the Tebah

To our friends in the community,

I am writing on behalf of Bevis Marks Synagogue and in relation to Welput's proposed development at 31 Bury Street, EC3A 5AR (link here).

We understand that you have been offered space in the application's proposed community hub building. In light of this, we gently write to inform you that despite Welput's offering of cultural space and community benefit, the proposal has an overwhelming negative impact on its neighbour, Bevis Marks Synagogue, as well as wider culture and heritage setting in the City core.

Detriment on historic landmarks

Welput's proposed building on Bury Street is directly adjacent to the synagogue, which is the oldest synagogue in continuing use in Europe, and a Grade I listed building. It is home to a living congregation and is critical historical site for British Jewry. Grade I listed buildings St. Botolph's Church and St Katharine Cree are also in the close vicinity, as are many other unlisted buildings. This is such an important cluster of heritage sites that the City of London has newly awarded Bevis Marks and its surrounds as a national Conservation Area.

Professor's blog on Bevis Marks's historical importance.

31 Bury's effect on Bevis Marks

Welput has suggested not only a restoration of Holland House and adjacent buildings, but a 45-storey office block, which severely threatens Bevis Marks' historical position within the city of London and its current use as a living cultural centre.

The proposed tower blocks incoming light to the synagogue's windows. Our building is a 300 year-old cathedral-type building, and without adequate light, our ability to hold key Jewish rituals is severely compromised.

The building's courtyard is also important to Bevis Marks' history and current use. The courtyard was built in 1699 and since has hosted generations of religious events, from weddings to festivals and community assemblies. Welput's tower would directly block the courtyard's remaining views to the sky, which is especially important to Jewish rituals.

VuCity rendering of proposed 31 Bury Street (red) beside Bevis Marks (green)

We have continued to unsuccessfully negotiate with Welput for over 5 years to adequately account for this impact on Bevis Marks and the surround heritage buildings.

Short clip on the impact of the proposed building

31 Bury – recent planning rejections

As you may know, Welput's 2020 application on the same site was rejected, and the City of London councillors expressed their concern for the substantial harm to heritage sites including Bevis Marks and The Tower of London. Despite this, Welput's current application remains largely the same. The current application is a mere 4 storeys lower at 43 blocks. From our position, light and setting impact is still extremely adverse.

Sky views - courtyard at Bevis Marks

Welput claims to bring great benefit by offering of community spaces, but we contend that this should be a requirement of all new buildings in the city and not a token to trade for a towering 45 storey tower. Restoring Holland House should not be at the cost of substantially harming neighbouring heritage sites including Bevis Marks, Tower of London, St. Katharine's Cree and St Botolph's Church.

Heritage organisations, including Historic England, SAVE Britain's Heritage and Museum of London Archaeological Society outspokenly object to Welput's application, as do our faith neighbours.

Read St. Katharine's Cree article of opposition.

Indeed, the objections are widespread and The City of London planning site logs more than 750 community objections and counting.

Your organisation and others should be offered great spaces to connect with the community London, and subsidies to hold great programmes regardless of developers' underlying objective to build tall. The community spaces that Welput have offered you should not be used as brownie points to dangle in front of the City of London to appease the city's concerns

BBC article summarising local dissent

Our request from you

Considering this, we hope to ask for your help. We greatly appreciate the need for cultural spaces in London, but this should not come at the expense of the existing heritage culture in the area.

We urge you to re-consider the effect of Welput's application and ask if you would rescind your support for the application. We would greatly appreciate if you would make a comment in support of a reduced height building at 31 Bury Street.

Where to make a comment: application portal

We greatly appreciate in advance your consideration.

Sincerely,

Rabbi Shalom Morris
Bevis Marks Synagogue

31 BURY STREET
Fallback template letter to City Corporation

Please note it is much better if you object in your own words, but we realise you may not have time to do this. Hence you might wish to use the text below, preferably with some adjustment so it isn't just a "standard product".

===

I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.

===

HOW TO SUBMIT YOUR VIEWS:

To:
Subject: Call to Action: Protect Bevis Marks
Reply-To: Bevis Marks Synagogue Heritage Foundation <office@bevismarksheritage.org.uk>

Dear Friends,

I am once again sending a call to action for you to help us protect Bevis Marks Synagogue.

Despite our successfully achieving a Conservation Area around Bevis Marks Synagogue just a few months ago, the City of London has now undermined our efforts and changed the goalposts which previously barred tall buildings in these protected areas.

As a result, developers at 31 Bury St have now submitted a new application for a 45 storey tower, a negligible change from the 48 storey tower that was refused just two years ago. It fails to respect the immense heritage of the synagogue site and would have a disastrous impact on Bevis Marks Synagogue as a living Jewish congregation, as well as the Dangoor Heritage and Education Visitor Centre.

We therefore need to you to strongly object, and to do so without delay. We encourage you to use your own words and views, but provide you with a sample template below. You can also read this document for additional points.

To submit your objection please follow this link.

Thank you,

Melody Salem
Chair, Bevis Marks Synagogue Heritage Foundation

Sample Letter of Objection:

I'm writing to express my strong opposition to this new application (24/00021/FULEIA).

I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area.

This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year.

The new tower, to the synagogue's immediate south, would dominate the

protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light.

What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years?

This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure.

I urge you to refuse this application.

THIS IS AN EXTERNAL EMAIL

Dear Ms Tastsoglou,

re: application 24/00021/FULEIA

I was extremely concerned to hear of the revived proposal to build this massively tall building in a sensitive location. As an architectural historian and as a Jew I am appalled that such a completely unnecessary development can even be under consideration in a conservation area which is of national significance. The proximity of Britain's oldest synagogue is of major concern, not only because of the inevitable disruption to its religious use, but also because of the potential structural damage to the building's foundations that could ensue.

Yours sincerely,

Dr. L. Jacobus

THIS IS AN EXTERNAL EMAIL

Dear Ms. Tastoglu,

My colleagues have prevailed upon me to ask you formally to convert my 'support' for the proposed building planned to be adjacent to Bevis Marks Synagogue into an objection.

Could you please, if you can, do so?

They believe that despite my extreme sarcasm (proposed building would be a barbarian monstrosity etc.), the tick in the support box overrides the attendant comment.

The support was conditional upon the Council supporting a similar structure adjacent to St. Paul's.

I believe I 'supported' the previous proposal on exactly the same basis. That 'support' was successful. The Council threw out the proposal definitively. I hope, and believe, they will do the same again.

Yours Sincerely,
G.M. BEN-NATHAN (Mr).

THIS IS AN EXTERNAL EMAIL

To Ms Tastsoglou,
City of London Case Officer for planning application 24/00021/FULEIA

I write anonymously as someone who works in planning advisory, this being a niche business, I do not wish to disclose my details formally.

Having reviewed the Radiance Assessment submitted with planing application 24/00021/FULEIA, I have found several shortcomings, which I lay out below.

1. Page 14 titled 'BS EN 17037:2018 and the UK Annex' lays out the relevant BRE (Building Research Establishment) guidance to which the said application is subject. It describes the Illuminance method as using 'sky and sun conditions derived from standard meteorological data', and taking into account 'location and building orientation'. The Radiance Assessment goes onto to neglect this method in favour of the Daylight Factor method, described on page 15 as 'considering an overcast sky and therefore the orientation and geographical location of the buildings [analysed] is not relevant'. Though the BRE guidance states either test may be used, it seems the Illuminance test would be more useful in a case such as this where orientation is paramount.

2. Pages 15-16 also under 'BS EN 17037:2018 and the UK Annex' neglect to mention at all the APSH (Annual Probable Sunlight Hours) test, which remains the key assessment for sunlight access to Existing Buildings as per paragraph 3.2.13 of the nationally accepted BRE's Site Layout Planning for Daylight and Sunlight: A Guide to Good Practice (the BRE Report). The risk to Bevis Marks Synagogue in pages 4-5 of the Independent Review of the Daylight and Sunlight Report commissioned for previous planning application 20/00848/FULEIA, was flagged as 'Moderate

Adverse' in the Proposed scenario and 'Major Adverse' in the Cumulative scenarios and it is surprising that this test is omitted from the latest planning application.

3. Page 22 of the Radiance Assessment assumes a visible light transmittance of 80% for the main glass panes of the Synagogue windows (going by paragraph C26 of the BRE Report this would make the manufacturers' normal incidence light transmittance 88%). Page 24 however has an oblique photo of the Synagogue windows taken from an external rooftop where they look dulled or aged, placing an effective 80% visible light transmittance into question.

I hope my observations have been useful and again I apologise for the understandable request of my anonymity.

Yours Sincerely,
Anon

The Rt Hon Lord Mayor
Alderman Professor Michael Raymond Mainelli
By email: [redacted]

16th May 2024

Re: Planning Application: 24/00021/FULEIA

My Lord Mayor,

I am writing to you as a result of the planning application at 31 Bury Street for a 43-storey office building, adjacent to the internationally renowned Bevis Marks Synagogue. This will cause substantial harm to the synagogue community.

Constructed in 1701, Bevis Marks was the first sizable synagogue in England, following the resettlement of the Jews in England in 1656. The Jewish community has become a valued part of British life in the years since it's construction. It is the oldest synagogue in Europe to hold continuous services and considered the Cathedral Synagogue amongst British Jewry.

I had understood that the recent instigation of the Creechurch Conservation Area would protect the synagogue's views. This now appears to not be the case and we would request that the proposed New Local Plan for 2040 be amended so that the existing presumption that tall building will be refused permission in conservation areas is retained.

I understand that an almost identical proposal at 31 bury St was turned down at planning committee two years ago and the current proposal does not address the grounds on which it was refused. So it is with great sadness that I am writing to you to object to the latest proposed scheme. It will greatly affect the light that enters the synagogue and, along with the cumulative effect of this and other previously built developments, will disrupt prayers and the use of the courtyard. The substantial harm caused by this development to the setting of the synagogue will greatly affect its continued use and cause great harm to the Bevis Marks Synagogue community.

Please can you pass this letter on to the relevant persons and ensure that our objection is noted.

BOARD OF DEPUTIES OF BRITISH JEWS
ADVOCACY | DEMOCRACY | COMMUNITY

The Rt Hon. The Lord Mayor, Alderman Professor Michael Mainelli
Members' Room
P O Box 270
Guildhall
London
EC2P 2EJ

Dear Lord Mayor,

24/00021/FULEIA and 24/00011/LBC

I am writing to you, as I was forced to write to your predecessor in 2021, to object formally to this planning application which, if approved, would have a detrimental impact on the Jewish community's beloved Bevis Marks synagogue, the oldest continuously used synagogue in Britain which dates from 1701. This most recent planning application is no less harmful than the earlier one which thankfully was rejected, following widespread opposition.

I write as President of the Board of Deputies of British Jews aware that my organisation, founded in 1760 to represent the Jewish community throughout the country, emerged from those Jews of Spanish and Portuguese heritage such as the founders of the Bevis Marks Synagogue. Modern British Jewish history was born at Bevis Marks when Jews first returned to this country following our expulsion in the 13th Century. It offered a safe haven to those who came from overseas and that feeling very much remains to this day. The synagogue is also the legacy of those who came before me in leading the community, and whenever I am at Bevis Marks I am humbled by that fact.

At 45 storeys, the proposed building would destroy the southern sky view, which is an essential part of the setting of the synagogue and is important for the intangible qualities it contributes to our religious ritual. Not only will it shroud the building in shadow, but it will have a direct impact on the local communities weekly Sabbath rituals. In Judaism, it is essential that we judge the coming of the Sabbath, and the end of the Sabbath, by our view of the night sky and the visibility of the stars. Should this development go ahead, the view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. Lastly, the synagogue, which is a Grade 1 Listed building will lose its character and significant beauty as a result of the proposed development.

Charitable activities with which the Board are identified are funded by The Board of Deputies Charitable Foundation (Registered Charity No. 1058107), a company limited by guarantee and registered in England (No. 3239086).

To add further insult to injury, the area has recently become the Creechurch Conservation Area, and this proposal flies directly in the face of the principles of conservation.

I would urge you to share with those who will make the relevant decisions, how important the Bevis Marks Synagogue is both to the UK Jewish community, to the City of London, and to the UK as a whole so they can come to the best decision regarding our shared heritage and reject this application.

Yours sincerely,

Marie van der Zyl OBE

THIS IS AN EXTERNAL EMAIL

Dear Ms Tastsoglou

I'm writing to express my strong opposition to this new application (24/00021/FULEIA).

As a British Jew I am beyond disappointed at the lack of respect for a Jewish place of worship. There have been enough assaults in the UK on Jews. This new application shows lack of consideration or respect for the essence of a place of worship. This would not be considered if it were Westminster Abbey.

I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.

sincerely

Subject: Bevis Marks (24/00021/FULEIA)

THIS IS AN EXTERNAL EMAIL

I am writing briefly but with strong feeling to object to the above planning application, which I believe is a rehashed but equally potentially damaging version of that which was rejected a few years ago.

Bevis Marks is a hugely iconic synagogue to British Jews (whether or not they belong to the same strand of Judaism) and has a long and proud history, which is one reason that it's

fabric is protected.

The proposal would wreak considerable and unacceptable damage upon its access to light (the possibility of electrical modifications to counter that is limited) and hence to the practicality of meaningful worship and other synagogue activities. It would also dramatically change the character of the immediate area near Bevis Marks (which would affect other heritage assets too). I ask you whether this would be deemed acceptable near an equivalent place of, for instance, Christian or Muslim worship - I think not.

I shall leave it there, as many other people will no doubt be putting forward more eloquent and detailed objections - noting also that both the case for changing the approach to tall buildings seems dubious, especially in this instance, as do the planning 'benefits' cited by the developer.

Please take determined action to scrutinise (and reject) this planning case firmly and fairly in the light of the unique character and importance of Bevis Marks and its locality.

Yours sincerely,
Peter Gartenberg

Subject: Objection to proposed construction of 31 Bury Street

THIS IS AN EXTERNAL EMAIL

Dear Ms Tastsoglou,

Dear Ms

I wish to formally object to the construction of 31 Bury Street

This objection is grounded in the significant negative impact that this development will

have on the historic Bevis Marks Synagogue, a Grade I listed building and the oldest synagogue in the United Kingdom still in use today.

Bevis Marks Synagogue, established in 1701, holds immense historical, cultural, and religious significance. It has served as a continuous place of worship for over 300 years and stands as a testament to the enduring presence and contributions of the Jewish community in London. The proposed construction poses several threats to this invaluable heritage site:

Visual Intrusion and Contextual Disharmony:
The new development, due to its scale and modern design, will overshadow the synagogue, disrupting the visual harmony of the area. Bevis Marks Synagogue is renowned for its architectural integrity and historical ambiance, which would be severely compromised by the juxtaposition of a contemporary high-rise structure. This visual intrusion will detract from the synagogue's aesthetic and historical context, diminishing its presence and significance.
Loss of Natural Light:
One of the most concerning aspects of the proposed construction is the potential reduction of natural light to the synagogue. Bevis Marks relies heavily on natural light to illuminate its interiors, a feature that enhances its spiritual and historical atmosphere. The towering structure at 31 Bury Street will cast shadows over the synagogue, leading to a darker interior that not only alters the experience for worshippers and visitors but also necessitates increased artificial lighting, impacting the authenticity of the historic setting.
Noise and Vibration Disturbances:
The construction phase is likely to introduce significant noise and vibration disturbances. These disturbances can affect the structural integrity of the synagogue, particularly given its age. Vibrations from heavy construction equipment pose a risk to the delicate fabric of the building, which has stood for centuries. Additionally, the noise will disrupt the serene environment essential for worship and reflection within the synagogue.
Increased Traffic and Access Issues:
The development will likely bring increased traffic to the area, complicating access to the synagogue. Bevis Marks is not only a place of worship but also a heritage site frequented by tourists, researchers, and members of the Jewish community. Increased congestion will hinder the accessibility for these groups, impacting the synagogue's function and its role as a community and cultural hub.
Heritage and Community Value:
Bevis Marks Synagogue is not just an architectural landmark but a living institution with deep ties to the local and global Jewish community. Any threat to its well-being is a threat to the community's heritage and history. The proposed development undermines the synagogue's historical environment, which is essential for its continued relevance and function.

In conclusion, the proposed construction at 31 Bury Street represents a significant threat to Bevis Marks Synagogue. It is imperative that the planning authorities consider the

profound and irreversible impact this development will have on one of the nation's most treasured heritage sites.

I urge you to reconsider the approval of this project in light of the substantial harm it poses to Bevis Marks Synagogue, its congregation, and the broader community that values this historic landmark.

Thank you for your attention in this matter

Kind Regards

David Salem

Subject: Planning Application 24/00021/FULEIA affecting Bevis Marks Synagogue

THIS IS AN EXTERNAL EMAIL

Dear Ms Tastsoglou
I am writing to formally object to the proposed development at 31, Bury Street, EC3A 5AR because of the awful effect this will have on the Grade 1 listed building, Bevis Marks Synagogue, which is less than 200 yards away.
I am Jewish and regularly visit this famous synagogue, the oldest in the UK and the oldest continually functioning synagogue in Europe. I have often accompanied children and young people to visit this historic landmark with its unparalleled cultural history.
It is a most beautiful building and prayer space - an oasis of calm in the heart of the City of

London. It is inconceivable that such a proposed building would be allowed next to St Paul's Cathedral, so why is the synagogue not afforded the same protection?
The proposed building would overshadow the synagogue and its courtyard for much of the day, reducing the usability of the courtyard for rituals and celebrations.
It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship.
The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan.
I understand that a previous application for development at 31 Bury Street was rejected some years ago due to the terrible adverse impact that an enormous skyscraper building would have on Bevis Marks Synagogue. This new application would also cause irreparable damage to the sanctity of this sacred space.
A synagogue is not just a building - it is the focal point for a community offering a shared-space for prayer, contemplation and praise. It was built, as many churches are, "for the glory of God" and it should continue to be a sanctuary and place of hope in these very difficult times for the Jewish community in the UK.
Thank you
Yours faithfully
Tony Samuel

[redacted]

29th May 2024

Dear Sirs,

I've just read in "City Matters" (May 22 – June 18) that Bevis Marks Synagogue is still under threat from a tall office block very close by in spite of an earlier application for a 48 storey tower being rejected by the City Corporation.

The fact that its height has been reduced from 48 to 43 storeys is neither here nor there. Developer Welputs words about maximising heritage and having "a sincere respect for the historic and cultural importance of the area around the site" sound good but essentially these words amount to equivocation. A reduction from 48 to 43 storeys is a gesture by Welput to get their own way and will not fool anyone. I hope the City Corporation will ~~not fall as~~ reject this application and revert to the status quo ante.

Yours faithfully,

THIS IS AN EXTERNAL EMAIL

Dear Anna Tastsoglou,

I am texting in support of Bevis Marks asking please do not allow the planning for next door to the Synagogue to go ahead.

Bevis Marks is a very old historical building that surely warrants a safeguard around its' being secured safely in the City and not to be dwarfed by planning permission for a high-rise building that would completely spoil its' everyday use as a Synagogue in its' own right. I am really hoping you will not allow the building permission to go ahead for the

sake of the Jewish population within the UK for whom the Bevis Marks Synagogue has a truly real and historical significance.

With much hope and appreciation,

Charlotte D’Alton Eldridge (Mrs)

You don't often get email from [redacted] Learn why this is important

THIS IS AN EXTERNAL EMAIL

Dear Ms Tastsoglou
I am writing to object to the proposed development around Bevis Marks synagogue for the following reasons:

- **A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance.**
- It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection?
- **It would destroy the southern sky view, which is an essential part of the setting**

of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked.

- The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place.
- **It would overshadow the synagogue and its courtyard** for much of the day, reducing the useability of the courtyard for rituals and celebrations.
- It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible.
- The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan.
- The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025.
- **The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny.** Many –for example, being car free, demonstrating holistic environmental design, having consolidated deliveries –are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community.
- They propose to restore the Listed Holland House[1] and turn it over to various uses which are claimed to be of community benefit. Whilst the restoration of this building is to be welcomed, the claims about the community value of the uses must be viewed with great scepticism.
- The existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and providing good service for many more years. Unnecessary demolition simply squanders the energy embodied in the building.
- The proposed building would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole.
- The City Corporation is being disingenuous: claiming to recognise the importance of the synagogue, yet simultaneously facilitating this monstrous development. We are entitled to expect much higher standards from Britain's most prestigious local authority.

Please keep me updated on this development.

Yours faithfully, Jackie Phillips

THIS IS AN EXTERNAL EMAIL

Dear Anna,
I am extremely concerned and dismayed by the thought of the new build surrounding the beautiful Synagogue of Bevis Marks. The building and its services are a cultural treasure. Many tourists come from the U.K. to visit and indeed visitors all over the world. A number of weddings take place there Because of its authenticity it has this will withdraw the character of a very fine listed building.

With all good wishes

Yours sincerely
Rachelle Goldberg

Subject: Planning application, 31 Bury St, ref 24/00021/FULEIA

THIS IS AN EXTERNAL EMAIL

Dear Anna Tastsoglou

I write to register my strong objection to the above Planning Application.

I am a longstanding member of the congregation at St Botloph's Aldgate, where I have now worshipped for over 40 years. During that time I have seen the Eastern side of the City become overwhelmed by more, and ever-taller tower blocks which, in my view, have been increasingly detrimental to the environment; I question whether

most of them have been truly necessary and I find it hard to believe that yet more are considered desirable.

The above Application is, in my view, of particular concern due to its impact on Bevis Marks Synagogue. Not only is this the oldest continuously-used synagogue in Britain, it is also of tremendous cultural and religious significance to the Jewish community. The proposed development would have a massively detrimental impact on the Synagogue as it would dominate both the building and its courtyard and would interfere with its light. Moreover, I am given to understand that observation of moon and stars are religiously important in the liturgy of the Synagogue and the proposed development would entirely block the necessary sky view. Such an outcome is completely unacceptable and, even if there were no other considerations, should be sufficient grounds to reject this proposal. I do not believe a similar impact on a church would be allowed and it is entirely unacceptable that our Jewish neighbours should receive any less consideration, particularly at such an important site as this.

I need to underline my objection by reference to the context of this application. I understand there was a previous application for a very tall building on the same site as recently as 2020. It appears to me that the present application is nothing more than an attempt to overcome the rejection of that proposal by shaving a minimal amount off the height of the tower; it seems to me the present proposal is in practical terms indistinguishable from the 2020 version. I believe what was unacceptable then remains unacceptable now and the developer (and others who will be influenced by the outcome) should not be allowed to subvert the previous decision in this way.

It also should be noted that the proposed development is in a conservation area. It ought properly to go without saying that this alone should suffice as grounds for rejection. If the City Corporation allows this Application, it will effectively render designation of conservation areas meaningless. Such an outcome would be entirely unacceptable and should not be contemplated.

Finally, I wonder at the fate of a similarly unsympathetic development should one be proposed in the vicinity, say, of St Paul's Cathedral. It seems likely to me that it would be rejected out of hand - that indeed its unacceptability would be so emphatically conveyed to such a developer that the application would never even be submitted. Again, I say it is completely unacceptable that our Jewish neighbours should receive any less consideration.

On each of these grounds individually and on all of them collectively I urge you to refuse this application. So far as it is possible I urge you also to make it clear that further 'salami-sliced' applications will be viewed unfavourably and future proposals must be more appropriate to such an important and sensitive site.

Yours sincerely,
Keith Barber

THIS IS AN EXTERNAL EMAIL

There were two synagogues in the vicinity. Dukes place and Bevis Marks. Dukes place was bombed during the second World War and subsequently served as my warehouse until it was rebuilt as an office block with a retail ground floor which I

rented until the seventies. Bevis marks which was surrounded by my warehouses is an extraordinary example of a virtually handbuilt wooden interior which most councils would promote as an outstanding building. When I was on the corporation there was a committee dedicated to the preservation and promotion of such glorious buildings. It seems a shame that the only building left of the vast Jewish population is to be overshadowed by yet another unrented office block. Perhaps you could let me know the current vacant property percentage in the city.
Regards
Paul Frankenberg.

THIS IS AN EXTERNAL EMAIL

Hello Anna Tamuglou, Case Officer,

I am writing to state my wholesale opposition to this application (24/00021/FULEIA), as I feel it is entirely inappropriate for the setting. I have worked in the City of London for a number of years now and hopefully will continue to for many years to come. I pass the area almost daily, walking from Liverpool Street.

A 45 story building is whole inappropriate to be built so close to Bevin Marks, by some measures *the* most important Jewish historical, cultural, and religious site in the entirety of the UK and a Grade I listed building. The proposed building would hamper religious use of Bevis Marks - limiting sight of stars and moon for example, and limiting use of the courtyard which is essential to some festivals, by casting it into constant darkness.

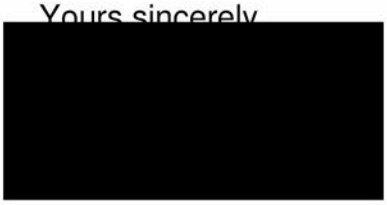
There are many tall buildings in the City, and many appropriate places for them. There *is*, and can be, only *one* Bevis Marks and it would be a disgrace if these plans were to go ahead.

Kind Regards,

Agniya Domnach
Buxton Road
London

24/00021/FULEIA

BGO's development initiatives, particularly the planned redevelopment of Holland House, demonstrate their dedication to transformative projects that catalyse both economic and cultural growth. BGO envisions the Museum of Diversity as an integral part of the city's landscape, where history, technology, and humanity converge to inspire future generations through unique architecture and exhibits showcasing artifacts from diverse cultures worldwide.



Furthermore, the City of London has a rich history of supporting the arts and museums, as evidenced by the success of the Museum of London and other institutions, which have become hubs of community engagement and cultural education. We foresee a partnership with BGO that will enhance our ongoing efforts to celebrate diversity, promote equality, and provide inclusive cultural education to all residents and stakeholders.

The anticipated establishment of the Museum of Diversity in the City of London is expected to create approximately 300 employment opportunities across various levels, significantly advancing our community's economic landscape. Moreover, the initial phase of this project, with an estimated investment of £1.2 million, will serve as a cultural beacon and a collaborative nexus for partners dedicated to showcasing the rich tapestry of our shared human experience.

The Museum of Diversity is ready to collaborate with the City of London to facilitate the establishment of BGO's cultural space at Holland House. We eagerly anticipate discussing the potential design and use of the space and are prepared to assist and support in their application or regulatory processes to expedite this exciting project.

We look forward to the Museum of Diversity joining the tapestry of the City's cultural landscape and becoming a beacon of inspiration, learning, and unity. Together, we can create a future where diversity is recognised and revered.

Yours sincerely

THIS IS AN EXTERNAL EMAIL

To whom it may concern,

I make this representation that the Local Plan 2040 as drafted is not sound. I make this representation generally, but specifically in respect of Policies HE1, S12 and S13 and the Policies Map.

I consider the draft unsound on the following grounds:

HE1 does not adequately protect heritage assets. It is not enough that development should "consider" enhancing conservation areas; enhancement should be actively sought and pursued. HE1 also does not adequately protect Bevis Marks Synagogue. As drafted, HE1(8) refers to the Synagogue's defined immediate setting"; however no such concept of immediate setting exists. As with other heritage assets, the whole setting of the Synagogue should be protected. This is particularly important because the Synagogue is included in the Tall Buildings Area, and the permissible height contours in Figures 14 and 15 clearly impinge upon the Synagogue and its setting.

S12 and S13 tall buildings policies are also inadequate. They should not simply "take into consideration local heritage assets" as 12(5) states, but must pay full regard to and preserve and enhance the significance of those assets. S13 should protect views of and from the Synagogue in a similar way to the way The Monument is treated, albeit special regard should also be paid to the culturally and religiously important setting of the Synagogue.

The current Local Plan Policy CS14 presumption against tall buildings in Conservation Areas must be retained in the new draft. As well, a sentence should be added to clarify that the Tall Buildings Area does not override heritage and townscape considerations.

I reserve the right to add or amend my proposed changes [and I should welcome being invited to participate in discussion at the Plan's examination].

Yours truly
Freddy Salem

City of London Conservation Area Advisory Committee

Department of the Built Environment,
Corporation of London,
P.O. Box 270,
Guildhall,
London EC2P 2EJ

8th May 2024

Dear Sir/Madam,

At its meeting on 25th April 2024 the City of London Conservation Area Advisory Committee considered the following planning application and reached the decision given below:

C.64 24/00021/FULEIA - Bury House 1 - 4, 31 - 34 Bury Street, London EC3A 5AR
Creechurch Conservation Area/Aldgate Ward. No Ward Club rep.
Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/cafe (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

The Committee strongly objected considering that the development proposals would result in the gross overdevelopment of this site in the Creechurch Lane Conservation Area, with a significantly negative impact on the character and appearance of the immediate Conservation Area and its setting. The proposals were considered to be highly damaging to the local townscape quality in the nearby street-scene context, with harmful consequences for important listed buildings that were in close proximity. The lack of architectural quality and refinement of the proposals was noted, together with their significant negative impact on wider townscape views and heritage context of the site's City/central London location.

I should be glad if you would bring the views of the Committee to the attention of the Planning and Transportation Committee.

Yours faithfully,

[redacted]

Rabbi Joseph Dweck | Senior Rabbi
הרב יוסף דוויך | רב הראשי

Ref: 24/ 00021/ FULEIA

28th June 2024

Dear Ms Tastsoglou,

Please excuse the delay in this consultation response. When Shravan Joshi invited me to meet with him on 18 April 2024, he cautioned me and my community from objecting to Welput's latest proposal on account that they would be amending it and it would look bad if we objected before giving them an opportunity to do so. As that has not transpired, I find myself now forced to object as I had originally intended to do so.

You will no doubt be aware of the strength of feeling around this submission, and I share in that deep disappointment. As the Senior Rabbi of the S&P Sephardi community, the custodian of Bevis Marks Synagogue, I am aware of the severe distress this application has caused, the waste of community resources it has engendered, and of the complete disregard it has shown for the needs of the Jewish community.

I've already submitted a detailed account appended to the synagogue's formal objection outlining the diminution of our religious practices that would result should this application be approved. Please see there for more information. But in short, the proposed tower would block out views of the southern sky necessary for Jewish worship, in particular the necessary views of the moon in the night sky for the Kiddush Levana prayer. Jewish tradition also strongly prefers that synagogue worship more generally include sky views, and clearly this was intended in the original design of the Bevis Marks synagogue with it numerous windows. This would no longer be possible should the tower at 31 Bury st be permitted. Finally, the further reduction in sunlight falling on the entirety of the synagogue site that would result from such a tower, would also harm the community's ability to worship as it has for over three centuries. This is both a breach of our religious rights, but it is also in conflict with the original design of the building, intended to be usable by daylight, which was an intentional departure from medieval buildings or houses of worship with stained glass windows.

More fundamentally, it is shameful that our community is forced to campaign once again to protect Bevis Marks Synagogue, when it should already be abundantly clear that it is in need of protection from circumstances such as this. That the City of London has as of yet refrained from formulating policies that would prevent this harm from even being proposed is a dereliction in their duty of care, and it demonstrates a disdain and disregard for the well-being of the UK's oldest Jewish community. At a time of increasing AntiSemitism in this country, I expect more from the City.

Anna Tastsoglou
City of London
Guildhall
London
EC2V 7HH

17 July 2024

Dear Ms Tastsoglou

Application Reference No. 24/00021/FULEIA
Proposed Development at Bury House, 1-4 & 31-34 Bury Street, London EC3A 5AR
Impact on 11-12 Bury Street, London EC3A 5AT

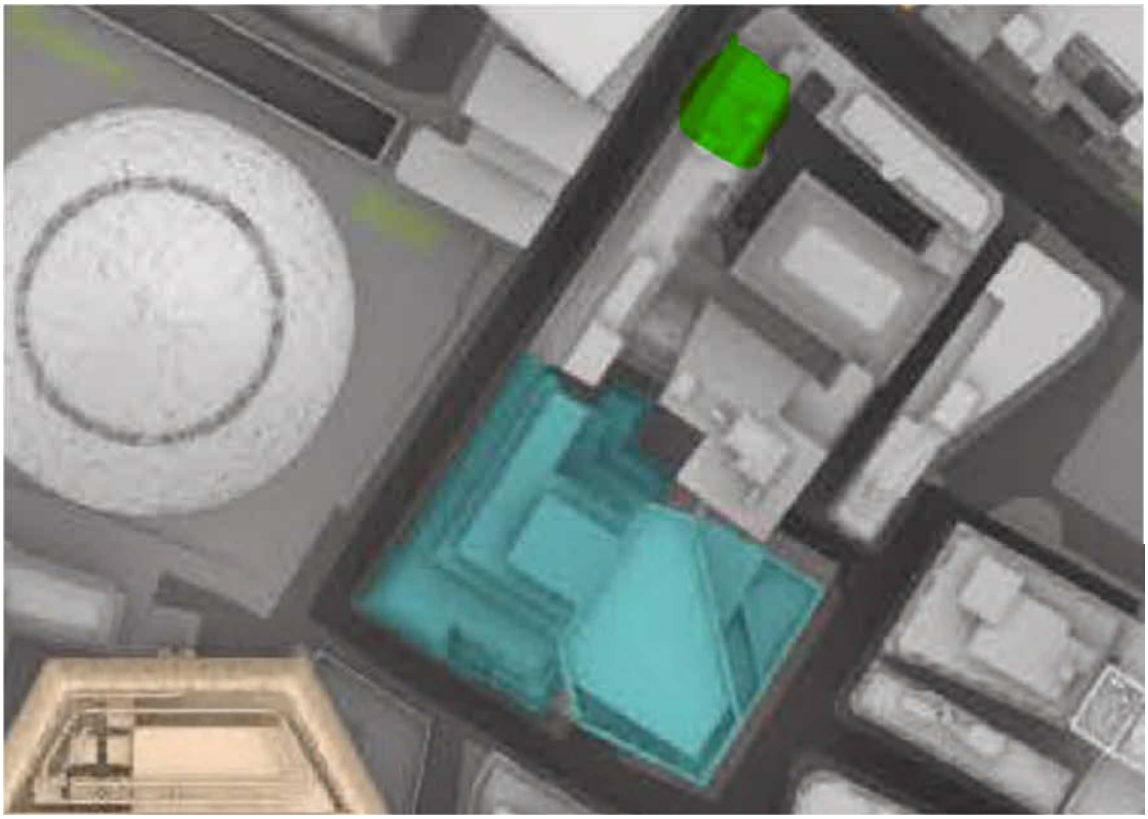
We are appointed by The Texel Group following concerns that the proposed 43 storey redevelopment of Bury House will impact upon the daylight and sunlight receivable by their property at 11-12 Bury Street.

Our client is disappointed that they have been obliged to respond negatively to the application, but feels compelled to oppose a development which will have an oppressive and overbearing impact on the way the occupiers of the building enjoy the property.

The Building Research Establishment (BRE) "Site Layout Planning for Daylight and Sunlight 2022, 3rd Edition provides guidance for the planning department to consider.

The introduction to the BRE guide at 1.1 states that "people expect good natural lighting in their homes and in a wide range of non-domestic buildings. Daylight makes an interior look more attractive and interesting as well as providing light to work or read by. Access to skylight and sunlight helps make a building energy efficient; effective daylighting will reduce the need for electric light, while winter solar gain can meet some of the heating requirements."

We have reviewed the daylight and sunlight study dated January 2024 prepared by GIA Chartered Surveyors on behalf of the applicant. The report analyses the impact on the neighbouring properties which surround the proposal, including St Andrew Undershaft Church, 2 & 4 Heneage Lane, St Helens Church, St Katherin Cree Church, Sir John Cass Primary School, 2-20 Creechurch Lane & 27-31 Mitre Street. 11-12 Bury Street has not been considered.



Given the scale of the proposal and the proximity with our client's property, along with the fact the proposed 43 storey tower is located to the south of our client's windows & external rooftop amenity area, we are of the opinion that the daylight and sunlight assessment should encompass the impact on 11-12 Bury Street.

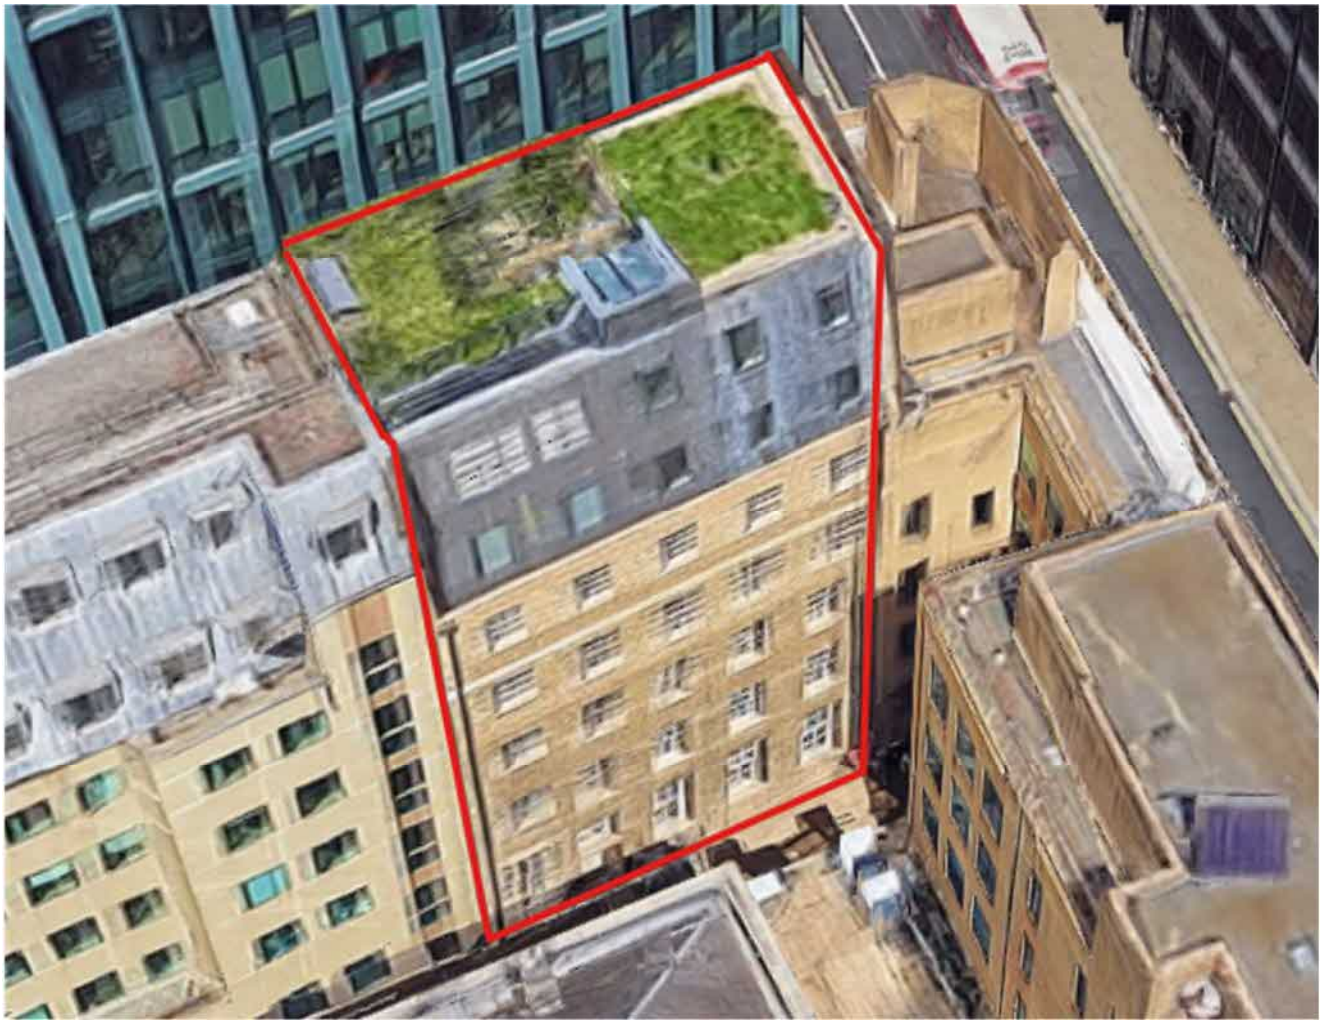
Essex SS6 7EW

The below images have been taken from the daylight and sunlight report completed by GIA, and they show the proposed development in blue. I have highlighted in green the position of 11-12 Bury Street on the plan and isometric views below.



Company:
Right of Light Consulting Ltd
Registered in England and Wales
No. 5908040

Registered Office:
Burley House,
15-17 High Street, Rayleigh,
Essex SS6 7EW

As you can see, the rear of our client's building does not directly face the proposed tower. However, this does not necessarily mean that daylight and sunlight will not be adversely affected. The reason for this, is that in this dense urban environment, daylight and sunlight to windows is naturally more scarce. Therefore, given the BRE daylight and tests allow for a 20% reduction from their current value, poorly lit windows have less daylight and sunlight they can afford to lose before hitting this threshold. This is the case with 11-12 Bury Street which is already hampered by the existing buildings surrounding it on all sides.

I have highlighted the rear elevation of 11-12 Bury Street below which faces southeast. Given the orientation of these windows, and that the proposal is located to the south of them, our clients are concerned with the impact on the sunlight the windows are able to receive, particularly in the winter months, when ordinarily the windows would benefit from solar gain from the south.

We can appreciate that focus tends to be towards habitable rooms at domestic premises in daylight and sunlight studies. However, despite 11-12 Bury Street being of non-residential use, we are of the opinion that it should be included in the analysis to demonstrate the level of compliance with the BRE guideline tests, particularly given the direct impact on the occupiers who will be subject to working in gloomier office spaces.

RICS Regulated by RICS

Company:
Right of Light Consulting Ltd
Registered in England and Wales
No. 5908040

Registered Office:
Burley House,
15-17 High Street, Rayleigh,
Essex SS6 7EW

Furthermore, in recent years there has been a significant increase in the conversion of commercial to residential properties, which seems likely to persist in the long term due to changing demands in the property market. As such, we are of the opinion that considering the impact on natural light to all buildings is even more important, to ensure future occupiers will be able to enjoy good levels of light.

So we are able to advise our clients on the loss of light to their building, we request that no decision is made in favour of the application until:

1. The applicant instructs their surveyor to visit our client's property and submits a complete and accurate daylight and sunlight assessment prepared in accordance with the BRE guide, and

2. The assessment shows that the proposed design, or amended design, complies with the BRE guide.

We understand that you have yet to visit our client's property. We look forward to liaising with you for a convenient time you will be able to visit and evaluate the reduction of light from our client's perspective.

In addition to planning, we understand that our client's property benefits from a legal right of light. We invite the applicant to engage with us to resolve all potential right of light matters. This is to avoid a situation where planning permission is granted for a development that cannot be built due to legal right of light restrictions.

Please acknowledge receipt of this letter and confirm that no decision will be made until the above points are addressed.

I look forward to hearing from you.

Yours sincerely

The Rt Hon. The Lord Mayor,
Alderman Professor Michael Raymond Mainelli

By email: michael.mainelli@cityoflondon.gov.uk

Office of The
CHIEF RABBI

305 Ballards Lane
London N12 8GB
020 8343 6301
info@chiefrabbi.org
chiefrabbi.org

15 May 2024

Ref: 24/00021/FULEIA

Dear Lord Mayor Mainelli,

It is with considerable concern that I write to you as I did to your predecessor Alderman William Russell in March 2021. It was then that I wrote to object to the proposal to construct a tower on the site of 31 Bury Street, due to the significant harm it would cause to Bevis Marks Synagogue. I am saddened to do so again despite its refusal two years ago and would be grateful if my objection can be recorded by the relevant authorities.

As you will know, Bevis Marks is the oldest synagogue in the UK in continuous use, and a deeply resonant symbol of the history of British Jewry. In the 320 years since the synagogue was built, the UK Jewish community has become a valued part of the fabric of British society. Bevis Marks Synagogue was one of the first major synagogues to be constructed following the resettlement of Jews in England in 1656. It has stood as a reminder of that history, and of how much has been achieved since members of the Jewish faith were permitted to return to this country.

I have been troubled to read that there is now another proposed development on the doorstep of the synagogue, with very limited changes to the original proposal, with the potential to significantly affect the natural light that can reach the building. This will, in turn, disrupt prayers taking place inside, and the use of the courtyard outside. It would have a notable impact on the atmosphere that Bevis Marks is so famed for around the Jewish world, to the detriment of those worshipping there.

Beyond this, by further reducing views of the southern exposure sky, this proposal would have implications for worshippers at Bevis Marks wishing to recite the monthly prayer *kiddush levana*, recited after nightfall upon seeing the waxing moon in the sky. The granting of permission to this proposal would therefore be a regrettable development with implications for rights of religious practice, precisely in the place where Jews first enjoyed these rights in England following the 17th century resettlement. That would be a tragic irony.

It was my hope that the City's new Creechurch Conservation Area would serve to protect Bevis Marks Synagogue from this type of scenario. I am disappointed that this seems now to not be the case. I trust that this can be rectified with some adjustments in the new local plan, ensuring that the synagogue's southern exposure remains unobstructed.

Thank you for your consideration of this matter.

Yours sincerely,

[redacted]

Dear Planning Department,

Re: Support for Planning Application 24/00021/FULEIA - Holland House, London EC3A 5AR

I am writing to express my support for the planning application for the development of Holland House, London EC3A 5AR as a flexible community, education, cultural, and amenity space.

The VOCES8 Foundation is a vocal music education charity based in the Wren church of St Anne & St Agnes near St Paul's cathedral. We discovered Holland House through our work hosting Citizens of the World refugee choir and have used the space for filming a forthcoming album release and have rehearsals lined up for the autumn. We are often over subscribed here at the VOCES8 Centre and we are now directing many arts creatives, educators and musicians to the space.

In our experience of offering an arts based space in the city, transforming Holland House into a multifunctional space will bring considerable benefits to the local community and wider society. It will provide a much-needed venue where people of all ages and backgrounds can engage in a diverse range of cultural, educational, and community activities. Musicians find it particularly hard to find spaces in the City that are quiet, roomy and professional at a reasonable hire fee, so proposed flexible spaces within Holland House will serve as a vital resource for our musicians, singers, workshop leaders, educators and the general public.

The application's emphasis on education aligns with the city's broader goals of promoting lifelong learning and supporting youth engagement. The integration of educational programs, particularly in the arts within Holland House will provide invaluable resources for schools, young people, professional and aspiring musicians, fostering creativity and talent within the community.

I support the planning application for Holland House and I am confident that this project will make a significant positive contribution to the City.

Thank you for considering my views.

Yours faithfully,

August 20th 2024

Dear Anna Tastsoglou,

I am writing in support of WELPUT's proposals for the future development of Bury House, Holland House, and Renown House - planning application reference 24/00021/FULEIA.

I am a musician and composer who is currently leading on the Arts Council-funded community arts project *Voices That Wander*. A significant portion of our rehearsals took place at Holland House and the use of this space for rehearsals was invaluable to the project. *Voices That Wander* is a project that brings together diverse groups from different generations and backgrounds to explore traditional Jewish music and its connections with Arabic music. *VTW* is about exploring musical traditions and bringing these to life in the context of social cohesion.

Rehearsal space in London is incredibly costly, and for a project such as mine on a fairly low budget being able to have access to the space was so important to make our project work. The use of Holland House allowed this project, which has brought creativity and music to hundreds of people in different communities in London, to thrive. This was my first major project as a composer and project leader, so access to Holland House has been key in the development of myself as a burgeoning artist.

I hope you'll consider the impact that Holland House has had upon artistic projects such as mine when you reflect upon the WELPUT's application, as it truly has made such a difference to mine.

All the best,

Lydia

28 August 2024

Dear Anna,

I am writing in support of WELPUT's proposals for the future development of Bury House, Holland House, and Renown House - planning application reference 24/00021/FULEIA

One of my productions - *Quiet Songs* - produced by Oedipa is rehearsing at Holland House. It is the winner of the Oxford Samuel Beckett Theatre Trust Award, which includes presentation at the Barbican and a production grant, but even with this support we were struggling to find a rehearsal venue within our slender means (Oedipa is a registered charity), as London venue hire is prohibitively expensive. Being welcomed into Holland House for our rehearsal period has not only provided us with the space we need, but also expanded the supporting community around this production, which is working inclusively and collaboratively, with access provision as part of the process rather than bolted on as extra.
https://www.barbican.org.uk/whats-on/2024/event/finn-beames-company-quiet-songs

It is very exciting to see the plans for Holland House, with my interest particularly drawn to the proposed workshops and theatre spaces, given the central London scarcity of flexible, smaller scale venues that offer audiences a close-up, and participants hands-on, experiences. My post-pandemic work has underlined how much people want, and need, to connect and attune with each other in community. This is also proven to improve social cohesion, quality of life and significantly boost mental health. (I have a specialism in trauma-informed care within performing arts processes, with projects ranging from professional productions on world stages to locally-embedded community projects, such as co-created pieces performed by and for the community).

The research and consultation that has gone into the proposal is coherent and rigorous, evident in the forms of activities and services proposed, envisioning Holland House as a vibrant cultural hub rooted in and serving its local community.

I hope you will bear these thoughts in mind when considering WELPUT's application

Yours sincerely

Friday 6th of September

Dear Anna,

I am writing on behalf of the Black Secret Education project in support of WELPUT's proposals for the future development of Holland House, Bury House and Renown House - planning application reference 24/00021/FULEIA.

As an independent education platform focused on bringing a dynamic level of accessibility to the study of Black and African History to the general public, through presenting the rich Histories of the African Continent and her peoples throughout the Diaspora in an inspiring, engaging and comprehensive manner. We have an online platform which is connecting students of all ages around the world to our learning community. Alongside our online content we also host a range of 'physical' live events as part of our outreach programme, primarily in the London area, but also at times we have been involved with cultural events run by other organisations taking place in Birmingham and speaking engagements across the Midlands, Manchester and Liverpool.

One of our strategic partners, Troy Richard's of The Museum of Diversity introduced us to Holland House and suggested that it could be a suitable location for our forthcoming program of live events. Infact, due to its central location, Holland House is ideal for many of the types of events we typically hold, and it also gives us an opportunity to increase the number of events we could potential hold annually. A constant challenge for us when it comes to holding live events in London is finding a suitable location at a 'reasonable' rate. For example, in previous years we used the Ambassadors Bloomsbury Hotel in Euston for our Inaugural launch event.

Last year in partnership with African Ancestry (a pioneering DNA company) we organised an event for African Ancestry's first visit to UK as part of their 20th Anniversary celebration tour at the Ambassadors Bloomsbury, which ended up being a huge success. However, in less then a year the price of hire for the Ambassadors Bloomsbury main event suite had more than doubled, making it challenging to hold multiple events at such locations. It's the same throughout the capital at present. There is a need for such initiatives as the WELPUT proposal for bringing social and cultural initiatives back to the centre of London.

For example, we often deliver guided tours of the British Museum to visitors from the Midlands and tourist from America. By having access to a central London location such as Holland House, we can also hold lectures related to the exhibits our visitors have experienced afterwards at Holland House. For visitors from outside of London, or indeed from abroad, central London is ideal for such activities. We also intend to hold a similar program with school children, there is so much interesting history almost literally at every turn and corner in central London, we will also be taking groups of school children on history walks through the streets of London and then bringing them back to Holland House for lessons on what they have seen and experienced. We have many ideas and ways of bringing history to life which we are now in a position to action, because of the opportunities that are available through Holland House.

Early last month, we actually did some principal filming for our next online module of content on the 6th floor of Holland House. This particular module is going to be aimed at a younger audience, which will also be designed with a focus of catering to multiple generational study, to allow for families to learn and study together side by side. From our viewpoint Holland House is a dynamic building, in a great location which offers multiple opportunities and usages of its space. It offers a versatility of options, from facilitating more intimate teaching experiences to catering for larger scale lectures and cultural events, all of this is possible at Holland House and more. We are fully in support of the WELPUT proposal and give our full endorsement to this initiative. It will be of benefit to many charities, cultural and community focused organisations, and it will also help to bring the community and a liveliness back to the city.

With kind regards,

Jeorge Asare-Djan

THIS IS AN EXTERNAL EMAIL

Dear Planning Department,

I am writing in support of the planning application for the future of Bury Street. The proposed repairs and opening up of the historic Holland House for a number of uses will help support a huge range of charities and community groups who do not have access to affordable workspace in the City.

My postcode is: E1 7EF

Letter of Support

20th September 2024

To whom it may concern,

Re Planning Application 24/00021/FULEIA

Club Together is a small, independent community interest company (CIC) supporting independent artists across London by providing essential training and development skills; as well as running community programmes and events.

After losing our venue in Newham due to rent increases, access issues and ever reducing creative funding from local authorities we have been working remotely to deliver our charitable work, but have faced organisational difficulties in doing this. Specifically, the lack of available, affordable space to rent for workshops, events and office space. As noted by the applicant, the proposed development includes a range of uses that align both with the Local Plan, and importantly for us, with our needs and those of the community and creative groups we work with.

Holland House has offered us a space free of charge to operate which, as a completely self-funded social enterprise, is invaluable for our business model and financial situation. This challenge is not only faced by us. A study by the Foundation for Future London found that 46 community spaces in London were permanently closed between 2018 and 2023, which is almost 10 per year. Meanwhile, the Greater London Authority notes that Between 2018 and 2022, London lost 2% of its cultural spaces. The situation in relation to music is especially dire; London lost 35% of its vital grassroots music venues from 2007. In response, the Mayor of London set up the Music Venues Taskforce to work out why so many music venues had closed and what impact this was having on London's culture and economy. Similarly, More than half of London's LGBTQ+ venues closed between 2006 and 2022, Greater London Authority data shows. Numbers fell from 125 to 50, with venues citing the cost-of-living crisis and rising rents as being among the reasons for closing.

Whilst the site is not directly within the Culture Mile BID, the close relationship between the development site, Culture Mile and other local culture landmarks such as Wilton's Music Hall means that this development presents a significant opportunity to enhance the creative and cultural economy of the City of London in a way that is sustainable and accessible for the grassroots and not just the large scale existing organisations such as the Barbican. As identified by the authority in the report Culture & Commerce: Fuelling Creative Renewal "the creative sector has enormous potential to play

a critical role in London's recovery" and we as Club Together CIC want to be a part of that through participating in this development, specifically the Holland House Hub as a "qualifying user". The Taskforce states that your "vision is for culture and commerce to work together to ensure London's creative energy and competitive strengths retain its position as the best city in the world in which to live, work, learn and invest."

We agree and are excited that "the Proposed Development represents a high-quality architectural response to the surrounding context… delivering new office floorspace alongside a mix of public, community, education, cultural, amenity and retail spaces" (1.7).

We have been impressed with the *long-term* community engagement plans and believe they have delivered on the CoL's Developer Engagement Guidelines and Statement of Community Involvement to the highest level.

Our experience and ambition alongside the developments proposed uses and activities presents an exciting opportunity to deliver against the City of London's 'Destination City' vision which "seeks to enhance the Square Mile's leisure offer to increase its appeal to existing and new audiences by creating a fun, inclusive, innovative and sustainable ecosystem." The impact and potential of this development to deliver against this ambition is vast and we want to display the sincerest thanks to Leila and the team behind this development project for their interest, support and generosity for our organisation. We wholeheartedly support the application and are excited to see it come to life.

Yours faithfully,

Emma King, Executive Producer

Cimeon Ellerton-Kay, Executive Chair

By Email

20th September 2024

To whom it may concern,

Re: Planning Application 24/00021/FULEIA (WELPUT: Holland House)

Citizens of the World (COTW) is the UK's leading refugee choir. Notable gigs include the BAFTA award-winning Platinum Party at the Palace for Her Majesty's Jubilee in 2022, seen on BBC One by 13 million people, and the Pyramid Stage at Glastonbury festival, where we performed with Elbow in front of 100,000 people.

More than this, it is a community of people seeking sanctuary and local community. A 60-strong non-auditioned choir for refugees and their allies representing over 30 nations; we advocate for understanding, dignity and kindness through the transformative impact of music and song. We create and perform vibrant and joyful music that breaks down community barriers, reduces prejudice and increases well being through social connection, singing instruction, and public performances.

We agree and are excited that "the Proposed Development represents a high-quality architectural response to the surrounding context… delivering new office floorspace alongside a mix of public, community, education, cultural, amenity and retail spaces" (1.7). We have been impressed with the long-term community engagement plans and believe they have delivered on the CoL's Developer Engagement Guidelines and Statement of Community Involvement to the highest level.

Historically, people experiencing displacement have very little opportunity to access the arts, and the choir fills a much-needed gap in breaking down barriers to the benefits of arts participation. Citizens of the World started in 2017 as a short-term project run by musicians and grassroots volunteers donating their time. The work proved so needed and successful that we continued, evolving to become a professional nonprofit, now in our 8th year.

Accordingly, we are delighted to support the Planning Application 24/00021/FULEIA. Holland House has provided much needed space free of charge which, as a completely self-funded nonprofit, is invaluable for ensuring our resources go to supporting our community and not hiring space. This challenge is not only faced by us. A study by the Foundation for Future London found that 46 community spaces in London were permanently closed between 2018 and 2023, which is almost 10 per year. Meanwhile, the Greater London Authority notes that Between 2018 and 2022, London lost 2% of its cultural spaces.

Our organisation has a huge direct effect on our members: combating isolation, providing a support network, offering creative opportunities, addressing digital inequality (providing data

Cntd. →

and devices) and so much more. We have an award-winning, experienced and well-established team across musical, operations and well-being management positions; and we facilitate paid roles for a number of our refugee members. Responding to member needs, we offer a community run swap shop, provide healthy food at rehearsals and cover access costs (including travel for all refugee members). We use our performances to extend our impact and message beyond the boundaries of our community space, to play our part in educating the wider public and balancing the portrayal of people seeking sanctuary.

Our experience and ambition alongside the developments proposed uses and activities presents an exciting opportunity to deliver against the City of London's 'Destination City' vision which "seeks to enhance the Square Mile's leisure offer to increase its appeal to existing and new audiences by creating a fun, inclusive, innovative and sustainable ecosystem." The impact and potential of this development to deliver against this ambition, with COTW and other community and cultural groups as partners is vast, and we want to display the sincerest thanks to Leila and the team behind this development project for their interest, support and generosity for our organisation. We wholeheartedly support the project and are excited to see it come to life.

Yours faithfully,

THIS IS AN EXTERNAL EMAIL

As previously with the previous application this is a to big a development ie 43 storeys in this area and
will totally destroy the light for Bevis Marks Synagoge . As the only continuous Synagoge in the UK
and Europe for over 350 years this is discusting that it is even being considered again.
To be honest the planning is almost anti semitic in nature with its disregard of the history and future
of the Sephardic community in such a historic building. My own family connections to the build date back
to 1741 or even earlier and I am horrified by these plans to destroy the ambiance and proper use of a
place of worship.
Would this even be considered if it was St. Paul's or Westminster Abbey?

THIS IS AN EXTERNAL EMAIL

I feel the development and how it encroaches on the Bevis Marks Synagogue and the surrounding conservation area is highly inappropriate.
Synagogues must have a view of natural light and at least partial view of the open sky. This new development will block both and basically destroy the synagogue's ability to be used by the orthodox and ancient community of one of the oldest synagogues in the UK set up to serve the Jews expelled by the Spanish Inquisition and invited to the UK by Oliver Cromwell in the 1640s!

I could not imagine for a minute that such a development would be allowed adjacent to the London Mosque in Regents Park or the Hindu Temple in Neasden, St Paul's Cathedral or Westminster Abbey.
Why next to one of the few Saphardi synagogues in the UK and also the oldest one ??
I suggest a real rethink, and a clever architect not wanting to erect yet another phallus on our skyline, could create a solution here that could provide the answer for the synagogue and the foreign investors paying little taxes in the UK and from countries that oppress the religion as well as other parts of UK life and human rights.

THIS IS AN EXTERNAL EMAIL

Dear Anna,
I wish to have it known that I object to this proposed building plan on the grounds that it will cause issues with light obstruction around the Bevis Marks Synagogue. This grade one listed building has been there since the 17th Century and relies on good natural light, so deserves to have the necessary facilities that it's age requires. The high building changes that continue to be applied for in this vicinity can never be acceptable as they will always be detrimental to the operation of this religious sacred establishment.
I hope you will consider mine and many others objections on similar grounds.
Yours Sincerely
Adele Frost

THIS IS AN EXTERNAL EMAIL

Dear Ms. Tastsoglou,

Your References: 24/00021/FULEIA and 24/00011/LBC

I have received your letter regarding the proposed skyscraper above Bevis Marks synagogue, a Grade 1 protected building in the Creechurch Conservation Area. This is yet another attempt to disregard the wishes of those who regularly use the area. Bevis Marks is the most historically significant site of Jewish worship in the country, and one would not dare to treat an equivalent site of the Established Religion, such as St. Paul's Cathedral, with such disrespect.

Your recent correspondence was written in impenetrable English, making it difficult to understand. It is particularly concerning that a dyslexic friend required assistance for clarity, and I could only comprehend it after utilising artificial intelligence software.

The letter is dated 8th October, giving just one month for responses. You must be aware that this coincides with the Jewish High Holidays and the subsequent festival of Sukkot. This timing unfairly limits the ability of those most affected by the project to respond.

If this has been an oversight, I request that you:

1. Send a revised letter in plain English that can be understood by the general public. Your Equality and Inclusion team may assist in this effort.

2. Extend the deadline for responses to 7th December 2024. It is unethical and potentially discriminatory to require feedback from the Jewish community when they are least able to engage.

Please ensure this email is forwarded to:

- Bob Roberts, Interim Executive Director Environment
- Your complaints department
- Your Equality and Inclusion team

I expect to hear from each of them, as well as from you.

Yours sincerely,

David Mendoza

Dear Madam,

My objection stands. A 43 storey building that towers over Bevis Marks is a disgrace and should not be allowed. Imagine such a building was planned in such proximity of St Paul's Cathedral, there would be public outrage and the application would have been rejected.

It would be a show of great disrespect and contempt by the City of London to the Jewish community in Britain if the application is allowed.

I hope you are open minded and respectful enough to understand and consider the sensitivity of this to the Jewish community in Britain.

Can Amado

You don't often get email from [redacted] Learn why this is important

THIS IS AN EXTERNAL EMAIL

Dear Planning Administration Team,

For the average reader, this re-consultation is written in impenetrable English. So, a friend fed the entire document into ChatGPT.

Essentially, the **demolition** of ***grade-listed*** Bury House ***plus*** a *4-storey extension* of Holland House is simply another attempt to overshadow the relatively small footprint of Bevis Marks Synagogue as an important faith and cultural beacon to multiple generations of European exiles that continue to worship today as a living congregation.

Why do I get the idea that this singular example of a historic Sephardic building is being targeted? Surely the Mayor of London would object to this, since he has pledged impartiality to all faith groups! I doubt that an equivalent of, for example, an Oxo Tower would be built adjacent to the Regent Park Mosque, yet it seems to be encouraged for Bevis Marks Synagogue. There are so many other disused places of worship that could be used for profit, and my faith in democracy is finally shattered.

I **object** to this re-consultation for the above reasons.

Regards,

Kathleen Parsons

THIS IS AN EXTERNAL EMAIL

Dear Anna

I have received your email in relation to Bury Street, I have carefully studied the submission of additional information and revised drawings and I subsequently took the opportunity of again visiting the site in relation to the proposed alterations. Having once again given careful consideration to the altered proposals I remain strongly opposed to the the development of this site with the multi storey building as proposed for the reasons I have previously given.

Yours Sincerely
Antony Eskenzi DSc CBE FRICS

You don't often get email from [redacted] Learn why this is important

THIS IS AN EXTERNAL EMAIL

This is to register my total opposition to demolishing and rebuilding this vast structure within a very short distance of a vitally important synagogue: Bevis Marks, which has a long and important history in this country.

I am sure you will get a large number of communications supporting my thought that it is entirely inappropriate to erect such a large building in this small and treasured space.

THIS IS AN EXTERNAL EMAIL

Regarding:
Location: 1-4, 31-34 Bury Street, London, EC3A 5AR (for 24/00021/FULEIA) and Holland House, 1 - 4, 32 Bury Street, London, EC3A 5AW (for 24/00011/LBC)

I wish to re-iterate my objection to the above planning applications. My reasons are as follows:

1. The planned developments will seriously adversely affect the Bevis Marks Synagogue in terms of both its existing setting, and its supply of natural daylight.
2. Possible further adverse effects and damage to the foundations of the Synagogue and the fabric of its structure.
3. The Synagogue is a Grade I listed building of national significance, the oldest in the UK, and has been for over 300 years continuously a working building and centre of Jewish faith and for these reasons should not be subjected to any potential damage or detrimental changes to its surrounding, daylight supply, and outlook.
4. The proposed developments are of an entirely different scale and design, will not be in any way in sympathy with the ancient Synagogue, and will dwarf and forever change its setting.
5. The London Plan contains policies that state that tall and very large buildings must not adversely affect the surroundings of, or overshadow, existing buildings.

Yours sincerely,

Lindsay Wakeman
London, N5 1SD

10 October 2024

Dear Ms Tastsoglou,

Planning Application at 1-4, 31 And 33-34 Bury Street, London, EC3A 5AR (the 'Site'): Response to comments from selected consultees on matters relating to effects on heritage significance in relation to the Proposed Development at the Site.

Introduction

1. This response has been prepared by KMHeritage on behalf of WELPUT in response to selected consultee representations made since submission of the full planning application under reference 24/00021/FULEIA for the

    a. "*Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.*"

And the associated Listed Building Consent application under reference 24/00011/LBC for the

b. "*Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works*".

2. The response seeks to provide high level commentary against key points on matters relating to effects on heritage significance of two buildings within the Site, namely Holland House (Grade II*) and Renown House (a non-designated heritage asset), made by the following four consultees: Historic England ('HE') in their letter dated 15 May 2024; Historic Buildings and Places ('HB&P') in their email dated 17th June 2024; The Twentieth Century Society ('TTCS') in their letter dated 17th May 2024 and The Victorian Society ('VS') in their letter dated 17th May 2024.

3. Comments made in relation to the impact of the Proposed Development on Townscape and Views have been addressed separately by The Townscape Consultancy and are not considered here.

Consultee comments with responses

4. This section groups the comments into the four main areas: Holland House: alteration to lightwell and party wall; Holland House: connection to Bury House; Holland House and Renown House: rooftop extension; and Renown House: general.

5. Responses may also refer to relevant paragraphs within the Heritage Statement dated December 2023 ('HS'), which accompanied the planning and Listed Building Consent applications.

Holland House: alterations to lightwell and party wall (with Renown House)

a. That altering the lightwell and demolishing party walls would be harmful through "*compromising the legibility of the historic design*". *(HE)*

b. "*The proposed extension would also have a harmful impact on building's the fabric and on the character of its interior spaces, namely through the infilling of its lightwell.*" *(TTCS)*

c. "*To accommodate an open connection with the proposed new tower at No. 31 Bury Street, further losses to Holland House are proposed, including [….],the enclosure of a light well. [..] the cumulative effect of these changes would heavily reduce the integrity of this heritage asset.*" *(VS)*

6. *Demolishing party walls:* the interconnection of Holland House and Renown House via removal of the party wall will create a new open plan space which will enable more productive use of the very limited usable floorplate that presently exists in Renown House (and which makes it difficult to Let) and will afford the joint endeavour new economically useful floorspace (**HS para. 5.42**). This intervention revisits and reinvents the original ambition of Helene Kröller-Müller to create one large building on the site (**HS, para. 2.22).** The fabric that it is proposed to remove to facilitate this is of low heritage significance in as far as it does not contribute significantly to the high architectural and aesthetic value for which Holland House has been listed at Grade II*. This would be a minor change to the floorplan in an area within Holland House that is not of high heritage significance (**HS, Appendix D**).

7. *Lightwell:* the lightwell is not pristine in terms of its fabric or proportions. It has seen extensive change as a result of the 1980s programme of alterations when it was partially infilled (eastern portion) with a new slab designed to increase the lettable area. There was also extensive demolition and reconstruction of the internal façade using masonry cladding with a glazed brick finish to replicate the original (**HS, para. 2.57**). It is a much underused and low quality space not least because it is open to the elements. Its proposed enclosure at 6th floor level will enhance the building's character and usefulness as a thriving high quality office space ('*optimum viable use*', NPPF para. 208) where lighting solutions are more than capable of replicating natural daylight conditions.

8. The '*fabric*' and '*character*' of the building's '*interior spaces*' are derived largely from the unique and high quality decorative internal spaces such as the original main entrance, basement and first floors lobbies and surviving boardrooms (**HS, Appendix D**). The space created by the lightwell, a common feature in buildings of this size and period, is secondary to these in terms of its contribution to fabric and character.

9. In more general terms, the '*legibility*' of the building's '*historic design*', as an intact whole, has already been compromised by the 1960s and 1980s interventions –including removing a not insubstantial amount of fabric from the east elevation in order to join it to the newly constructed Bury House. The Proposed Development positively seeks to improve upon those unsympathetic changes and enhance the character and appearance of the listed building and its neighbour.

Holland House: connection with Bury House

   a. *"[…] the rear wall to provide open floors and connections to the new proposed tower at No. 31 Bury Street. The cumulative impact of the loss of so much building fabric, as well as the damaging additions has a considerably negative impact on the integrity of this heritage asset and its historic architectural interest." (HB&P)*

   b. *"The proposed redevelopment would physically impact on the fabric of Holland House. Original rear floor slab and wall would be lost to connect Holland House with the Proposed Development. This part of Holland House has already suffered fabric loss as a result of the Bury House development in the 1960s and we are concerned*

that even more fabric would be removed as part of the current application. We are also concerned about the proposed insertion of a large stair to connect the ground and first floor levels and its impact on the interiors. We have concerns about the cumulative impact of previous and proposed changes on the significance of this Grade II listed building." (TTCS)*

c. "*To accommodate an open connection with the proposed new tower at No. 31 Bury Street, further losses to Holland House are proposed, including the rear wall, the insertion of a large new staircase, and the enclosure of a light well. Listing applies to all the building's fabric; the cumulative effect of these changes would heavily reduce the integrity of this heritage asset." (VS)*

10. This interconnection will be made at the existing point where the two buildings meet. This will affect only that part of the building which has already been compromised by the joining of Bury House to Holland House in the 1960s which resulted in the loss of much of the back wall of Holland House. This intervention will have the benefit of providing Holland House with DDA compliant lifts, essential firefighting cores and improved circulation without impacting upon fresh areas of structure or fabric or affecting fabric of high heritage significance. This will allow Holland House to become fit for the future and function in its '*optimum viable use*' (NPPF para. 208). Improvements to rectify past fabric loss and restore elements of the building's integrity, will include the restoration of the exposed part of eastern facade to the historic condition of glazed brick facing and the reinstatement of the lost Crittall fenestration (**HS para. 5.18, 5.33-34, 5.47**).

Holland House / Renown House: rooftop extension

a. *"The addition of attic levels which do not reflect the order or proportions of the original design intent would be particularly harmful to the appreciation of its significance by appearing overbearing." (HE)*

b. *"The scale of the proposed roof level and dormer windows to Renown House do not reflect the hierarchy of the building. As such, the extension would compromise its positive contribution to Holland House and the conservation area through increases to its height" (HE)*

c. "*HB&P objects to the proposed four-storey extension to both Holland House and Renown House. It is an intrusive, bulky, and top-heavy addition to both buildings that fails to respect their proportions and scale. The extension would result in the loss of historic fabric, particularly within Holland House at roof level and the rear wall to provide open floors and connections to the new proposed tower at No. 31 Bury Street. The cumulative impact of the loss of so much building fabric, as well as the damaging additions has a considerably negative impact on the integrity of this heritage asset and its historic architectural interest." (HB&P)*

d. "*that the proposed 3-storey extension to the roof of Holland House would seriously harm the significance of the Grade II* Holland House. The building's additional*

storeys would add considerable heaviness and bulkiness to the roofline. This building's extension would change the proportions and upset its balance, making it appear top heavy. While stepped back, it would still remain highly visible and impactful. This is illustrated in the applicant's HTVIA views 42, 43 and 60." (TTCS)

e. "*The four-storey extension to both Holland House and Renown House is excessive and top-heavy, disrupting the careful architectural proportions of both buildings. The extension would also result in the loss of historic fabric, including the loss of stone chimney stacks on Renown House and the complete removal of the top floor of Holland House, causing less than substantial harm." (VS)*

11. The design of the upwards extension to Holland House is covered in **HS, paras. 5.21-24**. The proposals for the rooftop extension seek to actively recognise, reference and support the architectural intent of the Listed building through its thoughtful design which seeks to reference the proportions of the openings and piers of the historic façade to successfully continue the verticality of the original design. Use of high-quality materials and complementary colouring will ensure that the new elements will not compete with the old. Plant will be removed completely.

12. The proposed extension will change the historic proportions of the building to a modest degree, however the sensitivity of its design ensures that it will remain subservient and respectful of the original so as not to appear incongruous or overbearing in longer views. Although there will be a minor change in massing, it is not considered that this change will be of a degree that will cause harm to the heritage significance of the building as expressed and embodied in its external appearance and will certainly have no effect upon the unique contribution made by the building's decorative interiors to its heritage significance. The fabric that will be removed is related to the 1960s rooftop extension and later alteration and is of low/no heritage significance (**HS, paras. 5.36-5.37**).

13. Renown House will be extended upwards by two storeys via an additional full floor above the cornice line and a sympathetic mansard extension to enable it to segue seamlessly with Holland House at its upper levels. The present rather prosaic and altered attic storey, overtopped with a lift overrun, will be removed and replaced with a modern mansard design which will differentiate the new addition from the more traditional style building below. This treatment allows Renown to remain separate and subservient to Holland House when seen from the street and will improve the massing relationship when seen in the context of the proposed roof extension to Holland House. The proposal preserves all that is interesting in the building's external expression via a thoughtful and appropriate design which enables it to contribute fully to the objectives for reinvigorating Holland House. The proposed roof extension has been carefully designed to respect the original design of Renown House and be supportive to the setting of Holland House. It is required in order to match the proposals for the roof extension to Holland House. In that context, the extension to Renown makes sense and would continue to make a supportive and positive contribution to Holland House (**HS, para. 5.20 & 5.22**).

Renown House: general

a. *'Renown House will lose all its interiors, roof mansard, and stone chimney stacks. New floor levels inserted to accommodate the connection with the proposed tower at 31 Bury Street and Holland House would not align with existing windows. The proposed interventions aggressively attack the integrity and design of this non-designated heritage asset.' (VS)*

14. The interconnection of Holland House and Renown House via removal of the party wall will create a new open plan space which will enable more productive use of the very limited usable floorplate that presently exists in Renown House (and which makes it difficult to Let) and will afford the joint endeavour new economically useful floorspace (**HS para. 5.19**).

15. Renown House retains a modest amount of heritage significance as a characterful survival of a small-scale early 20th-century office building. The essence of this character will not change under the proposals –it will still be read as such from the street –however the proposals will enable the building to continue to positively contribute to the City via interventions which will allow to become economically viable; something which it currently is not. The modest change to the building's massing is entirely appropriate and proportionate to its low level of heritage significance. Its ability to make a positive contribution to the townscape will not change or be harmed (**HS, para. 5.41-5.42**).

Summary

16. This letter has sought to provide high level commentary against the points raised from four key consultees on the effect of the Proposed Development on matters relating to the heritage significance of Holland House (Grade II*) and Renown House (a non-designated heritage asset). This shows that all of the points raised by these consultees were considered and addressed within the Heritage Statement (as well as other documentation) submitted as part of the planning and Listed Building Consent applications that were validated on 11 March 2024. We therefore consider that the application material is sufficient for the City of London to proceed with the determination of the application.

Yours sincerely

Anne

Dear contributor,

Thank you for your email.

Please note that you have been re-notified on this application due to the submission of a representation regarding the proposed development at Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR (application references: 24/00021/FULEIA and 24/00011/LBC).

You are not required to make another representation, albeit you have been provided the opportunity to do so, given your previous interest regarding the proposed development.

If you wish for your details to be removed from our list of contributors, please let us know and the planning authority will not notify you again for any development at this site.

THIS IS AN EXTERNAL EMAIL

Dear Ms. Tastsoglou,

Our Society's email of 9 October 2024 raised concerns over the Bury Street re-consultation. Despite this, you have failed to properly address the specific issues highlighted under:

1. **The Town and Country Planning Act 1990**
2. **The National Planning Policy Framework**
3. **The Planning and Compulsory Purchase Act 2004**
4. **The Equality Act 2010**

The following remain unresolved:

- **Incomprehensible Language**: Your letter of 8 October 2024 was impossible to decipher. We have since heard from qualified lawyers, none of whom could understand the text. This is unacceptable for official communication, and we now expect a letter in clear, plain English.

- **Consultation During Religious Holidays**: Issuing a consultation during the Jewish High Holidays and Sukkot was either negligent or a deliberate attempt to stifle response from the synagogue's users. This manipulation of process is a clear violation of the Equality Act 2010. An extension to 7 December 2024 is a minimal and reasonable request to correct this.

The Planning Department continues to consider applications that encroach on the Grade 1 listed Bevis Marks synagogue, yet no meaningful explanation has been provided to distinguish this re-application from those previously rejected. This calls your department's impartiality into question. The public perception that your department is collaborating with the developers is growing. This is compounded by the poor timing and impenetrable language of your communication.

We have received a holding response but no confirmation that our initial email was forwarded as requested to:

- Bob Roberts, Interim Executive Director Environment
- Your complaints department
- Your Equality and Inclusion team

Failure to respond fully by 23 October 2024 will leave us no option but to refer the matter to the Local Government and Social Care Ombudsman.

Yours sincerely,

David Mendoza
Joint President, Sephardic Genealogical Society

Subject: Objection to Applications 24/00021/FULEIA and 24/00011/LBC

Dear Ms. Tastsoglou,

Your References: 24/00021/FULEIA and 24/00011/LBC

I have received your letter regarding the proposed skyscraper above Bevis Marks synagogue, a Grade 1 protected building in the Creechurch Conservation Area. This is yet another attempt to disregard the wishes of those who regularly use the area. Bevis Marks is the most historically significant site of Jewish worship in the country, and one would not dare to treat an equivalent site of the Established Religion, such as St. Paul's Cathedral, with such disrespect.

Your recent correspondence was written in impenetrable English, making it difficult to understand. It is particularly concerning that a dyslexic friend required assistance for clarity, and I could only comprehend it after utilising artificial intelligence software.

The letter is dated 8th October, giving just one month for responses. You must be aware that this coincides with the Jewish High Holidays and the subsequent festival of Sukkot. This timing unfairly limits the ability of those most affected by the project to respond.

If this has been an oversight, I request that you:

1. Send a revised letter in plain English that can be understood by the general public. Your Equality and Inclusion team may assist in this effort.

2. Extend the deadline for responses to 7th December 2024. It is unethical and potentially discriminatory to require feedback from the Jewish community when they are least able to engage.

Please ensure this email is forwarded to:

- Bob Roberts, Interim Executive Director Environment
- Your complaints department
- Your Equality and Inclusion team

I expect to hear from each of them, as well as from you.

Yours sincerely,

David Mendoza

THIS IS AN EXTERNAL EMAIL

Dear City of London Planning,

Having taken another look at the proposed elevation styles and the updated document including the DSO I do wish to reinforce my comments.

The proposal as revised is a truly gloomy picture, pushing the surrounding residences and the historic building at Bevis Marks entirely into shade to a profound degree.

In terms of the choice of materials, while the building provides matching masonry and plenty of glass, the reality is that windows and blinds can be closed to obstruct the passage of light through the building, if the needs of its occupants are prime in their own use of blinds. Therefore however much glass the building provides, there is zero guarantee of blinds being left up to allow light through to the adjacent buildings.

The plan should be revised significantly either to offer a clear notch or a design with permanent unobstructed light passage through to and from all sides, with no occlusion permitted, to avoid placing the adjacent residences and historic buildings and usage areas into quite such a poor position as proposed.

It's entirely unacceptable to read the degree of loss for Bevis Marks taking light below even 2 hours a day at one equinox.

Dear contributor,

Thank you for your email.

Please note that you have been re-notified on this application due to the submission of a representation regarding the proposed development at Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR (application references: 24/00021/FULEIA and 24/00011/LBC).

You are not required to make another representation, albeit you have been provided the opportunity to do so, given your previous interest regarding the proposed development.

If you wish for your details to be removed from our list of contributors, please let us know and the planning authority will not notify you again for any development at this site.

Kind Regards

Dear Sir/Madam

This email was received but despite my best efforts, I am unable to understand its contents.

The fact that it was received during the Jewish High Holidays has significantly limited the time that I have had to seek clarity and respond appropriately. I assume that this is just an unfortunate oversight but would request that you extend the consultation period to enable those most affected by these proposals to meaningfully respond.

Should this not be agreed, I wish to place on record my ongoing and increasing opposition to these most egregious proposals, due to the negative and likely disastrous impact on Bevis Marks Synagogue.

Hello,

with reference to the letter dated 8 October 2024 re the above planning permission applications for Bury Street.

I reiterate my comments made on 23 April 2024 objecting to these applications: negative impact on surrounding area, particularly Bevis Marks (Grade 1 listed building), the Tower of London (World Heritage Site) and the Creechurch Conservation Area.

I urge that the plans are rejected in full.

Dear Madam,

My objection stands. A 43 storey building that towers over Bevis Marks is a disgrace and should not be allowed. Imagine such a building was planned in such proximity of St Paul's Cathedral, there would be public outrage and the application would have been rejected.

It would be a show of great disrespect and contempt by the City of London to the Jewish community in Britain if the application is allowed.

I hope you are open minded and respectful enough to understand and consider the sensitivity of this to the Jewish community in Britain.

Nothing that I can see in this latest resubmission responds adequately to the objections made to the previous versions, in particular in how Bevis Marks Synagogue would be directly affected and in how the views of the Tower of London would also be detrimentally affected.

I therefore remain opposed to permission being given for the construction of this building.

I note, further, that this latest resubmission is extremely difficult to make sense of, given the ways in which the documentation has been presented.

With best wishes

Dear City of London Planning Authority,
The proposals lister above would reduce views from and 'significantly affect the natural light' in Bevis Marks Synagogue, disrupting prayers and affecting the atmosphere inside.

The granting of permission to this proposal would therefore be a regrettable development with implications for rights of religious practice, precisely in the place where Jews first enjoyed these rights in England following the 17th century resettlement. This would be a tragic irony.'

The planned tower 'puts at risk the core purpose of the Bevis Marks Synagogue as a fully functioning place of Jewish worship'.

Yours faithfully
Edward Teeger

Dear Sir/Madam,

I am a supporter of this proposed development. It will bring much needed redevelopment to this area of the City (together with all the other proposed large scale developments)

I live on the SouthBank and work in the City. This part of the City Of London is like a shanty town, decrepit with non-descript buildings of little value.

Your faithfully,

Lee Moreland

Guildhall
London EC2P 2EJ

Dear Sir/Madam,

Re: Planning Application 24/00021/FULEIA (WELPUT: Holland House)

I am writing on behalf of the City Hindus Network (CHN), an organisation that serves as a platform for professionals within the Hindu community, fostering a sense of belonging and facilitating networking, cultural, and educational events across London. We are fully support the planning application that includes Holland House and believe the development will be a positive addition to the City of London.

A key reason for our support is the commitment made by the developers to provide free-of-charge community spaces within the current and future premises. As a not for profit, CHN has faced significant challenges in hosting events due to the limited availability of affordable venues in the city. The lack of access to cost-effective spaces has greatly restricted our ability to carry out more frequent events that serve the local community in the square mile and its professionals from various sectors.

The inclusion of community spaces at Holland House will directly address this issue, allowing us to expand our activities and engage more effectively with our members. This will not only benefit CHN but will also contribute to the cultural and social vibrancy of the City of London as a whole, promoting inclusivity and diversity.

We believe that the future Holland House will become an important hub for organisations like ours, providing us with a resource to further our mission to provide networking and professional development opportunities, as well as cultural and educational initiatives, at no additional cost to the community.

We trust that the City of London Corporation will recognise the significant community benefits this project offers and grant approval for the planning application.

Yours sincerely,

10 October 2024

Dear Ms Tastsoglou,

Planning Application at 1-4, 31 And 33-34 Bury Street, London, EC3A 5AR (the 'Site'): Response to comments from selected consultees on matters relating to effects on heritage significance in relation to the Proposed Development at the Site.

Introduction

1. This response has been prepared by KMHeritage on behalf of WELPUT in response to selected consultee representations made since submission of the full planning application under reference 24/00021/FULEIA for the

    a. "*Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.*"

And the associated Listed Building Consent application under reference 24/00011/LBC for the

b. "*Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works*".

2. The response seeks to provide high level commentary against key points on matters relating to effects on heritage significance of two buildings within the Site, namely Holland House (Grade II*) and Renown House (a non-designated heritage asset), made by the following four consultees: Historic England ('HE') in their letter dated 15 May 2024; Historic Buildings and Places ('HB&P') in their email dated 17th June 2024; The Twentieth Century Society ('TTCS') in their letter dated 17th May 2024 and The Victorian Society ('VS') in their letter dated 17th May 2024.

3. Comments made in relation to the impact of the Proposed Development on Townscape and Views have been addressed separately by The Townscape Consultancy and are not considered here.

Consultee comments with responses

4. This section groups the comments into the four main areas: Holland House: alteration to lightwell and party wall; Holland House: connection to Bury House; Holland House and Renown House: rooftop extension; and Renown House: general.

5. Responses may also refer to relevant paragraphs within the Heritage Statement dated December 2023 ('HS'), which accompanied the planning and Listed Building Consent applications.

Holland House: alterations to lightwell and party wall (with Renown House)

a. That altering the lightwell and demolishing party walls would be harmful through "*compromising the legibility of the historic design*". *(HE)*

b. "*The proposed extension would also have a harmful impact on building's the fabric and on the character of its interior spaces, namely through the infilling of its lightwell.*" *(TTCS)*

c. "*To accommodate an open connection with the proposed new tower at No. 31 Bury Street, further losses to Holland House are proposed, including [….],the enclosure of a light well. [..] the cumulative effect of these changes would heavily reduce the integrity of this heritage asset.*" *(VS)*

6. *Demolishing party walls:* the interconnection of Holland House and Renown House via removal of the party wall will create a new open plan space which will enable more productive use of the very limited usable floorplate that presently exists in Renown House (and which makes it difficult to Let) and will afford the joint endeavour new economically useful floorspace (**HS para. 5.42**). This intervention revisits and reinvents the original ambition of Helene Kröller-Müller to create one large building on the site (**HS, para. 2.22).** The fabric that it is proposed to remove to facilitate this is of low heritage significance in as far as it does not contribute significantly to the high architectural and aesthetic value for which Holland House has been listed at Grade II*. This would be a minor change to the floorplan in an area within Holland House that is not of high heritage significance (**HS, Appendix D**).

7. *Lightwell:* the lightwell is not pristine in terms of its fabric or proportions. It has seen extensive change as a result of the 1980s programme of alterations when it was partially infilled (eastern portion) with a new slab designed to increase the lettable area. There was also extensive demolition and reconstruction of the internal façade using masonry cladding with a glazed brick finish to replicate the original (**HS, para. 2.57**). It is a much underused and low quality space not least because it is open to the elements. Its proposed enclosure at 6th floor level will enhance the building's character and usefulness as a thriving high quality office space ('*optimum viable use*', NPPF para. 208) where lighting solutions are more than capable of replicating natural daylight conditions.

8. The '*fabric*' and '*character*' of the building's '*interior spaces*' are derived largely from the unique and high quality decorative internal spaces such as the original main entrance, basement and first floors lobbies and surviving boardrooms (**HS, Appendix D**). The space created by the lightwell, a common feature in buildings of this size and period, is secondary to these in terms of its contribution to fabric and character.

9. In more general terms, the '*legibility*' of the building's '*historic design*', as an intact whole, has already been compromised by the 1960s and 1980s interventions –including removing a not insubstantial amount of fabric from the east elevation in order to join it to the newly constructed Bury House. The Proposed Development positively seeks to improve upon those unsympathetic changes and enhance the character and appearance of the listed building and its neighbour.

Holland House: connection with Bury House

   a. *"[…] the rear wall to provide open floors and connections to the new proposed tower at No. 31 Bury Street. The cumulative impact of the loss of so much building fabric, as well as the damaging additions has a considerably negative impact on the integrity of this heritage asset and its historic architectural interest." (HB&P)*

   b. *"The proposed redevelopment would physically impact on the fabric of Holland House. Original rear floor slab and wall would be lost to connect Holland House with the Proposed Development. This part of Holland House has already suffered fabric loss as a result of the Bury House development in the 1960s and we are concerned*

that even more fabric would be removed as part of the current application. We are also concerned about the proposed insertion of a large stair to connect the ground and first floor levels and its impact on the interiors. We have concerns about the cumulative impact of previous and proposed changes on the significance of this Grade II listed building.“ (TTCS)*

c. “*To accommodate an open connection with the proposed new tower at No. 31 Bury Street, further losses to Holland House are proposed, including the rear wall, the insertion of a large new staircase, and the enclosure of a light well. Listing applies to all the building’s fabric; the cumulative effect of these changes would heavily reduce the integrity of this heritage asset.“ (VS)*

10. This interconnection will be made at the existing point where the two buildings meet. This will affect only that part of the building which has already been compromised by the joining of Bury House to Holland House in the 1960s which resulted in the loss of much of the back wall of Holland House. This intervention will have the benefit of providing Holland House with DDA compliant lifts, essential firefighting cores and improved circulation without impacting upon fresh areas of structure or fabric or affecting fabric of high heritage significance. This will allow Holland House to become fit for the future and function in its ‘*optimum viable use*’ (NPPF para. 208). Improvements to rectify past fabric loss and restore elements of the building’s integrity, will include the restoration of the exposed part of eastern facade to the historic condition of glazed brick facing and the reinstatement of the lost Crittall fenestration (**HS para. 5.18, 5.33-34, 5.47**).

Holland House / Renown House: rooftop extension

a. *"The addition of attic levels which do not reflect the order or proportions of the original design intent would be particularly harmful to the appreciation of its significance by appearing overbearing." (HE)*

b. *"The scale of the proposed roof level and dormer windows to Renown House do not reflect the hierarchy of the building. As such, the extension would compromise its positive contribution to Holland House and the conservation area through increases to its height" (HE)*

c. “*HB&P objects to the proposed four-storey extension to both Holland House and Renown House. It is an intrusive, bulky, and top-heavy addition to both buildings that fails to respect their proportions and scale. The extension would result in the loss of historic fabric, particularly within Holland House at roof level and the rear wall to provide open floors and connections to the new proposed tower at No. 31 Bury Street. The cumulative impact of the loss of so much building fabric, as well as the damaging additions has a considerably negative impact on the integrity of this heritage asset and its historic architectural interest.” (HB&P)*

d. “*that the proposed 3-storey extension to the roof of Holland House would seriously harm the significance of the Grade II* Holland House. The building’s additional*

storeys would add considerable heaviness and bulkiness to the roofline. This building's extension would change the proportions and upset its balance, making it appear top heavy. While stepped back, it would still remain highly visible and impactful. This is illustrated in the applicant's HTVIA views 42, 43 and 60." (TTCS)

e. "*The four-storey extension to both Holland House and Renown House is excessive and top-heavy, disrupting the careful architectural proportions of both buildings. The extension would also result in the loss of historic fabric, including the loss of stone chimney stacks on Renown House and the complete removal of the top floor of Holland House, causing less than substantial harm." (VS)*

11. The design of the upwards extension to Holland House is covered in **HS, paras. 5.21-24**. The proposals for the rooftop extension seek to actively recognise, reference and support the architectural intent of the Listed building through its thoughtful design which seeks to reference the proportions of the openings and piers of the historic façade to successfully continue the verticality of the original design. Use of high-quality materials and complementary colouring will ensure that the new elements will not compete with the old. Plant will be removed completely.

12. The proposed extension will change the historic proportions of the building to a modest degree, however the sensitivity of its design ensures that it will remain subservient and respectful of the original so as not to appear incongruous or overbearing in longer views. Although there will be a minor change in massing, it is not considered that this change will be of a degree that will cause harm to the heritage significance of the building as expressed and embodied in its external appearance and will certainly have no effect upon the unique contribution made by the building's decorative interiors to its heritage significance. The fabric that will be removed is related to the 1960s rooftop extension and later alteration and is of low/no heritage significance (**HS, paras. 5.36-5.37**).

13. Renown House will be extended upwards by two storeys via an additional full floor above the cornice line and a sympathetic mansard extension to enable it to segue seamlessly with Holland House at its upper levels. The present rather prosaic and altered attic storey, overtopped with a lift overrun, will be removed and replaced with a modern mansard design which will differentiate the new addition from the more traditional style building below. This treatment allows Renown to remain separate and subservient to Holland House when seen from the street and will improve the massing relationship when seen in the context of the proposed roof extension to Holland House. The proposal preserves all that is interesting in the building's external expression via a thoughtful and appropriate design which enables it to contribute fully to the objectives for reinvigorating Holland House. The proposed roof extension has been carefully designed to respect the original design of Renown House and be supportive to the setting of Holland House. It is required in order to match the proposals for the roof extension to Holland House. In that context, the extension to Renown makes sense and would continue to make a supportive and positive contribution to Holland House (**HS, para. 5.20 & 5.22**).

Renown House: general

a. *'Renown House will lose all its interiors, roof mansard, and stone chimney stacks. New floor levels inserted to accommodate the connection with the proposed tower at 31 Bury Street and Holland House would not align with existing windows. The proposed interventions aggressively attack the integrity and design of this non-designated heritage asset.' (VS)*

14. The interconnection of Holland House and Renown House via removal of the party wall will create a new open plan space which will enable more productive use of the very limited usable floorplate that presently exists in Renown House (and which makes it difficult to Let) and will afford the joint endeavour new economically useful floorspace (**HS para. 5.19**).

15. Renown House retains a modest amount of heritage significance as a characterful survival of a small-scale early 20th-century office building. The essence of this character will not change under the proposals –it will still be read as such from the street –however the proposals will enable the building to continue to positively contribute to the City via interventions which will allow to become economically viable; something which it currently is not. The modest change to the building's massing is entirely appropriate and proportionate to its low level of heritage significance. Its ability to make a positive contribution to the townscape will not change or be harmed (**HS, para. 5.41-5.42**).

Summary

16. This letter has sought to provide high level commentary against the points raised from four key consultees on the effect of the Proposed Development on matters relating to the heritage significance of Holland House (Grade II*) and Renown House (a non-designated heritage asset). This shows that all of the points raised by these consultees were considered and addressed within the Heritage Statement (as well as other documentation) submitted as part of the planning and Listed Building Consent applications that were validated on 11 March 2024. We therefore consider that the application material is sufficient for the City of London to proceed with the determination of the application.

Yours sincerely

Anne

THIS IS AN EXTERNAL EMAIL

Dear City of London

I object to the proposals for a 43-storey tower at 31 Bury Street.

Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.

The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses, which represents public benefits that tip the planning balance in their favour. However, the design changes will make hardly any difference to the impact on the Synagogue, and in any event are counterbalanced by the fact that the heritage 'bar' is now even higher as the Synagogue has recently gained the added status of being within a Conservation Area. The 'public benefits' would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause.

I suggest the following reasons for refusal:

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block

this critical view which is important to the functioning of the Synagogue.

Please refuse this damaging and inappropriate planning application.

Thank you

THIS IS AN EXTERNAL EMAIL

Dear Sir or Madam,

I am writing to you to ask you not to go ahead with the proposed development because:

1. I really do think that it would cause a lot of hard with regard to our heritage, in terms of its impact on the Bevis Marks Synagogue and on its site. It would also impact adversely on the Creechurch Conservation Area and on other local heritage sites.
2. I don't know if you are aware tha light is very important indeed to t Bevis Marks Synagogue. Prayers and worship involve a great deal of reading of printed script s in Hebrew, and this proposal would definitely have a terrible and unacceptable impact of the level of daylight, - which we all need in the Synagogue.
3. The courtyard of the Synagogue would be overshadowed, and this is used for a range of Communal and Religious activities.
4. The view of the moon passing across the night sky is symbolic and intrinsically related to the rituals of the Synagogue. This proposal would block this critical view, which is important to the functioning of the Synagogue.
5. I am sure you are that Bevis Marks Synagogue is a very significant building, both within the City of London and nationally. You must know that it is a Grade 1 listed building, and dates back to 1701. It is the oldest and most important Synagogue historically, in London. It is very important to the Jewish Coimmunity and is of huge significance in a number of ways: from an architectural, an artistic, and a historical perspective. . .
6. The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
7. The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
8. The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
9. The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.
10. There was a similar application along the same lines before by the same applicant: ref. 20/00848/FULEIA. This was refused in 2022, because of the impact of the proposal on Bevis Mark Synagogue and its setting, and on the setting of the Tower of London. These reasons are of course still very important, and I hope you will agree with me, that the reasons for refusal in 2022 still apply today.

Please could you let me know of your decision when you have made it.

Many thanks

THIS IS AN EXTERNAL EMAIL

Good afternoon,

I am writing to object to this planning application.

This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London.

Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. The Synagogue has recently gained the added status of being within a Conservation Area.

The reasons for refusal in 2022 apply today including that the proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting and the proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.

Yours faithfully,

Joel Bonnet

THIS IS AN EXTERNAL EMAIL

This is to register our strong objection to the planning application which will badly affect the historic oldest synagogue in UK. A 40 storey building will destroy the light going into the synagogue and courtyard. There are already enough towering buildings in the area. Please don’t allow this to happen.

THIS IS AN EXTERNAL EMAIL

Dear Madam, Dear Sir,

Please find the reasons why I strongly object to the planning application for a 43-storey tower at 31 Bury Street (ref. 24/00021/FULEIA), notwithstanding the additional information provided by the applicant.

-> This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.

-> The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses. However, the design changes will make hardly any difference to the impact on the Synagogue.

-> Bevis Marks Synagogue has recently gained the added status of being within a Conservation Area. The changes made by the applicants would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause

-> Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

-> The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.

-> The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.

-> The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.

-> The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the

Synagogue

Really hoping these objections will be taken into consideration and the planning application rejected.

Sincerely yours,

Laurent Sicsic

THIS IS AN EXTERNAL EMAIL

Dear Ms Anna

I would like to reconfirm my objection to these applications. I stress the reasons for the objections:

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance. This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.

The 'public benefits' described by the developer, would confer little to no benefit upon the Synagogue and the community it supports, and whilst they may benefit some people, it would hardly begin to counter the damage the tower would cause.

I reiterate again my objection.

Regards

Ezra Timan

THIS IS AN EXTERNAL EMAIL

Dear Sir/ Madam,

I would like to object to the 43 storey tower proposal. Although I understand changes have been made to offer benefits to the community, I still feel that as a resident of our beautiful city of London, the proposed tower should not go ahead. It will overshadow a magnificent Grade 1 listed building- the Bevis Marks Synagogue and will cause substantial harm to the character and appearance of Creechurch Conservation Area.
However enticing it may be to have new towers be built, I do believe that we have a duty to the future generation to maintain some respect for listed properties in London.
Please do not allow this proposal to go ahead and instead allow the historic beauty of Grade 1 buildings to remain pride of place.

Thank you in advance for your consideration.

Yours faithfully,

Mrs Sophie Obadiah

THIS IS AN EXTERNAL EMAIL

Dear Planning Committee,

I am writing to formally object to the proposed 43-storey tower development adjacent to Bevis Marks Synagogue in the City of London. This historic synagogue, constructed in 1701, holds both national and cultural significance as the oldest and one of the most historically important synagogues in the United Kingdom. As a Grade I Listed building, Bevis Marks is a unique symbol of communal, architectural, and historical heritage. I urge you to reject this application for the following reasons:

Firstly, this proposed development poses a severe threat to the heritage and historical significance of Bevis Marks Synagogue and its surrounding Creechurch Conservation Area. The tower would not only cause substantial harm to the synagogue's setting and appearance but also detrimentally impact the character of the conservation area itself. Additionally, this project would have a measurable negative effect on other valuable heritage assets in the area, albeit to a slightly lesser degree.

Furthermore, Bevis Marks Synagogue is exceptionally sensitive to natural light due to its architectural design and its role in worship, where natural light is critical for reading sacred texts. This development threatens to disrupt the internal daylight levels within the synagogue to an unacceptable degree. Such an impact would significantly hinder the daily practices and rituals essential to the building's religious and cultural function. Additionally, the proposed tower would cast extensive shadows over the synagogue's courtyard, an important space for community gatherings, celebrations, and religious observances. The loss of adequate sunlight in this area would fundamentally diminish the courtyard's usability, stripping away its warmth, openness, and purpose as a community space.

Another critical aspect of this objection concerns the synagogue's symbolic connection to the moon's passage across the night sky, an integral part of its rituals and traditions. The proposed development would obstruct this view, thereby erasing a fundamental aspect of Bevis Marks' spiritual and cultural experience. This loss would be irreversible, undermining traditions that are deeply meaningful to the community and have been observed for centuries.

It is also important to note that a similar application (ref. 20/00848/FULEIA) was previously submitted by the same applicant and was rightfully refused in 2022. The reasons cited in that decision –specifically, the adverse impacts on Bevis Marks Synagogue's setting and the Tower of London –remain fully applicable today. Despite claims of minor design modifications, the changes proposed do not adequately address the harm the

development would cause to the synagogue's environment and heritage. The recent designation of Bevis Marks within a Conservation Area only raises the heritage threshold, making this proposal even less appropriate.

The applicants argue that public benefits, such as offering spaces for community groups and small businesses, outweigh the detrimental impact on Bevis Marks. However, these so-called benefits provide little to no advantage to the synagogue itself or to the community it serves. Any marginal gains offered to others fail to justify the scale of harm inflicted upon a site of such historic and cultural importance.

In light of these issues, I strongly urge the committee to reject this application. The irreversible damage to one of the UK's most precious heritage assets is too high a cost for any perceived public benefit. Protecting Bevis Marks Synagogue is not only a duty to the City of London but also a responsibility to preserve our shared cultural and historical heritage for generations to come.

Thank you for your consideration.

Yours faithfully,

Dr Alan Mendoza

The new proposals by the developers are not much more different than those proposed in 2022.
The proposed building will be and eye-sore to the surrounding area and would severely impact the light to the synagoge,
I strongly object to the proposals.

Please find my objections to the additional proposals to 31 Bury Street.

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

- Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

> This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.

The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses, which represents public benefits that tip the planning balance in their favour. However, the design changes will make hardly any difference to the impact on the Synagogue, and in any event are counterbalanced by the fact that the heritage 'bar' is now even higher as the Synagogue has recently gained the added status of being within a Conservation Area. The 'public benefits' would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause.

It is therefore my view that the synagogue would be negatively impacted

Hello,

I'd like to reiterate my objection to this revised proposal.

Of primary concern to me is the Spanish & Portuguese Bevis Marks synagogue. Building a 43 storey tower in this location will block all sun and moonlight from the synagogue on which it is critically dependent. It is a grade 1 listed heritage site not only for the UK but the entire world. Natural light of critical not only because of the age of the historical building but also because many of the religious ceremonies that take place there relate to thanks and appreciation of it.

Unfortunately, even with the modifications that have been made to this application it continues to be entirely unacceptable.

Thank you for your support and understanding.

THIS IS AN EXTERNAL EMAIL

Subject: Your reference: 24/00021/FULEIA and 24/00011/LBC

Dear Ms Tastsoglou

I am writing to strongly object to planning application 24/00021/FULEIA and listed building consent application 24/00011/LBC for the proposed developments at Bury House, 31-34 Bury Street and Holland House, 32 Bury Street, London EC3A 5AR/5AW.

My objections are based on the following grounds:

1. Severe Impact on Heritage Assets

The proposed 43-storey tower (178.7m AOD) and substantial alterations to Holland House would cause significant harm to multiple heritage assets:

a) Bevis Marks Synagogue (Grade I listed): Europe's oldest continuously used synagogue, dating from 1701. The 43-storey tower, in close proximity, would severely impact its setting and overshadow its courtyard, fundamentally altering the character of this internationally significant site.

b) Holland House (Grade II* listed): The proposed four-storey roof extension, partial demolition, and extensive alterations including removal and reinstatement of external faience would compromise the architectural integrity of this remarkable building. These works risk damaging its distinctive character and fabric.

c) St Katherine Cree Church and St Botolph's Church (both Grade I listed): These 17th and 18th-century churches would be adversely affected by the scale and massing of the proposed developments.

The National Planning Policy Framework (NPPF) paragraph 199 states that "great weight should be given to the asset's conservation". The harm caused to these assets is not outweighed by public benefits, contrary to NPPF paragraph 202.

2. Conflict with Conservation Area Designation

The site falls within the recently designated Creechurch Conservation Area (January 2024). The proposed 43-storey tower, at nine times the size of the existing building, and the substantial alterations to Holland House directly conflict with the City of London's planning policy, which states that tall buildings are

inappropriate within conservation areas.

3. Non-Compliance with Development Plan

The application explicitly states that it "does not accord with the provisions of the development plan in force in the area". This admission alone should be grounds for refusal, as it contradicts local planning policies designed to protect the character and heritage of the area.

4. Environmental Impact

As an EIA application, the environmental statement must be scrutinised carefully. The scale of the development is likely to have significant impacts on local microclimate, wind patterns, and daylight/sunlight levels, which could adversely affect the surrounding area and its historic buildings.

5. Cumulative Impact

These proposals, combined with other recent and proposed developments in the area, would result in an unacceptable cumulative impact on the character of the historic City of London, particularly its low-rise areas of heritage significance.

6. Inappropriate Alterations to Holland House

The proposed alterations to Holland House, including the four-storey roof extension, partial demolition, and extensive internal changes, would significantly harm the architectural and historical integrity of this Grade II* listed building. The removal and reinstatement of external faience and the replacement of the existing concrete beam pose considerable risks to the building's fabric and character.

Conclusion

In light of these significant concerns, I urge the planning committee to reject both applications. The proposed developments would cause substantial harm to multiple heritage assets, contravene local and national planning policies, and fundamentally alter the character of this historically sensitive area of London.

The City of London has a duty to protect its unique historical fabric. Approving these applications would set a dangerous precedent for future development in conservation areas and around listed buildings of national and international importance.

Yours sincerely,

Dorothy Lampert (Mrs)

THIS IS AN EXTERNAL EMAIL

Dear Sirs

I would like to strongly object to the new proposed planning application on the following grounds:

1-the proposed development will overshadow Bevis Marks synagogue and cause substantial harm to its significance, character and appearance.

2-natural light is essential to reading of printed scripts which in turn is fundamental to worship. The proposal would have unacceptable impact on internal daylights levels.

3-the proposed development will cause an unacceptable level of overshadowing of the courtyard where community and religious uses take place.

4-the passage of the moon across the night sky is highly symbolic to the tradition and rituals of the Synagogue.

Your sincerely

Freddy Salem

You don't often get email from [redacted] Learn why this is important

THIS IS AN EXTERNAL EMAIL

Dear Sir/Madam

Proposals for a 43-storey tower at 31 Bury Street (ref. 24/00021/FULEIA)

I wish to comment on the above application. My *locus standi* is that I am a member of the congregation at Bevis Marks Synagogue, a Grade I listed building affected by the proposal.

Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance. It is now also within a Conservation Area.

This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022. Nothing in the amended proposal mitigates the reasons for refusal on that occasion and it would therefore be perverse to reverse the refusal.

The proposed development would cause significant damage to the functioning of this exceptional heritage asset, which would not be mitigated in any way by the proposal to create communal space in the area of the development. In particular:

- The proposed development would cause substantial harm to the character and appearance of the Creechurch Conservation Area and grave damage in heritage terms to the significance of Bevis Marks Synagogue and its setting.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels. Daylight is not merely an optional extra, it is fundamental to the functioning of the synagogue.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses. Particularly in view of the security needs of the Jewish Community, it would be entirely unrealistic to relocate these to another venue. The courtyard is a fundamental part of the whole way that this unique heritage asset functions.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

It is evident that the changes made since the previous (rejected) proposal do nothing to alleviate these fundamental objections. The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses, which represents public benefits. Whether or not this is true, it does not address the problems caused to Bevis Marks in particular, which was one of the main factors in the decision to refuse the earlier application. Moreover, given that Bevis Marks is now within

a Conservation Area, the bar to development that will damage it is even higher than before, and the legal requirement to preserve heritage assets is even greater.

Yours faithfully

(Dr) Ben Yudkin

THIS IS AN EXTERNAL EMAIL

Dear Sirs

My objection still stands as the changes proposed by the developed in no measurable way diminish the negative impact of the proposed development on Bevis Marks synagogue. The application is basically the same as the one (ref. 20/00848/FULEIA) which was rejected 2 years ago because of its impact on Bevis Marks and now that the synagogue is in a conservation area for an application to be accepted the impact needs to be less. Indeed it is impossible to see how a 43 story tower cannot have a negative impact so close to a 3 story 17th century Grade 1 listed building.
Bevis Marks is the oldest synagogue in UK. It has been, and remains, in continuous use for religious service and cultural activities ever since. Any redevelopment of the surrounding area needs to be done sympathetically to the historic surroundings.

Yours sincerely

THIS IS AN EXTERNAL EMAIL

Dear team

The re-consultation on this application prompts renewed objections:

Bevis Marks Synagogue and its setting would be substantially harmed in heritage terms. The Creechurch Conservation Area would suffer the same harm and similar harm would be inflicted on other heritage assets.

In the Synagogue natural light is essential for reading printed scripts that are essential to the worship and this proposal would destroy much of the essential daylight levels.

The proposal would overshadow the Synagogue (and other buildings and streets) unacceptably and against the conservation area requirements. Furthermore, it would block the passage of the moon in the night sky, another essential part of the Synagogue's worship, traditions and rituals.

This synagogue is unique, nationally recognised as such by its Grade 1 Listed status, with outstanding historic, architectural, artistic, archaeological and communal significance. The previous application by the same applicant (ref 20/00848/FULEIA) was refused in 2022 for two reasons - the impact on both the Synagogue and the Tower of London - and those same reasons apply now for this application.

The design changes claimed by the applicants make barely any difference to the impact on the Synagogue and no member of the public would want to use these claimed benefits in what would be a windy, dark narrow canyon. The Synagogue is now within the Conservation Area: this means the heritage aspects are even higher and make this application void. Please reject it.

Yours sincerely,

Katharine Ridler

12 November 2024

lpaburystreet@cityoflondon.gov.uk

Dear Sirs,

Re: Proposals for a 43-story tower at 31 Bury Street (ref. 24/00021/FULEIA)

I write in opposition to the above proposal because of the damage it will do to the Bevis Marks Synagogue and its environs.

My wife's family have been members of Bevis Marks since its creation, and we are still members despite living in Sheffield. I have written to you before about this planning application.

Having read the amended application, I can only say it is a wolf in sheep's clothing. The so-called improved public benefits (space for community groups and small businesses) are directed towards a non-existent 'need', and do not alleviate the detriment the project would cause to the Synagogue.

The proposed building destroys the historic context of Bevis Marks (a Grade I listed building), infringes on the Conservation Area, robs the Synagogue of light, and mocks the significance of Bevis Marks as the oldest, and I would say most important, Synagogue in the UK. Just ask yourselves: would you want this tower to be so close to Westminster Abbey or St Paul's?

The tower does not belong where they propose to build it. I call on you to refuse the planning application.

Thank you for your attention.

Yours faithfully,

Dr. Everett M. Jacobs

THIS IS AN EXTERNAL EMAIL

Dear Ms Tastsoglou,

I write in response to the letter of 29 October.

I wish to OBJECT to the proposal (31 Bury Street, ref. 24/00021/FULEIA) for the following reasons.

1. The proposed development will cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.

2. Bevis Marks Synagogue is one of the most natural light-sensitive places in London, where extensive
reading of printed scripts is fundamental to worship, and the proposal will have an unacceptable impact on internal daylight levels.

3. The proposal will result in an unacceptable level of overshadowing to the courtyard of Bevis Marks Synagogue, which is used for a variety of community and religious events.

4. The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of Bevis Marks Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

5. Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

6. This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London.

The reasons for refusal in 2022 apply to the new proposal.

I trust you will take these points into consideration and refuse the new application.

Best regards,

13 November 2024

Dear Ms Tastsoglou, I trust this message finds you well.

I am writing to express our strong support for the planning application for the redevelopment of Bury House, Holland House, and Renown House (Planning Application Reference: 24/00021/FULEIA). We are particularly enthusiastic about the Cultural Strategy included in this plan, which aims to benefit the local community, schools, and charities like ours.

upReach is an award-winning social mobility charity driven by a vision of a society in which everybody has an equal opportunity to realise their full career potential, regardless of social background. Founded in 2012, we support over 3,000 undergraduates from lower socio-economic backgrounds each year to access and sustain top graduate jobs by delivering a programme of 1-to-1 career coaching, working in close partnership with leading employers and universities.

Our London office is based in the Brick Lane/Spitalfields area, given the close proximity of our London office to Holland House, we are grateful for the opportunity to use its facilities at no cost. This accessible and budget-friendly space has been invaluable to us as a growing charity that needs larger venues for both internal and external meetings / events. It enables us to allocate more of our funding directly to programs for the undergraduates we support rather than to event rental fees, allowing us to maximise our impact.

We have become regular users of the space, both for internal training sessions and events that directly benefit the undergraduates we work with. Bringing students into the City of London, often for the first time, is a transformative experience, as it allows them to envision themselves in potential future careers and build confidence as they navigate their career options.

Looking ahead, we are excited about the redevelopment plans and the expanded possibilities that the Cultural Strategy offers. The upgraded space will further enhance our capacity to hold significant events that are essential to our mission. We envision hosting larger initiatives like our annual Career Festival, a one-day event where undergraduates can explore a variety of career pathways, connect with professionals, and develop employability skills.

Thank you for considering our input and for supporting initiatives that foster community engagement and career development. Please do not hesitate to reach out if you need further information or if we can assist in any other way.

Warm Regards,

Stephanie Lieber
Chief Operating Officer
upReach Charitable Company

Dear Ms Anna

I would like to reconfirm my objection to these applications.

- The proposed development would cause substantial harm in heritage terms to Bevis Marks Synagogue and to character and appearance of Creechurch Conservation area;;
- The synagogue is one of the most natural light sensitive in London and the development would cause unacceptable impact on internal daylight levels;
- Overshadowing in the synagogue court yard;
- A similar application by the same applicant was refused in 2022 for two reasons relating to the impact of the proposal on the setting of Tower of London and Bevis Marks Synagogue;

For such reasons and others, I object to granting planning permission.

Regards

Ruth

THIS IS AN EXTERNAL EMAIL

Dear Sir/Madam",

I am writing on behalf to strongly object to the planning application, currently under re-consultation. Bevis Marks Synagogue is a vital heritage and community asset of both national and international importance, and the proposed development would cause irreversible harm to its significance and functionality.

Key Objections:

1. Heritage Impact:
    - Bevis Marks Synagogue, a Grade I Listed building dating from 1701, is recognized as the oldest and most historically significant synagogue in the United Kingdom. It holds outstanding communal, architectural, artistic, historic, and archaeological importance.
    - The proposed development would cause substantial harm to the Synagogue's heritage significance and its setting, as well as to the character and appearance of the Creechurch Conservation Area. It would also result in less than substantial harm to other heritage assets.
2. Daylight and Overshadowing:
    - The Synagogue is uniquely light-sensitive, with natural daylight playing a fundamental role in its worship practices, including the extensive reading of printed scripts. The proposed development would lead to a significant reduction in internal daylight levels, adversely affecting worship and other activities.
    - Additionally, the development would overshadow the Synagogue's courtyard, a space used extensively for community and religious purposes, diminishing its usability and atmosphere.
3. Symbolic Views of the Night Sky:
    - The view of the passage of the moon across the night sky holds deep symbolic and ritualistic significance for the Synagogue. The proposed development would block this critical view, disrupting traditions that are essential to the Synagogue's spiritual and cultural practices.
4. Historical Context and Previous Refusal:
    - A similar application (ref. 20/00848/FULEIA) by the same applicant was refused in 2022 due to its detrimental impact on the settings of both Bevis Marks Synagogue and the Tower of London. These reasons for refusal remain equally valid today, and the adjustments in the current application do little to mitigate the harm.
5. Public Benefits vs. Harm:
    - The applicants suggest that the revised design, which includes space for

community groups and small businesses, offers public benefits that outweigh the harm. However, these changes fail to address the substantial negative impact on the Synagogue, and any perceived benefits are minimal at best.
    - Furthermore, the heritage “bar” has now been raised, as the Synagogue is newly recognized as being within a Conservation Area, further underscoring the inappropriateness of the proposal.

In summary, Bevis Marks Synagogue is a building of unparalleled heritage and cultural value, whose significance and function would be critically compromised by this development. The minor adjustments proposed do not begin to address the adverse effects identified in the previous refusal and continue to render the application unacceptable.

I urge the City of London Corporation to reject this planning application and uphold the protection of one of the nation’s most treasured heritage assets.

Thank you for considering this objection.

Yours sincerely,

Daniel Sacerdoti

THIS IS AN EXTERNAL EMAIL

Dear Sirs,

I write, again, to lodge objections to these proposals.

As a member of Bevis Marks Synagogue, I feel strongly that the proposed development will greatly harm the 300 year old Synagogue. As a regular attender I know that the light will be greatly affected and perhaps make it impossible to read in certain places. I also have worries about the affects such a structure might have on the fabric of our building.

I feel that these new proposals are cynical given that a very similar application was refused some two years ago. The conditions which led to this refusal still apply. The minor changes in these new proposals provide little benefit to the Synagogue and do not outweigh the damage a 43-storey tower could do to it.

Yours faithfully,
Marlena Schmool

THIS IS AN EXTERNAL EMAIL

Dear Sir or Madam

I wish to object, as I have previously, to the revised application for a 43-storey tower at 31 Bury Street.

All my previous points still hold and since reviewing the revision I have more to add:

The changes include 'public benefits' which have little or no benefit to Bevis Marks Synagogue. The fact still remains that there will be a significant reduction of daylight on this Grade 1 listed building, which relies on such illumination for many of its religious activities.

In addition the Synagogue has recently been included in the Creechurch Conservation Area. This should give it added protection; the original and revised plans do not achieve this.

Thirdly, I would like to remind you that Bevis Marks Synagogue is the oldest site of continuous Jewish religious activity not only in the City but in the country. Its value to the local and general communities is incalculable.

Finally, I would repeat that at a time when so many office buildings remain partially or completely unoccupied it seems absurd that such a large building in such a sensitive location should even be considered. The proposed addition of a small amount of 'community space' would not make a significant impact.

I trust that the City of London will once again refuse permission for this unsuitable application.

15 November 2024

Dear Ms Tastsoglou,

Bury House, 1-4, 31-34 Bury Street, London EC3A 5AR: Follow-Up Objection on behalf of The S&P Sephardi Community

On behalf of our client, The S&P Sephardi Community, we write further to our previous letter dated 15 May 2024, in relation to the planning application (ref. 24/00021/FULEIA) and the related Listed Building Consent application relating to the redevelopment of Bury House, 1-4, 31-34 Bury Street, EC3A 5AR.

This letter comprises a follow-up objection including:

- Further evidence in relation to daylight/sunlight which has been prepared on behalf of our client; and
- Responses to the letter prepared by the Applicant's agents DP9 dated 27th September 2024, specifically in relation to the GIA Lunar Transit Study;
- A letter from Professor Barry Stiefel, Professor of Historic Preservation & Community Planning at the College of Charleston, regarding the significance of the sky view for Bevis Marks Synagogue; and
- The findings of a review of the applicant's Equalities Statement prepared by the barrister Claire Nevin.

Generally

Our client's position remains that the proposals would have a substantial and wholly unacceptable impact on the historic, Grade I Listed Bevis Marks Synagogue and the Creechurch Conservation Area within which it sits; and a less than substantial and unacceptable impact upon other heritage assets in the vicinity. The revised proposals do not overcome this heritage harm or come anywhere close to delivering sufficient public benefits to outweigh it.

As you are aware, a previous application at this site (ref. 20/00848/FULEIA) was refused only two years ago on the basis of harm to Bevis Marks Synagogue and to the Tower of London World Heritage Site. It is abundantly clear that the building now proposed will have just as much impact upon the Synagogue and the other heritage assets as the one proposed previously, and that the only material change in circumstances is that the area is now designated as a Conservation Area, which means that heritage impacts should attract **even greater weight**, and Policy CS14(2) of the City Plan (which contains a strong presumption against tall buildings in Conservation Areas) is engaged.

It is clear the applications should be refused, for the following reasons (inter alia):

1. The impact upon the Synagogue (the first previous Reason for Refusal) has not been overcome; the new scheme would be little different from the previous one in its impact. There is now even stronger evidence of adverse impact, including a better articulated objection concerning the heritage/religious/cultural significance of the sky view, and empirical evidence of poor daylighting.

2. The impact on the World Heritage Site (the second previous Reason for Refusal) has not been overcome; the modelling of the new scheme is a little different, but it still has more-or-less the same substantial impact on a very important view of the Tower of London.

3. The site is now in a Conservation Area, meaning that the scheme's heritage impact (especially on the Synagogue, which is in the same CA) should be given even more weight. City Plan Policy CS14 is very specific in saying that tall buildings proposed in Conservation Areas will be refused.

4. The claimed heritage benefits amount to nothing of substance: it is ridiculous to claim that a 43 storey tower will enhance the Conservation Area, and adding a 4 storey upward extension to Holland House represents harm to that heritage asset, not sensitive restoration.

5. The claimed other public benefits must be viewed with deep scepticism, and certainly don't amount to something to which "very great weight" should be attached. For example, the three storeys of "public access" appears to be nothing more than a meanwhile use.

6. Insofar as there could be some heritage/public benefit, no attempt has been made to demonstrate that the proposed development is the minimum necessary to achieve it. The applicants maintain they are not running an enabling development argument but, in fact, they are. They are arguing to be allowed to erect a building that is specifically contrary to development plan policy, on the basis that their claimed public benefits outweigh the policy presumption and other material considerations. The planning system should only ever accept such an argument if it is demonstrated that what is proposed is the minimum necessary to achieve the claimed benefits.

7. The building is believed to be substantially unviable, and the small size of the site is such that it is unlikely a tall building would ever be viable, let alone one that relies upon substantial expenditure upon public benefits for its justification. Planning permission should not as a matter of principle be granted for developments that are unlikely ever to be built (or unlikely to be built except with significant amendment of the proposal and/or the package of claimed benefits which accompanies it).

As planning officers of undoubted integrity, I trust you and your colleagues will recognise the above, and also that any attempt to justify recommending approval would be both improper and wide open to legal challenge.

Bevis Marks Synagogue Daylight Report

On behalf of our client, Prof John Mardaljevic and Dr Stephen Cannon-Brookes (respectively of Daylight Experts and Cannon-Brookes Lighting and Design) have prepared a report regarding the daylight position in the Synagogue. The report (enclosed at **Appendix 1**) provides an assessment of the existing daylight levels in Bevis Marks Synagogue and considers how these would be likely to be affected by proposed development.

It represents the only empirical study of the Synagogue undertaken by anyone. All assessments made by third party consultants are based on assumptions and estimates.

The study was originally commissioned in 2022 in the wake of the then planning applications for very damaging tall office towers on the sites of 31 Bury Street and 33 Creechurch. Whilst the original planning applications for those sites have since been refused/withdrawn, there is now a fresh planning application for 31 Bury Street; hence the study results, which cover a two-year period, are of considerable topicality.

Background

The Synagogue was originally designed to be well daylit, with large windows on all four sides which satisfied both the spiritual and functional aspects of worship. Members of the congregation expect to be able to read during services using daylight. The point is well made by this illustration from 1884.

Figure 1: Bevis Marks Synagogue, 1884

Over the years, tall buildings have been constructed on neighbouring sites which has had a significant effect on the daylighting of the interior. The surrounding courtyard has increasingly been shaded from the sky, and this has resulted in a progressive lowering of internal daylight levels within the Synagogue.

Methodology

The report is informed by a long-term assessment of the lighting levels at the Synagogue which was carried out between 26th February 2022 to 2nd April 2024. The assessment was carried out using two illuminance meters, which are widely used to record light levels in museums and other heritage buildings.

The illuminance meters were placed in the central area of the ground floor (Sanctuary), both at a height normal for holding a prayer book. The two locations were selected to capture typical daylight levels experienced on the ground floor of the Synagogue. Light levels were recorded at five minute intervals continuously throughout the monitoring period.

Daylight is measured in lux units (lx), which can be understood as follows:

> Below 25lx - many occupants, particularly the elderly, will experience difficulty reading. The Synagogue is likely to appear drab and gloomy.
>
> Between 25lx - 50lx - many occupants may be able to read printed paper, provided the text is not too small. 50lx is generally regarded as sufficiently dark that most museum exhibits will not be harmed by exposure to that amount of light.
>
> Between 50lx - 100lx - most/all of the occupants are likely to be able to read printed paper, and the Synagogue is likely to begin to appear pleasantly daylit.
>
> Above 100lx - the Synagogue will be perceived as having a more pleasant/daylit appearance.

Existing Daylight Levels

The results of the assessment of existing daylight over a two+ year period showed that:

> The Synagogue is a fundamentally daylit building. Some electric lighting was installed in the 1920s, but artificial lighting is culturally inappropriate, and furthermore there is little if any scope to install more lighting in what is now a Grade 1 Listed building of the highest significance. In winter, the daylight levels are barely adequate.
>
> In general, daylight levels at the Synagogue are at a 'tipping point' where additional shadowing by nearby proposed developments could plunge the Synagogue into permanent winter daylight conditions, or worse.

Figure 2 in the report shows the typical daily hours lux levels achieved over the monitoring period:

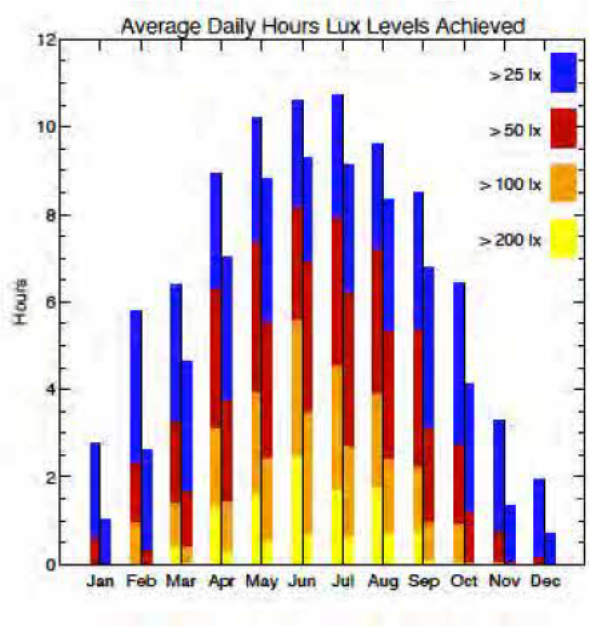

Figure 2: Average Daily Lux Levels Achieved

It is clear that in the winter months particularly, daylight in the Synagogue is very limited. Indeed, for a quarter of the year, the light levels never exceed 100lx (i.e. they are always blue or red on the graph above). Even in the summer months, much of the daylight is still at or below 100lx.

The report also considers how surrounding development that overshadows the courtyard of the Synagogue has an impact on internal light levels. On sunny days, the results show a pattern of a large dip in internal light level readings between around 08:30 to 10:00[1], after which light levels rise again. This is a result of the overshadowing of the Synagogue by neighbouring buildings.

Figure 5 in the report, below, demonstrates that when the courtyard is shaded by the very tall neighbouring building at One Creechurch Place, this has a significant and direct impact on internal light levels. For example, at 09:00 on 8 May 2022, the courtyard was fully in shadow. The illuminance levels (shown by the red and blue lines representing each illuminance meter) therefore dropped significantly (to below 25lux in one case, and below 50lux in the other); at 10:00, when the courtyard was no longer in shadow, the illuminance levels recovered.

The report confirms that this is a persistent pattern across the monitoring period which could not be explained by cloud patterns etc. This demonstrates the significant impact that the development of tall buildings in the vicinity of the Synagogue has already had on internal light levels.

[1] The timing will vary according to the date, but the phenomenon will occur in any event

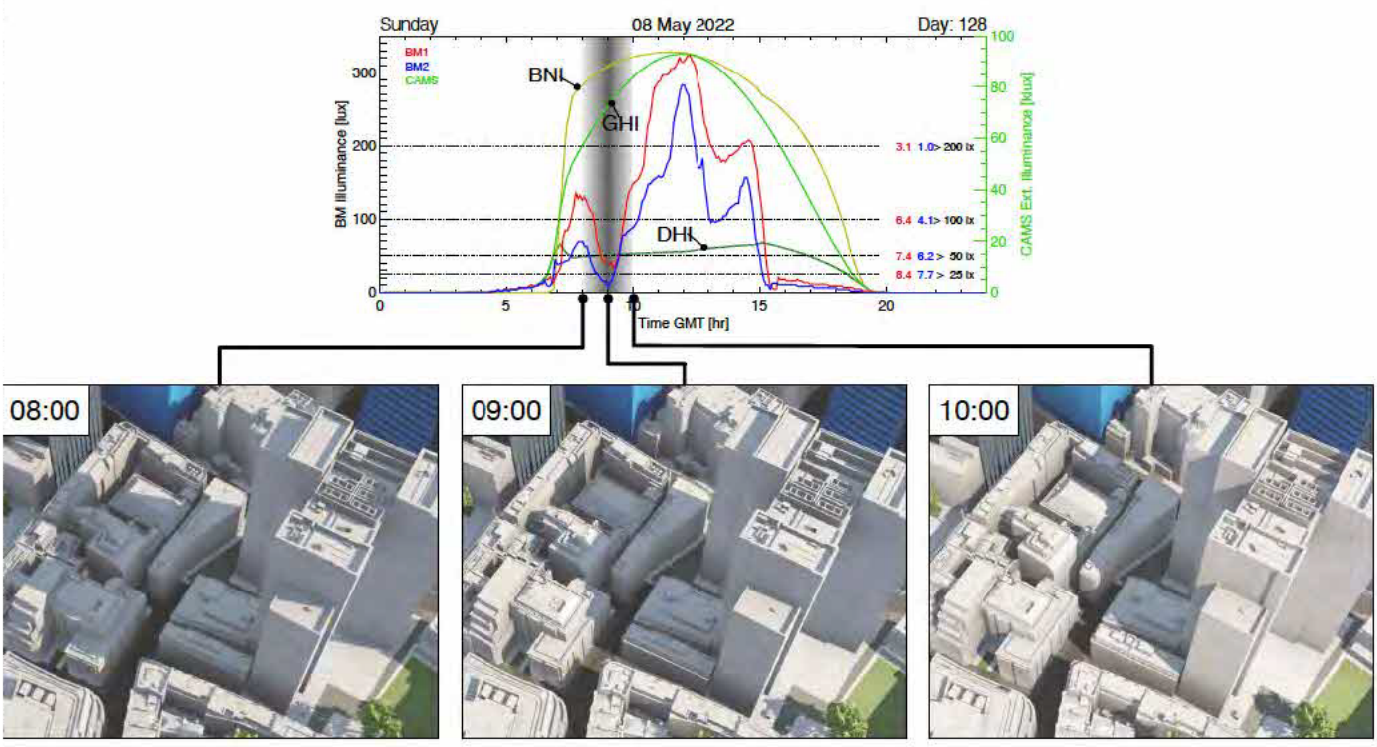

Figure 3: Impact of One Creechurch Place shadow on Bevis Marks

Potential Impact on Daylight Levels

The report goes onto consider the potential further impact on daylight levels within the Synagogue, should the proposed tall building at 31 Bury Street be approved and built. Figures 4 and 5 below show that for 31 Bury Street, on the same day (i.e. 8 May 2022), its shadow would begin to encroach on the Synagogue courtyard area around 11:00, and between 12:00-13:00 the courtyard area is heavily shaded, with shadow gradually receding until 14:00. Figures 4 and 5 relate to light monitors BM1 and BM2 respectively, with the pink and bright blue lines showing the position with 31 Bury Street in place.

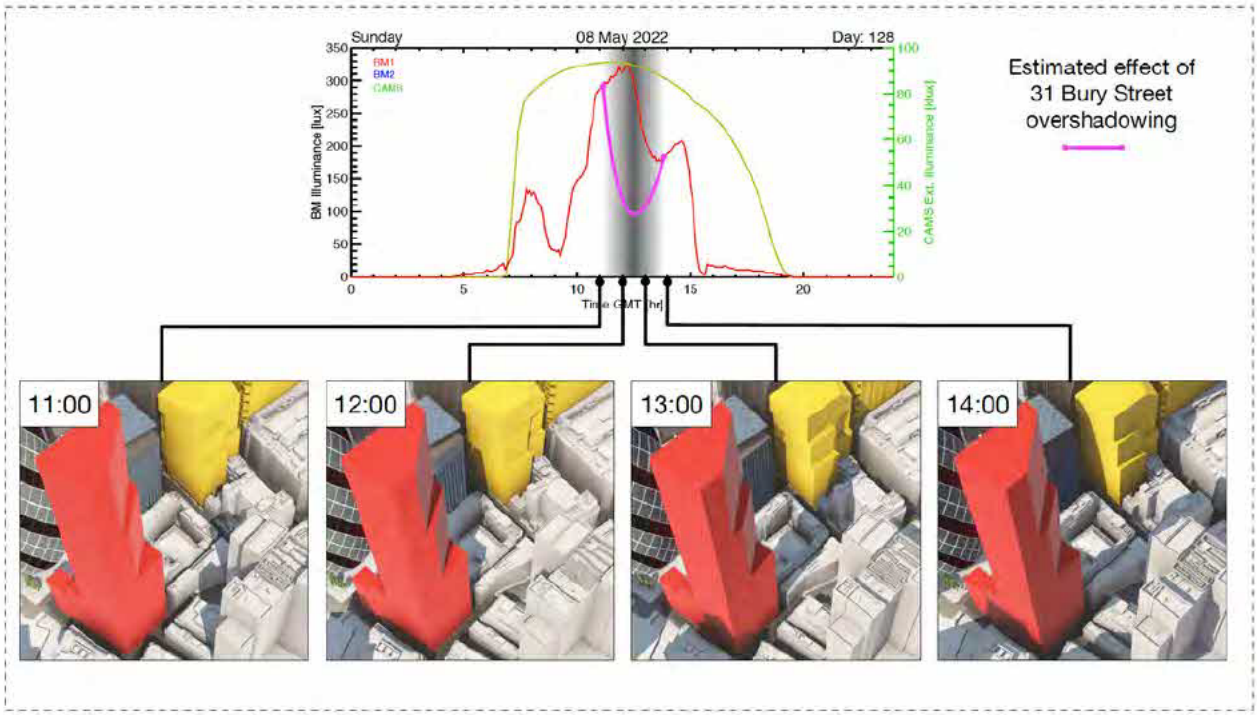

Figure 4: Progression of shadow cast by proposed development on Bevis Marks on light monitor BM1

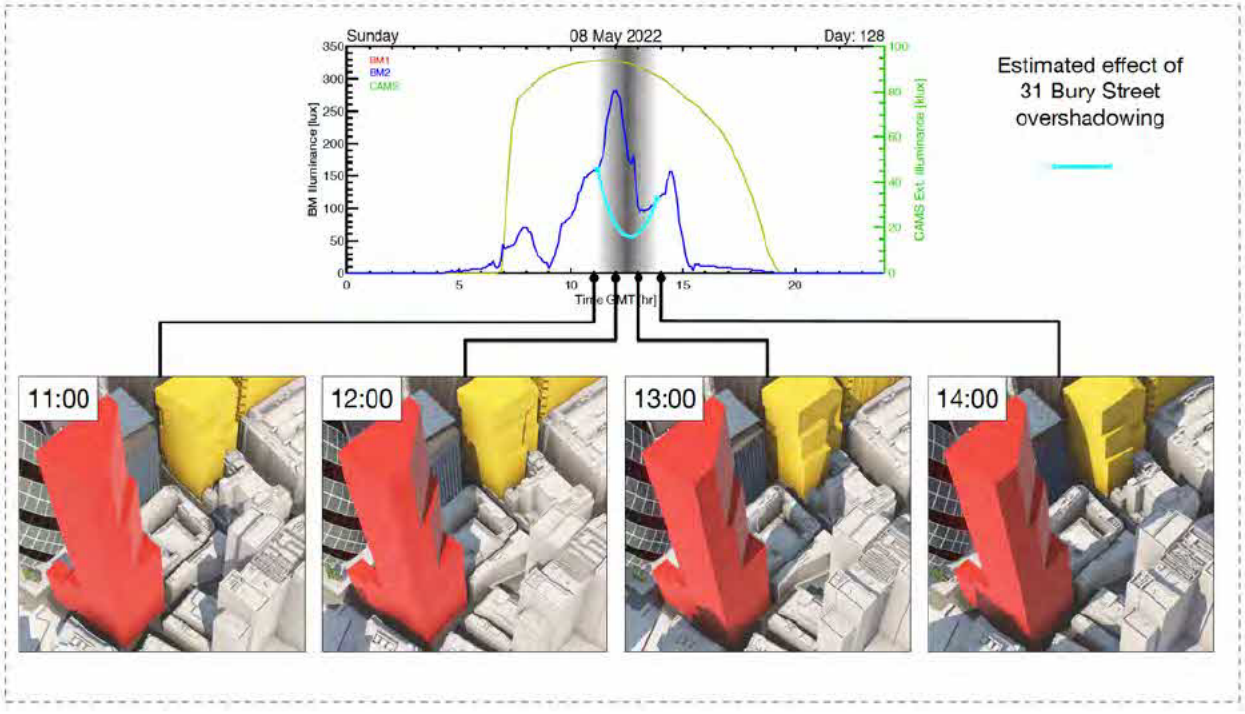

Figure 4: Progression of shadow cast by proposed development on Bevis Marks on light monitor BM2

The cumulative effect of the proposed development with One Creechurch Place is severe and would result in an unacceptable loss of light to the Synagogue.

Conclusions Regarding Daylight

This report contains the most thorough data available regarding the existing position of daylight in the Synagogue. It confirms that daylight levels at the Synagogue are at a 'tipping point' where additional shadowing by nearby proposed developments could plunge the Synagogue into something close to permanent winter daylight conditions, or worse. The projection that has been done for the effect of the proposed tower at 31 Bury Street shows a dramatic worsening of the Synagogue's daylight, resulting in an unacceptable cumulative effect.

This new evidence is of sufficient importance that we request formally that you require the applicants to respond to it in detail.

Response to DP9 letter dated 27th September 2024

The Applicant's agent, DP9, has prepared a detailed response to our previous letter dated 15th May 2024. This includes at Appendix 3 a Lunar Transit Study prepared by GIA.

Lunar Study

Rabbi Morris of Bevis Marks Synagogue has reviewed GIA's lunar study in great detail, and raises a number of issues with the way that the data has been presented, in relation to the practical matters that affect the Synagogue and its special requirements. His assessment is enclosed at **Appendix 2**.

GIA have reported that London has cloudy conditions 58% of the time based on information gained from the website https://weatherspark.com. As a result, they conclude that the moon is only visible 2.2% of the time from Bevis Marks Synagogue's courtyard. In reality, cloud cover is by no means a binary matter - it often changes over short periods of time, and often the moon can be seen through a veil of cloud. In contrast, buildings are fixed; once a building is constructed, for all intents and purposes it becomes perpetually densely 'cloudy' with respect to the lunar visibility.

Beyond this, the variability of climate conditions itself plays an important role in the monthly 'Kiddush Levana' rituals. Jews go outside after dark looking to see whether or not the moon is visible, wherein a cloudy sky is considered to be a bad omen, and a clear sky a positive one, as it allows for the prayer to be recited. The fixed reduction of visibility by the proposed tower would be a permanent obstruction, removing this variability which is central to the meaning of the ritual.

Furthermore, as reciting the prayer only takes a quarter of an hour, the preservation of sufficient unobstructed sky allows for the possibility that any cloud cover will pass, thus enabling the prayer to be recited despite earlier cloudy conditions.

Rabbi Morris has reviewed GIA's data and finds that the proposed development would prevent visibility of the moon in, on average, three months of the year when it is currently visible. At present, the Kiddush Levana prayer can be recited on average in nine months of the year. This is therefore a very significant reduction in the number of months of the year in which it is possible to recite the prayer.

GIA go on to claim that the moon is currently only visible for 2.2% of the time, and the proposed development would reduce that only to 1.8%, implying this is such a small change that it is of little consequence. However, that is a complete mischaracterisation of the position. Even if the figures were correct, the reduction amount is considerable. It is trite to say so, but as something gets smaller, it becomes more precious, and so the sensitivity to further loss becomes more acute.

It is noted that BRE has also been instructed to review the GIA report on behalf of the City of London, and that they reach a similar conclusion to the rabbi:

"With both the consented and proposed developments in place (in the cumulative scenario), the opportunity to view the moon from the observer location used by worshippers at Bevis Marks Synagogue when reciting Kiddush Levana would reduce by 51% on average throughout a full lunar cycle, compared to the existing baseline."

Finally, and very importantly, this is a matter which is deeply entwined with the history of Judaism and of the Synagogue. Below is a woodcut from 1695, showing Jews revering the moon and the stars at the synagogue in Amsterdam.

Figure 5: 1695 Woodcut

The synagogue shown is a relatively low building, open to the sky, exactly as Bevis Marks Synagogue was when it was built around the same period.

Below is another image, showing the same phenomenon at a synagogue in Germany in 1726.

Figure 6: Illustration of a synagogue Germany (1726)

Enclosed at **Appendix 3** is a letter from Professor Barry Stiefel, Professor of Historic Preservation and Community Planning at the College of Charleston. Professor Stiefel is a leading expert in Western Sephardi Synagogue architecture. Professor Stiefel's letter sets out in detail the cultural and religious significance of the sky view for the community at Bevis Marks Synagogue, with reference to religious observances, daily prayers, festivals, and its cultural, historic, mystical and symbolic significance. Professor Stiefel concludes that even partially blocking the important sky view would lead to disruption for the Sephardic Jewish community at Bevis Marks Synagogue.

What we have here is not only very important to the modern day religious and cultural rituals of a minority ethnic group, but something which is fundamental to the significance of the heritage asset. The sky view is not just a matter of aesthetics; it serves a purpose which has always been an important and integral part of the functioning of the building.

Enabling Development and Viability

The letter prepared by DP9 states that they do not make an 'enabling development' argument and we understand from our previous discussions that viability evidence has not been requested from the applicant. We have sought advice from Lord Banner K.C. on this matter and his advice (enclosed at **Appendix 4**) is that:

"it would be amply open to the Council to take the view that the "clear and convincing justification" for the harm to the significance of Bevis Marks Synagogue and the Tower of London does not exist without (clear and convincing) evidence that the benefits relied upon cannot be achieved without the extent of harm that would be caused - including viability evidence."

We therefore remain of the view that the applicant should provide viability evidence to demonstrate that the claimed benefits (including heritage benefits) of the scheme cannot be achieved without the extent of harm that would be caused. It is indisputable that a very tall building on the 31 Bury Street site would cause considerable harm to Bevis Marks Synagogue and the Tower of London. The applicants are effectively arguing that the benefits of the proposed development (including heritage benefits) would, in their opinion, outweigh those harms as well as clear conflict with the statutory development plan. For the Corporation to be able to consider that argument, it will require robust evidence that a building of the dimensions proposed (a) can deliver the benefits claimed, and (b) is no taller than necessary for the balance to be capable of being tipped in its favour, i.e. viability evidence.

We again formally request that you require proper evidence from the applicants. If such information is not provided, we put you on notice that this will form part of any legal challenge in due course.

Equalities

Our previous objection raised concerns regarding the Equalities Statement submitted as part of the application. We note DP9's response which states their view that the submitted Statement is sufficient. We have instructed Claire Nevin, a barrister specialising in environmental and human rights law, to carry out a review of the Equalities Statement (enclosed at Appendix 5). The review sets out, in summary, that "*the Equalities Statement is not sufficiently detailed on the potential impacts on the Jewish community at BMS to continuing worshipping in accordance with their faith. The failure of the Equalities Statement to address several key aspects [...] does not comply with the Guidance and case law*". The review concludes that were the City of London to rely on this Equalities Statement alone to discharge their Public Sector Equality Duty (PSED), it would be in breach of the duty.

The decision maker (i.e. the City of London's Planning Committee) must have due regard to the factors set out at Section 149 of the Equalities Act 2010. Ms Nevin concludes that if the City of London were to decide to grant planning permission, a formulated statement of reasons would be required in accordance with the Supreme Court's ruling in *Dover DC v Campaign to Protect Rural England (Kent) [2017]*. A formulated statement of reasons would be required because:

> There is substantial public opposition to the proposals.
>
> A very similar proposal was refused in 2022 and the area now enjoys heightened statutory and policy protections due to its recent designation as a Conservation Area. The proposal is therefore likely to involve major departures from the development plan and other policies of recognised importance.
>
> Given the City of London's recent decision to refuse a similar application, and the recent designation of the Conservation Area, a formulated statement of reasons would be required to explain consistency of decision making.
>
> The decision would be likely to have both an immediate impact on the Jewish community and lasting relevance for the application of policies relating to tall buildings and conservation areas in future cases.

> Section 149 contains a positive duty to have 'due regard' to equalities impacts. In the absence of a formulated statement of reasons, it would otherwise be difficult to ascertain whether the City of London complied with this duty.

It is therefore important that Members of the Planning Committee are made aware that a formulated statement of reasons should be provided in the event that they were minded to resolve to grant permission for the application.

Ms Nevin's review also draws comparisons between the current application at 31 Bury Street, and the application for the 'Tulip' skyscraper, which was refused by the Secretary of State in November 2021 (ref. APP/K5030/W/20/3244984). Bevis Marks Synagogue was amongst the heritage assets considered in the decision, with the Secretary of State finding that the "wider setting" of the Synagogue "*includes a number of office towers, visible from the courtyard.*"

Regarding Bevis Marks Synagogue and a number of other heritage assets, the Secretary of State remarked that the Tulip would "*cause a marked exacerbation in the existing harm from tall buildings to the setting of the assets and the ability to appreciate their architectural or historic significance. The effect would be variously to create an overbearing presence from within the curtilage of the heritage asset (…)*". This clear view expressed by the Secretary of State is a material consideration that must be taken into account when determining the application at 31 Bury Street.

Ms Nevin concludes that: *"It is trite that planning authorities must carefully balance different (sometimes competing) factors and decide how they should weigh in the overall balance. However, certain factors will always weigh more heavily in the balance than others. The Guidance clearly states "the greater the relevant potential impact, the higher the regard required by the duty." Considering the importance of the PSED and the extent of the potential impacts of the development proposal on the Jewish community at BMS, I consider that this is a case that warrants the heightened regard envisaged by policy and by extension, substantial weight in the overall planning balance."*

Conclusions

In summary, none of the material produced by the applicant or their agent in response to our previous objection changes our client's position and our strong objections previously set out. The additional evidence enclosed with this submission provides further reasons why the application should not be approved.

The previous application at this site was correctly refused on the basis of heritage harm including to Bevis Marks Synagogue. The level of harm is now significantly greater because a new heritage asset - the Creechurch Conservation Area - has come into existence, and because the significance of the sky view is now better understood. The revised proposals do not begin to overcome the heritage harm or deliver sufficient public benefits to outweigh it, let alone to justify a clear conflict with City Plan Policy CS14.

The applications should be refused. However, in order for you to be in a position properly to report them to Committee, we reiterate our request that you require the applicants to respond in detail to the empirical evidence on daylight, and to produce a viability assessment to justify their *de facto* enabling development case. You might also think it appropriate to suggest they produce a robust Equalities Statement to assist you in your reporting on this most important and sensitive matter.

Yours sincerely,

Roger Hepher

Executive Summary

Bevis Marks Synagogue, 1884 (John Crowther)

In order to determine if the Bevis Marks Synagogue is at risk from significant loss of daylight due to proposed nearby developments, it is necessary to establish two matters of fact:

1. The current levels of daylight provision in the Synagogue.
2. The expected reduction in daylight provision to the Synagogue caused by the proposed developments.

The first can only be determined reliably by direct measurement of daylight levels in the Synagogue over extended periods. The second can only be estimated using a realistic prediction method which minimises the uncertainty in the outcome.

This report focuses on the findings of a long-term measurement campaign to quantify the daylight provision in the core of the Bevis Marks Synagogue. The measurements, using two conservation grade light meters, were carried out over a two year period from 26th February 2022 to 2nd April2024. Theresultsattestto thefactthattheSynagogueisa functionally daylit buildingforconsiderableperiodsoftheyear:overwinterthedaylightlevelsarebarelyadequate, buttheyimproveconsiderablyf ortheotherninemonthsoftheyear.Thedataalsoshow that thedaylightlevelsi n theSynagoguearedata‘ti ppingpoint’–significantadditi onalshadowing by nearby proposed developmentscould plungetheSynagogueintopermanentwinterdaylight conditi ons,orworse. Thereportalso providesguidanceregarding theselection ofa suitable prediction method to estimatethelossofdaylightprovision to theSynagoguecaused by the proposeddevelopments.

1 Introduction

To set the picture, the Synagogue was designed to be well daylit with large windows on all four sides to meet spiritual and functional aspects of worship. That the latter has always involved the congregation reading during services is confirmed by the presence of lockers beneath every seat, some of which predate the Synagogue and that are still in use. Members of the congregation expect to be able to read during services using daylight, which as of tradition plays a role in the timing of services. This helps to explain why the generous number of original chandeliers were not electrified during the 20th century, since, as in early the 18th century, appropriate candles are expensive and their use is reserved for special services. Furthermore, it is the minimal level of material change since then that earned the current Grade 1 listing of the building, its fabric and furnishings.

Whilst the building and its use remain largely unchanged the same cannot be said for its surroundings and this has had a substantial effect on the daylighting of the interior. The narrow surrounding courtyard has maintained a perimeter of space though one increasingly shaded from the sky by the rising height of adjacent buildings. The consequences of this can be read in the interior with redundant boxes above the upper level windows on the SE and SW walls. In the past these housed blinds to diffuse direct sunlight, now largely blocked by adjacent buildings. Change has been incremental, but always in the direction of lower daylight levels as the height of these buildings increased. An earlier report by surveyor GIA presented the current conditions showing how little direct view of the sky remains from the Synagogue's windows.

Site measurements of light levels indicate that the interior is on the cusp of losing work-able levels of daylight under most sky conditions. Review of existing conditions and schematic modelling indicates that the daylighting in the Synagogue is now largely dependent on reflected light from the surfaces of the buildings surrounding the courtyard. This is most obvious during periods of sunlight, the absence of which is easily perceived since levels are considerably lower when sky is overcast. At these times, the current and relatively sparse electric lighting on the columns is utilised, but, as reported, even when members of the congregation tend to congregate around the columns, light levels are insufficient for these to be an effective alternative means of illumination.

2 Measuring the Daylight Levels in Bevis Marks

Illuminance is a measure of the amount of light (i.e. the luminous flux per unit area) under normal viewing conditions. Illuminance has a unit of lux (often shortened to lx). Illuminance is the quantity most commonly used to assess illumination levels in buildings. For example, to specify the artificial lighting in an office, usually something in the range 300lx to 500lx. Verification of an artificial lighting system would be carried out using a lightmeter, e.g. taking measurements at various desks to ensure that the design intent (say, 300lx across the desks) has been achieved.

In contrast to artificial lighting, verification of daylight levels in a building is far more complex. The quantity and quality of daylight in buildings is continually varying due to the natural changes in sun and sky conditions from one moment to the next. These changes have components that are: random (e.g. individual cloud formations); daily (i.e. progression from day to night); and, seasonal (e.g. changing day length and prevailing weather patterns). Accordingly, to be reliable, any measurement of daylight provision in a building must be taken over a period of at least a full calendar year. Daylight levels measured outside vary enormously.[1] For example, in the Midlands (UK), typical daylight levels at noon vary from ~60,000lx in summer to around ~10,000lx in winter. Peak values under the sunniest conditions can reach in excess of ~90,000lx. Half an hour after sunrise (or half an hour before sunset), daylight levels will be around ~1,000lx. Thus, any meaningful assessment of daylight provision indoors must describe the degree of occurrence of,

[1] Here we refer to measurements taken on the horizontal plane in an unobstructed outdoor setting, i.e. with a full view of the hemispherical sky vault.

usually, particular daylight levels throughout the year. How this was achieved for Bevis Marks is described in the sections that follow.

2.1 Daylight Measurement Strategy

Two logging illuminance meters (referred to as BM1 and BM2) were used to record the daylight levels in the Synagogue. The meters employed were newly purchased Hanwell ML4701 LUXBUGS, which are widely used to record light levels in museums and heritage buildings. They were placed in the central area of the ground floor (Sanctuary), as can be seen in Figure 1. BM1 was located on the edge of the Bimah and BM2 on the pew closest to the Ark, both at the height normal for holding a prayer book. These locations were selected to capture the range of daylight levels across the core of the ground floor area of the Synagogue. Perimeter areas, under the balconies were not considered as scaffolding was present around the ground floor windows at the start of monitoring. Light levels were recorded at five minute intervals continuously throughout the monitoring period. There were occasional losses of data due to the practicalities of long-term light monitoring in an occupied space. For example, due to internal memory overflow. And one occasion when BM1 was misplaced for a number of weeks following a wedding.

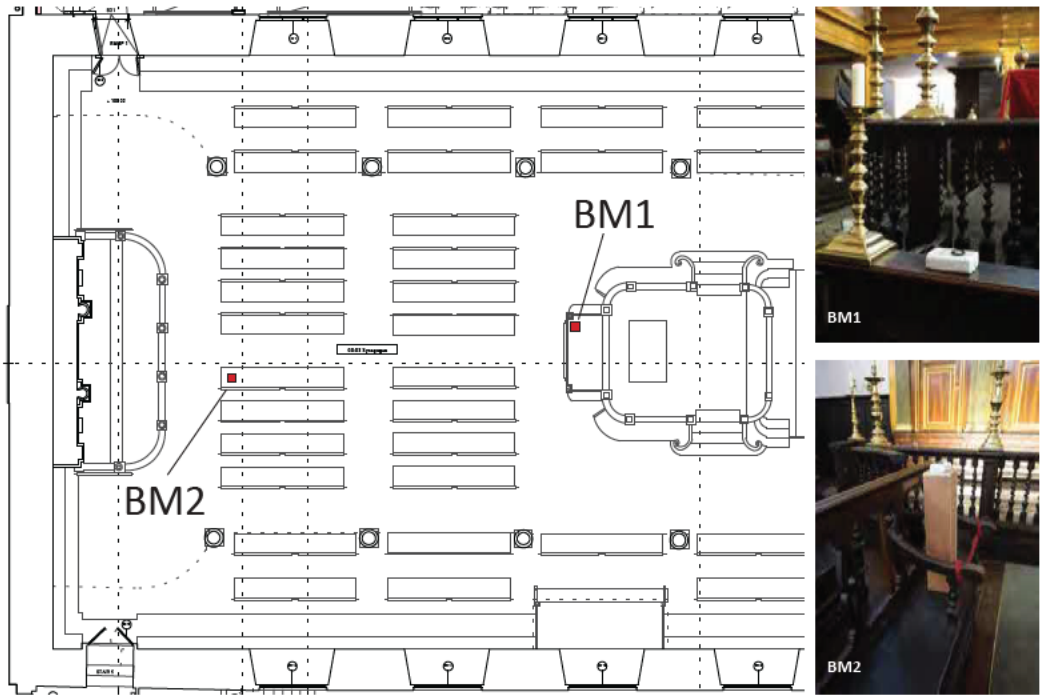

Figure 1: Location of Hanwell loggers BM1 and BM2

2.2 Determining Daylight Provision from the Measured Illuminance Data

The monitored illuminance data used to quantify the long-term daylight provision in the Synagogue were recorded between 26th February 2022 and 2nd April 2024 by logging meters BM1 and BM2. In total, there were 767 full days of measurements where either one or both loggers were recording (equivalent to approximately 2.1 years of data). The rationale for processing the data into metrics that characterises the overall daylight provision in the Synagogue was as follows:

i. All the measured data should be used to avoid bias in the presentation of the results, i.e. no 'cherry-picking' of measurements.

ii. Results should be presented on a monthly basis to reveal how the daylight levels vary across the year.

iii. For each month, the average daily occurrence in hours of key daylight levels should be determined from the measurements.

iv. The key daylight levels used should relate to human visual performance requirements and preferences.

v. Results are normalised to monthly totals, but there should be no interpolation/ estimation of missing data.

The key illuminance levels used to characterise the daylight provision are: 25lx, 50lx, 100lx and 200lx. The minimum key value of 25lx is approximately the lowest illuminance level advised for use in public spaces when lighting needs to be strictly limited, invariably for conservation purposes in museums and art galleries to protect particularly delicate artworks, fabrics, etc. A more typical illuminance level used for all but the most delicate artefacts is 50lx. Daylight illuminance levels around 50 to 100lx are typical in many residential rooms under moderately bright overcast skies. Under daylight illumination levels of 50–100lx, occupants may often be content to read books/ newspapers without additional lighting providing the eye has adapted and there are no contrast issues (e.g. bright window in the field of view). All the same, they might *prefer* illuminances greater than 100lx, particularly if reading for extended periods. Note that the response of the human eye is such that a doubling of brightness is perceived as a significant change, whereas a smaller incremental edition might be difficult to notice. Accordingly, the final illumination level for consideration is set to 200lx.

The likely implications for the occupants of the Synagogue experiencing the various illuminance ranges are summarised as follows:

- Below 25lx many occupants, particularly the elderly, will experience difficulty reading. Those who are not too elderly and with good eyesight may manage to read provided the daylight levels are above 10lx.[2] The Synagogue is likely to appear drab and gloomy.
- Between 25–50lx many of the occupants may be able to read printed paper, provided the text is not too small. The Synagogue is likely to appear dim at the lower end of the range (~25lux), but noticeably brighter at the upper end (~50lux)
- Between 50–100lx most/ all of the occupants are likely to be able to read printed paper without undue discomfort, unless they have marked visual impairment. The Synagogue is likely to begin to appear pleasantly daylit.
- Between 100–200lx there are likely to be few significant improvements in visual performance for the majority of occupants. However, the synagogue is likely to be perceived as having a markedly more pleasant/ daylit appearance.
- Illuminances greater than 200lx probably not needed for the majority of tasks carried out in the Synagogue. However, the additional brightness imparted would be perceived as further 'enlivening' the Synagogue, and therefore welcomed by the occupants.

[2] Young adults with standard vision can generally read fairly well down to illuminance levels in the range 5–10lx. However, as visual acuity declines by roughly a factor of three between the ages of 20 and 60, older people invariably need multiples of these light levels to read, often supplemented by eye correction (glasses etc).

2.3 Daylight Monitoring Results

The illuminance levels in the Synagogue recorded at locations BM1 and BM2 in the period between 26th February 2022 and 2nd April 2024 are presented in both tabular and graphical form. The data were processed to show the average daily occurrence in hours that the four key illuminance levels were achieved (i.e. exceeded) on a monthly basis. A summary of the complete analysis is shown in Table 1. For example, for the month of February, an illuminance of 25lx was achieved (on average) for 5.8 hrs (BM1) and 2.6 hrs (BM2).[3] Whereas an illuminance of 50lx was achieved (on average) for 2.3 hrs (BM1) and 0.3 hrs (BM2).

	BM 1 Hours lux value achieved				BM 2 Hours lux value achieved

Table 1: Average daily hours key illuminance values achieved on a monthly basis

The data in Table 1 are presented graphically in Figure 3. Two bars are shown for each month, the left hand is data from BM1 and the right from BM2. Colour coding is employed to show the number of hours achieved for the four threshold light levels (25, 50, 100 and 200lx). Note the 'bars' are superposed rather than stacked – see illustration in Figure 2. For example, in July, 25lx is achieved (on average) for 10.7hrs (BM1) and 9.1hrs (BM2). Whereas 200lx is achieved for 1.7hrs (BM1) and 0.6hrs (BM2).

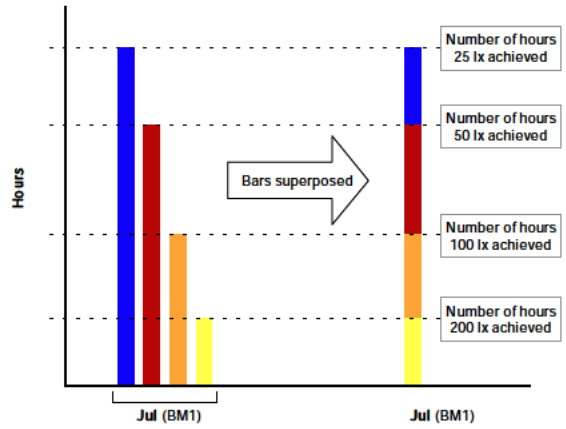

Figure 2: Illustration showing superposition of bars in Figure 3

[3] Decimal hours are shown, e.g. 1.5hrs equals 1hr 30mins.

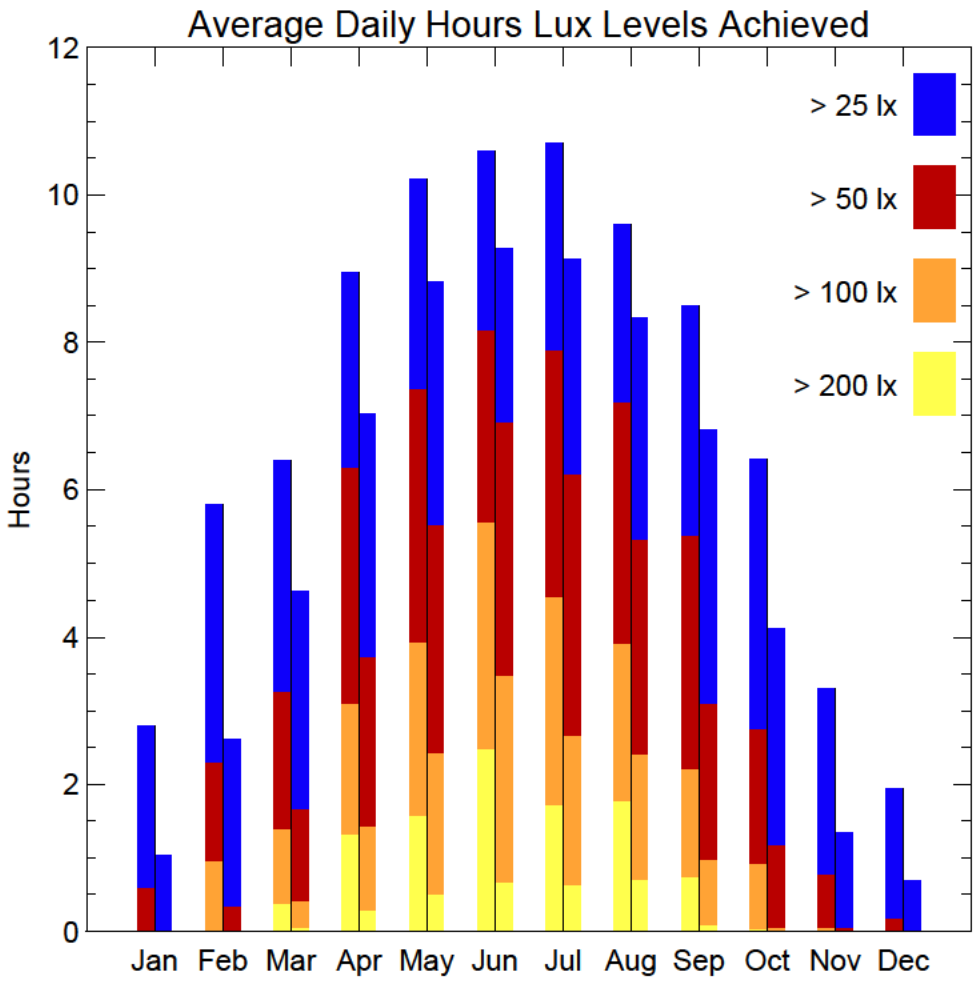

Figure 3: Typical daily hours lux levels achieved. Monitoring period 26th February 2022 to 2nd April 2024

2.4 The Importance of Reflected Sunlight

It was revealing to compare the measured internal illuminance values with simultaneous data for the sun and sky conditions at the same location. The external condition data used were global horizontal irradiation, diffuse horizontal irradiation and beam normal irradiation at 15 minute intervals for the entire monitoring period to date. The global and diffuse horizontal irradiation data were sourced from the Copernicus Atmosphere Monitoring Service (CAMS). This service provides freely available satellite-derived radiation data covering Europe, Africa, the Middle East and parts of South America at various time resolutions. The period of record is February 2004 to the present day (with up to two days delay). CAMS satellite irradiation data has undergone numerous validation studies and shown to be a reliable indicator of conditions on the ground.[4,5]

CAMS irradiation data for the precise latitude/ longitude coordinates of the Synagogue were

[4] German Salazar et al. "Solar irradiance time series derived from high-quality measurements, satellite-based models, and reanalyses at a near-equatorial site in Brazil". In: *Renewable and Sustainable Energy Reviews* 117 (2020), p. 109478.

[5] Laurent Vuilleumier et al. "Accuracy of satellite-derived solar direct irradiance in Southern Spain and Switzerland". In: *International Journal of Remote Sensing* 41.22 (2020), pp. 8808–8838.

downloaded from the Solar Radiation And Meteorological Data Services website.[6] The CAMS irradiation data for the duration of the monitoring period (26th February 2022 to 2nd April 2024) were converted to illuminance values using the Perez luminous efficacy models. Global horizontal illuminance (GHI) is a measure of the total light from the sun and sky received by an (unobstructed) horizontal surface. Diffuse horizontal illuminance (DHI) is the same as global horizontal illuminance but excluding the contribution of solar radiation. When the two quantities are plotted, the amount by which GHI is greater than DHI indicates the degree of sunniness. A bell-shaped curve for GHI indicates largely clear sky conditions throughout the day. If however the lines of GHI and DHI overlap (i.e. when GHI equals DHI), this indicates that the sky at that time was largely overcast with no significant solar contribution, i.e. GHI ≃ DHI. The beam normal illuminance (BNI) is a measure of the direct sun intensity measured normal to the direction of the sun. The BNI can often exceed GHI on clear days at times when the sun altitude is low – and thus its contribution to horizontal illuminance is small compared to its intensity measured normal to the beam.

Our use of the CAMS-derived illuminance data is illustrative. However, examination of the correspondence between the internal daylight levels and the (external) illumination levels confirmed our hypothesis that reflected sunlight makes a significant contribution to the daylight inside the Synagogue. And also that the effect is important throughout the year. An example plot of the data collected on 8th May 2022 is used to illustrate the substantial contribution of reflected sunlight to the internal daylight levels in the synagogue, Figure 4. The red and the blue lines show the illuminance measured at points BM1 and BM2, respectively, at 5 minute intervals. The time axis shows GMT.

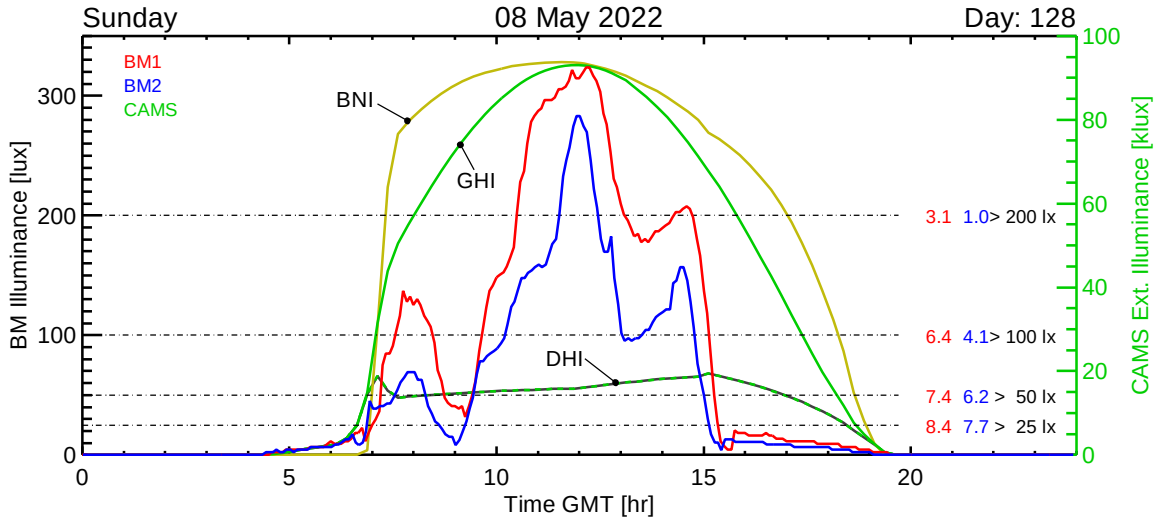

Figure 4: Example data plot for 8th May 2022. The external sun and sky conditions-derived from satellite data-are indicated by the green and yellow lines. The solid green line shows the global horizontal illuminance (GHI), and the dashed green/grey line shows the diffuse horizontal illuminance (DHI). The yellow line shows the beam normal illuminance (BNI).

For this bright day, the maximum recorded illuminances were ~320lux (BM 1) and ~280lux (BM 2), at the same time around 12:00. The key illuminance values are indicated by horizontal dashed lines. The CAM S-derived external illumination data is over-plotted using the same time axis, however the scale used is now the right-hand y-axis in green, with units of klux, i.e. thousands of lux. For this day, The peak GHI (and, coincidently, peak BNI) were both ~95klux (i.e. ~95,000lux) around noon. W hereas DHI (the illuminance from the sky only on

[6] https://www.tsv.soda-pro.com

thehorizontal) was ~20,000lux. Thedata showsthat thiswasa largely clear, sunny day with just a small degree of cloud around dawn (07:00). All 767 daily plots of illuminance measurements in the Synagogue showing also the satellite-derived external illuminance conditions are presented in Appendix B of the report.[7]

A conspicuous feature evident on many of the sunny days (see Appendix B) is a large dip in both internal light level readings around 08:30 to 10:00, followed by another rise. This distinct dip is quite broad (lasting approximately two hours) and does not result from reduced external irradiation – GHI is steadily increasing until around noon. Instead, it is evident that this feature results from the progression of the path of the sun and its interaction with the surrounding buildings. It appears that, on this day from around 06:00 and until 08:00, the Synagogue receives reflected sunlight from the surrounding buildings. Then, between 08:30 and 09:30, the reflected sunlight decreases to a minimum because the sun is being blocked by a nearby surrounding building – One Creechurch Place (~80m tall from ground level). Thereafter, when the sun has progressed past the obstructing building, the reflected sunlight increases as rapidly in the next hour as it declined in the previous hour. Such a persistent feature cannot be explained by random variations such as cloud patterns, etc.

This assertion is confirmed by examining the internal illuminance plot (Figure 4) alongside simulated time-lapse images for that day which show the progression of sunlight and shadow around the immediate vicinity of the Synagogue. The illustration given in Figure 5 shows renderings of the shadow patterns for the hours 08:00, 09:00 and 10:00.[8] These renderings reveal the important contribution of reflected light from the immediate surroundings to the daylight levels in the Synagogue. At 08:00 the shadow cast by One Creechurch Place has begun to encroach on the Synagogue courtyard, and the measured daylight levels begin to decline steeply. At around 09:00 the shadow cast by One Creechurch Place results in the maximum reduction in daylight levels recorded at both locations in the Synagogue: below 50lux for BM1 and below 25lux for BM2. At 10:00 the shadow cast by One Creechurch Place begins to recede from the courtyard, and the illuminance levels measured in the Synagogue begin to rise steeply, eventually attaining values around 300lux each.

The example above showing the overshadowing effect of One Creechurch Place on daylight levels in the Synagogue can be used to illustrate the likely effect that (proposed building) 31 Bury Street would have on Synagogue daylight levels on a similarly clear day during the middle of the year. The illustration is shown in Figure 6 using the same presentation to that employed for One Creechurch Place. For 31 Bury Street, its shadow would begin to encroach on the Synagogue courtyard area around 11:00, and between 12:00–13:00 the courtyard area is heavily shaded. By 14:00 the shadow from 31 Bury Street has largely receded from the Synagogue courtyard area. The illuminance plot used previously is repeated, but now the likely effect on the measured daylight levels at BM1 and BM2 (caused by 31 Bury Street) has been illustrated by superposing on the BM1/ BM2 lines 'best guess' estimates indicating how they might change – magenta curve for BM1, cyan curve for BM2. The *actual* degree of light reduction could be less or greater than that shown – but, given the similarities with the example of One Creechurch Place, it is likely to be of that order. The same data for BM1 and BM2 are shown disaggregated (with the less significant details removed) in Figures 7 and 8, respectively.

The contribution of reflected sunlight might appear to be a subtle aspect of the daylight dynamics in the Synagogue. However, it is revealing of a wider reality that the *prevailing* (i.e. yearly) daylight in Bevis Marks depends overwhelmingly on reflected sunlight and skylight from nearby building surfaces. Consequently, any reduction of the daylight provision in the Synagogue that might result from additional overshadowing can therefore only be assessed using a computer simulation technique that accounts adequately for reflected sunlight and skylight.

[7] Note, two versions of the report have been prepared: with and without the 64 pages containing the 767 daily plots.

[8] The shadow pattern images were generated using the VuCity software and supplied with permission for use by HGH Consulting.

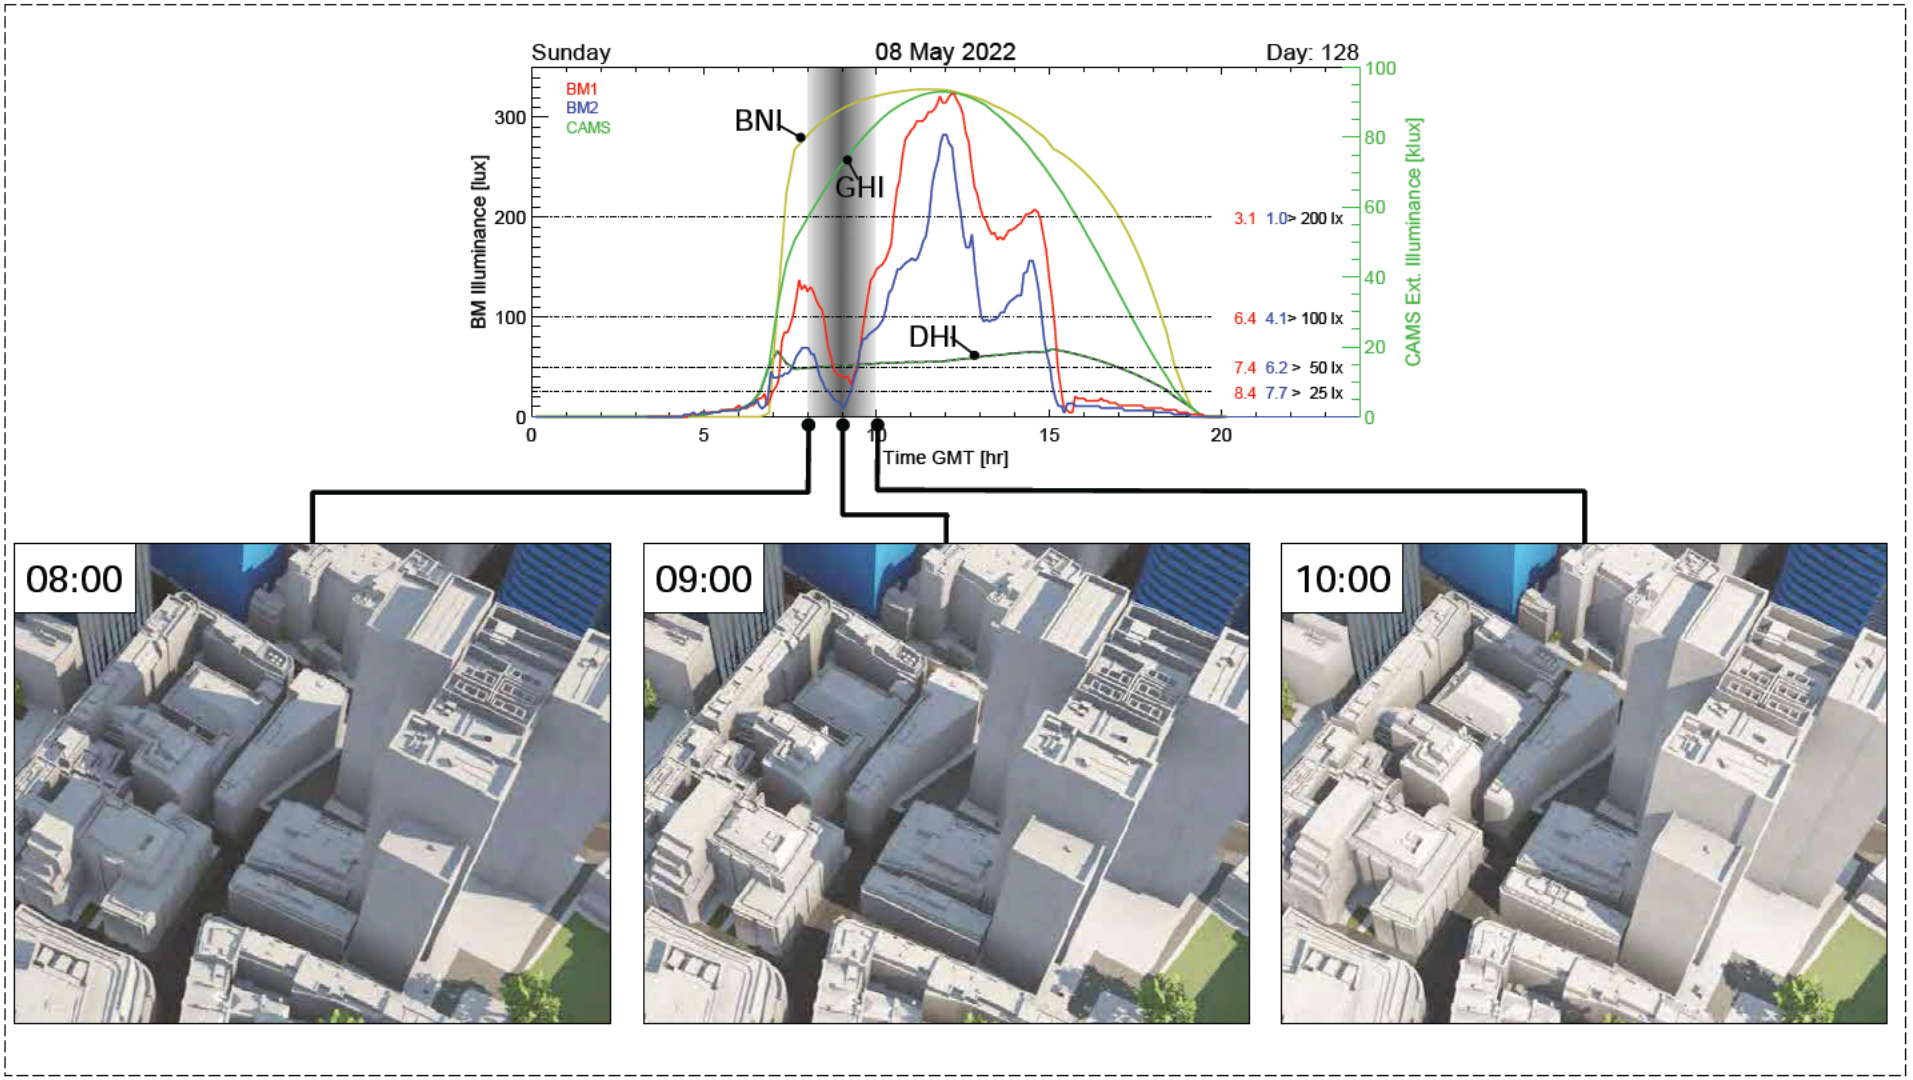

Figure 5: Renderings showing the progression of shadow cast by One Creechurch Place on Bevis Marks for a clear sky day (8th May) between the hours 08:00 and 10:00 (GMT). The significant effect of the overshadowing on measured Bevis Marks illuminance levels is readily apparant.

3 Predicting Daylight Levels in Bevis Marks

As noted in the Executive Summary, the reduction in daylight provision to the Synagogue caused by any proposed development(s) can only be estimated using a realistic prediction method which minimises uncertainty in the outcome. In other words, the prediction method used must be able to faithfully model the prevailing nature of the daylight levels experienced by the occupants of the synagogue – and as proven by direct measurement.

Commonly used prediction methods employed by surveyors at the planning stage do not model actual daylight levels, i.e. illuminance lux levels. Instead, they model various proxies of daylight provision under enormously simplified conditions. For example, a single unchanging sky condition (uniform or standard overcast brightness pattern) with no contribution from sunlight. These methods do not predict absolute levels of illuminance (e.g. as measured in the Synagogue), instead they predict percentage ratios. The basis and intrinsic limitations of these methods are described in Appendix A.

3.1 Climate-Based Daylight Modelling

In the mid to late 1990s, Mardaljevic developed and validated a daylight simulation approach that would later become known as Climate-Based Daylight Modelling, or CBDM.[9,10] The CBDM 'engine' developed by Mardaljevic was founded on the *Radiance* Lighting Simulation System.[11] Although lacking a formal definition, CBDM is widely taken to be the prediction of any luminous quantity (illuminance and/ or luminance) using realistic sun and sky conditions derived from standardised climate data, i.e. hourly annual weather files. Thus, CBDM predicts annual profiles of absolute quantities, such as illuminance, which are directly comparable to what can be measured in buildings. For example, with a suitably detailed 3D model, it would be possible to predict daylight levels at points in the Synagogue, and then process the annual simulation data to produce plots of daylight provision similar/ identical to that shown in Figure 3.

The widespread adoption of the *Radiance* lighting simulation system[12] and, ultimately, CBDM was due in part to the outcomes from validation studies which demonstrated quite remarkable prediction accuracy, e.g. within ±10% of measured values.[13] Around this time, the accuracy of physical scale models for daylight assessment was called into question, with validation studies showing large discrepancies between illuminances measured in a scale model and the full-size building under the same conditions.[14] CBDM as a tool for practical application steadily gained traction during the first decade of the millennium. Landmark projects such as daylighting the New York Times Building[15] and the Central Park Tower daylight injury evaluation[16] (also in New York) helped to demonstrate the potential of this powerful new technique.

In 2013 the UK Education Funding Agency (EFA) made CBDM a mandatory requirement for the evaluation of designs submitted for the Priority Schools Building Programme (PSBP). School designs submitted to the PSBP must achieve certain 'target' criteria for the useful daylight illuminance metric. This was believed to be the first major upgrade to mandatory daylight

[9] J. Mardaljevic. "Simulation of annual daylighting profiles for internal illuminance". In: *Lighting Research and Technology* 32.3(2000),pp.111–118.

[10] Working independently and a little later, Christoph Reinhart also developed a similar technique, but with a different formulation and, arguably, less rigorously validated.

requirements since the introduction of the daylight factor more than half a century ago. In the US, a climate-based daylight metric approved by the IESNA has appeared in the latest version of LEED. The 2018 European Standard for Daylight in Buildings (EN 17037) is the first major standard where the basis for daylight assessment is founded on the annual occurrence of absolute measures of illuminance.[17] This marked a step-change from the traditional daylight factor approach. To assess the daylighting performance of a building design against EN 17037 criteria, the evaluated spaces are rated in terms of the spatial extent and the (CBDM predicted) degree of occurrence of target illuminance values as a fraction of the daylit year.

3.2 Outline CBDM Evaluation of Bevis Marks

In September 2021 we carried out climate-based daylight modelling (CBDM) simulations of an approximate scenario based on the Synagogue and its current surroundings. A 3D model of the Synagogue was created based on detailed drawings, and the nearby buildings estimated to create a simple 'massing' model for the surroundings. The 3D model therefore should be considered to be an approximation until a 3D laser scan of the Synagogue is carried out and a detailed massing model acquired. Accordingly, the CBDM results generated using this 3D model should be considered as illustrative until more accurate building geometry is available. Nevertheless, we believe the 3D model is sufficient to reveal 'broad brush' characteristics of the daylight illumination in the Synagogue. More importantly, the findings support our assertion that the methods commonly used to assess daylight provision in buildings – both for rights of light and planning – are not applicable for the particular case of Bevis Marks because they cannot adequately reveal the *actual* degree of daylight loss resulting from the proposed developments. The rationale for our assertion – given below – necessitates an appreciation of the distinction between directly received light (from the sun or sky) and indirectly received light, i.e. that which arrives from the sun or sky following multiple reflections.

The quantity referred to here as the total annual illumination (TAI) is a measure of all the daylight illumination received at a point in a building for a period of a full year. It is a useful summary metric since it reveals the totality of daylight illumination – from the sun and sky – over a representative period of a full year. Total annual illumination is one of the many metrics that can be predicted using CBDM to indicate the daylighting performance of a space. The CBDM formulation used here is a research-grade daylight simulation tool developed by Mardaljevic and known as the 4 Component Method (4CM). This tool is widely regarded to be the most rigorously validated of all daylight simulation tools, and so serves as a benchmark to assess the accuracy of other CBDM formulations. The 4 Component Method is called so because it predicts, at a point in a space, the total daylight in terms of its four components:

i. Direct sun – light that arrives directly from the sun (usually through a window).
ii. Indirect sun – light from the sun that arrives following one or more reflections, usually from both external (e.g. surrounding buildings, ground, etc.) and internal surfaces (e.g. walls, ceilings, etc.).
iii. Direct sky – light that arrives directly from the sky (usually through a window).
iv. Indirect sky – light from the sky that arrives following one or more reflections, usually from both external (e.g. surrounding buildings, ground, etc.) and internal surfaces (e.g. walls, ceilings, etc.).

Analysing the CBDM predictions for TAI in terms of the four components can, depending on the scenario, greatly enhance the understanding the importance of the various light transfer mechanisms, and how they contribute to the light experienced by the occupants of a building.

The TAI predictions for the core of the Synagogue revealed that around ~1% of the daylight received over a full year was that arriving directly from the sky, no direct sunlight at all was received. Thus, ~99% of the daylight illuminating the core of the synagogue is light from the sun

[17] European Committee for Standardization. *EN 17037:2018 - Daylight in Buildings*.2018.

and the sky reflected off adjacent buildings. Of the reflected light illuminating the core of the Synagogue, about 3/5 iscomprised of reflected skylight and theremaining 2/5 by reflected sunlight. We would expect a fully detailed 3D model to give some variation in the relative amounts of the illumination components. However, even if the total of the direct components were predicted to be several times greater, say, 5%, it would not alter the key finding that daylight illumination is dominated by *reflected* light – originating from the sun and the sky in roughly equal proportions. Note, walking around the core of the Synagogue, at best only tiny slivers of sky are directly visible through the windows. Thus, the potential for direct illumination by skylight is very small indeed, and for direct sunlight it must be negligible/ zero. And since the estimated massing model of the surroundings was partial, it is not improbable that the direct components of total daylight in the core of the Synagogue could amount to even less than the ~1% predicted by the illustrative model.

4 Conclusions

4.1 Daylight Measurement

The following assertions can be made from the daylight monitoring evidence collected between 26th February2022and2nd April 2024:

a) The measured daylight levels support the claim made by the users of the Synagogue that it is experienced as functionally daylit space for the majority of the months of the year.

b) The daylight levels during the winter months, however, are often only barely exceeding the threshold needed to perform visual tasks, e.g. reading, appreciation of the space, etc.

c) The measured data supports our observations from site visits that daylight in the core of the Synagogue is comprised almost entirely of reflected light. Reflected sunlight makes a significant contribution to the prevailing daylight levels in the Synagogue, even on partially sunny days which occur much more often than entirely clear-sky days.

It is reasonable therefore to describe the prevailing daylight provision in the Synagogue at present as being at or very close to a 'tipping point'. Consequently, any additional reduction in daylight provision caused by the proposed developments carries the significant risk that the prevailing daylight levels inside the Synagogue could be pushed beyond this 'tipping point', with the Synagogue ceasing to be a *functionally daylit* space.W erethattohappen,itcouldprofoundlyaffect thecharacter,perception and useofthespace–bringingintoquestion thecontinued survival oftheonly Synagoguein Europetohaveheld regularservicescontinuously formorethan 300 years.

4.2 Daylight Prediction

Theevidencecollected during themonitoring campaign clearly demonstratesthat theonly way to reliably predict the daylight loss due to proposed developments is to use Climate Based Daylight Modelling (CBDM). In contrast to the traditionally used methods (see Appendix A), CBDM has the potential to reliably predict the totality of daylight illumination – including the important reflected sun and sky contributions – over representative periods of at least a full year.

Statement of Compliance and Declaration

The authors of this report have prepared it in compliance with norms expected for an expert witness, including possible use of the material in court:

I. We confirm that our report includes all facts which we regard as being relevant to the opinions which we have expressed, and that attention has been drawn to any matter which would affect the validity of those opinions.

II. We confirm that our duty to the Court (should it become a legal matter) as expert witness overrides any duty to those instructing or paying us, that we have understood this duty and complied with it in giving my evidence impartially and objectively, and that we will continue to comply with that duty as required.

III. We confirm that we are not instructed under any conditional fee arrangement.

IV. We confirm that we have no conflicts of interest of any kind other than those already disclosed in my report.

V. We confirm that our report complies with the expected norms for academic practice with regard to acting as Expert Witness.

VI. We confirm that, insofar as the facts stated in our report are within our knowledge, we have made clear which they are and we believe them to be true, and that the opinions we have expressed represent our true and complete professional opinion.

VII. We aware of the requirements of CPR Part 35, practice direction 35 and the Guidance for the Instruction of Experts in Civil Claims 2014.

A.1 Waldram, Trotter and the daylight factor

Quantitative measures of daylighting provision evolved from the methods devised in the 19th century to determine some objective basis for the degree of daylight injury (that is, reduced daylight illumination) caused to an existing space by the introduction of some obstruction, e.g. a new building. The Prescription Act 1832 provides for the creation of a right to light where light has been enjoyed for the period of 20 years before a claim to the easement is made.[18] Once a right to light (with regard to a particular window) is determined to exist, the owner of the right is entitled to *"sufficient light according to the ordinary notions of mankind"*. Whilstthe1832 Actessentiallyenshrined in Common Law thenotion ofa'righttolight',thedetermination of whatconstitutesan *"ordinary notion"* of sufficiency was, initially, largely a matter of judgement supplemented by rough rules of thumb such as the 45° rule, i.e. the vertical angle of sky visible at the centre of the window. The attempts to systematise the assessment of daylight injury date back to at least 1865.[19]

In the 1920s, Percy Waldram determined what was intended to be a precise and objective measure of an *"ordinary notion"* of sufficiency for daylight illumination. This was based on measurements of daylight illumination in buildings combined with subjective determination of sufficiency by a jury of experts. From this study, Waldram determined the so-called "grumble point", i.e. the point in a space at the boundary between sufficient and insufficient daylight from a window. The "grumble point" was defined in terms of the illumination received at that boundary as a percentage of the unobstructed horizontal illumination from a notional average (assumed uniform luminance) sky. The percentage value at the "grumble point" was determined by Waldram's jury to be 0.2%. For practical application of Waldram's "grumble point" in 'rights of light' disputes, surveyorscommonly apply the"50/ 50 rule" to determineif a spaceisadequately daylit, i.e. no more than half of the space at table-top height should receive less than 0.2% of the sky illumination. Additionally, the percentage value is referred to as the sky factor since, for evaluation purposes, it is a measure of the illumination on a horizontal surface resulting from any direct view of a uniform luminance sky, expressed as a percentage of the horizontal illumination from an unobstructed view of the sky. Neither reflected light nor attenuation from any glazing are accounted for in the 'rights to light' schema.

Whilst Waldram's work is widely credited as providing the basis for the daylight factor, it appears that the idea of using a ratio between inside and outside was first proposed in 1895 by Alexander Pelham Trotter (1857–1947).[20] Theoriginsofthedaylightfactor(DF)areactually somewhathazy sincetheredoesnotappeartohavebeen aseminalpaperintroducingtheap-proach.Thereferencetoitsintroductionin1895appearstobeanecdotalandrecalledanumber ofyearslater.Thedaylightfactorwasconceived asameansofratingdaylightingperformance

[18] ThePrescriptionAct1832."(Regnal.2and3W ill4)".In: *The Stationery Office, London* (1832).

[19] R.M. Kerr. *On Ancient Lights: And the Evidence of Surveyors Thereon : with Tables for the Measurement of Obstructions*.J.M urray,London,1865.

[20] J. A. Love. "The evolution of performance indicators for the evaluation of daylighting systems". In: *Industry Applications Society Annual Meeting, 1992., Conference Record of the 1992 IEEE* (1992), 1830–1836 vol.2.

independently of the actually occurring, instantaneous sky conditions. Hence the daylight factor DF was defined as the ratio of the internal horizontal illuminance E_{in} to the unobstructed (external) horizontal illuminance E_{out}, usually expressed as a percentage:

$$DF = \frac{E_{in}}{E_{out}} 100\% \quad (1)$$

However, the external conditions still need to be defined since the luminance distribution of the sky will influence the value of the ratio. At the time that the daylight factor was first proposed it was assumed that heavily overcast skies exhibited only moderate variation in brightness across the sky dome, and so they could be considered to be of constant (that is, uniform) luminance. The assumption of a uniform sky is, of course, in keeping with the notion of rating the performance independently of sky conditions. In the second half of the 20th Century the daylight factor formulation switched from using the uniform sky to the CIE Standard Overcast Sky.

A.2 Absolute and relative values of illumination

In a 1937 paper P. J. Waldram claimed that: *"The eye is affected by ratio only, and is scarcely aware of huge variations in amount."*.[21] The evidence for this was based on an assessment of the daylight adequacy of 20 spaces carried on both a "bright day" and a "dull day" by a 'jury' of six members (i.e. the data used previously to determine the "grumble point"). Waldram's claim appears to have become the foundation for what is now an 'article of faith' among stanumber of practitioners, i.e. that there is no need to make any consideration of absolute values – the daylight factor ratio is all that is required. Waldram's assertion and the evidence in support of it were examined in a 1955 CIE paper by R.O. Phillips.[22] Phillips notes that:

> *If this investigation did, in fact, support the view that the daylight factor is more important than the actual illumination in determining the adequacy of the lighting, then the values of the daylight factor determined would be substantially the same on both types of day. If on the other hand, it is the illumination which is the more important, a higher value of the daylight factor would be required on a dull day that on a bright one.*

The original report of the 'jury' findings presented by Waldram included the curve shown in Figure A1. This was intended to "*summarise the results concisely and to deduce a figure of daylight factor which may fairly be said to represent the average opinion of the observers*".[23] Phillips decomposes this curve into the data taken on the bright and dull days respectively. They clearly show different distributions, with a marked preference for a higher daylight factor value on a dull day compared to a bright one: the means were 0.20% (dull day) and 0.09% (bright day). Applying a paired *t*-test on the data, Phillips notes that: "*Since such a value could only arise by chance once in several millions of cases, the hypothesis that there is no difference must logically be rejected*". In short, Phillips' analysis of the data makes the convincing case that, contrary to Waldram's assertion, the subjects were in fact expressing a preference for adequate absolute daylight levels rather than relative ones (i.e. daylight factors).

Phillips' paper is potentially of great significance since it offers a robust challenge to a rarely unquestioned assertion that has long been held as a fundamental tenet of daylighting design/ evaluation. That is being so, a question presents itself: why has this paper been consigned to near-obscurity? This finding from the Phillip's paper is included here because Waldram's assertion has been so influential that it has framed much of the development of methodologies for the evaluation and testing of daylight performance in spaces. In particular for the case of

[21] P. J. Waldram. "Measuring and predetermining daylight illumination". In: *The Builder* (1937), p. 598.

[22] R. O. Phillips. "An historical outline of the concepts and terminology of daylight". In: *Proc. CIE v2, Zurich, Switzerland* (1955).

[23] Ibid.

Bevis Marks, the preference for *higher* levels of absolute illumination (say, 100lx rather than 25lx) would appear to be in accord with what was *actually* determined by Waldram's 'jury'.

It needs to be recalled that, at the time that Waldram's jury carried the assessments, notions of illumination adequacy were very different from what they are today. However, that consideration does not alter the significance of Phillips' re-evaluation of the Waldram study. This and related studies by Waldram also serve as the basis for the "rights to light" schema devised for the determination of daylight injury. In recent years the methodology employed by Waldram has been severely critiqued in a number of papers.[24,25,26,27]

B Daily Plots of Illuminance Data

DESCRIPTION ONLY – SEE COMPLETE REPORT FOR THE DAILY PLOTS

Appendix B presents all 767 complete days of monitoring data recorded between 26th February 2022 and 2nd April 2024 by logging meters BM1 and BM2. Data are presented where there is a complete day for either one or both of the meters. For the first period of monitoring, 26th February 2022 to 7th June 2022, the contribution of electric lighting used by contractors during maintenance work was subtracted from the values recorded by BM1 and BM2. For the remaining period, it can be seen that a number of days show the small contribution (~10lux) of electric lighting at various times. This will have a small effect (i.e. slight 'uplift') on the results presented in Section 2.

As described in Section 2.4, the plots also contain illustrative external illuminance conditions (GHI, DHI and BNI) derived from satellite remote sensing.

Appendix 2 - Response to GIA Lunar Study

the S&P HARDI community Bevis Marks

Planning application ref. 24/00021/FULEIA; proposed 43 storey tower at 31 Bury Street

Response to the Lunar Transit Study and Additional Information produced by GIA

14 November 2024

Rabbi Shalom Morris

Rabbi, Bevis Marks Synagogue

PhD Candidate, King's College London, Dept of History

Introduction

This note sets out the findings of a review of the ‘Lunar Transit Study’ and ‘Additional Information’ produced by GIA (12 Sept and 17 Oct respectively). It is beyond the scope of this report to consider the validity of the data provided by GIA. However we reserve the right to later interrogate this data in more detail, should this be necessary.

Our review of the data provided found that significant harm will come to the Bevis Marks Synagogue should the planning application be approved.

GIA’s report attempts to demonstrate that the harm caused to the Bevis Marks Synagogue would be negligible. However, this conclusion does not stand up to scrutiny in light of the nature of the Kiddush Levana ritual. The fundamental point is that the prayer is recited once each month after nightfall, when the waxing moon is visible. While GIA’s findings give the impression of negligible change in the current conditions, this outcome is rooted in their considering the impact of the proposal on views of the moon throughout the entire lunar transit, from moonrise to moonset, over an eighteen year cycle.

GIA’s 'wide-net’ analysis not only skews their results, it also fails to consider the month on month practical impact of the proposed tower on the ability of the community to worship, which would be significant. The proposed tower would lead to the cessation of the synagogue’s ritual several months a year, and further degrade the community’s ability to worship in the remaining months.

This determination has been corroborated by the BRE’s independent review of the GIA report (commissioned by City of London Corporation, 4 Nov)) and will be referred to in further detail in our conclusion.

We therefore ask that officers carefully consider the analysis presented below when considering this application, taking special account of the equality impacts of it on the Jewish community.

Rabbi Shalom Morris

Bevis Marks Synagogue

14 November 2024

Kiddush Levana

What follows in this section is a description of the:

1.Kiddush Levana prayer and ritual.

2.What is unique about its recital in the traditions of Bevis Marks Synagogue.

3.How the ritual has been recorded and altered in Europe, highlighting:

1.The relationship between the ritual and synagogue.

2.The impact of unpredictable climactic conditions.

Kiddush Levana in Judaism

Judaism's calendar is lunar, linking Jewish practices and festivals each month throughout the year to the moon's cycle. The appearance the new moon is:

1.Anticipated with a prayer on the Sabbath prior (Kiddush Hahodesh)

2.Celebrated upon its return (Rosh Hodesh)

3.Marked with a prayer of renewal (Kiddush Levana)

Kiddish Levana is Hebrew for 'Sanctification of the Moon,' and is a prayer recited each month by Jews. The prayer is a call for renewal, hence the link to the new moon which is becoming increasing visible during this part of the month. Therefore, the prayer is said when the waxing moon in visible in the night sky, commonly from day 3 to 15 of thus he lunar cycle.

The prayer is recited whilst standing outside, under an open sky, and requires sight of the moon. If the moon is blocked by either buildings or clouds, the prayer cannot be recited. However, if the moon is visible through a cloud, one can still recite the prayer.

Kiddush Levana takes about fifteen minutes to recite. It is typically recited following the evening service at a synagogue, so that it can be said with a prayer quorum. It is ideally also recited on a Saturday night when the congregation is still wearing their Sabbath finest.

Kiddush Levana is only recited from day ten in the Hebrew month of Av (typically July/ August), and from the 11th in Tishri (typically September/October), on account of the mourning/repentance that takes place during the first days of those months. This is because the prayer is meant to be recited whilst in a joyous spirit. In contrast, as the prayer is considered to be a petition, it is generally avoided on the eves of Sabbaths and Festivals when petition prayers are considered inappropriate.

Kiddush Levana at Bevis Marks Synagogue

Kiddush Levana has been practiced in the Bevis Marks Synagogue community since the 1600s. Evidence of this can be found in several Jewish sources.

1.Rabbi Jacob Sasportas, first rabbi of the London community (1663), writes of the practice in his Responsa *Ohel Yaakob* (67).

2.The prayer is included in the first Hebrew/ English Spanish & Portuguese (Sephardi) prayer book published by Alex Alexander in England in 1772 (pg 202).

3.David Aaron de Sola, reader of the Bevis Marks Synagogue congregation, includes the prayer in his 'Book of Blessings' published in 1829.

4.Rabbi Shemtob Gaguin, Chief Judge of the Spanish & Portuguese Jewish community in London includes discussions of the community's Kiddush Levana traditions in his work 1934 Keter Shem Tob (Vol 2.)

There are several particular traditions in Bevis Marks Synagogue with respect to Kiddush Levana. These peculiarities reinforce the risk posed to the congregation's unique cultural heritage should a development be approved that interferes with the community's worship.

1.At Bevis Marks Synagogue Kiddush Levana is *ideally* said from day seven of the lunar cycle until the middle of the month, as the moon is giving off more light in the second quarter of its cycle than it does at day 3, thereby giving more meaning to the prayer of renewal. See *The blessings, or, Expressions of praise and thanksgiving said by all Israelites on various occasions with an interlineary translation* published in 1829 by Bevis Marks Synagogue minister David Aaron de Sola (page 83). This is in accordance with the ruling of the authoritative R Yosef Karo (Shulhan Arukh), who along with the rest of the Iberian Jewish community was expelled from Spain in 1492. When climactic conditions are difficult, it is permitted to recite even from day 3.

2. Furthermore, in departure from other Jewish communities, there are nuances to the liturgy of the prayer, as well as the absence of certain mystical repetitions. See *Keter Shem Tob* by Rabbi Shemtob Gaguine, chief judge of the of the London Spanish & Portuguese Jewish community in the first half of the twentieth century (Part 2:1). This reflects the authentic Iberian tradition of Sephardi Judaism that is preserved at Bevis Marks Synagogue.

3. Finally, in the tradition of Bevis Marks Synagogue the prayer is called 'Birkat Levana', the 'Blessing of the Moon', and not 'Sanctification' or 'Kiddush' as it is more commonly called.

Germany 1726
Georg Puschner from Kirchners Judisches Ceremoniel

Kiddush Levana in European History

The peculiarity of this Jewish tradition caught the attention of European observers of Judaism during the early modern era. This can be seen in both visual and literary depictions. Indeed, the European context also influenced the practice and meaning of this ritual.

As stated above, the Kiddush Levana prayer is typically recited following the evening prayers whilst standing outside of the synagogue. This is depicted in historical drawing and prints of the ritual being performed in Europe in the seventeenth and eighteenth century, the years when Bevis Marks Synagogue was established. This reflects the relationship between the prayer and synagogue.

1695 Amsterdam
Haggadah

Literary observers of Judaism also recorded the tradition. The following account by English Christian religious writer John Allen in his 1816 work *Modern Judaism; or a Brief Account of the Opinions, Traditions, Rites, and Ceremonies of the Jews in Modern Times*, depicts the ritual with scorn (pg 379).

'On the first Saturday evening in the month, if the moon is then visible, or on the first evening after, when the sky is bright enough to have a clear view of her, the Jews assemble in the open air, for what is called "the consecration of the new-moon:" when some grave rabbi pronounces the following. benediction, in which he is joined by all the company…'.

Furthermore, the variability of weather patterns in Europe, became a central to the relationship of European Jews to the meaning of the prayer. For European Jews, cloud cover, a common concern, was seen as a bad omen, whilst a clear night was considered a positive sign, as the prayer for renewal could then be recited.

Finally, proximity in the northern hemisphere has made the recital of 'Kiddush Levana' notoriously difficult in locations like England during July and August with it short summer nights and associated lower arc of the moon.

The GIA Report

GIA's report was carried out on behalf the applicant to consider the impact of the proposed redevelopment on the synagogue's worshipping community's ability to recite the monthly prayer Kiddush Levana which requires sight of the moon. The report considers views of the moon from two positions, N and P, as well as during both the major and minor lunistices.

In analysing the data, GIA concludes that at the current baseline the synagogue only retains views of 2.2% of the lunar arc during a major lunistice. With the proposed building and previously approved buildings, this would decrease to 1.3%. These numbers take into account average atmospheric conditions which include cloudy skies. Slight variations to these results based upon major or minor lunistices and position P or N can be found in GIA's Table 01.

This note questions the data assumptions used by GIA to reach their percentage conclusions, the relevance of climatic conditions in their analysis, and mostly importantly considers the overall impact on ability of the community to continue to recite the Kiddush Levana prayer.

Climate Conditions

The Kiddush Levana prayer can only be recited when the moon is visible. Therefore, if obstructed by clouds or buildings, the prayer cannot be recited. Based upon the website https:// weatherspark.com GIA reported (pg 7) that London has cloudy conditions 58% of the time. As a result, they conclude that while in position N the moon should be visible 5.1% of the time, in practice this is likely to only be the case 2.2% of the time.

This conclusion is not robust. In practice cloud is not a "black or white" matter. Sometimes clouds are patchy; sometimes the moon can be seen behind a veil of cloud; furthermore, climate change is a dynamic and present consideration. In contrast, buildings are fixed. In other words, sometimes it is cloudy, sometimes it is not, but once a building is constructed, for all intents and purposes it becomes perpetually 'cloudy' with respect to the lunar visibility. The possibility of cloudy skies should therefore not be considered relevant when considering the impact of perpetually reducing lunar views. A comparison may be made with trees: in planning, trees are disregarded when visual impacts are assessed, because they are impermanent.

Beyond this, the variability of climate conditions themselves plays an important role in the Kiddush Levana ritual. Jews go outside after dark to see whether or not the moon is visible, whereupon a cloudy sky is considered to be a bad omen, and a clear sky a positive one, as it allows for the prayer to be recited. The fixed reduction of visibility by the proposed tower would be a permanent obstruction, removing this variability which is central to the meaning of the ritual.

Furthermore, as reciting the prayer takes approximately a quarter of an hour, the preservation of sufficient unobstructed sky allows for the possibility that any cloud cover will pass, thus enabling the prayer to be recited despite earlier cloudy conditions. This would not be the case should the view be obstructed by a permanent building.

GIA Percentages

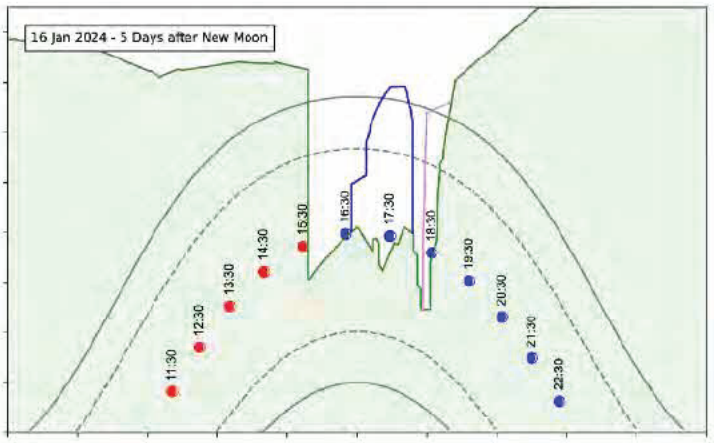
GIA concludes (pg 37) *'Additional obstructions in the Future Baseline and Cumulative scenarios will lead to a small absolute reduction in visibility of the lunar bracelet*.' This conclusion, without critiquing the method of analysis itself, is highly misleading. The data provided allows for different percentage conclusions to be reached, depending on which data is considered. In GIA's instance, they've stated (pg 3): '*In order to capture all possible lunar position across the sky, a period of 18.6 years has been studied. This is the length of time needed to conclude a full lunar cycle. All possible locations of the moon's passage have been captured within a lunar bracelet depicted in the sky (see* fig *.1). Once the obstructions already visible from the Synagogue's courtyard are considered, once the passage of the moon during daylight hours are discounted, and the probability of cloudy skies taken into account, the opportunities to see the moon's passage to recite "Kiddush Levana" are limited to 2.2% of the time over 18.6 years*'.

In other words, GIA's percentages are based upon all potential visibility of the moon over the horizon throughout the night sky during this 18.6 year window. In very few settings would the moon ever remain visible constantly throughout this time as any buildings, or landscape features, would reduce this visibility. Of greater consequence is consideration of the amount of time the moon is visible over the Bevis Marks Synagogue, and what impact would the proposed tower have on it.

In this respect, according to GIA the reduction from the current baseline to the future conditions, would be a decrease of 41% - nearly half - marking a very significant reduction in lunar visibility for the synagogue community.

Level of Obstruction

GIA state "*During a minor lunistice, the opportunities of seeing the passage of the moon above the Synagogue are further reduced to 1.8% of the lunar bracelet, owing to the lower transit of the moon in the sky. This means that the passage of the moon will not be visible above the Synagogue's sky, for most months each year.*"



GIA furthermore claim "*during each observation period, the lunar transition will be remain observable, assuming that it would have been in the Baseline scenario, even with the consented 100 Leadenhall and the proposed 1-4, 31-34 Bury Street in place.*"

Both of these claims are unsupported by the data provided (daily graphical representations of the moon passage set against the backdrop of proposed and approved buildings, as made available in their "Additional Information", see Appendix-1 below, and graph to the right). According to GIA's own data, the moon is visible over Bevis Marks Synagogue most months of the year. Furthermore, should the proposed tower be approved, the moon would not be observable in the night sky for at least 3 months a year, when it is currently visible. This is the case in May, June and September during both major and minor lunistices. In some instances it would no longer remain visible in April and October either. During a minor solstice, the reduction of lunar visibility caused by the proposal would be even more dramatic owing the the lower amounts of current visibility.

Furthermore, even during the months when the moon would remain visible, the proposed tower would reduce the numbers of days, and hours in those days, when the moon is visible in the night sky. In some months it would reduce it to one or two days, when the possibility of cloudy conditions would then have a significant impact on the ability to recite the prayer anymore in those months, particularly as the remaining hours of visibility will be quite brief, at times not even long enough to recite the prayer or to make it unlikely to perfectly time a service to ensure visibility.

This point has been born out in the BRE review which found that even in months when some moon views remained, these were of extremely short duration (thirty minutes over two days). This would render the ability and likelihood of being able to recite the Kiddush Levana as improbable, and as such the proposed tower would result in a scenario even those months as akin to blocking out the moon completely.

In this regard, the proposed tower, would result in a quantifiable reduction in the community's ability to worship. Assuming the prayer can currently be recited on average 10 months a year, and in the proposed conditions at most 6 months a year, and more likely only 4 or 5 times, the impact of the proposal would result in a considerable reduction in worship of 40% to 60% of the time.

Conclusion

GIA mischaracterises the negative impact of the proposed tower by casting a wide net of data points, which present a skewed picture of the current ability of the community to worship, and the degree of harm it would experience should the scheme be approved. In practice, the proposed tower would reduce overall visibility of the moon from the current baseline by 40%-60%. GIA acknowledge a 40% loss.

The data provided by GIA though makes it clear that in absolute terms, the proposed tower would reduce the ability of Bevis Marks Synagogue to worship as it has since 1701 by at least 3-5 months per year, causing a reduction in the times the community can worship of 30%-50%, possibly even by 60%.

The BRE report corroborates this conclusion. 'With both the consented and proposed developments in place (in the cumulative scenario), the opportunity to view the moon from the observer location used by worshippers at Bevis Marks Synagogue when reciting Kiddush Levana would reduce by 51% on average throughout a full lunar cycle, compared to the existing baseline.

According to the BRE, 'Based on the results reported in the GIA lunar transit study…the relative reduction in the hourly visibility of the lunar bracelet from the Synagogue courtyard would be significant with the proposed development in place'.

It is clear then that the proposed tower would cause significant harm to the historic community of Bevis Marks Synagogue. The proposed tower would undermine its centuries-long history of worship on this site, and their ability to maintain of their unique Spanish & Portuguese Jewish traditions.

Put into heritage terms, the planning system is concerned with the *significance* of heritage assets. The sky view as an entity of cultural/ religious importance in Judaism is surely a very important contributor to the Synagogue's significance as a working synagogue. This is made all the more significant as Bevis Marks Synagogue is likely the only one in the world in continual use dating back to 1701, and is the oldest synagogue in the UK. Hence, if these sky views are severely impaired, not only does our minority community suffer damage to our culture, but the heritage asset (the Grade-1 Listed Bevis Marks Synagogue) loses significance. This is in addition to the substantial loss of significance in conventional heritage terms.

Kiddush Levana, 14 Nov 2024

Appendix 3 - Letter from Professor Barry Stiefel

COLLEGE of CHARLESTON
DEPARTMENT OF ART AND ARCHITECTURAL HISTORY

Hgh Consulting
45 Welbeck Street, London W1G 8DZ

11 November 2024 / 10 Heshvan 5785

Subject: The Effects of Tall Development Too Close Qahal Kadosh Sha'ar ha-Shamayim / Bevis Marks Synagogue

Dear Bella Tidswell and Rabbi Shalom Morris,

This letter is in response to your correspondence from 8 November 2024 / 7 Heshvan 5785 regarding the significance of the sky view from Qahal Kadosh Sha'ar ha-Shamayim / Bevis Marks Synagogue, a Grade I listed building. This is of consequence, considering that the congregation's Hebrew name, Qahal Kadosh Sha'ar ha-Shamayim, translates as the Holy Congregation of the Gates of Heaven. Visual access to the heavens is thus of great importance in the deliberations regarding compliance with the National Planning Policy Framework regulations, especially paragraphs 205 and 206.

The moon, stars, and sun hold significant cultural and religious importance for Sephardic Jews, as they do for many Jewish communities, with Qahal Kadosh Sha'ar ha-Shamayim / Bevis Marks Synagogue being an epitomic example as the oldest Jewish congregation in the British Isles. To begin with, the Jewish calendar is primarily lunar, meaning it is based on the cycles of the moon. This affects the timing of Jewish holidays, including Passover, Sukkot, and Rosh Hashanah. The sighting of the new moon is particularly important as it marks the beginning of a new month (Rosh Chodesh). Sephardic Jews, like other Jewish communities, recite a special series of blessings called Kiddush Levana. This blessing is said once a month, typically after the appearance of the new moon but before it reaches its full phase. It is a moment of reflection and gratitude for the natural world and its cycles.

In Jewish mysticism (Kabbalah), the moon often symbolizes the *Shekhinah*, the divine presence. The phases of the moon can represent different spiritual states and the relationship between the divine and the Jewish people. Historically, the observation of celestial bodies was crucial for navigation and agriculture. For Sephardic Jews, who have lived in various parts of the world, from the Iberian Peninsula to North Africa and the British Isles, understanding the stars and the moon was essential for daily life and survival. Some Sephardic communities have unique customs and traditions related to the moon and stars. These might include specific prayers, songs, or rituals that have been passed down through generations. For Sephardic Jews, the stars in the sky hold both practical and symbolic significance. Historically, stars were essential for navigation, especially for Sephardic Jews who navigated across the British Atlantic World and beyond. The stars helped determine directions and seasons, which was crucial for travel and agriculture. Stars are often seen as symbols of God's creation and the vastness of the universe. They remind

the Jewish people of their place in the cosmos and the greatness of the Creator. The stars are mentioned in various parts of the Torah and other Jewish texts. For example, God's promise to Abraham that his descendants would be as numerous as the stars in the sky (Genesis 15:5) is a powerful symbol of continuity and divine blessing.

In some Sephardic traditions, specific prayers and blessings are associated with the stars. These practices can vary by community but often include expressions of awe and gratitude for the natural world. In Kabbalistic thought, stars can represent spiritual entities or forces. They are sometimes seen as channels through which divine energy flows into the world. Certain Jewish holidays and rituals are tied to the appearance of stars. For example, the end of Shabbat is marked by the appearance of three stars in the sky, signaling the beginning of a new week.

The sun also holds significant religious, cultural, and practical importance for Sephardic Jews. The sun's cycle dictates the timing of daily prayers. For example, the Shacharit (morning prayer) is recited after sunrise, and the Mincha (afternoon prayer) is said before sunset. The sun's position helps structure the rhythm of daily religious life. The setting of the sun marks the beginning and end of the Sabbath (Shabbat) and Jewish holidays. Shabbat begins at sunset on Friday and ends at sunset on Saturday, making the sun's cycle integral to these observances. Once every 28 years, a special blessing called Birkat Hachama is recited to thank God for the creation of the sun. This rare event is a significant moment of reflection and celebration in the Jewish calendar. The sun is often seen as a symbol of God's power and the light of divine wisdom. It represents the consistency and reliability of God's presence in the world. Historically, the sun was crucial for agriculture, which was a central part of life for many Sephardic Jewish communities. The sun's light and warmth were essential for growing crops and sustaining life. Some Sephardic traditions have specific customs and rituals associated with the sun. These might include prayers or blessings said at sunrise or sunset. In Kabbalistic thought, the sun can represent various spiritual concepts, such as the divine light that sustains the universe. Its daily journey across the sky is seen as a metaphor for spiritual enlightenment and the journey of the soul.

Regarding Qahal Kadosh Sha'ar ha-Shamayim / Bevis Marks Synagogue, blocking out the sky with new development (even partially) could pose several problems for Sephardic Jews, given the cultural and religious significance of celestial objects:

1. **Interference with Religious Observances**: The sighting of the moon is crucial for marking the beginning of new months and for reciting the Kiddush Levana blessing. If the sky is obstructed, observing these important religious practices would be challenging.
2. **Disruption of Daily Prayers**: The sun's position is essential for timing daily prayers. Obstructions that block the view of the sun could make it difficult to determine the correct times for Shacharit (morning prayer) and Mincha (afternoon prayer).
3. **Impact on Sabbath and Festivals**: The setting of the sun marks the beginning and end of the Sabbath and Jewish holidays. If the view of the sunset is blocked, it could complicate the observance of these sacred times.
4. **Loss of Symbolic Connection**: The stars, moon, and sun are powerful symbols in Jewish tradition, representing God's creation, divine presence, and spiritual enlightenment. Blocking the view of these celestial bodies could diminish the sense

of connection to these symbols. This is especially crucial for Qahal Kadosh Sha'ar ha-Shamayim / Bevis Marks Synagogue, the Holy Congregation of the Gates of Heaven.

5. **Cultural and Historical Disruption**: For Sephardic Jews, who have historically relied on the stars for navigation and timekeeping, obstructing the sky could sever a link to their cultural heritage and historical practices.
6. **Challenges to Mystical Practices**: In Kabbalistic thought, the celestial bodies are seen as channels of divine energy. Obstructing the view of the sky could interfere with mystical practices and the spiritual significance attributed to these celestial objects.

Overall, blocking out the sky with new development could significantly disrupt the religious, cultural, and spiritual practices of Sephardic Jews, making it difficult to maintain their traditions and observances. Therefore, I highly recommend that disruptions to the sky view from Qahal Kadosh Sha'ar ha-Shamayim / Bevis Marks Synagogue be minimized and mitigated as much as possible. Addressing these efforts should be done in consultation as much as possible with the congregation and its spiritual leaders as the law permits. Do let me know if you have any further questions or concerns.

Sincerely,

[redacted]

Dear Roger,

Thank you very much for your message. My starting point for considering your questions is para. 206 of the NPPF, which (giving effect to the Planning (Listed Buildings and Conservation Areas) Act duties), requires a “clear and convincing justification” for any harm to the significance of a heritage asset.

In the circumstances you describe below, and in light of how the proposed development is pitched, it would be amply open to the Council to take the view that the “clear and convincing justification” for the harm to the significance of Bevis Marks Synagogue and the Tower of London does not exist without (clear and convincing) evidence that the benefits relied upon cannot be achieved without the extent of harm that would be caused – including viability evidence.

Very best wishes,

Charlie

Lord Banner K.C.

Appendix 5 - Advice from Claire Nevin

IN RESPECT OF

BEVIS MARKS SYNAGOGUE

Advice on Equalities Statement for the proposed redevelopment of Bury House

---

Introduction

1. In instructions dated 17 October 2024, I was asked by Roger Hepher of hgh Consulting, on behalf of the S&P Sephardi Community at Bevis Marks Synagogue ("**BMS**"), to advise on the Equalities Statement accompanying the live planning application for the proposed redevelopment of Bury House, 1-4, 31-34 Bury Street, EC3A 5AR (ref. 24/00021/FULEIA) ("**the planning application**"). The purpose of the Equalities Statement is to assist the City of London in discharging its legal duties to consider the equality impacts of the planning application in its role as the planning authority.

2. The planning application and related application for listed building consent were submitted to the City of London in January 2024. The proposed development comprises the demolition of Bury House and construction of a 43-storey tower, the partial demolition of Holland House and Renown House and extensions to both buildings, for office, flexible retail/café and flexible community/education/cultural/amenity uses.

3. I was specifically asked to advise on whether the Equalities Statement is sufficiently detailed on the potential impacts of the planning application on the Jewish community at BMS to discharge the legal requirement for decision makers to have due regard to equality considerations throughout the decision-making process.

4. My advice will first address the factual background, including the circumstances of BMS. I will then set out the legal framework and relevant caselaw governing the assessment of equalities impacts under the *Equality Act 2010* ("**EqA 2010**") followed by my views on whether the Equalities Statement is sufficiently detailed.

5. This advice is my independent and impartial view of the application of the law to the facts of this case. If the S&P Sephardi Community at BMS decides to waive legal advice privilege and put this advice in the public domain, I kindly request that it avoid selective quotation, which may be taken out of context. If the advice is made public, I will not assume liability for any reliance by third parties.

Factual Background

BMS and the Jewish Community

6. BMS dates back to 1701 and is the oldest and most historically significant synagogue in the country, often referred to as the 'Cathedral' Synagogue due to its significance within the Jewish faith. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance and its importance both within the City of London and on a national level is recognised by its Grade I Listed status. This is the highest level of listing, meaning the building is deemed, on a national level, to be of 'outstanding' special architectural and historic interest. Indeed, the Historic England Grade 1 listing notes that the Synagogue's "*little altered state is of exceptional historic interest.*"

7. The Synagogue stands within a courtyard which functions as part of the Synagogue and is of great value to the community as a social and religious space, for gathering before and after services and for holding events. My instructions and supporting documents explain that the unobstructed night sky view from the courtyard serves an important spiritual and ritualistic purpose that is central to Jewish practice.

8. The weekly celebration of the Sabbath does not officially end until the average person can see three medium sized stars in the sky; a ritual that is consciously observed from the courtyard of BMS every week. Members of the congregation at BMS further rely on the appearance of three medium sized stars in the sky to fulfil their daily obligation of reciting the *Shema Yisrael* every evening. Although the congregation may rely on the clock when it is too cloudy to observe the appearance of the three stars, the centuries old practice of observing them from the courtyard is of fundamental importance to religious practice at BMS.

9. Similarly, the beginning of each new Jewish (lunar) month is marked by the appearance of the new moon. Each month, approximately one week after seeing the new moon, the BMS congregation gathers outside in the courtyard to recite a special blessing over the new moon. The permanent obstruction of the night sky view from nearby development would render it impossible to perform the prayers because the moon would no longer be visible from the courtyard for significant periods of time. A key ritual observed at this site for hundreds of years would therefore be permanently lost to the Synagogue community.

10. The sky view is also critical to ensuring that enough daylight reaches the interior of the Synagogue. Adequate natural light is key to religious worship at BMS given the intrinsic nature of reading a large quantity of printed texts to Jewish worship. Adequate light levels must be maintained within the Synagogue for this to continue. The amount of natural light in the Synagogue has already been reduced by the construction of higher buildings in the surrounding area and its status as a listed building greatly restricts the possibility of installing further electrical lighting. I understand from my instructions that any further reduction in natural light would jeopardise the ability of the congregation to read from the printed texts.

11. Furthermore, ample light is crucial to safely carrying out circumcisions at the Synagogue; a practice that has continued uninterrupted at BMS for over three hundred years. My instructions explain that those who conduct circumcisions at BMS have raised concerns that any further reduction to light levels would render it impossible to carry out circumcisions at BMS.

Previous planning decisions

12. In October 2021, the City of London's Planning and Transport Committee refused a previous, similar application by the same applicant (an application for a 48-floor tower at 31 Bury St). The refusal identified two harms. The first was harm to the setting and amenities of Grade-1 listed Bevis Marks Synagogue by reason of the "*overbearing and overshadowing impact of the development on the courtyard of the Synagogue*." The second was harm to the World Heritage Site Tower of London.

13. The main difference between the new planning application and the application that was refused in October 2021 is a reduction in height of 19m and two high-level setbacks. BMS considers these modifications to be of little consequence given that the proposed development would be 178.7m high in any event. However, the newly designated Creechurch Conservation Area, within which BMS and the proposed development site at Bury Street sit since its formal designation in January 2024, is a key difference.

14. In November 2021, the Secretary of State refused permission for the 'Tulip' skyscraper in the City of London. BMS was amongst the heritage assets considered in the decision, with the Secretary of State finding that the setting of BMS is "*largely limited to what can be experienced from within its courtyard*" and the "*wider setting*" of the Synagogue "*includes a number of office towers, visible from the courtyard*." Regarding BMS and a number of other heritage assets, the Secretary of State remarked that the Tulip would "*cause a marked exacerbation in the existing harm from tall buildings to the setting of the assets and the ability to appreciate their architectural or historic significance. The effect would be variously to create an overbearing presence from within the curtilage of the heritage asset (…)*" (in relation to BMS).

The City Plan 2040

15. The City Plan, which was submitted for examination on 29 August 2024, sets out the City Corporation's vision, strategic objectives and planning framework to guide future development and decision-making in the City of London to the year 2040. Inspectors have been appointed to carry out the examination but the dates for examination have not yet been published.

16. The City Plan proposes to include the Synagogue within the Tall Buildings Area and remove the current presumption against tall buildings in the Conservation Area. It further proposes to protect only the "immediate setting" of the Synagogue. Weight is of course a matter for the decision-maker. However, given the draft City Plan is still in the relatively early stages of the decision-making process, it should be given no more than limited weight by the Committee when it comes to decide the planning application.

BMS' objection to the planning application

17. In May 2024, BMS submitted a detailed, 33-page objection to the planning application describing the interrelationship between the Synagogue's heritage and religious significance. The main objections included in this letter can be summarised as follows:

    (i) The proposed development would cause substantial harm in heritage terms to the significance of BMS and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.

    (ii) The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.

    (iii) The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.

    (iv) The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

Legal Framework

Primary Legislation

18. Section 149 of the EqA 2010 (which is referred to as the 'general equality duty') provides that:

    (1) A public authority must, in the exercise of its functions, have due regard to the need to—

    (a) eliminate discrimination, harassment, victimisation and any other conduct that is prohibited by or under this Act;

(b) advance equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it;
(c) foster good relations between persons who share a relevant protected characteristic and persons who do not share it.

(…)

(3) Having due regard to the need to advance equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it involves having due regard, in particular, to the need to—
(a) remove or minimise disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic;
(b) take steps to meet the needs of persons who share a relevant protected characteristic that are different from the needs of persons who do not share it;

(…)

(7) The relevant protected characteristics are—
age;
disability;
gender reassignment;
pregnancy and maternity;
race;
religion or belief;
sex;
sexual orientation.

19. It will be apparent from the above that having "*due regard*" to equalities impacts imposes positive obligations on decision makers to "***advance*** *equality of opportunity*", "***foster*** *good relations*", "***remove or minimise*** *disadvantages*" and "***take steps***" to meet the needs of persons who share a protected characteristic [emphasis added]. It therefore follows that the starting point for decision makers subject to the PSED is to robustly consider the *positive steps* they can take to meet the needs of persons who share protected characteristics, remove or minimise disadvantages etc. It will not be sufficient for the purposes of s.149 to accept harm as a foregone conclusion and then merely

decide on the level of harm that will be acceptable to those sharing a relevant protected characteristic.

Guidance

20. The Equality and Human Rights Commission's 'Technical Guidance on the Public Sector Equality Duty: England' (updated in April 2023) explains at para 2.17 that the public sector equality duty ("**PSED**") "*applies to individual decisions as well as policy formulation (…)*" although "*this does not mean that what the duty requires those exercising the function to do in both these situations is the same. The courts have made it clear that the regard due when exercising a function will depend on the circumstances in which a function is being exercised.*"

21. The Guidance clarifies at para 2.39-2.40 that to 'have due regard' means "*that in making decisions and in its other day-to-day activities a body subject to the duty must consciously consider the need to do the things set out in the general equality duty (…) How much regard is 'due' will depend on the circumstances and in particular on the relevance of the aims in the general duty to the decision or function in question. The greater the relevant and potential impact, the higher the regard required by the duty.*"

22. As to how the different needs of people with protected characteristics might be met when those needs differ from those without them, the Guidance clarifies that the duty is to meet 'needs' rather than any desires or preferences. The need must be intrinsic to the protected characteristic. In the context of the protected characteristic of religion or belief, the Guidance clarifies at para 3.30 that a relevant body "*may have to have regard to meeting needs which arise as a consequence of religious belief, where these arise in the context of a function which they do have*."

23. Complying with the general equality duty in practice entails ensuring a sound evidence base because in order to give proper consideration to the aims set out in the general duty, the relevant decision-making body will need to have sufficient evidence of the impact its policies and practice are having or are likely to have on people with protected characteristics (The Guidance at para 5.15). This entails sufficient understanding of the disadvantages or different needs of people who share a particular protected characteristic.

24. Importantly, it will be necessary to collate relevant information to have evidence-based decision-making and a body subject to the PSED will need to be able to show that it had adequate evidence to enable it to have due regard to its s.149 duty. Para 5.17 of the Guidance states that "*adequate and accurate equality evidence, properly understood and analysed, is at the root of effective compliance with the general equality duty. Without it, a body subject to the duty would be unlikely to be able to have due regard to its aims*."

25. A proper evidence base allows a body to understand the effect of its policies, practices and decisions, to consider whether further research or engagement is necessary, to consider whether there are ways of mitigating any adverse impact identified and decide whether to modify or reconsider a policy, practice or decision (para 5.18 of the Guidance). A relevant body cannot hide behind a lack of evidence or information about a relevant issue to justify not being able to meet the PSED. If the body does not have sufficient evidence to have due regard under s.149, it will need to obtain it (para 5.23 of the Guidance).

Case Law

26. The above principles set out in the Guidance are derived from case law. The seminal cases on the general equality duty are summarised below.

27. In *Hotak v Southwark LBC* [2015] UKSC 30; [2016] AC 811 at [73-76], the Supreme Court identified "*valuable judgments in the Court of Appeal*" explaining what the PSED requires. For instance:

    (i) At [75], the Supreme Court referred to the case of *Bracking v Secretary of State for Work and Pensions [2013] EWCA Civ 1345, [2014] Eq LR 40* which clarifies that the PSED "*must be exercised in substance, with rigour, and with an open mind*" (per Aikens LJ in *R (Brown) v Secretary of State for Work and Pensions [2008] EWHC 3158 (Admin), [2009] PTSR 1506* , para 92).

    (ii) At [75], the Supreme Court further approved the principle set out in *R (Hurley & Moore) v Secretary of State for Business, Innovation and Skills* [2012] EWHC 201 (Admin) according to which, it is for the decision-maker

to determine how much weight to give to the duty: the court simply has to be satisfied that "*there has been rigorous consideration of the duty (…) the court cannot interfere … simply because it would have given greater weight to the equality implications of the decision.*"

(iii) Drawing the threads together, the Supreme Court remarked at [74] that having 'due regard' means take account of what is ""*appropriate in all the circumstances" (…) I do not think it is possible to more precise or prescriptive, given that the weight and extent of the duty are highly fact-sensitive and dependent on individual judgment*."

Advice

The Equalities Statement

28. Taking the above legal framework into account, what counts as 'due regard' for the purposes of s.149 of the EqA 2010 depends on what is appropriate in the circumstances. The extent of the duty is highly fact-sensitive and will change from case to case. However, given BMS' unique status as the oldest and most historically significant Synagogue in the country, its recognition as a 'cathedral Synagogue' with over three hundred years of continuous worship and its Grade I listing that reflects its exceptional heritage value, I consider that an Equalities Statement accompanying a proposed development of this scale would have to demonstrate a sufficient understanding of the specific potential impacts of the development proposal on the Jewish community at BMS.

29. Furthermore, given the positive obligations on decision makers subject to the PSED, the City of London will have to go beyond merely demonstrating an understanding of the religious practices of the Jewish community at BMS to actively considering the positive steps it can take through its decision making functions as a planning authority to meet the needs of those who worship at BMS, remove or minimise disadvantages facing them, foster good relations and advance equality of opportunity.

30. The Equalities Statement notes at paras 3.27-3.28 that 2% of the City of London's residents are Jewish and BMS is one of a number of places of worship in close proximity to the site.

31. BMS is directly addressed from para 3.43 onwards where the Equalities Statement makes the following observations:

    (i) BMS is located approx. 30m north of the site. It is a place of worship and a community facility. It is the oldest Synagogue in the UK and the only Synagogue in Europe to have held regular services continuously for more than 300 years.

    (ii) It notes the times of Shabbat and the fact that the Synagogue is used for various celebrations, as well as the fact that it is of significance to the Jewish community because of its heritage.

    (iii) It remarks that the Synagogue is open to visitors and received a lottery grant in 2019.

32. The Equalities Statement notes in the table at page 19 that impacts of the proposed development may have different impacts on the protected characteristic of religion or belief due to how places of worship are used for religious ceremonies. Specific impacts to BMS are noted from para 4.38 and are said to include:

    (i) **Townscape and visual impact**. The Equalities Statement concludes that the proposed development will alter the visual backdrop to the Synagogue from the courtyard but that this does not impact on the use of the Synagogue or its courtyard for religious activities.

    (ii) **Noise**. However, the Equalities Statement notes that contractors will have close regard to the religious calendar to limit disruption during religious events.

    (iii) **Daylight and sunlight**. The Equalities Statement notes that the Synagogue is sensitive due to the reliance of candlelight only during religious ceremonies where the congregation need to be able to read from the Torah. However, it goes on to note that the Synagogue currently receives very low levels of light. It further states that as the proposed development would lead to a small reduction in the amount of daylight received, it is unlikely to affect the current use of these areas or increase the requirement for artificial lighting.

(iv) **Night sky visibility**. The Equalities Statement addresses the proposed development's potential impact on the ability to observe the night sky during Shavuot, noting that the proposal will not materially affect the ability to observe the night sky from the courtyard. However, the Equalities Statement concludes that high levels of light pollution in London limit the potential for night sky observations.

33. The s.149 duty is primarily one of process rather than outcome ('have due regard'). I therefore consider that the Equalities Statement contains just enough information on the potential daylight and sunlight impacts of the proposed development for the reading of religious texts to discharge the PSED. However, it completely fails to address the potential daylight and sunlight impacts on the ability to continue carrying out circumcisions in the Synagogue. This was raised in BMS' objections so it should have been addressed in an updated Equalities Statement.

34. Concerning the night sky view, the Equalities Statement refers to the potential impacts on the continuing observance of Shavuot but is entirely silent on the importance of the night sky view to the weekly observance of Shabbat, the daily obligation to recite the *Shema Yisrael* and the monthly blessing on the appearance of the new moon. BMS' objection raised these specific points and explained the ways in which the development proposal's obstruction of the night sky view might prevent these religious practices from taking place.

35. Without giving "*rigorous consideration*" to these specific issues, it is hard to see how the Equalities Statement can safely conclude that the recognised alterations to the visual backdrop to the Synagogue from the courtyard would "*not impact on the use of the Synagogue or its courtyard for religious activities*."

36. I consider on balance that the Equalities Statement is not sufficiently detailed on the potential impacts on the Jewish community at BMS to continuing worshiping in accordance with their faith. The failure of the Equalities Statement to address several key aspects of the night sky view and the importance of adequate lighting for circumcisions does not comply with the Guidance and case law which requires the PSED to be "*exercised in substance, with rigour"* (*Bracking*) and "*have regard to*

meeting needs which arise as a consequence of religious belief" (para 3.30 of the Guidance).

37. It is trite that planning authorities must carefully balance different (sometimes competing) factors and decide how they should weigh in the overall balance. However, certain factors will always weigh more heavily in the balance than others. The Guidance clearly states "*the greater the relevant potential impact, the higher the regard required by the duty*." Considering the importance of the PSED and the extent of the potential impacts of the development proposal on the Jewish community at BMS, I consider that this is a case that warrants the heightened regard envisaged by policy and by extension, substantial weight in the overall planning balance.

Statement of Reasons

38. With some exceptions, planning committees are not generally required to give reasons for decisions to grant planning permission. The extent of the duty to give reasons for granting planning permission was discussed in *Dover DC v Campaign to Protect Rural England (Kent)* [2017] UKSC 79; [2018] 1 W.L.R. 108 where the at [59], the Court held *"(…) it should not be difficult for councils and their officers to identify cases which call for a formulated statement of reasons, beyond the statutory requirements. Typically there will be cases where, as in Oakley and the present case, permission has been granted in the face of substantial public opposition and against the advice of officers, for projects which involve major departures from the development plan, or from other policies of recognised importance (such as the "specific policies" identified in the NPPF - para 22 above). Such decisions call for public explanation, not just because of their immediate impact; but also because, as Lord Bridge pointed out (para 45 above), they are likely to have lasting relevance for the application of policy in future cases.*"

39. If the City of London decides to grant planning permission, I consider that such a decision would fall within the categories envisaged by the Supreme Court where a formulated statement of reasons would be required. This is because:

    (i) There is substantial public opposition to the proposals.

    (ii) A very similar proposal was refused in 2021 and the area now enjoys heightened statutory and policy protections due to its recent designation as a Conservation

Area. The proposal is therefore likely to involve major departures from the development plan and other policies of recognised importance.

(iii) Given the City of London's recent decision to refuse a similar application and the recent designation of the Conservation Area, a formulated statement of reasons would be required to explain consistency of decision making.

(iv) The decision would be likely to have both an immediate impact on the Jewish community at BMS (amongst others affected by the proposals) and lasting relevance for the application of policies relating to tall buildings and conservation areas in future cases.

(v) Section 149 contains a positive duty to have 'due regard' to equalities impacts. In the absence of a formulated statement of reasons, it would otherwise be difficult to ascertain whether the City of London complied with this duty.

40. These observations on the duty to give reasons are relevant to understanding how an eventual decision to grant planning permission might be otherwise vulnerable to legal challenge. For the reasons stated above, a complete failure to give reasons in this case could be subject to legal challenge.

41. However, if reasons are given and the committee remedies the inadequacies of the Equalities Statement by robustly considering the specific potential impacts to BMS, it would be hard to argue that the PSED has not been discharged. That is unless the committee nonetheless gives irrational reasons for granting permission (a high hurdle). In any event, even if the committee robustly considers the potential equalities impacts on BMS but nonetheless decides to override the needs of the Jewish community in favour of the development proposal, I am of the view that a clear statement of reasons would be required.

Conclusions

42. My conclusions are as follows:

(i) The Equalities Statement does not comply with s.149 of the EqA 2010 as it does not sufficiently address the potential impacts of the planning application on the ability of the Jewish community at BMS to continue worshipping in accordance with their faith. While it addresses some points (reading religious texts by natural light), it completely ignores several important potential impacts on the ability of the Jewish community at BMS to continuing worshipping in accordance with their faith.

(ii) If planning permission is granted, I consider that a formulated statement of reasons will be required to demonstrate compliance with the PSED.

Dear Sirs,

As a regular worshipper at Bevis Marks, I would like to reaffirm my objections to the Proposal for a 43-storey tower at 31 Bury Street (ref. 24/00021/FULEIA). For the following reasons.

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.
- Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.
- This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.

Yours sincerely,

Michael Green

Dear Sirs,

Re: Town and Country Planning Act 1990

Town and Country Planning (Environmental Impact Assessment) Regulations 2017

Planning (Listed Building and Conservation Areas Act 1990

Location: 1- 4 31 – 34 Bury Street London EC3A 5AR (for 24/00021/FULEIA) and Holland House, 1-4, 32 Bury Street, London, EC3A 5AW

I am writing to thank you for your further message on the above subject dated 8October 2024. This message is an additional submission on behalf of Bevis marks Synagogue and follows my earlier letter, as a Consultee dated 21 April 2024. A copy of this letter is attached.

May I make the following additional points:-

1. The objection to the proposed development of a 43 storey tower building at 31 Bury Street is based both on the loss of light that will be caused to the synagogue but also on the overcrowding of the area which will result from the building of the new property, the associated areas surrounding it, and the additional traffic that will be created if the building is occupied. It is, I suggest an overdevelopment in the area. It may not be directly relevant as a planning issue but it is suggested that a new building of this size is not required at the present time and there is or will be sufficient adequate premises available for business users.
2. Bevis Marks Synagogue is part of the heritage and Environment of the City, which is shared with the City Churches, the Tower of London, the Monument and the numerous Banking buildings. It is important for this heritage to be preserved so that the City of London remains an attractive and important business centre.
3. The adverse effect of the development of the Synagogue should be considered in the light of its long history of usage form 1701 and its outstanding and unusual architectural features, including the contribution of members of the Synagogue to the British Armed forces.

Your helpful consideration of the above would be greatly appreciated.

With kind regards.

Yours faithfully

For the attention of Ms. Anna Tassioglou, Case Officer

Dear Sir,

Re: Development Alongside Bevis Marks Synagogue
Planning Application Reference 24/00021/FULEIA

I am writing with reference to the proposed development alongside the Bevis Marks Synagogue. I understand this comprises a 45 storey building to the south of the Synagogue. We very much hope that this will not be allowed to proceed as we are clear that it will severely limit or indeed eliminate natural light for the Synagogue.

I am a long-standing member of the Spanish & Portuguese Congregation and of the Synagogue concerned, which I attend regularly. I have, in the past been a member of the governing body of the organisation.

We are aware of the initial view that the development would be undesirable but we understand that it is now currently being seriously considered. We are informed that it is a speculative development without a commitment from a potential occupant.

We appreciate that you have to consider the matter in relation to planning policy but we do hope and strongly suggest that this should include the preservation and benefit of a long established building (dating from 1701) and also a long-standing heritage site which is of benefit to the City of London as a whole.

We ask you to consider the matter in broad terms as in appropriate in heritage terms and to bear in mind the interests of the Congregation and Community, the Synagogue having been in continuous use since 1701. May I also include a reference to the external Memorial Plaque showing the substantial contribution of the Community to the World Wars, including a VC awarded in the First World War.

I should appreciate your acknowledgment to this letter and your helpful consideration of this matter.

Yours faithfully,

[redacted]

THIS IS AN EXTERNAL EMAIL

Dear Anna,

Please find my objection below to the scheme at 31 Bury St (24/00021/FULEIA). As I work in mental health, I ask that you withhold my full address from the public record for safety reasons. I'm happy for you to have it for the purposes of submission [redacted] EC3A [redacted]), and to include the first half of my postcode with the objection as I've done below.

Best,
Dr Andrea Rosen

I am writing to express my continued objection to the scheme at 31 Bury St. The additional information provided by the developers does not change the harm this proposed building would cause the Bevis Marks Synagogue, and their continued attempts to minimise this harm and gaslight the Jewish community are frankly abusive and unacceptable. The lunar study provided by the developers has already been contradicted by the City's independently commissioned study, which found the proposed scheme would significantly harm the synagogue's lunar views and ability to worship. This should be case closed, especially as the City has already refused planning permission for essentially this exact same scheme. Continuing to entertain these revised applications is a gross and ongoing betrayal of the Jewish community's trust.

Sincerely,
Dr A Rosen
City resident (EC3A)

Dear Sir/Madam,

Re: Planning Application 24/00021/FULEIA (WELPUT: Holland House)

I am writing on behalf of City Sikhs, a leading organisation that supports Sikh professionals across London, providing networking opportunities, cultural engagement, and community initiatives that foster a sense of belonging and diversity. We would like to express our strong support for the planning application for Holland House and believe this development will bring meaningful benefits to the City of London.

A significant aspect of our support stems from the commitment to providing free-of-charge community spaces within the new and existing premises. Like many community organisations, City Sikhs often encounter difficulties in finding affordable venues in the city to host our events, which range from professional development workshops to cultural and social gatherings. This challenge limits our ability to connect with and support our members effectively.

The inclusion of accessible community spaces at Holland House will directly address this longstanding issue. It will allow us to host more frequent and impactful events, benefiting not only our members but also contributing to the cultural richness and inclusivity of the City of London. By enabling organisations like ours to expand our reach and activities, the development will serve as a catalyst for greater engagement and collaboration within the Square Mile.

We believe the proposed Holland House development will become an invaluable resource for fostering connections, promoting diversity, and strengthening community ties. Its potential to serve as a hub for cultural, educational, and professional initiatives aligns closely with the values we champion as an organisation.

We hope the City of London Corporation will appreciate the far-reaching benefits of this proposal and approve the planning application.

Sincerely

THIS IS AN EXTERNAL EMAIL

Dear Lord Mayor King,

I write, on behalf of Chatham Memorial Synagogue and many or the Jewish community of Kent in grave concern over the threat over the Bevis Marks Synagogue.

This significant and historic site, is pertinent to British Jewry as a whole as the earliest surviving synagogue, operating continually for over 320 years since Jews were newly allowed back into England.

The Bury Street development proposal [24/00021/FULEIA] would cause substantial harm to the Bevis Marks Synagogue and its community. It is one of the most light-sensitive places in London; extensive reading of printed matter in daylight is fundamental to daily worship, and the proposal would have a significant detrimental impact on the community's ability to worship in accordance with our faith.

The view of the passage of the moon is also critical to religious activity, and the proposal would block this critical view.

The Jewish community would be grateful for your support in this matter, and to ensure that the proposals are permanently denied.

Kind regards,

Dalia

City of London
PO Box 270
Guildhall,
London EC2P 2EJ

21st November 2024

Dear Ms Tastsoglou,

Re: Planning application 24/00021/FULEIA Bury House London EC3A 5AR

I am writing on behalf of Chatham Memorial Synagogue and the Jewish community of Kent. We strongly object to the above planning application on the grounds of the negative impact it will have on the Grade I listed Bevis Marks Synagogue (BMS) and the communities who use it.

BMS is the oldest surviving synagogue in the UK, and is the only one which has been continually in use in Europe for over 320 years, since soon after Jews were allowed back into England. It is deeply significant to Jews across the UK, and is deeply resonant of our freedom here.

Any works which impede the use in any way of this significant site are deeply offensive; in particular, the impact of the above development which, through its reduction in natural daylight to the synagogue and courtyard, will disrupt the ability of the synagogue to worship in accordance with our faith.

We believe that this proposal breaches the rights of the Jewish community under the Equalities Act 2010, and sincerely hope that permission is, again refused.

Yours sincerely,

THIS IS AN EXTERNAL EMAIL

Dear Ana,

I am writing to express my strong objection to the proposed 45-storey development adjacent to the historic Grade I Listed synagogue. This building, of immense cultural and historic importance, would be overwhelmed by the sheer scale and inappropriate placement of the proposed tower.

It is inconceivable that such a structure would be allowed next to St. Paul's Cathedral, yet the synagogue is not afforded the same protections. The development would obliterate the southern sky view, a vital aspect of the synagogue's setting and integral to its religious rituals, including

the observation of celestial events. The resulting overshadowing would render the synagogue courtyard unusable for many rituals and celebrations, while the already limited natural light within the building would be further diminished. Due to the synagogue's historic nature, additional electric lighting is not a viable solution.

This site falls within the Creechurch Conservation Area, where tall buildings are not permitted under current planning policy. The development directly conflicts with the statutory development plan, and the City Corporation’s ongoing work on identifying suitable sites for tall buildings is incomplete and not yet independently assessed. Approving this development ahead of this process would undermine proper planning protocols.

While the developers argue that the project offers planning benefits, these claims do not withstand scrutiny. Features such as being car-free or environmentally sustainable are standard expectations for modern commercial buildings and do not justify the harm to the synagogue. The restoration of Holland House, while welcome, should not be used to justify such an inappropriate scheme, particularly when its purported community benefits are questionable.

Furthermore, the existing building at 31 Bury Street is only 40 years old and capable of refurbishment, avoiding the environmental cost of unnecessary demolition. The proposed tower would also damage the setting of other heritage assets and compromise the character of the Conservation Area as a whole.

It is deeply disappointing that the City Corporation, while claiming to recognise the importance of the synagogue, is facilitating this monstrous development. We are entitled to expect much higher standards from Britain’s most prestigious local authority. I urge you to reject this proposal and protect the integrity of our heritage and planning policies.

Best,

LiLi Jackson

THIS IS AN EXTERNAL EMAIL

Dear Sirs,

I wish to make an objection to the proposed planning application **20/00848/FULEIA.**

Others will have given very good reasons why they object to what has been proposed, my objection really goes to the heart of the matter which is after all these years, where peaceful worship has taken place, in the traditional way (using daylight, and the moon) since 1701 at the Bevis Marks Synagogue, is going to irrevocably ruined.

The idea of blocking out the natural light by some huge building project upsets me more than I can say. It feels like a steamroller, in a blundering, unfeeling way, trampling underfoot something that cannot be replaced. Something that has been sacred for all these years. It cannot be right. The Bevis Marks Synagogue is a very special bailing, it is Grade 1 listed as you know, and in a conservation area. It will not be the same should this project go ahead. It can't be.

Please stop it.
Kind regards,

Mrs Jane Clucas

THIS IS AN EXTERNAL EMAIL

To whom it may concern at the City of London Planning Authority

You did not notify me about the new consultation regarding revised plans for a 43-storey tower at 31 Bury Street, and I understand that I should have received a re-consultation letter from you.

I have only very recently learned about the submission of additional information and revised drawings by the promoters of the planned 43-storey building at 31 Bury Street.

I object to this construction project.

Why do I object?

The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.

The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.

The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.

The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

In addition, Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

From my perspective, the reasons for the planning refusal from 2022 remain the same. The ‘public benefits’ would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause.

Moreover, the design changes will make hardly any difference to the

impact on the Synagogue, and in any event are counterbalanced by the fact that the heritage ‘bar’ is now even higher as the Synagogue has recently gained the added status of being within a Conservation Area.

Please register my strong opposition to the development proposals for 31 Bury Street.

Yours sincerely

Jeanette R Rosenberg OBE

THIS IS AN EXTERNAL EMAIL

Dear Sir/Madam,

I am writing to lodge a number of objections and concerns with respect to the current plans for development, i.e.

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.
- Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.
- This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 still apply today
- The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses, which represents public benefits that tip the planning balance in their favour. However, the design changes will make hardly any difference to the impact on the Synagogue, and in any

event are counterbalanced by the fact that the heritage ‘bar’ even higher as the Synagogue has recently gained the added status of being within a Conservation Area.

- The ‘public benefits’ would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause.
- Personally speaking, my great grandparents and grandparents lived nearby over 100 years ago, and it is very sad to think that such plans can literally severely affect the historic buildings which should be maintained for as long as possible for all the reasons outlined above.

I look forward to hearing from you accordingly.

Yours faithfully,

Philip Brodie

To: lpaburystreet
Subject: 20/00848/FULEIA: Objection to Development
Date: 23 November 2024 19:42:44

You don't often get email from [redacted] Learn why this is important

THIS IS AN EXTERNAL EMAIL

Dear Sirs,

I object in the strongest possible terms to the proposals for a 43-storey tower at 31 Bury Street.

My objection is based on the following points:

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.

- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.

- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.

- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

Furthermore:

- Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

- This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.

- The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses, which represents public benefits that tip the planning balance in their favour. However, the design changes will make hardly any difference to the impact on the Synagogue, and in any event are counterbalanced by the fact that the heritage 'bar' is now even higher as the Synagogue has recently gained the added status of being within a Conservation Area.

- The ‘public benefits’ would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause.

Although I do not live in the local area, my family has a longstanding connection with Bevis Marks, as several of my ancestors were founding members in the early 1700s, and my family had continuous membership well into the 20th century.

I therefore trust that this proposed development will be refused, as it would have a significant adverse impact on some of the most important cultural and historical assets in the City of London and the surrounding area.

Yours faithfully,

Richard Brett

To Whom It May Concern

I have relatives who helped built the Bevis Marks Synagogue and were members there for at least the first hundred years of its existence. I have become aware of a proposed highrise in close proximity to it and would like to express my reservations regarding it. It is still a working synagogue and natural light is an important feature of the services there and I am concerned about the potential affect of such a tall building in close proximity to it and also the courtyard which holds various community and religious events. It seems the developer has previously made an application (20/00848/FULEIA) which was turned down due to its impact on the Synagogue's activities and also the Tower of London. While the developer has added various amenities for community use, the height and its potential effect on the Synagogue's services and community activities has not changed so I would suggest a reduced height or turning it down again.

Dear sirs,

I am all for redevelopment but when it means the destruction on an iconic London building it has gone far enough.
I am talking about Bevis Marks Synagogue.

I believe the objections listed are totally acceptable and require the City of London not accept this development for the following reasons:-

1) The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.

2)The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.

3)The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.

4)The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

5)Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

6)This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. To whom it may concern, I am extremely concerned that yet again this same application has been resubmitted with a few small alterations. I consider that to keep submitting in this way and expecting people to yet again object is harassment. Not withstanding the additional information provide by the applicant I strongly object to this new proposed building.

Objections are:_

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.
- Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.
- > This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.
- The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses, which represents public benefits that tip the planning balance in their favour. However, the design changes will make hardly any difference to the impact on the Synagogue, and in any event are counterbalanced by the fact that the heritage 'bar' is now even higher as the Synagogue has recently gained the added status of being within a Conservation Area. The 'public benefits' would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause.

  I hope that you will take account of all objections and consider the special significance of Bevis Marks.

Kind regards,
Jennye Seres

THIS IS AN EXTERNAL EMAIL

Dear Sirs / TO WHOM IT MAY CONCERN

I have written my objections to previous planning applications of this site and am dismayed that, despite the Creechurch Conservation Area surrounding the Bevis Marks Synagogue, exceptions are being allowed for specific proposed developments. The makes a mockery of the agreement of the principles of the Conservation Area. The objections concerning the Synagogue remain unchanged as follow:-

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

As I have stated previously,

Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.

The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses, which represents public benefits that tip the planning balance in their favour. However, the design changes will make hardly any difference to the impact on the Synagogue, and in any event are counterbalanced by the fact that the heritage 'bar' is now even higher as the Synagogue has recently gained the added status of being within a Conservation Area. The 'public benefits' would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause.

THIS IS AN EXTERNAL EMAIL

Proposals for a 43-storey tower at 31 Bury Street (ref. 24/00021/FULEIA)

We have previously objected to the proposals for a 43-storey tower at 31 Bury Street

We understand applicants have made changes to their design and again; We object to their proposal. These design changes will hardly change the impact on the Synagogue. We are sure you are aware the Synagogue is in a Conservation Area. Any 'public benefit' from such a proposal would provide little to no benefit upon the Synagogue and the community it supports. If there is any benefit to anyone, it would hardly begin to counter the damage the proposed tower will cause.

The Synagogue is a natural light sensitive space. Extensive reading of printed script is fundemental to our worship. The proposal will have an unacceptable impact on daylight levels inside; which is not acceptable.

The proposed structure will overshadow the Bevis Marks synagogue and it's courtyard which is used for various community and religious uses.Further more, in the Jewish religion it is an important part of tradition and ritual to track the path of the moon. This proposed building will overshadow and prevent this.

It will cause substancial harm both in heritage terms to the significance of the Synagogue and to the Creedchurch Conservation Area as a whole.

Over and above the points we outlined above, we would like to point out that this application is merely a similar application to 20/00848/FULEIA which was refused for two reasons - relating to the setting of Bevis Marks Synagogue and the setting of the Tower of London. Those reasons still apply and the proposal should be refused.

19th November 2024

Dear Members of the Committee,

I am writing to express my opposition to Planning Application 24/00021/FULEIA, which proposes the construction of a 43-storey building at 34 Bury Street. It is clear that this application will have a substantively negatively impact on worship at the Bevis Marks synagogue, the oldest synagogue in the United Kingdom, and the oldest synagogue in continuous use in Europe.

This new office building would block out the daylight, and the appearance of the moon from the synagogue and its courtyard for much of the day. This would make it impossible to mark the coming of the new moon, key to Kiddush Levana, which has been practiced at Bevis Marks for nearly four hundred years. This application would therefore breach Policy DM 10.8 of the City of London plan, which states that:

"To achieve an environment that meets the highest standards of accessibility and inclusive design in all developments (both new and refurbished), open spaces and streets, ensuring that the City of London is **inclusive and safe for of all who wish to use it, regardless of disability, age, gender, ethnicity, faith or economic circumstance;**

It would also contravene the 2021 London Plan, which stresses in GG1 G that new buildings:

"are designed to **reinforce or enhance the identity, legibility, permeability, and inclusivity of neighbourhoods**."

These policies are made in mind with the City of London and Mayor of London's public-sector equality duties under the Equality Act 2010, particularly where this regards fostering **"good relations between persons who share a relevant protected characteristic and persons who do not share it"**.

It is clear that this development would contravene these duties, and therefore I believe that it be refused.

Yours sincerely,

[redacted]

THIS IS AN EXTERNAL EMAIL

Dear Sir/Madam

Bevis Marks Synagogue

I write in connection with the above planning application and would like to lodge my objection to this application on the basis:

• The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
• The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
• The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
• The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

Also, I would emphasise that Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

It should also be noted that this application follows a previous, similar application by the same applicant (and the same ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today

The applicants say they have made changes to the design and are now providing space that can be used by community groups and small businesses, which represents public benefits that tip the planning balance in their favour. However, the design changes will make hardly any difference to the impact on the Synagogue, and in any event are counterbalanced by the fact that the heritage 'bar' is now even higher as the Synagogue has recently gained the added status of being within a Conservation Area.

The 'public benefits' would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to

counter the damage the tower would cause.

Regards, Gerald Stern

THIS IS AN EXTERNAL EMAIL

Dear Sir or Madam,

I was horrified to hear about the planning application by developers that would impact on the Bevis Marks Synagogue in London.

I know that I live miles away from this site, but whenever I am in London I love to spend some time at Bevis Marks Synagogue, the oldest Synagogue in England – it is a truly wonderful place that evokes a time that has passed sadly, but also provides members of the community with hope for its continued use.

I can see no good reason for the building of a 43-story tower at 31 Bury Street, London. I am sure that this tower **will not** be considered to be an object worth conserving in fifteen years, let alone over 100 years (like Bevis Marks Synagogue).

I am concerned about the substantial harm to the significance of this Synagogue that will come to the character and appearance of the Creechurch Conservation Area and other heritage assets. The need for natural light at the synagogue is imperative and I am sure that a 43-story tower would impact on internal daylight levels. I also understand that the proposal would result in unacceptable levels of overshadowing of the Synagogue's courtyard, which is used by the community and has other religious uses.

Surely it behoves the City of London to make sure that heritage areas of London are protected against unreasonable developments. In other cities they have turned heritage areas into areas for not only tourists but the local community to use. As I understand, Bevis Marks is a recognised Grade 1 Listed building, and as such should be granted freedom from this kind of encroachment. I also understand that this is not the first such application – as one was refused in 2022 (Ref: 20/00848/FULEIA). Surely the reasons that that refusal still stand today. I understand that the applicants say they have provided for community use and small businesses, but they still have NOT tipped the planning balances in their favour as far as Bevis Marks is concerned.

I really hope to hear in the near future that the City of London has refused this planning application outright.

THIS IS AN EXTERNAL EMAIL

ref. 24/00021/FULEIAG

Given the overwhelming strength of the objections that caused the previous applications to be refused, I find it difficult to believe that a revised application has now been made in respect of 31 Bury Street.

I refer particularly to the effect of the proposal on Bevis Marks Synagogue. Bevis Marks, which dates from 1701, is by far the oldest and most important synagogue in the United Kingdom, and is loved by Jews of all denominations. Visitors from abroad, whether Jewish or not, are keen to see the building, which is renowned for its historical and architectural interest as well as for its intrinsic beauty.

The proposed development would dwarf and overwhelm the Synagogue and its courtyard. Bevis Marks is a Grade 1 listed building, and it is now in a Conservation area, which enhances its status and makes the case for its protection even stronger than it was.

The development proposed here would be an act of vandalism, would amount to a slap in the face for the many people - architects, archaeologists and historians - who are interested professionally in Bevis Marks, and would leave the Jewish community feeling disrespected and ignored.

THIS IS AN EXTERNAL EMAIL

I submitted my objections to the previous plans for the development on this site. The provision of community space in the new plans does nothing to lessen the damage which will be done to Bevis Marks Synagogue. My original objections stand, which are:

This proposed development is totally unacceptable given the impact it will have on Bevis Marks Synagogue. The development proposed in 2020 was rightly refused planning permission. This new application should be refused for the same reasons. It is too tall and will overshadow the synagogue, which is a Grade 1 listed building of great historical, cultural, and religious significance being the most important Jewish site in the UK. In particular, the new building will destroy the southern sky view which is an important part of the setting of the synagogue. The developers state that the new development will have many benefits for the community which, even if true, does not justify the harm which will be done to the synagogue. This development is in the Creechurch Conservation Area, this alone should be sufficient for the application to be refused. A development like this would not be permitted close to St Paul's Cathedral and should not be permitted here.

THIS IS AN EXTERNAL EMAIL

Anna Tastsoglou
Case Officer, Development Division
City of London

Via email: lpaburystreet@cityoflondon.gov.uk

Dear Ms. Tastsoglou:

Your ref: 24/00021/FULEIA and 24/00011/LBC

Thank you for your correspondence of October 29, 2024, and the opportunity to provide further observations with respect to the above-noted application.

Notwithstanding the additional information provided by the applicant, I continue to maintain my objection to the proposed planning application.

The applicant is seeking to demolish Bury House, partially demolish Holland House, and erect several multi-story buildings and extensions, one of which is 43 stories high. As you note, "[t]he application is for planning permission for development which does not accord with the provisions of the development plan in force in the area in which the land to which the application relates is situated. The proposal is considered to affect a Building of Special Architectural or Historic Interest. The development is also considered to affect the setting of a listing building and the character and appearance of Creechurch Conservation Area."

This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 continue to apply today.

The applicant claims it has made changes to the design, and is now providing space that can be used by community groups and small businesses which represents "public benefits" that should tip the planning balance in its favour. It must be noted that tipping the planning balance in its favour is now more difficult considering that the proposed changes impact structures within a Conservation Area. These alleged "public benefits" confer little to no benefit upon the Synagogue and the community it serves. Any claimed "public benefits" to others cannot compare with the damage the proposed development will cause to the Synagogue and the Conservation Area.

In summary, the proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting and substantial harm to the character and appearance of the Creechurch Conservation Area, as well as harm to a number of other heritage assets.

Bevis Marks Synagogue is a profoundly significant building within the City of London, and on a national and international level. It is widely recognised as being of outstanding communal, architectural, artistic, historical and archaeological significance. Recognised by Grade I Listed status, the building dates from 1701 and is the only synagogue to have provided continuous services for over 300 years. It is one of two such buildings in the entire UK and Europe. The proposed demolitions and the construction of a non-descript office tower, of which there are plenty in London, may forever alter this historic place.

Bevis Marks Synagogue must be preserved in its undisturbed condition, which includes maintaining access to and use of its structures and surrounding spaces. The proposal would result in an

unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses. The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels. As well, the view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

In addition, the overshadowing of the Synagogue by a 43 story tower may compromise the security of the Synagogue and its members and visitors. Such a compromise to security must not be permitted.

Thank you for your consideration of this letter.

Yours truly,

Dr. Anne Walker BSc MSc DVM JD

You don't often get email from [redacted] Learn why this is important

THIS IS AN EXTERNAL EMAIL

24/00021/FULEIA and 24/00011/LBC

I refer to my original response to the proposal to build a tower block in the very close vicinity of the historic Bevis Marks Synagogue, to which I sent an extended letter of objection at the time of the original planning consultation in May.

I have now studied the further amended proposals which you sent to me early in November.

These new proposals do not in my view go any way to remove or even substantially diminish the threat to the quality and significance of Bevis Marks Synagogue and to its setting in the Creechurch Conservation Area.

The installation of a 43 storey 2020s tower block at such close quarters would hugely diminish the grace and standing of the 1701 historic synagogue building, since the new building would totally dominate the Conservation Area, removing the impact of seeing this fine and unique contribution to our history given its proper dignity in its place as the prime building in its immediate vicinity.

I find it hard to believe that an act of such cultural vandalism would be visited on St Paul's Cathedral or Westminster Abbey as the most significant historic places of Christian Worship in our country.

The current application would also do nothing to mitigate the huge damage to the functioning of the Bevis Marks Synagogue that would be created if this or any other tower block were to be built in the Creechurch Conservation Area this close to the synagogue.

It will so much diminish the amount of natural light in the synagogue as to make it more difficult to read the hand calligraphed unpointed Hebrew of the Torah scrolls from which the sacred texts of the services are read, as well as diminishing the natural light needed to assist worshippers from reading their Hebrew service prayer books.

The overshadowing of the Courtyard of the Synagogue by the proposed building would make it all but impossible on most of the relevant monthly dates of the year for the congregation to witness the transition of the New Moon which is an essential part of the ancient and inspiring ceremonial Kiddush Levanah— the Sanctification of the New Moon.

This is no small matter. At a time when the Jewish community of Great Britain is under vilification, attack and very real threats, it is more than ever essential that its place as a proud part of British history and one of its oldest functioning non Christian places of worship remains as central and its amenities maintained undiminished as a place of worship and as testimony of the centrality of the Jewish community to the record of warm acceptance of its role as living testimony to British cultural history.

THIS IS AN EXTERNAL EMAIL

Dear team,
I write as a member of Bevis Marks Synagogue since the 1980s, who attends services weekly and cares very much for its future.
This renewed application for a building on this site could be regarded as vexatious. A similar plan was rejected in 2022 (ref 20/00848/FULEIA) due to its effect on the Tower of London and Bevis Marks Synagogue. The impact on the synagogue remains negative, despite the changes made (I am not qualified speak for the Tower).
The conservation area that has been established around the synagogue is obviously compromised by this plan, and is sufficient grounds for rejecting the application. The application should not have been allowed.
The practical objections remain unchanged. The vibrations that would inevitably result from construction work so nearby would endanger this Grade 1 listed building, whose importance to the worldwide Jewish community is particularly high, as the oldest synagogue in continuous use in Europe. The noise of construction work would disrupt services and also the daily life of the rabbi, who lives next door on Heneage Lane and has a small child.
The quality of light inside the building is a sensitive issue. On sunny days there is a golden quality to the light that lifts the atmosphere and shows the patina of the furniture and the polished brass lamps to advantage. Light is essential for following the complex liturgy and Bible readings. The electric lighting, which was installed in the 1920s, is insufficient but cannot be changed, since the fittings are attached to the columns of the gallery. On gloomy days the interior is shadowy and lifeless. The proposed tower would plunge it into perpetual semi-darkness.
Blocking off the sky from the courtyard would make it impossible to perform the rituals around the new moon, as they have been for three centuries.
This major tourist asset should not be damaged, especially as a visitors' centre is currently being completed, and is due to open in the next year.
Yours truly,
Jeremy Schonfield

THIS IS AN EXTERNAL EMAIL

I am a member of Bevis Marks synagogue and wish to object to this proposal for the following reasons:

1. Bevis Marks is a grade 1 Historical building in a Conservation area. Building more modern blocks around it will undermine the atmosphere and make mockery of the idea of conservation.
2. Overshadowing the building and reducing daylight will compromise the religious experience of Synagogue users, who will have to augment God's created light with man-made electricity when reading the scripture.
3. Bevis Marks is the oldest synagogue in unbroken service not only in Britain, but possibly world wide. Therefore, the way it is respected and protected has wide reaching echoes and has to be taken seriously.

Yours truly,
Tamar Schonfield

THIS IS AN EXTERNAL EMAIL

Dear Sirs,

I wish to register my strongest objections to your proposal for the development of the above project. Please take these comments into account.

- The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets.
- The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels.
- The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses.
- The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.

Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates from 1701 and is the oldest and most historically significant synagogue in the country. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance.

This application follows a previous, similar application by the same applicant (ref. 20/00848/FULEIA) which was refused in 2022 for two reasons, relating to the impact of the proposal on the setting of Bevis Marks Synagogue, and the setting of the Tower of London. The reasons for refusal in 2022 apply today.

The applicants say they have made changes to the design and are now

providing space that can be used by community groups and small businesses, which represents public benefits that tip the planning balance in their favour. However, the design changes will make hardly any difference to the impact on the Synagogue, and in any event are counterbalanced by the fact that the heritage ‘bar’ is now even higher as the Synagogue has recently gained the added status of being within a Conservation Area. The ‘public benefits’ would confer little to no benefit upon the Synagogue and the community it supports, and - whilst they may benefit some people - would hardly begin to counter the damage the tower would cause.

Please register my strongest objection to this proposal and inform me of your decision by return.

Many thanks,

Ketty Ozer

PLANNING APPLICATION (24/00021/FULEIA) - OBJECTION
BURY HOUSE, 31 BURY STREET

From:
PNatali
14LeasideAvenue
London
N103BU

Date: 27 November 2024

Application Reference:	24/00021/FULEIA
Address:	Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR
Proposal:	Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.
Case Officer:	Anna Tastsoglou

I object to this planning application (24/00021/FULEIA) at Bury House, 31 Bury Street.

I have previously objected to a similar application (20/00848/FULEIA) on the same site.

The previous application (20/00848/FULEIA) was refused on 22 June 2022 by the City Corporation, in part, because "*The development would adversely affect the setting of the Grade 1 listed Bevis Marks Synagogue and its setting and amenities by reason of the overbearing and overshadowing impact of the development on the courtyard of the Synagogue (which harms would not be outweighed by the public benefits of the proposal), contrary to Local Plan Policy CS10.1 (ensuring buildings are appropriate to the setting and amenities of surrounding buildings and spaces); Local Plan Policy CS12 (conserving or enhancing the significance of the City's heritage assets and their settings and providing an attractive environment to the City's communities) and London Plan Policy GG1 (Building strong and inclusive communities, promoting fairness, inclusivity and equality)*.".

I objected to the current application on 2 April 2024. That application has now been amended and additional information submitted (as per your letter of 8 October 2024).

The current application (24/00021/FULEIA) is of no greater merit than the previous, refused, application; the current application would also have an overbearing and overshadowing impact on the Synagogue and its courtyard and it would be at the expense of the Jewish community. I am therefore very concerned about the current application.

Bevis Marks is the oldest continually functioning Synagogue in the UK, with families able to trace their roots back to the early days of the community in the 17th century. It is an important part of this country's multi-faith heritage and is an active and vibrant Synagogue and community. It is a pity that the wannabe developer is seeking to obtain planning consent for a scheme that will be detrimental to the Synagogue, its community and its wider place in Britain's heritage.

My objections to the current proposals are many and include, in part, the following:

- The proposed 40+ storey tower would completely overwhelm the Grade 1 Listed Synagogue building, which is of enormous historic and cultural significance.
- The proposed tower would overshadow the Synagogue and its courtyard for much of the day. It would further reduce the already minimal daylight that penetrates into the Synagogue, making it even more difficult to conduct worship. It would also reduce the ability for the Synagogue's courtyard to be used for rituals and celebrations.
- Although the wannabe developer's Design and Access Statement sets out (at 5.4a3) that the current proposals include a height reduction from the previous proposals such that, it is claimed "*The height reduction and stepped form of the upper sections are purposely designed to minimise any adverse impact to views from the [Synagogue's] courtyard*", this is disingenuous as the wannabe developer is incorrect *viz* in order to minimise any adverse impact to views from the Synagogue's courtyard there should be NO new development visible from the Synagogue's courtyard. (See also comments concerning light above.)
- Irrespective of any qualities of design or sustainability, a building of the size and scale proposed is simply inappropriate to be built so close to a Grade 1 Listed Synagogue building; a similar approach would not be permitted adjacent to St Paul's Cathedral and there is no good reason for such an approach to be acceptable adjacent to Bevis Marks Synagogue.
- The City of London's heritage, and the Jewish community's centuries old ability to worship at the Synagogue, should not suffer at the expense of alleged benefits that the wannabe developer contends might become available elsewhere in the area. Britain's Jewish community and its heritage do matter and must be preserved.
- The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict between the proposed development and the statutory development plan. The City Corporation would be disingenuous were it, on the one hand, to create the Creechurch Conservation Area and, on the other hand, to remove the very restrictions pertaining to the Creechurch Conservation Area that benefit the Synagogue and its setting.

Further, I note the following:

- The objection to the application that appeared in The Times on 26 November 2024 (Appendix A, attached), the terms of which I wholeheartedly agree.
- The Ministry of Housing, Communities and Local Government has now restricted the granting of permission by the Corporation, to allow the government to consider the case: https://www.bbc.co.uk/news/articles/cgr08wq4qn0o.
- It is high time that the Corporation put an end to the repetitive actions of wannabe developers seeking to harm Bevis Marks and the Jewish community. It is unconscionable that year on year wannabe developers' actions leave the Jewish community and its supporters feeling under constant threat of development taking place around Bevis Marks, which results in so much energy having to be devoted to defeating the wannabe developers at every turn, all at the expense of the community wishing to be able to continue with its continuing peaceful worship at Bevis Marks.

I request that the City Corporation rejects the proposed development.

Thank you for your attention.

APPENDIX A

Letter in The Times 26 November 2024

Synagogue in peril

Sir,

For more than 300 years the Grade I listed Bevis Marks Synagogue has been at the heart of British Judaism. It is one of the most natural light-sensitive places in London, where extensive reading of printed texts is fundamental to worship. That may become impossible, especially in the winter months, if a 43-storey tower is built at 31 Bury Street, overshadowing the synagogue and its courtyard. The proposal will be considered by the City of London planning committee on December 13. A similar proposal was rejected in 2022 because of the damaging impact on the synagogue and the Tower of London. The former is now included in a conservation area, which ought to give further protection, but the City of London is trying to undermine this. More than 1,340 objections have been received and we urge the committee to reject the plan.

Sir Michael Bear, lord mayor of London 2010-11; **Lord Levene of Portsoken**, lord mayor of London 1998-99; **Rachel Blake**, MP for the Cities of London & Westminster; **the Right Rev Sarah Bullock**, Bishop of Shrewsbury; **Sir Stuart Lipton**; **Professor Sir Simon Schama**; **Baroness Deech DBE KC**; **Lord Dyson**; **Rt. Hon Lord Howard of Lympne CH KC**; **Baroness Neuberger DBE**; **The Rt. Hon Lord David Triesman**; **Lord Wolfson of Tredegar KC**, shadow attorney-general; **Phil Rosenberg**, president of the board of deputies of British Jews; **Keith Black**, chair of the Jewish leadership council; **Professor Lucy Noakes,** president of the Royal Historical Society; **Professor Miri Rubin**, president of the Jewish Historical Society of England; **Rabbi Shalom Morris**, Bevis Marks Synagogue; **Rabbi Joseph Dweck**, senior Rabbi S&P Sephardi Community; **The Very Rev Prof Sarah Foot**, Dean of Christ Church, Oxford; The Rev **Laura Jorgensen**, St. Botolphs without Aldgate and area dean of the City of London; **The Rev Josh Harris**, Priest-in-Charge at St Katharine Cree; **Sadiya Ahmed**, founder of Everyday Muslim Heritage and Archive Initiative; **Tom Holland**, FRSL; **Simon Sebag Montefiore**; **Professor Sir Christopher Clark**, regius professor of History at Cambridge University; **Professor David Feldman**, Director of Birkbeck Institute for the study of antisemitism; **Dr Jaclyn Granick**, senior lecturer in modern Jewish history, Cardiff University; **Abigail Green**, professor of Modern European History at Oxford University; **Professor Tony Kushner**, The Parkes Institute, University of Southampton; **James Parkes**, professor of History; **Professor Laura Leibman**, Princeton University, Leonard J. THIS IS AN EXTERNAL EMAIL

I am a member of the S&P Sephardi Congregation and a regular worshipper at Bevis Marks Synagogue.

I was horrified to learn of the application which has been submitted to erect a 43 storey office tower on the site of Bury House, which would have a devastating effect on the Synagogue and those who worship there.

The Synagogue is already surrounded by buildings which cut out a good deal of natural light, particularly on dull days. If the proposed building were erected however, not only would the Synagogue be deprived of further light but at night the moon would no longer be visible from the exterior of the building, which would prevent the practicing of an important religious ritual.

I am also most concerned about the damage which the excavation works involved with the erection of the proposed block would cause to the foundations and upper structure of the Synagogue building, especially bearing in mind that it was built over 300 years ago, when building regulations were non existent and foundations were much shallower than they are today. If, despite the overwhelming opposition to this planning application, permission were to granted, then the architects, civil engineers and other professionals involved in the erection of the new building, not to mention the contractors themselves, would need to be fully covered by indemnity insurance against the untold damage that could be caused to the Synagogue and other nearby properties.

I would be most surprised if the Corporation of London were to grant its consent to the erection of such a completely out of scale office building, which would leave such a shameful and permanent legacy on one of its most unique and historic buildings. What a contrast this would make to the recently constructed piazza at the end of the street, which has secured an uninterrupted view of St Botolph's Church.

Unfortunately, the City of London already has too many ziggurats, each one more hideous in its appearance than the next, and to permit the erection of yet another, particularly in a location so close to a conservation area, would only tarnish the landscape of the City even further.

Our Ref: SG30645

Dear Sir/Madam

The proposed development has been examined from a technical safeguarding aspect and does not conflict with our safeguarding criteria. Accordingly, NATS (En Route) Public Limited Company ("NERL") has no safeguarding objection to the proposal.

However, please be aware that this response applies specifically to the above consultation and only reflects the position of NATS (that is responsible for the management of en route air traffic) based on the information supplied at the time of this application. This letter does not provide any indication of the position of any other party, whether they be an airport, airspace user or otherwise. It remains your responsibility to ensure that all the appropriate consultees are properly consulted.

If any changes are proposed to the information supplied to NATS in regard to this application which become the basis of a revised, amended or further application for approval, then as a statutory consultee NERL requires that it be further consulted on any such changes prior to any planning permission or any consent being granted.

Yours faithfully

NATS Safeguarding

LPA Ref: 24/00021/FULEIA and 24/00011/LBC

London City Airport Ref: 2024/LCY/067

Date: 19/03/24

Dear Anna Tastsoglou,

Thank you for consulting London City Airport. This proposal has been assessed from an aerodrome safeguarding perspective. Accordingly, it was found **to have the potential to conflict** with London City Airport's safeguarding criteria. If the local planning authority is of a mind to approve this application, then London City Airport suggests the following condition contained in this letter is applied to any future approval.

LPA Reference	24/00021/FULEIA and 24/00011/LBC
Proposal	Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works. Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam;

	partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works.
Location	1-4, 31-34 Bury Street, London, EC3A 5AR
Borough	City of London
Case Officer	Anna Tastsoglou

London City Airport's response must change to an objection unless this condition is applied to this planning permission.

Building Obstacle Lighting Condition

Details of obstacle lights shall be submitted to and approved in writing by the Local Planning Authority. The obstacle lights must be in accordance with the requirements of regulation CS ADR-DSN Chapter Q 'Visual Aids for Denoting Obstacles' and will be installed and illuminated prior to the decommissioning of any temporary obstacle lighting associated with the construction of the development.

Reason: Aviation obstacle lights are required on the development to avoid endangering the safe movement of aircraft and the operation of London City Airport.

We would also like to make the following observations:

CAA Building Notification

If any part of the development exceeds 91.4m AGL, upon grant of permission, City of London are required to notify the Civil Aviation Authority (CAA) as required under Annex 2 paras 30 – 32 of DfT/ODPM Circular 01/2003 'Safeguarding of Aerodromes & Military Explosives Storage Areas'.

CAA Crane Notification

Where a crane is 100m or higher, crane operators are advised to notify the CAA (arops@caa.co.uk) and Defence Geographic Centre (dvof@mod.gov.uk). Crane notification | Civil Aviation Authority (caa.co.uk)

The following details should be provided before the crane is erected:

- the crane's precise location
- an accurate maximum height

- start and completion dates

This response represents the view of London City Airport Ltd as of the date of this letter and applies solely to the above stated application. This letter does not provide any indication of the position of any other party, whether they are an airport, airspace user or otherwise. It remains your responsibility to ensure that all the appropriate consultees are properly consulted.

If any changes are proposed to the information supplied to London City Airport in regard to this application which become the basis of a revised, amended or further application for approval, then as a statutory consultee London City Airport Ltd requires that it be further consulted on any such changes prior to any planning permission, or any consent being granted.

If you need guidance, templates, documents or have any queries please contact safeguarding@londoncityairport.com

Kind regards,

Simon Vince
On behalf of London City Airport

Standing Advice

Dear Sir/Madam,

Thank you for your email.

In relation to the above planning consultation and given the role of Transport for London (TfL) in promoting and supporting active travel through the planning process, Active Travel England (ATE) will not be providing detailed comments on development proposals in Greater London at the current time. However, ATE and TfL have jointly produced a standing advice note, which recommends that TfL is consulted on this application where this has not already occurred via a Stage 1 referral to the Mayor of London. Our standing advice can be found here: https://www.gov.uk/government/publications/active-travel-england-sustainable-development-advice-notes

Regards,

Development Management Team

Dear Anna,

Bury House, 1 - 4, 31 - 34, Bury Street, London, EC3A 5AR

Demolition of bury house and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of holland house and renown house; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at holland house (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at renown house (36.49m AOD); interconnection of the three buildings; use of the buildings for office (class E(G)), flexible retail/café (class E(A)/E(B)), and flexible community/education/ cultural/amenity (class F2(B)/ F1(A)- (E)/ E(F)/sui generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

Thank you for consulting us on the above application. Based on the information available, the application raises no environmental concerns for us. We therefore have **no comments** on this application, however, please consider the following advice.

Water Resources
Increased water efficiency for all new developments potentially enables more growth with the same water resources. Developers can highlight positive corporate social responsibility messages and the use of technology to help sell their homes. For the homeowner lower water usage also reduces water and energy bills.

We endorse the use of water efficiency measures especially in new developments. Use of technology that ensures efficient use of natural resources could support the environmental benefits of future proposals and could help attract investment to the area. Therefore, water efficient technology, fixtures and fittings should be considered as part of new developments.

We recommend that all new non-residential development of 1000sqm gross floor area or more should meet the BREEAM ‘excellent’ standards for water consumption.

We also recommend you contact your local planning authority for more information.

Pre Application Advice

Cont/d..

INVESTOR IN PEOPLE

Regarding future applications, if you would like us to review a revised technical report prior to a formal submission, outside of a statutory consultation, and/or meet to discuss our position, this will be chargeable in line with our planning advice service. If you wish to request a document review or meeting, please contact our team email address at HNLSustainablePlaces@environment-agency.gov.uk.

Final comments
Thank you for contacting us regarding the above application. Our comments are based on our available records and the information submitted to us. Please quote our reference number in any future correspondence. Please provide us with a copy of the decision notice for our records. This would be greatly appreciated.

If you have any questions, please email me at HNLSustainablePlaces@environment-agency.gov.uk, quoting the reference at the beginning of this letter.

2nd April 2024

Dear Anna,

TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED)
NATIONAL PLANNING POLICY FRAMEWORK 2021

Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works

Recommend Archaeological Conditions

Thank you for your consultation received on 14th March 2024.

The Greater London Archaeological Advisory Service (GLAAS) gives advice on archaeology and planning. Our advice follows the National Planning Policy Framework (NPPF) and the GLAAS Charter.

Assessment of Significance and Impact

The proposed development is in an area of archaeological interest. The City of London was founded almost two thousand years ago and London has been Britain's largest and most important urban settlement for most of that time. Consequently, the City of London Local Plan 2015 says that all of the City is considered to have archaeological potential, except where there is evidence that archaeological remains have been lost due to deep basement construction or other groundworks.

The site lies in an area which was formerly within the walls of the Roman city of Londinium. A large Roman ditch was identified to the west of the site at St Mary Axe and a Roman road was identified to the south of the site, both of which are likely to have continued through the site. Roman buildings have also been identified close to the site. The Augustinian Holy Trinity Priory (founded 1108) was formerly located partially within the east of the site. The site was occupied by a series of buildings during the post-medieval period, including a school.

All three of the current buildings on the site have a basement. The deepest basement appears to be under Holland House although no OD height has been provided for it. Shallower basements appear to be present beneath Bury House and Renown House. The archaeological desk-based assessment (AOC 2023) submitted with the application suggests that the Bury House basement has removed all archaeological deposits to a depth of c 11m OD. No depth for the basement of Renown House has been provided but a similar level of impact may be expected. Remains of the Abbey previously excavated to the east of the site have confirmed that the lower parts of the Abbey remains extend to below 11m OD in places. It is also possible that deeper cut features of Roman date may also survive beneath the current basements. No archaeological evaluation or investigation has been previously carried out on the site to ascertain likely levels of truncation.

The proposed development includes a basement under Bury House that will extend to four levels. This will cause complete truncation of any surviving archaeological deposits. In Holland House, no new basements are proposed but a crane base and new foundation will be inserted into the current lightwell. Renown House will retain its facade, which is likely to need propping. The supports for the propping are likely to extend below the current basement. Underpinning may also be required here.

It is therefore possible that remains of Roman and medieval date survive on the site, although remains of high significance are not expected due to truncation from the current buildings. The proposed development will have a high impact on these potential remains. It is

recommended that an archaeological evaluation take place, if consent is granted, in order to establish the nature and extent of archaeological survival. In the first instance, geotechnical investigations should be monitored by an archaeologist as they are carried out. If archaeological remains are encountered, a full programme of archaeological mitigation, which covers all below ground impacts should be implemented.

A cultural and education space is to be provided within the proposed development. The archaeological work should therefore include public engagement to feed into the cultural and education programme for the site. The story of Holy Trinity Priory is of particular interest as little information about this site is available to view within the City.

Planning Policies

NPPF Section 16 and the London Plan (2021 Policy HC1) recognise the positive contribution of heritage assets of all kinds and make the conservation of archaeological interest a material planning consideration. NPPF paragraph 200 says applicants should provide an archaeological assessment if their development could affect a heritage asset of archaeological interest.

NPPF paragraphs 195 and 203 and London Plan Policy HC1 emphasise the positive contributions heritage assets can make to sustainable communities and places. Where appropriate, applicants should therefore also expect to identify enhancement opportunities.

If you grant planning consent, paragraph 211 of the NPPF says that applicants should record the significance of any heritage assets that the development harms. Applicants should also improve knowledge of assets and make this public.

Recommendations

I advise that the development could cause harm to archaeological remains and field evaluation is needed to determine appropriate mitigation. However, although the NPPF envisages evaluation being undertaken prior to determination, in this case consideration of the nature of the development, the archaeological interest and/or practical constraints are such that I consider archaeological conditions could provide an acceptable safeguard. This would comprise firstly, evaluation to clarify the nature and extent of surviving remains, followed, if necessary, by a full investigation.

I therefore recommend attaching conditions as follows:

Condition 1 No demolition or development shall take place until a stage 1 written scheme of investigation (WSI) has been submitted to and approved by the local planning authority in writing. For land that is included within the WSI, no demolition or development shall take place other than in accordance with the agreed WSI, and the programme and methodology of site evaluation and the

nomination of a competent person(s) or organisation to undertake the agreed works.
If heritage assets of archaeological interest are identified by stage 1 then for those parts of the site which have archaeological interest a stage 2 WSI shall be submitted to and approved by the local planning authority in writing. For land that is included within the stage 2 WSI, no demolition/development shall take place other than in accordance with the agreed stage 2 WSI which shall include:

A. The statement of significance and research objectives, the programme and methodology of site investigation and recording and the nomination of a competent person(s) or organisation to undertake the agreed works
B. Where appropriate, details of a programme for delivering related positive public benefits
C. The programme for post-investigation assessment and subsequent analysis, publication & dissemination and deposition of resulting material. This part of the condition shall not be discharged until these elements have been fulfilled in accordance with the programme set out in the stage 2 WSI.

Informative Written schemes of investigation will need to be prepared and implemented by a suitably professionally accredited archaeological practice in accordance with Historic England's Guidelines for Archaeological Projects in Greater London. This condition is exempt from deemed discharge under schedule 6 of The Town and Country Planning (Development Management Procedure) (England) Order 2015.

Condition 2 Public Engagement .

No development shall commence until details of an appropriate programme of public engagement including a timetable have been submitted and approved in writing by the local planning authority. The development shall be carried out in accordance with the approved programme.

Informative: Historic England's Guidelines for Archaeological Projects in Greater London provides advice on popular interpretation and presentation options.

Condition 3 Foundation Design ...

No development shall take place until details of the foundation design and construction method to protect archaeological remains have been submitted and approved in writing by the local planning authority. The development shall be carried out in accordance with the approved details.

These pre-commencement conditions are necessary to safeguard the archaeological interest on this site. Approval of the WSI before works begin on site provides clarity on what investigations are required, and their timing in relation to the development programme. If the applicant does not agree to these pre-commencement conditions, please let us know their reasons and any alternatives suggested. Without these pre-commencement conditions being imposed the application should be refused as it would not comply with NPPF paragraph 211.

I envisage that the archaeological fieldwork would comprise the following:

Geotechnical Monitoring

Archaeological monitoring of geotechnical pits and boreholes can provide a cost-effective means of establishing the potential for archaeological remains to survive on previously developed land or where deep deposits are anticipated. It is usually used as part of a desk-based assessment or field evaluation.

Evaluation

An archaeological field evaluation involves exploratory fieldwork to determine if significant remains are present on a site and if so to define their character, extent, quality and preservation. Field evaluation may involve one or more techniques depending on the nature of the site and its archaeological potential. It will normally include excavation of trial trenches. A field evaluation report will usually be used to inform a planning decision (pre-determination evaluation) but can also be required by condition to refine a mitigation strategy after permission has been granted.

Public engagement

Where appropriate, local planning authorities and the developer are advised to make investigative works open to and interpreted for the public and to include that as part of the WSI. Opportunities for public engagement, proportionate to the significance of the investigation, could, for example, include enabling participation in investigation, providing viewing platforms and interpretation panels, jointly designed open days in partnership with the local community, public talks and online forums as well as coverage in local media. Once analysed, the results and the knowledge gained may be communicated, in addition to formal publication and deposition of the archive, through displays, exhibitions and popular publications and might inform site design and public art.

You can find more information on archaeology and planning in Greater London on our website.

This response relates solely to archaeological considerations. If necessary, Historic England's Development Advice Team should be consulted separately regarding statutory matters.

Yours sincerely

APPLICATION COMMENT FORM

From: Ella Brown, Environmental Resilience Officer

Application No: 24/00021/FULEIA

Development Management Case Officer: Anna Tastsoglou

Site Address: Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

Proposal: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

Application Received: 8th January 2024

Request for Comment Received: 14th March 2024

Comment:

Application submission documents relating to climate change resilience and adaptation have been reviewed, including:

- Sustainability Statement (Hoare Lea, October 23)
- Design and Access Statement (Stiff+Trevillion, January 2024)
- Flood Risk Assessment and Drainage Strategy (Thorton Tomasetti, January 2024)
- Outdoor Thermal Comfort Assessment (GIA Chartered Surveyors, October 2023)
- Preliminary Ecological Appraisal and Biodiversity Net Gain Report (Hilson Moran, September 2023)
- Health Impact Assessment (Quod, January 2024)

Overheating and the urban heat island effect

There are no site-specific references to overheating or the urban heat island in the Sustainability Statement, although the report does refer to Policy CR1in the policy review.

An outdoor thermal comfort assessment was conducted by GIA using high resolution Computational Fluid Dynamics (CFD). The assessment found:

- All ground level conditions were suitable for intended use, or no worse than the baseline conditions
- The proposed development is having a beneficial impact on existing benches to the north of 30 St Mary's Axe
- Conditions for all existing off-site terraces are suitable for the intended use

Date & Initials

- Conditions for all proposed terraces are suitable for the intended use.

Flooding

The proposed development is in Flood Zone 1 and has been assessed to be at low risk of flooding from all sources. The proposed drainage system will be sized to attenuate storms up to the 1 in 100 year event plus a 40% allowance for climate change, comprising a blue roof and two attenuation tanks. Flows will be restricted to 5 l/s, which provides an 83% reduction on the equivalent brownfield rate during the 2 year storm event.

Water stress

The FRA & DS states that "*roofwater recycling has been discounted on the basis that the roof area is small compared to the number of potential users and disproportionate investment required to distribute a small water resource over a large number of occupants.*"

The FRA & DS states that roof drainage will be used for irrigation for the green roofing and green walls.

Biodiversity and pests and diseases

A Preliminary Ecological Appraisal (PEA) has been produced by Bowes & Wyer. The survey deemed the site to be of low ecological value with limited opportunities to support nesting birds. The proposed development incorporates multiple biodiversity enhancements measures which will result in an Urban Greening Factor (UGF) exceeding 0.3. Ecological enhancements will be delivered through the inclusion of green roof habitats, terraced landscaping, a green wall and planting at the public realm level. Habitat infrastructure such as bird and insect boxes will also be installed.

The Sustainability Statement states "*The project will prioritise native, locally sourced plants (from within the UK) as part of the landscape strategy for the public realm, a decision driven by both responsible procurement and biosecurity considerations.*"

There is no reference to pests and diseases within the Sustainability Statement or PEA.

A Health Impact Assessment was prepared by Quod which found the proposed development has a positive impact on health through:

- New jobs associated with the uplift in office floorspace and affordable co-working space supporting access to local employment;
- Provision of flexible community/education/cultural space meeting an identified need in the area;
- 'City Cycles' – a new social enterprise in the retail space on site supporting unemployment adults into employment through training and work experience of bike mechanics, as well as meeting a need for bike servicing in the area;
- A car-free building minimising vehicles travelling to the Site alongside extensive provision of bike parking to support active travel (and improved pedestrian permeability, as set out above);

APPLICATION COMMENT FORM	
• Provision of new open space at James' Court and external building terraces providing much needed amenity provision; • Heneage Arcade providing a new north-south through route improving connectivity and permeability, as well as enhancing the attractiveness of the physical environment; • Inclusivity and accessibility as placemaking principles; • Building and landscape design considering sustainability and climate change, with ASHPs and a 'fabric first' approach significantly reducing the carbon footprint, and extensive urban greening measuring enhancing biodiversity; • The building and landscape design also provides an enhanced environment for workers and site users (along with the wider public) through high quality design aspiring towards • BREEAM 'Outstanding' and WELL 'Platinum' rating, an attractive public realm, greening measures and supporting active travel measures Food, trade and infrastructure The Sustainability Statement writes that the project aims to deliver a 'WELL' certified building thereby incorporating industry best practice on health and wellbeing. Measures encouraging physical exercise such as the provision of cycle spaces will incentivise active commuting. The positive health impacts taken from the Quod Health Impact Assessment can also be applied to positive improvements to trade and infrastructure. Recommendation: The proposed development is not compliant with Local Plan Policy DM 15.5 (Climate change resilience), Draft City Plan 2036 Strategic Policy S15 (Climate Resilience and Flood Risk) and associated City Plan 2036 Policies CR1 and CR2. The following condition should also be considered to provide details of how the development has responded to risks from climate change; this condition may be fulfilled by a satisfactory assessment in support of the BREEAM Wst 05 credit: *Prior to the commencement of the development (other than demolition) a Climate Change Resilience Sustainability Statement (CCRSS) shall be submitted to and approved in writing by the Local Planning Authority, that demonstrates that the development is resilient and adaptable to predicted climate conditions during the lifetime of the development. The CCRSS shall include details of the climate risks that the development faces (including flooding, heat stress, water stress, natural capital, pests and diseases) and the climate resilience solutions for addressing such risks. The CCRSS will demonstrate that the potential for resilience and adaptation measures (including but not limited to: solar shading to prevent solar gain; high thermal mass of building fabric to moderate temperature fluctuations; cool roofs to prevent overheating; urban greening; rainwater attenuation and drainage; flood risk mitigation; biodiversity protection; passive ventilation and heat recovery and air quality assessment to ensure building services do not contribute to worsening photochemical smog) has been considered and appropriate measures incorporated in the design of the building. The CCRSS shall also*	EB 03/04/24

APPLICATION COMMENT FORM	
demonstrate how the development will be operated and managed to ensure the identified measures are maintained for the life of the development. The development shall be carried out in accordance with the approved CCRSS and operated and managed in accordance with the approved CCRSS for the life of the development.

3 April 2024

Dear Sir/Madam

TOWN AND COUNTRY PLANNING ACT 1990

The City Council has considered the proposals described below and has decided it DOES NOT WISH TO COMMENT ON THE PROPOSAL(S).

SCHEDULE

Application No.: 24/01716/OBS **Application Date:**

Date Received: 14.03.2024 **Date Amended:** 14.03.2024

Plan Nos: Letter from City of London dated 14 March 2024.

Address: Bury House, 31 Bury Street, City Of London, EC3A 5AR

Proposal: Application for planning permission ref. 24/00021/FULEIA:

Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

Application for listed building consent ref. 24/00011/LBC:

Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works.

Yours faithfully

4 April 2024

Dear Sir/Madam

Re: 1-4, 33-34 , BURY STREET, LONDON, EC3A 5AR

Waste Comments
The proposed development is located within 15 metres of a strategic sewer. Thames Water requests the following condition to be added to any planning permission. "No piling shall take place until a PILING METHOD STATEMENT (detailing the depth and type of piling to be undertaken and the methodology by which such piling will be carried out, including measures to prevent and minimise the potential for damage to subsurface sewerage infrastructure, and the programme for the works) has been submitted to and approved in writing by the local planning authority in consultation with Thames Water. Any piling must be undertaken in accordance with the terms of the approved piling method statement." Reason: The proposed works will be in close proximity to underground sewerage utility infrastructure. Piling has the potential to significantly impact / cause failure of local underground sewerage utility infrastructure. Please read our guide 'working near our assets' to ensure your workings will be in line with the necessary processes you need to follow if you're considering working above or near our pipes or other structures. https://gbr01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thameswater.co.uk%2Fdevelopers%2Flarger-scale-developments%2Fplanning-your-development%2Fworking-near-our-pipes&data=05%7C02%7CPLNComments%40cityoflondon.gov.uk%7C2e02d3fdd087c44bc904708dc54bd5898%7C3fe658bcdb3ce0405685193222fa98ae8%7C0%7C0%7C638478380783468059%7CUnknown%7CTWFpbGZsb3dBeyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=KPU05FUvFf55w6xXOMw5ZU44IEgfvIPx5Vlf0%2BwUCaKc%3D&reserved=0 Should you require further information please contact Thames Water. Email: developer.services@thameswater.co.uk Phone: 0800 009 3921 (Monday to Friday, 8am to 5pm) Write to: Thames Water Developer Services, Clearwater Court, Vastern Road, Reading, Berkshire RG1 8DB

As required by Building regulations part H paragraph 2.36, Thames Water requests that the Applicant should incorporate within their proposal, protection to the property to prevent sewage flooding, by installing a positive pumped device (or equivalent reflecting technological advances), on the assumption that the sewerage network may surcharge to ground level during storm conditions. If as part of the basement development there is a proposal to discharge ground water to the public network, this would require a Groundwater Risk Management Permit from Thames Water. Any discharge made without a permit is deemed illegal and may result in prosecution under the provisions of the Water Industry Act 1991. We would expect the developer to demonstrate what measures will be undertaken to minimise groundwater discharges into the public sewer. Permit enquiries should be directed to Thames Water's Risk Management Team by telephoning 02035779483 or by emailing trade.effluent@thameswater.co.uk . Application forms should be completed on line via https://gbr01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.thameswater.co.uk%2Fdeveloper&data=05%7C02%7CPLNComments%40cityoflondon.gov.uk%7C2e02d3fdd087c44bc904708dc54bd5898%7C3fe658bcdb3ce0405685193222fa98ae8%7C0%7C0%7C638478380783458921%7CUnknown%7CTWFpbGZsb3dBeyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=rLTIWxmFvrxPeccwLjw%2BPGKBBqVlWn697ULWSQqjYXo%3D&reserved=0. Please refer to the Wholesale; Business customers; Groundwater discharges section.

We would expect the developer to demonstrate what measures will be undertaken to minimise groundwater discharges typically result from construction site dewatering, deep excavations, basement infiltration, borehole installation, twning and site remediation. Any discharge made without a permit is deemed illegal and may result in prosecution under the provisions of the Water Industry Act 1991. Should the Local Planning Authority be minded to approve the planning application, Thames Water would like the following informative attached to the planning permission: "A Groundwater Risk Management Permit from Thames Water will be required for discharging groundwater into a public sewer. Any discharge made without a permit is deemed illegal and may result in prosecution under the provisions of the Water Industry Act 1991. We would expect the developer to demonstrate what measures he will undertake to minimise groundwater discharges into the public sewer. Permit enquiries should be directed to Thames Water's Risk Management Team by telephoning 020 3577 9483 or by emailing trade.effluent@thameswater.co.uk . Application forms should be completed on line via https://gbr01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.thameswater.co.uk%2Fdeveloper&data=05%7C02%7CPLNComments%40cityoflondon.gov.uk%7C2e02d3fdd087c44bc904708dc54bd5898%7C3fe658bcdb3ce0405685193222fa98ae8%7C0%7C0%7C638478380783461786%7CUnknown%7CTWFpbGZsb3dBeyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=tT7XL0YF%2Ftk7SMLZOHxvcYqVy3enj2zFCGDgbmuJfbk%3D&reserved=0. There are public sewers crossing or close to your development. If you're planning significant work near our sewers, it's important that you minimize the risk of damage. We'll need to check that your development doesn't limit repair or maintenance activities, or inhibit the services we provide in any other way. The applicant is advised to read our guide working near or diverting our pipes. https://gbr01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.thameswater.co.uk%2Fdevelopers%2Flarger-scale-developments%2Fplanning-your-development%2Fworking-near-our-pipes&data=05%7C02%7CPLNComments%40cityoflondon.gov.uk%7C2e02d3fdd087c44bc904708dc54bd5898%7C3fe658bcdb3ce0405685193222fa98ae8%7C0%7C0%7C638478380783467059%7CUnknown%7CTWFpbGZsb3dBeyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=3cRpas4Le4fkkyWAZ3BFbqNneFVFvSfnf1ddc%2FfStTA9E%3D&reserved=0

Thames Water would advise that with regard to the COMBINED WASTE WATER network infrastructure capacity, we would not have any objection to the above planning application, based on the information provided.

Water Comments
There are water mains crossing or close to your development. Thames Water do NOT permit the building over or construction within 3m of water mains. If you're planning significant works near our mains (within 3m) we'll need to check that your development doesn't reduce capacity, limit repair or maintenance activities during and after construction, or inhibit the services we provide in any other way. The applicant is advised to read our guide working near or diverting our pipes. https://gbr01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.thameswater.co.uk%2Fdevelopers%2Flarger-scale-developments%2Fplanning-your-development%2Fworking-near-our-pipes&data=05%7C02%7CPLNComments%40cityoflondon.gov.uk%7C2e02d3fdd087c44bc904708dc54bd5898%7C3fe658bcdb3ce0405685193222fa98ae8%7C0%7C0%7C638478380783472112%7CUnknown%7CTWFpbGZsb3dBeyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=2lnBYJ32W6NSlgOJLWLTXGBvW6T5PPmdBHhZKA9feA%3D&reserved=0

The proposed development is located within 15m of our underground water assets and as such we would like the following informative attached to any approval granted. The proposed development is located within 15m of Thames Waters underground assets, as such the development could cause the assets to fail if appropriate measures are not taken. Please read our guide 'working near our assets' to ensure your workings are in line with the necessary processes you need to follow if you're considering working above or near our pipes or other structures. https://gbr01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.thameswater.co.uk%2Fdevelopers%2Flarger-scale-developments%2Fplanning-your-development%2Fworking-near-our-pipes&data=05%7C02%7CPLNComments%40cityoflondon.gov.uk%7C2e02d3fdd087c44bc904708dc54bd5898%7C3fe658bcdb3ce0405685193222fa98ae8%7C0%7C0%7C638478380783476395%7CUnknown%7CTWFpbGZsb3dBeyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=XLgbn1VuQHHqMAiBvBkfokUOnL YnAVIG3%2FjlGpv3E%3D&reserved=0 Should you require further information please contact Thames Water. Email: developer.services@thameswater.co.uk

If you are planning on using mains water for construction purposes, it's important you let Thames Water know before you start using it, to avoid potential fines for improper usage. More information and how to apply can be found online at thameswater.co.uk/buildingwater.

Following initial investigations, Thames Water has identified an inability of the existing water network infrastructure to accommodate the needs of this development proposal. Thames Water have contacted the developer in an attempt to agree a position on water networks but have been unable to do so in the time available and as such Thames Water request that the following condition be added to any planning permission. No development shall be occupied until confirmation has been provided that either:- all water network upgrades required to accommodate the additional demand to serve the development have been completed; or - a development and infrastructure phasing plan has been agreed with Thames Water to allow development to be occupied. Where a development and infrastructure phasing plan is agreed no occupation shall take place other than in accordance with the agreed development and infrastructure phasing plan. Reason - The development may lead to no / low water pressure and network reinforcement works are anticipated to be necessary to ensure that sufficient capacity is made available to accommodate additional demand anticipated from the new development" The developer can request information to support the discharge of this condition by visiting the Thames Water website at thameswater.co.uk/preplanning. Should the Local Planning Authority consider the above recommendation inappropriate or are unable to include it in the decision notice, it is important that the Local Planning Authority liaises with Thames Water Development Planning Department (e-mail: devcon.team@thameswater.co.uk) prior to the planning application approval.

Yours faithfully

Dear Sir/Madam

Re: 1-4, 33-34 , BURY STREET, LONDON, EC3A 5AR

Waste Comments
The proposed development is located within 15 metres of a strategic sewer. Thames Water requests the following condition to be added to any planning permission. “No piling shall take place until a PILING METHOD STATEMENT (detailing the depth and type of piling to be undertaken and the methodology by which such piling will be carried out, including measures to prevent and minimise the potential for damage to subsurface sewerage infrastructure, and the programme for the works) has been submitted to and approved in writing by the local planning authority in consultation with Thames Water. Any piling must be undertaken in accordance with the terms of the approved piling method statement.” Reason: The proposed works will be in close proximity to underground sewerage utility infrastructure. Piling has the potential to significantly impact / cause failure of local underground sewerage utility infrastructure. Please read our guide ‘working near our assets’ to ensure your workings will be in line with the necessary processes you need to follow if you’re considering working above or near our pipes or other structures. https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/working-near-our-pipes Should you require further information please contact Thames Water. Email: developer.services@thameswater.co.uk Phone: 0800 009 3921 (Monday to Friday, 8am to 5pm) Write to: Thames Water Developer Services, Clearwater Court, Vastern Road, Reading, Berkshire RG1 8DB

As required by Building regulations part H paragraph 2.36, Thames Water requests that the Applicant should incorporate within their proposal, protection to the property to prevent sewage flooding, by installing a positive pumped device (or equivalent reflecting technological advances), on the assumption that the sewerage network may surcharge to ground level during storm conditions. If as part of the basement development there is a proposal to discharge ground water to the public network, this would require a Groundwater Risk Management Permit from Thames Water. Any discharge made without a permit is deemed illegal and may result in prosecution under the provisions of the Water Industry Act 1991. We would expect the developer to demonstrate what measures will be undertaken to minimise groundwater discharges into the public sewer. Permit enquiries should be directed to Thames Water’s Risk Management Team by telephoning 02035779483 or by emailing trade.effluent@thameswater.co.uk . Application forms should be completed on line via www.thameswater.co.uk. Please refer to the Wholesale; Business customers; Groundwater discharges section.

We would expect the developer to demonstrate what measures will be undertaken to minimise groundwater discharges into the public sewer. Groundwater discharges typically result from construction site dewatering, deep excavations, basement infiltration, borehole installation, testing and site remediation. Any discharge made without a permit is deemed illegal and may result in prosecution under the provisions of the Water Industry Act 1991. Should the Local Planning Authority be minded to approve the planning application, Thames Water would like the following informative attached to the planning permission: “A Groundwater Risk Management Permit from Thames Water will be required for discharging groundwater into a public sewer. 1st May 2024

Dear Anna Tastsoglou,

24/00021/FULEIA | Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works. | Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

SAVE Britain's Heritage strongly objects to the above planning application for Bury House 1-4, 31-34 Bury Street on the grounds that this proposal would cause substantial harm to the Grade I listed Bevis Marks Synagogue and its setting, and the Creechurch Conservation Area which is designated to protect multiple highly listed heritage assets and their character. SAVE also strongly objects to the total demolition of Bury House on climate grounds. We further note that a previous scheme for a 48-storey tower at No. 31 Bury Street was already refused permission in 2022 (ref no. 20/00848/FULEIA) on the grounds that the development would overbear and overshadow the Bevis Marks synagogue. For these reasons, this application fails to comply with national and local policy for preserving the historic and natural environment of the City of London, and so we call on the Local Planning Authority to refuse planning permission.

Proposal

This application proposes the total demolition of Bury House and construction of a 43-storey building; the partial demolition of Holland House and Renown House; and the erection of roof top extensions on these buildings.

Significance

The application site lies on Bury Street and includes the Grade II* listed Holland House (No. 1-4 and 32 Bury Street), Bury House (No. 31 Bury Street) and Renown House (No. 33-34 Bury Street). It is fully located within the Creechurch Conservation Area, which was newly designated in January 2024.

The site is adjacent to the Grade I listed Bevis Marks Synagogue which is one of England's most important religious buildings and is of exceptional historic and architectural value of the highest significance. Bevis Marks was constructed between 1699-1701 to designs by Jospeh Avis. The synagogue's internal fittings, which include benches, an ornately carved echal and seven brass chandeliers, are recorded by Historic England as being 'remarkably complete and little altered'. Historically, the Bevis Marks Synagogue was home to the Sephardic Jewish Community which first settled in Aldgate in the 18th century. It is the only synagogue in Europe that has been in continuous worship for over 300 years, and so is a building of international importance and outstanding historic value.

The newly created Creechurch Conservation Area (CCA) includes listed buildings of outstanding and exceptional heritage significance. In addition to Bevis Marks, two other buildings within the CA are of Grade I listed status. These are St Katherine Cree Church (1628-31) and St Botolph's Church (1741-44). Only 2.5% of listed buildings are Grade I.

Holland House, is a Grade II* listed building within the CCA, constructed between 1914-16 to designs by the Dutch architect H.P.Berlage with interiors by Henri van de Velde. The steel-framed building is clad in grey-green faience with a black marble base and doorway. The building's facade has a striking rhythm, brought to life by an alternating pattern of prominent vertical ribs and narrow windows, punctuated by decorative sunk bosses. The building was heralded by Pevsner as being of 'remarkable design', which emphasises this building's architectural importance.

No. 31 Bury Street, Bury House, is a non-designated extension to Holland House by Gotch & Partners in 1967 which is harmonious in scale with Holland House. Its height of five storeys, plus two set-back floors, does not overwhelm the Grade II* listed building nor overshadow the Creechurch Conservation Area.

A number of non-designated heritage assets make further positive and sensitive contributions to the architectural character of the conservation area. Renown House (within the application site) is a handsome Edwardian commercial building, built in 1912 to designs by Delissa Jospeh. Located on a corner plot as Bury Street winds into Creechurch Lane, the building defines the corner with its confident neo-French Classical style. Its present scale, massing and materiality is harmonious with the neighbouring Holland House, Bevis Marks Synagogue and wider CCA.

Assessment

1. Substantial harm to Bevis Marks Synagogue

SAVE considers that the proposed 43-storey tower at No. 31 Bury Street will cause substantial harm to the setting of the Grade I listed Bevis Marks Synagogue. The proposal will fundamentally alter the streetscape around this highly designated asset which is of exceptional historic value.

The Local Planning Authority is under a legal duty to preserve and enhance listed buildings and their settings under Section 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990. Further to this, Para 206 NPPF (2023) provides that any harm to the significance of a heritage asset, including its setting, requires clear and convincing justification. SAVE contests the applicant's claim in the Heritage, Townscape and Visual Impact Assessment [para 8.134] that "only the immediate setting of the Bevis Marks Synagogue contributes to its significance", to be insufficient to comply with Para 206. Historic England's Good Practice Advice in Planning Note 3: The Setting of Heritage Assets: Historic Environment (2015) sets out that, "setting is the surroundings in which an asset is experienced, and may therefore be more extensive than its curtilage". We consider that the proposed 43-storey tower, which would be visible from within the courtyard of Bevis Marks synagogue, has a direct and substantially harmful impact upon the building's setting and secluded nature. The sky view from within the courtyard has religious importance and allows daylight into the synagogue's interior. We wish to highlight the reason for refusal of application 20/00848/FULEIA which found that a tall building at No. 31 Bury Street would "affect the setting of the Grade I listed

Bevis Marks Synagogue and its setting and amenities by reason of the overbearing and overshadowing impact of the development on the courtyard of the Synagogue".

This proposed development contravenes local as well as national policy. Policy CS12(1) City of London Local Plan (adopted 2015) requires that development should safeguard the City's listed buildings and their settings. More specifically, Policy HE1 [Managing Change to the Historic Environment] of the emerging City Plan 2040 recognises that the Bevis Marks Synagogue requires, "special consideration and protection, given their outstanding architectural and historic significance and…the critical contribution of elements of setting to that significance." We call upon the LPA to refuse a planning application which fails to comply with national and local policy and contradicts the emerging City Plan 2040.

2. Substantial harm to the Creechurch Conservation Area (CCA)

The application site, whilst within the City Cluster, is fully within the Creechurch Conservation Area which was newly designated in January 2024. Policy CS14(2) of the City of London Local Plan (2015) states that planning permission for tall buildings will be refused within inappropriate areas, such as conservation areas. Policy S12 [Tall buildings] of the emerging City Plan (2040) elaborates that "tall buildings must have regard to… the significance of heritage assets and their immediate and wider settings".

We strongly object to this proposal on the grounds that it would cause substantial harm in heritage terms to the special character and appearance of the Creechurch Conservation Area. This harm would fail to meet the duty to preserve the CCA under Sections 72 of the Planning (Listed Buildings and Conservation Areas) Act 1990. At 43-storeys, the proposed tower would overshadow a number of highly designated heritage assets, which include three buildings of the highest possible listed status, which the conservation area is designated to protect. We consider the tower, which would be located directly behind Holland House and Renown House, would diminish the primacy and appreciation of these buildings. The drastically increased scale from the present 7-storey Bury House would compound this harm.

In the absence of a formal Appraisal and Management Plan yet to be adopted, we refer to The Proposed Bevis Marks/ Creechurch Conservation Area (2022) draft documentation which recognises that, "despite the proximity to the cluster of tall buildings in the eastern part of the City, the area under consideration has a remarkably consistent and harmonious low-rise scale of building" (p. 3, para 1.02). The erection of a tower within the CCA would erode its low-scale, harmonious townscape. This is unsupported by local policy. Policy CS12(2) of the City of London Local Plan (2015) requires that to conserve the significance of the City's heritage assets, the distinctive character and appearance of the City's conservation areas will be preserved and enhanced, while allowing sympathetic development within them. This proposed application cannot be considered sympathetic development.

3. Substantial Harm to Holland House and Renown House

The works proposed to Renown House and the Grade II* listed Holland house (in the associated application 24/ 00011/ LBC) are strongly concerning. We recognise that the rooftop alterations to Holland House are later additions, not contemporaneous with the original 1916 building. However, they are sufficiently set back from the building's facade to be considered largely unobtrusive when viewed from the streetscape. The proposed 4-storey roof top extension is an increase in scale and massing which would overwhelm Holland House and detract from an architectural appreciation of the building. The extension of Renown House by a storey, and the realignment of the floor plates to connect with Holland House constitutes further, drastic alteration which, when as read a whole, amounts to substantial harm.

Para 207 NPPF (2023) provides that, "where a proposed development will lead to substantial harm to…a designated heritage asset, local planning authorities should refuse consent, unless it can be demonstrated that the substantial harm or total loss is necessary to achieve substantial public benefits that outweigh that harm". We do not consider that the

purported public benefits from this development can outweigh the cumulative harm caused by these radical rooftop extensions, a harm which is further compounded by the proposed tower at No. 31 Bury Street.

4. Views of the Tower of London

The development would adversely affect the setting of the Tower of London World Heritage Site by causing less than substantial harm to LVMF view 10A.1. Whilst we acknowledge a reduction in height from the previous application 20/00848/FULEIA, we do not consider this sufficient to mitigate the adverse impact on the setting of the Tower of London.

Policy HC4 of the London Plan (2021) notes that proposals should not harm, and should seek to make a positive contribution to, the characteristics and composition of strategic views and their landmark elements, also stating that: "*they should also preserve and, where possible, enhance viewers' ability to recognise and to appreciate Strategically Important Landmarks in these views*". The scheme cannot be considered in compliance with this policy.

5. Unsustainable development

This application cannot be considered sustainable development. The demolition of No. 31 Bury Street (Bury House) would generate an embodied carbon footprint on a scale that runs counter to Para 157 NPPF (2023) and Policy CS15 of the City of London Local Plan (2015) which provides that the demolition should be avoided through the reuse of existing buildings and their structures.

This development would further contradict emerging policy which recognises the wider benefit in heritage terms of the retrofit first approach. The City of London Corporation is currently consulting on Planning for Sustainability Supplementary Planning Document (SPD). Chapter 3 [Retrofit and Reuse] states that, *"in the City of London context, retrofitting existing buildings contributes to preserving and enhancing the sensitive character of conservation areas, creating an architecturally innovative environment, and contributing towards making the City a leading leisure and culture destination"*. We consider this application fails to meet national and local policy on sustainability grounds and runs counter to emerging guidance on sustainable development.

Conclusion
For the reasons outlined above, SAVE objects to this planning application on heritage and climate grounds, and we call on the Local Planning Authority to refuse planning permission.

I trust that these comments are useful to you, and I ask that you keep SAVE informed of further decisions or consultation regarding this application.

Yours sincerely,

[redacted]

THE GEORGIAN GROUP

08/05/24

Application: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

LPA Reference: 24/00021/FULEIA & 24/00011/LBC

Address: Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

Dear Ms Tastsoglou,

Thank you for consulting the Georgian Group on the above applications for Planning Permission and Listed Building Consent. Based on the information available to date, the Group objects to both applications for the reasons set out within this letter.

The Group objected to two applications within the setting of Bevis Marks Synagogue in 2021, these were for a tower rising to just under 198 metres located at 31 Bury House and a tower rising to just over 93 metres situated at 33 Creechurch Lane. Both these applications, if permitted, would have caused significant harm to the setting and significance of Bevis Marks Synagogue and the Group were vocal in highlighting this threat to the City of London. Since then, the Creechurch Conservation Area has been designated offering greater protection for this internationally significant building.

Summary

The Georgian Group objects to the applications for Planning Permission and Listed Building Consent. The Group's statutory remit is 1700-1840 and it is only buildings within that period referred to in this letter. For buildings outside this period, the Group defers to the expertise of our sister national amenity societies.

The location, height and massing of the proposed development would cause considerable harm to the significance of Bevis Marks, St Botolph's Church and the Creechurch Conservation Area. The proposed development is defined as a tall building and therefore in line with policy CS14 of the existing local plan should not be permitted within a conservation area. Consequently, the development would be contrary to policy D9 of the

President The Duchess of Argyll
Chairman Paul Zisman
Director David Adshead

London Plan. The height and massing of the building would cause considerable harm to the three heritage assets referenced above and is therefore contrary to legislation as well as national and local policy relating to heritage assets.

The Georgian Group is aware of the consultation on the proposed City Plan 2040 and will be making representations to address specific concerns with the plan.

Significance of Surrounding Heritage Assets and Area

Bevis Marks Synagogue

Bevis Marks is the oldest surviving synagogue in England and is statutorily listed at grade I. It is a rare survival of an extremely well-preserved synagogue which has remained in continual use since its completion in 1701. Externally, the design of the building has drawn comparisons with the city churches of Christopher Wren and the early nonconformist meeting houses – most evidently with their large, arch-headed windows. The interior of Bevis Marks bears a strong resemblance to the building of its mother congregation, the Portuguese great synagogue of Amsterdam designed by Elias Bouwman. Historic fabric linking these important synagogues is present in Bevis Marks, in the form of the great central chandelier which sits over the reader's platform and four lampstands that stand before the Torah shrine.

Whilst the architectural interest of Bevis Marks is exceptional, the contribution the building and its associations make to the historic interest of the surrounding area is of the utmost importance. Bevis Marks is the only survivor of three Jewish places of worship in the vicinity. The first synagogue after the resettlement was situated where the existing Cunard House sits and is commemorated with a historic City Corporation Plaque. Duke's Place was the location of the now demolished Great Synagogue which was constructed to serve the growing congregation in the area but was destroyed by bombing in 1941. Bevis Marks is therefore the last tangible link to the historic Jewish association in this area of London.

The setting of the synagogue not only greatly contributes to the significance of the building as an architectural composition but also to the synagogue's religious workings and function. The provision of light into a synagogue is fundamental to the practices of Judaism and would have been an influential factor in Joseph Avis's designs. Bevis Marks admits natural light through the large windows on the first floor, providing a suitable environment for the reading and reciting of prayers. This is particularly necessary on the eastern wall of the synagogue where the Ehal is located, which, in the case of Bevis Marks, is made up of three ark cupboards divided by pilasters of the Corinthian order. Setting is influenced by environmental factors, as set out within Historic England's guidance document GPA3 The Setting of Heritage Assets. Reducing the amount of light into the synagogue would harm its setting and therefore significance.

Wrapped around the synagogue is an enclosed space which performs a vital liturgical function in the celebrations of festivals and holy days. This space is seen as an extension of the synagogue and is therefore due equal protection. Threats to this functioning space have been posed in recent years and consent has been rightly refused. Now is the time to provide further protection to ensure the courtyard is allowed to continue to perform its integral function.

St Botolph Without Aldgate

St Botolph's church is located on the site of an earlier building thought to date to the 16th century but with earlier origins. The current building was designed by George Dance the Elder and built between 1741-44. Dance was at this time the Clerk of Works for the City of London, a role he held from 1735 until 1765, and during this time was responsible for the Mansion House at Bank. Dance has a great association with the surrounding area, with his son George Dance Jnr taking up the role of Clerk of Works for the City of London in 1767. St Botolph's church possesses exceptional architectural and historic interest.

Externally, the church is laid in Flemish bond with mixed yellow and red brick and stone dressings. Venetian windows are present to the north, east and west elevations along with Gibbsian surrounds and pedimented doorways forming an impressive classical composition. The church is aligned N-S meaning that the tower, which rises from a pediment topping the body of the church, forms a pleasing view from the south and longer views down the Minories. The tower and spire hold prominence in its surroundings giving it a landmark quality.

The classical composition of the tower and northern elevation is appreciated from the Minories, with the buildings on the western and eastern side framing the church when approaching from the south. Their inclusion within the proposed conservation area is encouraged for the benefit of the surrounding character and appearance and setting of St Botolph's Church.

The setting of the St Botolph's greatly contributes to the significance of the church and the prominence the spire has on the surrounding built environment is a key element. The hotel development to the east of the church allows for the spire to appear against a clear skyline when moving along Leadenhall Street onto Aldgate High Street. Whilst development to the rear, notably Irongate House and those buildings between Houndsditch and Bevis Mark's leading to Duke's Place, contribute to the setting of St Botolph's due to their relatively low-rise design. The erection of One Creechurch Place has harmed the setting of St Botolph's church when viewed across Aldgate Square from the east, creating the potential for enhancement with future development.

Creechurch Conservation Area

The Creechurch Conservation Area was officially designated in January 2024. The Georgian Group were vocal in supporting its designation to acknowledge the unique historic and architectural interest associated with this section of the City of London.

The Bevis Marks and Creechurch area has exceptional historic interest relating to the presence of Bevis Marks and those sites where former synagogues were located. The area has important and visible associations with the Jewish community and their resettlement within the City of London during the 17th century. This is a contributing factor to the importance of the proposed conservation area. The presence of Bevis Marks along with the two plaques commemorating the former synagogues within the area represent a unique connection between the area and the Jewish community and for wider Anglo-Jewry relations.

Alongside Bevis Marks Synagogue, two religious' buildings in St Botolph's without Aldgate and St Katherine's Cree create a distinct character of important religious institutions. As stated above, the landmark quality of St Botolph's without Aldgate is a contributing factor to the interest of the conservation area and the prominence of the

spire within the local surroundings contributes to the strong ecclesiastical character of the conservation area.

Proposal

The applicant intends to demolish Bury House and erect a new building comprising four basement levels and ground plus 43 storeys. A full description of the proposals, as well as the listed building consent application, can be found at the head of this letter.

Proposals and Their Impact

Bevis Marks Synagogue

The courtyard wrapped around Bevis Marks should be seen as an extension of the building due to the vital liturgical function it plays in the workings of the synagogue. The courtyard forms the immediate setting of the building and allows visitors to appreciate the unique setting and appearance of the building. The setting of Bevis Marks contributes greatly to the significance of the building, allowing light into the synagogue which is integral to the practices of Judaism.

The proposed development as shown within the submitted HTVIA would be a dominating visual intrusion on the courtyard and setting of the synagogue. Views 45a and 45b show the impact the proposed tall building would have on the setting of Bevis Marks and the synagogue. The height, massing and positioning of the proposed tower would have an overbearing impact on Bevis Marks harming the setting and the ability to experience the building.

Owing to the impact the proposed tall building would have on the setting of Bevis Marks the level of harm would be towards the higher end of Less than substantial due to the importance of the setting and the potential for reduced light.

St Botolph Without Aldgate

The spire of St Botolph's church is prominent within the local environs and views within the Creechurch Conservation Area. It is identified within the City of London Protected Views SPD as being a church with a 'skyline presence'. The prominence of St Botolph's spire can be appreciated from along Aldgate High Street looking West and from the Minories looking North. Kinetic views of St Botolph's and its spire are permitted when moving around the Creechurch Conservation Area and the wider surroundings which all contribute to the significance of the building.

The applicant has provided views towards the church within the submitted HTVIA on pages 189-194 and identified as views 38 and 39. View 38 is situated along Aldgate High Street and shows the proposed development rising above One Creechurch Place, a building which harms the setting of the church and detracts from the interest of the Creechurch Conservation Area. The cumulative view shows the proposed tall building grouped in with 100 Leadenhall Street and 1 Undershaft. The height, massing and proximity would challenge the landmark quality of St Botolph's Church which is more evident within view 39 situated further east along Aldgate High Street. The impact of the towers would be further exacerbated in kinetic views along Aldgate High Street where the proposed development would be visible in the skyline behind the church.

The positioning of the tower in relation to the spire of St Botolph's would challenge its presence on the city skyline and be a distraction in views down Aldgate High Street. Both

the presence of the spire and views towards the church contribute to its significance and therefore the proposed development would cause an element of harm to St Botolph's Church. This harm would be at the low-middle level of less than substantial harm.

Creechurch Conservation Area

Views within the Creechurch Conservation Area contribute considerably towards its significance and allow for the special interest of the area to be appreciated. As referenced above concerning Bevis Marks and St Botolph's, the impact on those individual assets is similarly applicable to the wider character and appearance of the Creechurch Conservation Area which the proposed development would cause harm to.

The special interest associated with the Creechurch Conservation Area is closely related to the three places of worship situated within the area. The proposed development would harm the ability to appreciate two of those in Bevis Marks Synagogue and St Botolph's Church which fall within the Georgian Group's statutory remit. The Group defers to the expertise of our sister National Amenity Societies on buildings which fall outside of our remit.

A further characteristic that contributes to the special interest of the conservation area is the proliferation of historic open spaces including the courtyard of Bevis Marks Synagogue. The proposed development would have a negative impact, as referred to above, on the courtyard of Bevis Marks, and the churchyard of St Botolph's owing to the impact on their setting which in turn would cause harm to the character and appearance of the Creechurch Conservation Area.

It is evident from the views submitted within the HTVIA that the proposed development would pose an incongruous element to the area and would harm the prevailing character and appearance of the Creechurch Conservation Area. The level of harm would be at the upper end of less than substantial harm, boarding on substantial.

Policy and Guidance

Section 16(2) of the Planning (Listed Building and Conservation Areas) Act 1990 makes it a statutory duty for the local authority or Secretary of State, when considering whether to grant listed building consent, to have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses. Regarding planning permission, section 66(1) of the Act makes it a statutory duty for decision makers to have special regard to the desirability of preserving listed buildings or their setting. Section 72 of the Act states that special attention must be paid to the desirability of preserving or enhancing the character or appearance of conservation areas.

Guidance on carrying out this statutory duty is set out by the Government within the National Planning Policy Framework (NPPF). Paragraph 205 states that 'when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance'. Any harm caused to the significance of a designated heritage asset will need a clear and convincing justification for doing so in line with paragraph 206 of the NPPF.

Planning practice guidance set out by the government requires any harm identified to either be classified as less than substantial or substantial harm. If the harm is identified

as less than substantial, then in line with paragraph 208 of the NPPF this harm should be weighed against the public benefits associated with the proposed scheme.

Section 38(6) of the Planning and Compulsory Purchase Act 2004 states that 'where in making any determination under the planning Acts, regard is to be had to the development plan, the determination shall be made in accordance with the plan unless material consideration indicates otherwise'.

London Plan Policy HC1 states 'development proposals affecting heritage assets, and their settings, should conserve their significance, by being sympathetic to the assets' significance and appreciation within their surroundings. The cumulative impacts of incremental change from development on heritage assets and their settings should also be actively managed.'

Policy D9 Tall Buildings within the London Plan requires Development Plans to define what is considered a tall building and for local authorities to determine where they are appropriate and where they are not. It goes on to state that 'Tall buildings should only be developed in locations that are identified as suitable in Development Plans'. The policy concerning heritage assets states that 'proposals should take account of, and avoid harm to, the significance of London's heritage assets and their settings. Proposals resulting in harm will require clear and convincing justification, demonstrating that alternatives have been explored and that there are clear public benefits that outweigh that harm. The buildings should positively contribute to the character of the area'.

The City of London's Local Plan Core Strategic Policy CS12 sets out the City's objective to 'conserve or enhance the significance of the City's heritage assets and their settings and provide an attractive environment for the City's communities and visitors'.

Policy CS13 states the City's objective to 'protect and enhance significant City and London views of important buildings, townscape and skylines, making a substantial contribution to protecting the overall heritage of the City's landmarks'.

Core Strategic Policy CS14 states that in relation to tall buildings, planning permission will be refused if they are located within inappropriate areas such as conservation areas. Within the same policy, consideration will also be given to 'the potential effect on the City skyline; the character and amenity of their surroundings, including the relationship with existing tall buildings; the significance of heritage assets and their settings; and the effect on historic skyline features'.

The following advice from paragraph 013 of the Planning Practice Guidance accompanying the NPPF entitled 'What is the setting of a heritage asset and how can it be taken into account?' is directly relevant: 'When assessing any application which may affect the setting of a heritage asset, local planning authorities may need to consider the implications of cumulative change'. Additionally, Historic England's guidance on the setting of heritage assets states: 'Where the significance of a heritage asset has been compromised in the past by unsympathetic development affecting its setting, to accord with NPPF policies consideration still needs to be given to whether additional change will further detract from, or can enhance, the significance of the asset'.

Paragraph 013 of the Planning Practice Guidance additionally states: 'The extent and importance of setting is often expressed by reference to the visual relationship between the asset and the proposed development and associated visual/physical considerations. Although views of or from an asset will play an important part in the assessment of impacts on setting, the way in which we experience an asset in its setting is also influenced

by other environmental factors such as noise, dust, smell, and vibration from other land uses in the vicinity, and by our understanding of the historic relationship between places. For example, buildings that are in close proximity but are not visible from each other may have a historic or aesthetic connection that amplifies the experience of the significance of each'.

The Georgian Group's Recommendation

The proposals would cause harm to the significance of Bevis Mark Synagogue, St Botolph's church and the Creechurch Conservation Area and would therefore be contrary to legislation as well as national and local policy as set out above.

The Georgian Group recommends the applications for Planning Permission and Listed Building Consent be refused by your local authority.

In determining this application, you should bear in mind the statutory duties contained within sections 16(2), 66(1) and 72(1) of the Planning (Listed Building and Conservation Areas) Act 1990.

Yours sincerely,

Edward Waller (Conservation Adviser for London and South East England)

Dear Sir or Madam

Planning consultation: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.
Location: 1-4, 31-34 Bury Street, London, EC3A 5AR (for 24/00021/FULEIA) and Holland House, 1 - 4, 32 Bury Street, London, EC3A 5AW (for 24/00011/LBC)

Thank you for your consultation on the above dated 14 March 2024 which was received by Natural England on 14 March 2024.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

SUMMARY OF NATURAL ENGLAND'S ADVICE

NO OBJECTION

Based on the plans submitted, Natural England considers that the proposed development will not have significant adverse impacts on statutorily protected nature conservation sites or landscapes.

Natural England's generic advice on other natural environment issues is set out at Annex A.

Sites of Special Scientific Interest Impact Risk Zones
The Town and Country Planning (Development Management Procedure) (England) Order 2015 requires local planning authorities to consult Natural England on "Development in or likely to affect a Site of Special Scientific Interest" (Schedule 4, w). Our SSSI Impact Risk Zones are a GIS dataset designed to be used during the planning application validation process to help local planning authorities decide when to consult Natural England on developments likely to affect a SSSI. The dataset and user guidance can be accessed from the data.gov.uk website

Further general advice on the consideration of protected species and other natural environment issues is provided at Annex A.

We would be happy to comment further should the need arise but if in the meantime you have any queries please do not hesitate to contact us.

For any queries regarding this letter, for new consultations, or to provide further information on this consultation please send your correspondences to consultations@naturalengland.org.uk.

Yours faithfully

Helen Churchill

ADDRESS: 1-4, 31-34 Bury Street, London, EC3A 5AR (for 24/00021/FULEIA) and Holland House, 1 - 4, 32 Bury Street, London, EC3A 5AW (for 24/00011/LBC)

PROPOSAL:

24/00021/FULEIA – Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

24/00011/LBC – Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works.

Tower Hamlets Council
Tower Hamlets Town Hall
160 Whitechapel Road
London
E1 1BJ

Thank you for your correspondence dated 14th March 2024, informing the London Borough of Tower Hamlets (LBTH) about the City of London's receipt of the aforementioned Planning application and Listed Building Consent.

LBTH previously voiced strong objections to a similar application at Bury House, 31 Bury Street, between 2020-2021 (City of London ref: 20/00848/FULEIA and LBTH refs: PA/20/02417, PA/21/00436, and PA/21/01930). These concerns remain.

While it is noted that the current proposal now includes adjacent Holland House (Grade II*) and Renown House, our primary concerns pertain to the replacement building for Bury House.

Despite minor adjustments, the replacement building maintains its design as a tall, slender tower situated to the southeast of the Gherkin. Although the maximum height has been marginally reduced from 197.94m AOD to 178.7m AOD, and a stepped form introduced to the upper sections, these modifications do little to alleviate the impact on the Tower of London World Heritage Site (WHS).

As illustrated in LVMF View 10A.1 in Figure 5.4 of the Tower of London Heritage Impact Assessment, despite the reduced height and massing, the proposed development would still disrupt the clear sky gap between the City Cluster and the Tower of London, encroaching inappropriately and competing with the iconic White Tower.

Consequently, LBTH maintains its objection to the proposals, expressing concerns that, even with amendments, the proposed development would significantly and detrimentally affect the setting of the Grade I listed Tower of London WHS and its townscape views.

These proposals severely risk diminishing the ability to appreciate the Outstanding Universal Value of the Tower of London WHS.

Yours sincerely,

Catarina Cheung
Planning Officer
For and on behalf of The Director of Planning and Building Control

13 May 2024

Bury House, Bury Street, London EC3A 5AR

Planning Ref: 24/00021/FULEIA and 24/00011/LBC

Dear Madam

Thank you for your notification letter of 14th March inviting Historic Royal Palaces to submit observations by 15 May 2024.

As guardians of the Tower of London WHS we write to object to the revised proposals for this site. It is evident from the submission material that the proposed development would have a significant damaging visual effect on aspects of the 'Outstanding Universal Value' (OUV) of the Tower WHS. On the basis of the information available on the City's website, our comments on the proposal are set out below and we would ask that these are considered in the Council's determination of the application.

On 19th November 2020 we objected to the previous application for this site (20/00848/FULEIA) for which ICOMOS conducted a Technical Review and for which Planning Permission was refused. In our view, the reduction in the height of the building from 48 storeys to 43 storeys is not sufficient to mitigate the harmful impact on the OUV of the WHS and overcome the previous reason for refusal in this regard. Particularly on the attributes of the Landmark Siting of the Tower of London and on the Physical Dominance of the White Tower.

In the London View Management Framework (LVMF) view 10A.1 from the north bastion of Tower Bridge it is imperative that adequate visual separation is maintained between the City Cluster and the White Tower silhouette. The proposal retains just a sliver of sky space to separate it, but of course this view, like any other, is not static: move a few metres north and the proposal would appear to rise directly out of the White Tower.

The LVMF guidance for view 10A.1 states that: 'The location enables the fine detail and the layers of history of the Tower of London to be readily

Historic Royal Palaces
Tel +44(0)20 3166 6000 www.hrp.org.uk
Historic Royal Palaces is a Registered Charity (No. 1068852) and Historic Royal Palaces Enterprises Ltd, a company registered in England (No. 3418583)
The registered office and address for services of both bodies is Hampton Court Palace, Surrey, KT8 9AU

understood. This understanding and appreciation is enhanced by the free sky space around the White Tower' Where it has been compromised its visual dominance has been devalued.'

Regarding the background to the Tower, the LVMF guidance notes, 'Views from this place include the relationship between the Tower of London and the City in the background. It is important that the background of the landmark in these views is managed sensitively and should not compromise a viewer's ability to appreciate the Outstanding Universal Value of the World Heritage Site'.

It should be borne in mind that the LVMF was written in 2011-12, when the only existing tall buildings in the emerging Cluster were the Gherkin (30 St Mary Axe), the Willis Towers and Tower 42. The expansion of the Cluster since, in both scale and height, has been beyond anything that was envisaged when the LVMF was published. The new proposal for Bury House, would still inevitably increase the existing compromise of the free space around the White Tower.

In Historic Royal Palaces' view, the damaging visual impacts are also evident in the dynamic journey across Tower Bridge and in the local views from within the inner ward of the Tower identified in our Local Setting Study 2010. These impacts would be particularly apparent in the view north-west from the centre of Tower Green over the roof of St Peter ad Vincula (TBHVIA views 22 and 23), increasing the visual intrusion of the modern city skyline into the inner ward.

A key impact of the proposed development would be that it would inevitably extend the eastern shoulder of the Cluster toward the Tower, further reducing the crucial separation between the Tower and the burgeoning City. Although there has been a minor decrease in the proposals' height, it still creates an abrupt vertical cliff edge in LVMF 10A.1, rather than a stepping down into the 'foothills' of the Cluster. This is a contradiction in the principles being set out for the Cluster and the proposal is also still high enough to suggest that there should be a further continuation of the downward slope of the Cluster towards the White Tower – which over the years has pushed increasingly up and out in the easterly direction from the consented 100 Leadenhall scheme.

You will note that in their 2022 Technical Review, ICOMOS restated the position from the 2019 Review that "the cumulative effect of new developments, in relation to the possible negative visual impact on the integrity of the property in question, should not be diminished. The integrity of the World Heritage property the Tower of London has already reached its limit in terms of visual impact, and it is clear from the visual project documentation that there is no room for additional

HISTORIC ROYAL PALACES

challenges to it. Neither is it an acceptable 30 City of London ref: 18/01213/FULEIA 12 approach to allow further negative visual impact on the property's integrity when it is already threatened." This position still stands for the current application and the impact of the development as proposed would be of significant heritage harm to the setting of the Tower of London and the Outstanding Universal Value of the World Heritage Site. On this basis the proposals are contrary to the policies of the Local Plan, London Plan and NPPF, whilst the scheme does not deliver sufficient public benefits to outweigh the level of harm created.

The Planning Statement submitted with the planning application relies significantly on the draft policies of the City Plan in seeking to justify the excessive height and position of the proposal. However, given that the draft plan remains at an early stage of preparation, having not been submitted or tested through examination, with significant objections remaining to the tall buildings policies and proposals in the draft document, it is evident that limited weight can be attributed to the draft plan in the determination of the application at this stage.

Historic Royal Palaces therefore objects to the proposed development, which would be harmful to the OUV of the Tower of London WHS and we ask the City of London to refuse the application.

Yours faithfully

Anna Tastsoglou
City of London Corporation

14 May 2024

Dear Anna

1 - 4, 31 - 34 Bury Street, London, EC3A 5AR City of London E1W 2BX– TfL's Detailed comments

Thank you for consulting TfL about this referable planning application. It is understood that the proposal includes the demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

These comments follow the Mayor's recent consideration of the case at stage 1. TfL is in receipt of the Transport Assessment, dated January 2024, Planning Statement, dated January 2024; and other associated document. These form the basis of the response below.

Site location

The site is bounded by Bury Street to northwest and south; and Creechurch Lane to the south-east. The nearest part of the Transport for London Road Network (TLRN) is the A10 Bishopsgate, 200m to the west.

The site is served numerous London Underground, DLR and National rail services within walking distance, including Liverpool Street Rail and Underground Station, Bank Underground Station, Aldgate Underground Station, Aldgate East Underground Station, Tower Hill Underground Station, Tower Gateway DLR Station, and Fenchurch Street Rail Station. The site is also served by numerous bus services with bus stops within a short walking distance. As such, the site records an excellent public transport access level (PTAL) of 6B, which 0 is the lowest and 6b is the highest.

The Cycleway CS2 is located approximately 400m east of the site. A southern extension of Cycleway 1 (C1) through Bank, past Liverpool Street station, along Eldon Street and

then along London Wall and Bevis Marks gyratory was recently funded through the latest City of London Local transport Implementation Plan.

In addition, there are three TfL Cycle hire docking stations locating within 200m of site which are St Mary's Axe, Houndsditch, and Jewry Street cycle hire docking stations.

Access and parking

Pedestrian Access

It is proposed that the proposed development will enable access through James' Court (to the south) and also through Heneage Place (to the north) as part of new public route through the building (7am – 11pm). Office access 'out of hours' will be via the Creechurch Lane entrance (to the east). Public and retail uses are accessible wrapping around to the west directly to Renown House and Holland House. This will significantly improve permeability of the site and increase the overall space available for pedestrian movement between Heneage Place and Bury Street and along Creechurch Lane; which is welcomed in line with London Plan policy T2 Heathy Street.

A Pedestrian Comfort Level analysis has been undertaken for 13 section of local streets in the vicinity of the site. It is considered that the streets to be used as the main route for access would be able to accommodate the additional footfall and without adverse impacting the PCLS with B+ rating maintained, while the narrower minor routes would not see any notable increase in footway nevertheless.

Cycle and vehicle Access

Cycle parking access will be via Creechurch Lane at the north-east corner of the building. The entrance provided is dedicated for cyclists which is separated from the pedestrian entrance. The entrance is equipped with a sliding door and stairs with a wheeling channel to access basement B1 and B1 Mezzanine. An alternative cycle access is provided via a lift to the basement within the north core for those not wanting to use the staircases. In addition, A secondary access for cycle parking is provided via the eastern Holland House entrance, off James' Court, via lift or stair, this welcomed.

Vehicle Access

TfL welcomes that an off-street servicing area at the north west corner of the site is provided to serve Bury House, Holland House and Renown House, in line with London Plan Policy T7 Delivery & Servicing, and is accessed directly via Heneage Lane. Having said that, Stage 1 Road Safety audit is required to support its acceptability in highway safety terms.

Cycle Parking

A total of 667 cycle parking spaces will be provided, of which 585 spaces will be for long stay spaces, and 85 short stay spaces.

It is also proposed that 5% (29 spaces) will be provided the form of adaptable spaces to accommodate users of larger / unconventional cycles and those with mobility impairments. The remaining spaces will be in the form of Sheffield

Stands (87spaces), and Fold bike lockers (58) and 1 High Density solution type space.

Alongside with long stay cycle space, the short stay spaces will be provided within the basement level 1 (B1) and B1 mezzanine level accessed via the Creechurch Lane cycle entrances. All cycle parking shall be designed in line with the London Cycle Design Standards. Shower and changing facilities should also be provided for the office element in line with London Plan policy T5 Cycling and London Plan cycle parking standards.

Car Parking

TfL welcomes that no on-site car parking has been proposed as the proposal will be 'car free'. As per current, on-street blue badge parking spaces are available on Creechurch Lane and Mitre Street.

.

Healthy Street & Vision Zero

An Active Travel Zone assessment (ATZ) has been undertaken and seven routes has been reviewed. The study has identified improvement opportunities on some routes, which include ensuring footways are well maintained, providing additional seating and minor crossing improvements etc.

Since part of the land use of the proposed development would be for flexible community/education/ cultural/amenity use; therefore TfL considers that an Night-time ATZ shall also be carried out to assess routes for darker hours, ensuring safety and security for vulnerable users.

TfL is developing safety improvement proposal for the A10 Bishopsgate, the estimate cost of the project is currently £1.5m, therefore a partial contribution of £350K is sought from this proposal toward the project, the amount of contributions is based on common approach adopted for proposed developments in the area.

The City Corporation is encouraged to secure necessary improvements for work on its highway network accordingly.

Trip generation

The submitted TA expected that the proposal would generate a total of 966 two-way trips are forecasted in the AM Peak (08:00-09:00) and 955 two-way trips in the PM Peak (17:00-18:00), with a net increase of approx. 690 two-way persons trips during the peaks compare with the existing offices. This assessment is considered robust and is therefore accepted. A lower level of trips is also expected for the proposed retail use, which is not considered significant.

Mode share

It is also predicted that vast majority of the trips to/ from the proposal will be by sustainable transport modes. Of those, nearly 10%% of trips will be by bike or on foot, and 7% will be by bus, 38% by tube and 47% by rail (including Elizabeth Line); and the level of car and taxi trips are negligible.

Public Transport service

The site is already with a very high level of public transport services; it is therefore considered that the proposal would not give rise to significant adverse impact to existing London Underground and local bus services in City area.

London Cycle Hire
It is estimated that the proposal would generate an additional 309 two-ways cycle trips over the current proposal, which means additional demand for cycle hire services. A financial contribution of £100K and land to construct additional docking station on footprint or as close to it as possible is therefore sought. The applicant is urged to identify a mutually agreeable location that would be accepted by the City Corporation and TfL

Delivery & Servicing
It is welcomed that at at-grade off-street on-site service yard will be provided for servicing, access from Heneage Place. A draft Delivery and Servicing Plan (DSP) has been submitted, which outlines the servicing arrangement for the proposal, includes consolidation and restricting servicing vehicle size of goods vehicle of up to 7.5T with 8m maximum length, this is due to the restricted width of Heneage Lane and the vehicle weight limit. However, the DSP shall also promote the use of cycle servicing to reduce goods vehicle traffic in the City and be more sustainable; as well as enabling night-time servicing to reduce traffic impact during normal business hours. The DSP should therefore be revised the comments above, and the final detailed DSP should be secured by pre-occupation condition.

Construction Logistics
A Detailed Construction Logistics Plan (DSP), produced fully in according with TfL's CLP guidance, should be secured by pre-commencement condition.

Travel Planning
A Framework Travel Plan have been submitted which is welcomed. It is considered that the 5 years mode shift targets to walking and cycling should be more ambitious to achieve the Mayors' long terms aspiration for 80% sustainable travel by 2041.

The Travel Plan should therefore be revised to reflect the comments above, and the finalised Plan should be secured by s106 planning obligation.

Community Infrastructure Levy
The MCIL2 rate for City of London is £80 per square metre.

Summary
The following matters should be resolved before the application can be considered in line with the transport policies of London Plan;

1. Secure the delivery of all highways, walking/ cycling and public realm improvement work by legal agreement'
2. Undertake Stage 1 Road Safety Audit for the proposed servicing access
3. Secure appropriate contribution toward local walking/ cycling/ Healthy Street improvements in line with ATZ findings and carried out Night-time ATZ.

4. Secure a partial financial contribution of £100K for TfL toward proposed A10 Bishopsgate improvement.
5. Secure the submission and approval of cycle parking details by condition.
6. Secure £100K (index linked) financial contribution toward enhancing local cycle hire services.
7. Revise the DSP in light of comments, and secure approval of both DSP and CLP by conditions.
8. Revise the Travel Plan, and ensure that the Plan would contribute positively toward the Mayor's sustainable travel goal and secure them by s106 agreement; and
9. Secure appropriate Mayor CIL payment from the proposal toward Crossrail.

I trust that these comments are of assistance. If you have any further queries, please let me know.

Yours sincerely,

PakLim Wong

Bury House, 31 Bury Street, City of London, EC31 5AR
Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings

Dear Ms Tastsoglou,

The SPAB has been made aware of the above application and is writing to register its strong objection on the basis of the serious harm that would be caused to the Bevis Marks Synagogue and the Creechurch Conservation area.

The proposal for a 45 storey office block at 31 Bury Street bears striking similarities to the highly controversial scheme which was refused by your authority in 2022. The major area of difference would appear to be the justification offered by the applicant for the scheme. Much is made of the new building's sustainability credentials, the economic benefits that would flow from it, and the provision of space for a variety of community uses. In our view, these arguments are tenuous at best and do not provide adequate justification for the substantial harm that would be caused to the Synagogue and the conservation area.

Any new building of the type proposed would be expected to demonstrate solid sustainability credentials, so this cannot be considered as a determining factor when weighing justification against harm to an exceptional heritage asset. Also, and quite simply, the most sustainable building is one that already exists and we cannot see that the applicant has fully understood or explained the total carbon lifecycle cost of the proposed development.

We are also not convinced that there is a requirement for community usage on the scale envisaged by the applicants, and indeed the location of our own offices in the City of London allows us to witness on a daily basis the many underused and often cavernous 'community' spaces that now occupy the ground floor of tall buildings at the expense of genuinely useful and affordable small scale businesses and community premises.

The previous application was rightly refused by your Planning Committee based on the serious harm that would have been caused to the Synagogue. To that harm must now be added the very damaging impact on the newly designated Creechurch Conservation Area that would result if the application were granted. The height, scale, and mass of the proposed tower would overwhelm the Conservation Area and cause a high level of harm to key views. We cannot think of any precedent that would support your Authority in granting a permission that would be so clearly in contravention of the requirement of Section 72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 that special attention must be paid to the desirability of preserving or enhancing the character or appearance of the area. Indeed, doing so would set a very damaging precedent.

The SPAB urges that the application be refused by your local authority.

With best wishes

Christina Emerson

15 April 2024

Dear Anna,

Letter of Planning Application Response: 1-4, 31-34 Bury Street (ref. 24/00021/FULEIA and ref. 24/00011/LBC)

Introduction

Further to a review of the submission documents, I write on behalf of the Chapter of the Cathedral Church of St Paul in London, referred to hereinafter as the Cathedral, regarding the proposals for a new tall building at the above site.

Background

We would here note that we have not been approached for pre-application discussion regarding this project. The Cathedral always welcomes the opportunity to provide constructive feedback on emerging proposals within the setting of St Paul's. We regret that this did not occur.

We note that this application was subject to an Environmental Impact Assessment. At the time of writing we are not aware that we were consulted on the scoping report for that EIA. As will be apparent in our comments which follow, we are not altogether content with aspects of the applicant's documentation and impact evaluation, which might have been addressed by the EIA scoping assessment.

Comment

The proposals involve the construction of a new tall building to Bury Street, on the eastern end of the cluster.

Whilst the development site is separated visually from the Cathedral by the bulk of the Cluster, the proposals will still be appreciable in key views of St Paul's (as identified within the *Heritage, Townscape and Visual Impact Assessment* - HTVIA) and thus form part of its setting. We would therefore query why an assessment of the significance of the Cathedral (including the

Caroe Architecture Ltd. is a company limited by guarantee, registered in England & Wales: registered number 06927269; Lewis House, Great Chesterford, Essex CB10 1PF

contribution made by its setting) and subsequent heritage impact assessment was not explicitly included in the application documents, either within the HTVIA prepared by The Townscape Consultancy or the Heritage Statement prepared by KM Heritage. We would suggest that such assessment should be included in the submission documentation as a matter of due course given the exceptional significance of the Grade I listed building and the evolving nature of its setting. If this assessment is not included, we consider that explicit mention should be made of why the Cathedral was scoped out of assessment in order to fully understand the extent of potential heritage impact.

We do, however welcome the inclusion of key views of the Cathedral outlined in the 'Visual Assessment' section of the HTVIA. Whilst we understand that the proposals are located on the eastern side of the cluster and a 'partial' ZTV is included as an appendix to the HTVIA, the inclusion of a ZTV that covers a wider area would be of great assistance in understanding the extents of potential visual impact, and why certain strategic views (such as view 15B.2) were not taken forward for assessment.

Fleet Street views are not included within the HTVIA. However, the Processional Way along Fleet Street is an incredibly sensitive area of the setting of the Cathedral in terms of potential heritage and visual impact. We would therefore also seek to be assured that there is absolutely no visual intrusion within views of the Cathedral from Fleet Street.

Wider Considerations: Bevis Marks

We have confined our observations on this application to our primary locus (ie concern for the heritage and setting of St Paul's) and our well established planning application review methodology. However we also feel we would be remiss in not making mention of the evident impacts that this major development proposal has on both the Tower of London (WHS) and Bevis Marks Synagogue.

The City Planning and Transportation Committee refused consent for an earlier proposal – which, to most observers, is more or less similar to the current application. The committee determined that the impact on the heritage and setting of two highly significant and sensitive Grade 1 listed heritage assets were found to be unacceptable.

Caroe Architecture Ltd. is a company limited by guarantee, registered in England & Wales: registered number 06927269; Lewis House, Great Chesterford, Essex CB10 1PF

Accepting that other commentators and critics, including Historic England, will be better placed to advise Planning Committee on the methodology and evaluation of impacts of this development on Bevis Marks especially: the main observation that we wish to add to our comments here is in relation to the definition and understanding of 'setting'. There is very good guidance from HE on evaluation and consideration of managing significance, which includes 'setting' in GPA 1 and 2. We feel that it is important to note that, whilst the Tower and St Paul's are (in different ways) privileged with specific heritage management policies that broadly recognise these internationally significant heritage assets, Bevis Marks has to argue a case for 'Protection, Preservation and Celebration' within the rubric of the NPPF and Planning (Listed Buildings and Conservation Areas) Act 1990.

All participants will rightly be concerned with seeking a better and shared understanding of the heritage setting of the Synagogue and, to date, it would appear that the regulators and proposers of this scheme have not yet arrived at a shared understanding of setting and the significance thereof. This important consideration might have been addressed by EIA Scoping.

Where the interests of St Paul's and those of Bevis Marks intersect, we suggest and as noted above, is that this application before committee does not appear to be supported by sufficient or proportionate evidence and expertise in relation to the full and correct evaluation of the heritage context into which this major project intrudes. We would therefore urge officers and Committee to allow for these necessary data to emerge to inform any determination.

Conclusion

We hope that our comments are constructive and assist the project team, and Officers at the City, moving forward. We would happy to review any additional information submitted to better understand potential impacts.

Yours sincerely,

Dear Ms Tastsoglou

Arrangements for Handling Heritage Applications Direction 2021
& T&CP (Development Management Procedure) (England) Order 2015
& Planning (Listed Buildings & Conservation Areas) Regulations 1990

HOLLAND HOUSE 1 - 4, 32 BURY STREET LONDON EC3A 5AW
Application Nos 24/00011/LBC & 24/00021/FULEIA

Thank you for your letters of 14 March 2024 regarding the above applications for listed building consent and planning permission. On the basis of the information available to date, we offer the following advice to assist your authority in determining the applications.

Summary

In 2021 your authority considered a similar scheme for the replacement of Bury House with a 48-storey tower. That application was refused, which we welcomed. This was because the proposals would have harmed the Outstanding Universal Value of the Tower of London World Heritage Site. The application was also refused because the proposed tall building would have harmed the Bevis Marks Synagogue due to its overbearing and overshadowing impact on the synagogue and its courtyard.

The current proposal, an amended scheme on a larger site, would not overcome either of the previous reasons for refusal in our view. Indeed, further harm caused by the proposed alterations to Holland House and the development's impact on the Creechurch Conservation Area mean that this scheme is worse than that refused from a heritage perspective.

Historic England objects strongly to the applications and recommends they should be withdrawn or refused.

Historic England is subject to both the Freedom of Information Act (2000) and Environmental Information Regulations (2004). Any Information held by the organisation can be requested for release under this legislation.

Historic England Advice

Significance of the heritage assets

a) Tower of London World Heritage Site

The Tower's attributes, as defined in the adopted WHS Management Plan (2016) convey its Outstanding Universal Value as an iconic landmark and symbol of London which sits at the heart of our national and cultural identity. They reflect the Tower's role as the setting of many significant episodes of European history and as one of the best surviving examples of a medieval fortress palace in the world. The Tower of London is a monument of exceptional historic and architectural importance as reflected in its multi-designation as a World Heritage Site, scheduled monument, collection of listed buildings, and conservation area. The World Heritage Site (WHS) is located approximately 550m south-east of the development site.

The Tower is vulnerable to development in its setting, particularly the expansion of the City's cluster of tall buildings. The physical relationship of the Tower with the City as viewed from the river is central to understanding its Outstanding Universal Value (OUV). The Statement of OUV adopted by the World Heritage Committee, in the section relating to integrity, notes that such development 'could limit the ability to perceive the Tower as being slightly apart from the City or have an adverse impact on its skyline as viewed from the river.'

The view from the north bastion of Tower Bridge towards the Tower of London, View 10A.1 in the London View Management Framework (LVMF), is historically important as a long-established picture post card view. It forms part of a kinetic experience of the Tower and wider London skyline along the bridge. Views of the Tower from this location showcase the Tower's attributes as an internationally famous monument, a symbol of Norman power, its landmark siting and its physical dominance.

These attributes were considered in detail during the Tulip public inquiry. The Inspector found that they 'rely to a great extent on its setting' (IR 14.25) and, of the latter three attributes, 'the sky space component…is central to its OUV' (IR 14.29).

The eastern edge of the Cluster, between the Gherkin and the Tower of London, is presently defined by the Salesforce/Heron Tower at 110 Bishopsgate and Heron Plaza at 80 Houndsditch. These step away from the Tower and up in stages to the taller Gherkin, somewhat mitigating their impact on the Tower of London.

b) Bevis Marks Synagogue (Grade I listed)

Bevis Marks Synagogue is the oldest surviving synagogue in the United Kingdom. It was built between 1699-1701 for a growing Sephardi community in the City of London,

following the Resettlement of the Jews in England in the 1650s. The synagogue has been described as the ‘Cathedral’ Synagogue to Anglo Jewry, such is its stature and symbolic importance.

The synagogue is a key part of the history of British Judaism and is of international importance, particularly given its roots in the Sephardi diaspora created by the expulsion of Jews from the Iberian Peninsula in 1492. The synagogue continues the traditions of those communities who travelled to the Low Countries and is now one of the oldest continually functioning synagogues in Europe.

The synagogue is remarkably little altered. Its architectural and historic significance, including its communal value is clearly exceptional and it is Grade I listed for that reason. Its setting, whilst somewhat compromised by the evolving City around it, continues to make an important contribution to its architectural and historic significance and the ability to appreciate that significance.

The premier example of early synagogue architecture in England, Bevis Marks Synagogue was built by the master craftsman Joseph Avis who worked closely with both Sir Christopher Wren and Robert Hooke elsewhere in the City. It is a simple, well-proportioned classical building executed in brick and shares much in common with the style preferred for public buildings and churches, designed by the likes of Wren, at the time.

Perhaps the most striking way that the synagogue is externally distinguishable from these places of worship is by its discrete siting away from the street in a small courtyard. Its hidden away location suggests a degree of caution, or limitation, for a place of worship (particularly when compared to the near contemporary Sephardi synagogue in Amsterdam). Nevertheless, the high-quality architecture was a demonstration of their faith and an investment which suggests the congregation were confident that they would remain welcome in London. In this way architecture was used by the Sephardi community to establish a positive identity, and permanence, within society.

Historically, the synagogue formed part of a wider estate with lower rise community buildings encircling it. Despite modern development largely replacing the former one and two storey ranges, the form of the courtyard remains, and the enclosure continues to provide separation from the outside world. The synagogue is the pre-eminent feature of the space, reflecting its function and status. It is currently seen with a largely clear sky backdrop which enhances its presence.

The adopted Conservation Management Plan (CMP 2019) for the synagogue notes that the courtyard represents an arresting point of departure from the modern world into what is palpably a historic place. It states that ‘views across and out of the courtyard, as well as visibility of the sky are important contributors to the setting of the

Historic England is subject to both the Freedom of Information Act (2000) and Environmental Information Regulations (2004). Any Information held by the organisation can be requested for release under this legislation.

synagogue, as well as the courtyard's amenity value.' We note that the synagogue has liturgical practices which include interactions with the sky and celestial bodies. The CMP further explains the communal significance of the courtyard as a place where people gather before and after services and other events, including weddings. It therefore has a key role in supporting the customs and traditions of the synagogue.

Modern development, including tall buildings, is increasingly visible in the wider setting of the synagogue. Where tall buildings encroach into the skyspace around the courtyard and have windows facing into it, they reduce its special sense of privacy and openness to the sky. This makes elements of the setting particularly sensitive to further erosion or loss. The synagogue nevertheless continues to benefit from a large amount of clear sky making a strong positive contribution to the buildings setting and significance, and the ability to appreciate these.

c) The site - Holland House (Grade II* listed), Renown House and Bury House

Holland House was designed as the London headquarters of W.M. Müller & Co by the preeminent Dutch architect H.P. Berlage, from 1913-16. It is a highly original office design and the only example of his work in the country. This building is now prominently sited, following the construction of the Gherkin and the creation of the public space around it which has enhanced the ability to appreciate its significance.

It is an important building particularly because of its pioneering approach to rational façade design. The primary elevation has a regular grid without any apparent hierarchy - radical for its time. The realised design was unprecedented in London, reflecting Berlage's interest in contemporary American architecture and his own progressive ideas. The building is of more than special interest which is reflected by its Grade II* designation.

Holland House wraps around the slightly earlier 33-34 Bury St (Renown House) to the south, a good quality but unlisted commercial building of 1912 (designed by the architect Delissa Joseph). It contributes positively to the setting of Holland House. Despite being separated by only a few years, the traditional architectural language of Renown House, including the hierarchical arrangement of its floor levels as expressed in its composition, contrasts unmistakably with the radical approach to façade design pursued at Holland House. This juxtaposition enhances the appreciation of the latter's significance.

31 Bury Street (Bury House) is a late 60's office building. While its design is of no particular merit, it is sympathetic in scale to its historic neighbours. Bury House is physically connected to Holland House, which also has alterations and extensions contemporary with the former that detract from the listed building's significance.

d) Creechurch Conservation Area

Recently designated for its special architectural and historic interest, the Creechurch Conservation Area's character is embodied in three exceptional Grade I listed places of worship: Bevis Marks Synagogue, the churches of St Katherine Cree and St Botolph-without Aldgate. Alongside these are high quality commercial buildings and warehouses from the late-nineteenth and early-twentieth centuries. Subsequent modern development is generally sympathetic to the historic scale, resulting in a clearly defined character worthy of preservation. The tall building at 1 Creechurch Place is an outlier which detracts considerably from the area's qualities.

Holland House, Renown House and Bevis Marks Synagogue make a strong positive contribution to the conservation area's special architectural and historic interest. Although Bury House may not make a distinct positive contribution, its perceived scale is sympathetic to its neighbours and the area more broadly. The loss of James Court and the southern part of Heneage Lane caused by its construction has interrupted the historic urban grain to a small extent.

Impact of the proposals

The proposals are for the replacement of Bury House with a new 44 storey building (178.7m AOD) and the alteration and extension of Holland House and Renown House.

a) Tower of London World Heritage Site

The current proposals show a modest reduction in height and a chamfering of the massing at the uppermost part of the building, compared to the refused scheme. The proposed tower would, though, be slightly wider than the previous scheme in its middle section. We conclude the proposals would cause a similar level of harm to OUV as the previously refused scheme.

While the reduction of clear sky around the White Tower due to 80 Houndsditch has harmed OUV, we recognise that the height of this building was specifically designed to finish below the capping of the White Tower's turrets as viewed in LVMF 10A.1. As such 80 Houndsditch demonstrates some deference to the silhouette of the Tower because of its lower height.

Compared to the existing backdrop to the Tower in View 10A.1, as defined by 80 Houndsditch, these proposals would fill more sky space, rise higher than the corner turret of the White Tower and appear in closer proximity to it. The proposed tall building would also standout from the Cluster due to the proposed cladding material. The additional height that would be introduced at its eastern edge, would result in a striking upward step in scale directly beside the White Tower, creating much more of a cliff edge than the current situation.

It would therefore present a greater distraction and harm the Tower's attributes of OUV as a symbol of Norman power, its landmark siting and its physical dominance, and so harming the integrity of the WHS. The proposals would make the Cluster increasingly overbearing overall, adding to the existing cumulative harm to the attributes conveying the WHS's OUV referred to above.

The experience from Tower Bridge is kinetic and the composition of the view changes considerably within a very short distance when moving north from viewpoint 10A.1. This is explained in the Tower's Local Setting Study and was highlighted in the Tulip decision (IR 14.28). Here the Inspector noted that the Gherkin already impinges on the sky space around the Tower of London because it rises higher than the overall height of the closest turret of the White Tower when it moves through the sky space behind it.

The proposals would introduce a comparable scale and mass to the Gherkin, evident notably closer to the Tower, leaving less of the kinetic experience unimpacted. Consequently, the Tower would appear less apart from the City and its silhouette would be further compromised when compared to the existing situation, adding to the harm to the attributes of OUV we have identified above.

The proposed development would also be visible within the Tower of London Inner Ward. At different points it would appear above the roofline of the Chapel Royal of St. Peter ad Vincula and 2 Tower Green (both Grade I listed), adding further to the visual intrusions of various tall buildings in the City. Consequently, it would further diminish the self-contained ensemble of historic buildings and spaces, distracting from the Tower's remarkable sense of place.

b) Bevis Marks Synagogue

The proposed development would harm the significance of the synagogue, intruding directly behind it when viewed from its courtyard. The new tower would appear closer to the synagogue than any other existing tall building development, greatly reducing the clear sky backdrop, resulting in a worse scenario than the previously refused application proposals.

The ability to appreciate the architectural interest of the synagogue would consequently be diminished. Its precedence would be all but lost with a roofline that would become framed against distracting modern development of a very large scale. The new tall building would become a dominant feature of the courtyard at the expense of the synagogue, diminishing the latter's role as the focal point of the space.

The special historic character of the place and the deliberate sense of separation from the outside world would be further diminished. The ability to see clear sky from the courtyard would also be lost, breaking the visual link between the space and celestial bodies.

Such harm needs to be considered in a cumulative context, with existing and consented tall buildings already having a damaging impact. These proposals would cause a greater degree of harm than those schemes, because of the location of the development site relative to the synagogue, evident immediately upon entering the courtyard.

c) Holland House and Renown House

Holland and Renown House would be altered in order to combine them with the proposed tall building on the site of Bury House. We note as heritage benefits the conservation works and proposed increased access, which would improve the ability to appreciate the significance of Holland House. However, the alterations would include the demolition of party walls in order to provide better connectivity and to enable a shared core. The light well in Holland House would be extended and subdivided. These alterations would result in harm to Holland House by compromising the legibility of its historic design.

Both Holland House and Renown House would be extended upwards which would result in a greater level of harm to the listed building and to the conservation area. In the case of Holland House, the addition of attic levels which do not reflect the order or proportions of the original design intent would be particularly harmful to the appreciation of its significance by appearing overbearing.

The scale of the proposed roof level and dormer windows to Renown House do not reflect the hierarchy of the building. As such, the extension would compromise its positive contribution to Holland House and the conservation area through increases to its height.

The proposed tall building would appear to tower over Holland House distracting from an appreciation of its high architectural interest, causing further harm.

d) Creechurch Conservation Area

The proposals would similarly harm the conservation area by reducing the positive contribution made to it by these buildings. The scale of the proposed tall building would detract from a relatively consistent historic scale and become the dominant form.

We note proposals offer modest enhancement to the character and appearance of the area by reinstating the southern part of Heneage Lane as a route through, which would be a small heritage benefit.

<u>Legislation, policy and guidance considerations</u>

We note the salient points of law, policy and relevant guidance here.

a) The Planning (Listed Buildings and Conservation Areas) Act 1990

Section 16 (2) and 66 (1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 (as amended) sets out the statutory duty on local planning authorities to have special regard to the desirability of preserving listed buildings or their setting or any features of special architectural or historic interest which they possess.

Section 72 (1) of the Act also requires Local Planning Authorities to pay special attention to the desirability of preserving or enhancing the character or appearance of conservation areas.

Section 38 (6) of the Planning and Compulsory Purchase Act 2004 requires Local Planning Authorities to determine planning applications in accordance with the development plan unless material considerations indicate otherwise.

b) The City of London Plan 2015 - 2026

The Local Plan context affords considerable protection to the Tower of London and Bevis Marks Synagogue, befitting their status as heritage assets of the highest significance.

According to the City of London's adopted Local Plan, the site is within the broad area identified for tall buildings in the Cluster. This is set out in the adopted Plan in Core Strategic Policy CS7: Eastern Cluster, which seeks the provision of high quality tall commercial buildings within the cluster area on appropriate sites and adhere to the principles of sustainable design, conservation of heritage assets and their settings and taking account of their effect on the wider London skyline and protected views. This policy therefore recognises that not all sites within the Cluster area are suitable for tall buildings.

Policy CS12: Historic Environment, seeks the "safeguarding [of] the City's listed buildings and their settings" and "Preserving and, where appropriate, seeking to enhance the Outstanding Universal Value…of the Tower of London World Heritage Site and its local setting." It states that "development in conservation areas will only be permitted if it preserves and enhances the character or appearance of the conservation area"

Policy CS13: Protected Views, aims "to protect and enhance significant City and London views of important buildings, townscape and skylines…by…securing an appropriate setting of and backdrop to the Tower of London World Heritage Site, so ensuring its OUV."

Policy CS14: Tall Buildings, states that such development will only be permitted on sites that are considered suitable, having regard to the potential effect on the City skyline; the character and amenity of their surroundings, including the relationship with existing tall buildings; the significance of heritage assets and their settings; and the effect on historic skyline features. The policy indicates that permission will be refused for tall buildings in inappropriate locations, including conservation areas.

c) The London Plan 2021

London Plan Policy HC1 Heritage conservation and growth requires development proposals affecting heritage assets and their settings to conserve their significance. It further requires the cumulative impacts of incremental change to be actively managed.

London Plan Policy HC2 World Heritage Sites, requires development proposals in the setting of WHSs to conserve, promote and enhance their OUV, including the authenticity, integrity and significance of their attributes, and support their management and protection. In particular, they should not compromise the ability to appreciate their OUV, or the authenticity and integrity of their attributes. It additionally requires development within the setting of a WHS to be supported by a Heritage Impact Assessment.

London Plan Policy D3 requires all development to follow a design-led approach that optimises the capacity of sites, including consideration of design options to determine the most appropriate form of development that responds to a site's context.

London Plan Policy D9 Tall Buildings requires that proposals should take account of, and avoid harm to, the significance of London's heritage assets and their settings. Proposals resulting in harm will require clear and convincing justification. Where the proposals concern the setting of a World Heritage Site, the policy reserves the strongest protection, stating that new tall buildings "must preserve, and not harm, the Outstanding Universal Value of the World Heritage Site, and the ability to appreciate it".

The Tower of London is identified in the London Plan as one of three Strategically Important Landmarks for London, and the importance of managing its setting is recognised in the strategic views policies HC3 and HC4, and the London View Management Framework (LVMF Supplementary Planning Guidance, 2012).

The LVMF supplementary planning guidance, in relation to view 10A, states that this location "enables the fine detail and the layers of history of the Tower of London to be readily understood. This understanding and appreciation is enhanced by the free sky space around the White Tower. Where it has been compromised, its visual dominance has been devalued" (para. 182).

It requires that “the Tower of London should not be dominated by new development close to it” (para. 183) and that “some visual separation should be retained between the upper parts of the White Tower and the emerging cluster of tall buildings in the background” (para. 186).

d) The National Planning Policy Framework

The National Planning Policy Framework (NPPF) requires planning policies and decisions to reflect relevant international obligations and statutory requirements (Paragraph 2). This includes those obligations under the 1972 World Heritage Convention which require that the UK Government protects and conserves the World Heritage within its territory.

Chapter 16 of the NPPF concerns the historic environment. Paragraph 195 notes that heritage assets range from sites and buildings of local historic value to those of the highest significance, such as World Heritage Sites which are internationally recognised to be of Outstanding Universal Value. It recognises that these assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance.

A robust and proportionate understanding of the significance of any affected heritage assets is required and this should be taken into account in order to avoid or minimise any conflict between the conservation of heritage assets and any aspect of a development proposal (Paragraphs 200-201).

Any finding of harm is a consideration to which the decision-maker must give “considerable importance and weight” and “less than substantial harm” in NPPF terms does not imply “a less than substantial objection”.

If harm is deemed to be less than substantial, paragraph 208 of the NPPF requires that harm be weighed against the public benefits of the proposals. Great weight should be given to the conservation of designated heritage assets, irrespective of the level of harm caused, and the more important the asset, the greater the weight should be (Paragraph 205). Any harm to, or loss of, the significance of a designated heritage asset should require clear and convincing justification (Paragraph 206).

Chapter 12 of the NPPF considers good design as a key aspect of sustainable development. Paragraph 135 requires that developments should be sympathetic to local character and history, and Paragraph 193 states that development that is not well designed should be refused permission, especially where it fails to reflect local and government design guidance. Related to this, the National Design Guide (NDG, 2021) emphasises the importance of heritage and context when considering the merits of a design.

e) The Tower of London World Heritage Site Management Plan 2016

The management plan states that “the greatest challenge to the WHS… remains the impact on its setting of development and tall buildings” (p.4). Key elements of the Tower’s setting that are sensitive for the management of its OUV are highlighted in paragraphs 7.3.17-18 (p.99) and 7.3.27 (p.101), namely the potential of new development to change the relative scale of the Tower in views, and the degree to which the Tower’s relationship with the City can be understood by the sky space around the White Tower.

f) The Tower of London Local Setting Study (2010)

The Local Setting Study supports the management plan policies. In relation to the view from Tower Bridge, it notes that the existing Cluster buildings appear to move closer to the White Tower, ‘towering’ over it, which reduces its apparent prominence and scale. It states that the White Tower should not become ‘lost’ in the City and that additional buildings in the backdrop (‘behind’ *or* ‘close’) could further diminish its perceived scale.

g) The Setting of Heritage Assets Historic Environment Good Practice Advice in Planning Note 3 (GPA3)

The Setting of Heritage Assets recommends a staged approach to understanding impacts on setting. Step 2 of that guidance is an assessment of the degree to which settings and views contribute to significance or allow it to be appreciated. This includes consideration of ‘the asset’s intangible associations with its surroundings, and patterns of use’; a further non-exhaustive checklist of possible attributes of setting is also provided. Those that may be applicable in this case, relate to the experience of the asset, including the following:

- Intentional intervisibility with other historic and natural features
- Visual dominance, prominence or role as focal point
- Sense of enclosure, seclusion, intimacy or privacy
- Rarity of comparable survivals of setting
- Traditions

Step 3 of this guidance requires an assessment of the effects of proposed development on significance or the ability to appreciate it. A further checklist of potential attributes of a development which may affect significance is provided, including:

- Proximity to asset
- Position in relation to key views to, from and across
- Prominence, dominance or conspicuousness

Historic England is subject to both the Freedom of Information Act (2000) and Environmental Information Regulations (2004). Any Information held by the organisation can be requested for release under this legislation.

- § Competition with or distraction from the asset
- § Change to skyline, silhouette
- § Lighting effects and ‘light spill’

Historic England’s position

Historic England objects strongly to the current proposals. We consider they would harm designated heritage assets of the highest possible significance, contrary to planning legislation, policy and guidance. We do not support the development of a building of scale proposed in this location due to the inevitable harmful impact it would have on the historic environment.

The reasons for refusal for the previous application remain entirely applicable to these proposals. That application was refused because the proposals were considered to harm the contribution to the OUV of the Tower of London World Heritage Site made by its setting, in particular in views that best allow that OUV to be appreciated. A second reason for refusal was the overbearing and overshadowing impact on the synagogue and its courtyard.

a) The Tower of London World Heritage Site

The previously refused application was subject to a Technical Review by ICOMOS, one of the Advisory Bodies to UNESCO’s World Heritage Committee, in July 2022. Given the similarities between the current scheme and the refused one, we consider that ICOMOS' previous advice remains relevant to the current application and should similarly be taken into consideration. ICOMOS considered that the proposals would harm the integrity of the WHS as well as the significance it derives from attributes conveying its OUV.

This harm remains in the current planning application. In the case of the World Heritage Site, a small reduction in height of the proposed tall building (without an apparent loss of deliverable office floor space) causes a similar impact. The same attributes of OUV (as a symbol of Norman power, its landmark siting and its physical dominance) and so the integrity of the WHS, would be harmed.

The submitted Heritage Impact Assessment for the Tower does not consider the potential for negative impacts on OUV and we disagree strongly with its conclusion of a minor and beneficial impact in LVMF View 10A.1. It does not adequately consider the impact on the important kinetic experience of the viewpoint either. In their technical review, on this point ICOMOS stated that ‘the work to maintain a separateness from the Tower is completely unsuccessful’. The same is true of these proposals.

The City’s adopted policies CS7, CS12, CS13 and CS14 require tall building proposals to avoid harm to the City’s historic environment and its skyline, including the OUV of

Historic England is subject to both the Freedom of Information Act (2000) and Environmental Information Regulations (2004). Any Information held by the organisation can be requested for release under this legislation.

the Tower. Similarly, the London Plan provides for a robust protection of OUV in policies HC1, HC2, HC3 (and associated LVMF guidance) and D9. The proposals do not meet the requirements of these policies and are in clear conflict with them.

We consider that, despite the changes to the scheme, a high level of harm would be caused to the same attributes of the WHS' OUV. For the purposes of the NPPF, we find that the harm would be in the middle of the less than substantial range to the World Heritage Site. Given the especially great weight which needs to be given to the conservation of World Heritage Sites, which are internationally recognised for their OUV as an irreplaceable resource, this weighs very heavily against the proposals.

Notwithstanding our view that the advice received from ICOMOS on the previous scheme for this site remains relevant, the Department for Culture, Media & Sport (DCMS), representing the UK State Party to the World Heritage Convention, has decided to notify the current case to UNESCO. We consider that any decision on this application would benefit from knowing the position of the World Heritage Centre and/or further advice of ICOMOS. We note that we have received request from the World Heritage Centre to produce a State of Conservation Report for the Tower of London this year, indicating that UNESCO has serious concerns about the impacts of development on the setting of this WHS and its OUV.

b) Bevis Marks Synagogue

Our understanding of the significance of the synagogue has developed since the previous application. Clear harm would be caused to multiple aspects of the synagogue's significance by blocking the open sky in its backdrop - noting in particular the considerations set out in GPA3 and the assessment of significance in the adopted CMP. We defer to the expertise of the Sephardi community on the aspects of significance that are associated with their religious customs and traditions that may be impacted by the current proposals.

We think that the harm arising from the proposals would be greater than we previously identified. The harm would fall in the middle of the less than substantial range, which represents a considerable impact to a building and setting of exceptional significance and rarity, which are sensitive to change.

The submitted Heritage and Townscape Visual Impact Assessment presents a limited understanding of the significance of the synagogue, and the contribution made by setting to that significance. It does not explain why a different understanding to the adopted CMP has been reached with regard to the value of the sky. We consider that the application fails to meet the requirements of Paragraph 200 of the NPPF, as the level of detail is not sufficient.

c) Holland House, Renown House and Creechurch Conservation Area

New additional harmful impacts to the historic environment arise through the present applications in the case of Holland House and the newly designated Creechurch Conservation Area, as described above. The proposed roof extensions have not been resolved in a way which avoids or minimises harm in accordance with the requirements of the NPPF. Given its importance as a pioneering building, we think that such harm is difficult to justify.

The introduction of a tall building within the conservation area would harm its character and is at odds with the provisions of Local Plan Policy CS12 and CS14. The latter indicates that permission will be refused for tall buildings in inappropriate locations, including conservation areas.

d) Design and heritage benefits

We are not convinced that sufficient steps have been taken to minimise or avoid conflicts between the conservation of all of the designated heritage assets referred to above, as required by the NPPF.

As context (including the historic environment, as set out in the NDG) is a fundamental aspect of good design, we find that the design quality is poor in this respect. Similarly, the proposals do not appear to comply with the design-led approach required by London Plan Policy D3, as the site's capacity has not been optimised with regard to the site's context and capacity for growth, including the setting of such exceptional heritage assets, which are an important consideration.

The heritage benefits arising from the scheme are limited and could be achieved in less harmful ways. We afford them little weight and consider them incapable of outweighing the identified harm.

Recommendation

Historic England strongly objects to these applications. We recommend that they are refused or withdrawn.

We would welcome further discussion with your authority before considering our position in regard to our power of direction for the Listed Building Consent.

This response relates to designated heritage assets only. If the proposals meet the Greater London Archaeological Advisory Service's published consultation criteria we recommend that you seek their view as specialist archaeological adviser to the local planning authority.

The full GLAAS consultation criteria are on our webpage at the following link:

https://www.historicengland.org.uk/services-skills/our-planning-services/greater-london-archaeology-advisory-service/our-advice/

Yours sincerely

Alexander Bowring
Inspector of Historic Buildings and Areas
London & South East Region

17 May 2024

Dear Anna Tastsoglou,

SITE: Holland House 1-4, 32 Bury Street, City of London EC3A 5AW

REF: 24/00011/LBC & 24/00021/FULEIA

The Twentieth Century Society has been consulted on the above applications for alterations and extension to Holland House and the redevelopment of the Bury House site. These applications were reviewed by the Society's advisory Casework Committee of experts on Monday 13th May and the comments below reflect the committee's response. The Society strongly objects to the proposals on account of the harm that would be caused to the significance of the Grade II* listed Holland House and Creechurch Conservation Area.

Holland House was completed in 1916 to designs by the Dutch architect Hendrik Petrus Berlage for WH Müller & Co, a shipping, steel and mining company. The clients were the company heads, the German couple Anton Kröller and Helene Müller who had employed Berlage on projects in the Netherlands where their company was based and became important patrons of his work. Berlage was a major architect in the Netherlands and Holland House was a rare commission in England. WH Müller's London offices were built from steel to showcase the company's trade and impress in its modernity. Berlage had travelled to the US in 1911 and experienced its steel high-rises which he published in Amerikaansche reisherinneringen ('Memories of my American trip') in 1913. The Holland House offices was an early innovator in England for its adoption of a steel frame in construction. It is clad in hand-made glazed terracotta manufactured by the Royal Dutch Delftware Factory in Delft and imported to London on Müller's ships during WWI. The elevations have a strong vertical emphasis created through closely spaced full-height mullions set on a regular grid and chamfered to emphasise their slenderness. Ceramic spandrels, each with a central square boss, mark the floor levels. Black granite clads the building's plinth and entrances, and forms a relief carving of a steamship by Joseph Mendes da Costa at the corner of the return elevation to Bury Street. Key interior spaces were richly finished.

Policy

Holland House is Grade II* listed, placing it in the top 8% of listed buildings in England. Its conservation is therefore of the utmost importance. The local authority should be mindful of sections 16(2) and 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 which state that, in the decision-making process on applications affecting listed buildings, "the local

planning authority [...] shall have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses."

The site is also located within the very recently designated Creechurch Conservation Area. The local authority therefore needs to bear in mind section 72(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 which requires that "In the exercise, with respect to any buildings or other land in a conservation area [...] special attention shall be paid to the desirability of preserving or enhancing the character or appearance of that area."

The application needs to be assessed in relation to paragraph 205 of the NPPF which requires that "When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation..."

In addition, paragraph 206 of the NPPF requires that "Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting) should require clear and convincing justification. Substantial harm to or loss of [...] assets of the highest significance [...] grade I and II* listed buildings [...] should be wholly exceptional".

Paragraph 207 states that: "Where a proposed development will lead to substantial harm to (or total loss of significance of) a designated heritage asset, local planning authorities should refuse consent, unless it can be demonstrated that the substantial harm or total loss is necessary to achieve substantial public benefits that outweigh that harm or loss, or all of the following apply: a) the nature of the heritage asset prevents all reasonable uses of the site; and b) no viable use of the heritage asset itself can be found in the medium term through appropriate marketing that will enable its conservation; and c) conservation by grant-funding or some form of not for profit, charitable or public ownership is demonstrably not possible; and d) the harm or loss is outweighed by the benefit of bringing the site back into use."

Assessment

It is the view of the Society's Casework Committee that the proposed 3-storey extension to the roof of Holland House would seriously harm the significance of the Grade II* Holland House. The 3 additional storeys would add considerable heaviness and bulkiness to the building's roofline. This extension would change the building's proportions and upset its balance, making it appear top heavy. While stepped back, it would still remain highly visible and impactful. This is illustrated in the applicant's HTVIA views 42, 43 and 60. The proposed extension would also have a harmful impact on the building's fabric and on the character of its interior spaces, namely through the infilling of its lightwell.

The Society also has serious concerns about the proposed ground plus 43-storey office tower development to Bury House and its impact on the significance of Holland House. The proposed redevelopment would physically impact on the fabric of Holland House. Original rear floor slab and wall would be lost to connect Holland House with the proposed development. This part of Holland House has already suffered fabric loss as a result of the Bury House development in the 1960s and

we are concerned that even more fabric would be removed as part of the current application. We are also concerned about the proposed insertion of a large stair to connect the ground and first floor levels and its impact on the interiors here. We have concerns about the cumulative impact of previous and proposed changes on the significance of this Grade II* listed building. The proposed ground plus 43-storey office would also clearly impact on the setting of Holland House – it would rise up directly behind the building and would appear to overshadow it. This is illustrated in the applicant's illustrative CGIs and views within its HTVIA. We accept that the proposed height of the office has been reduced from the previous application (which proposed a ground plus 48 storey tower) but a reduction of five storeys has done little to reduce its impact on the surrounding built environment. It was on account of this impact on heritage that the previous scheme was refused. The planning/heritage context has also changed since the previous application. This area has very recently been designated the Creechurch Conservation Area which makes the site even more sensitive to change and even harder to justify such tall development here.

These aspects of the scheme would majorly harm the significance of Holland House. We do not feel that this harm is mitigated by the few positive interventions proposed as part of the scheme, which includes restoring the elevations, replacing non-original windows with units closer to the originals, reinstating the blocked-in Bury Street entrance and conserving original interior finishes. These benefits could be delivered through a scheme which has a much less harmful impact on the site's heritage. We would seriously challenge the applicant's claim that remedial work to the elevations (which has already been approved by the local authority) could only be delivered through the wider redevelopment of the site (we refer to paragraph 2.32 of the planning statement).

For the reasons outlined in this letter, the Society strongly objects to the proposals and recommends that the local authority refuses these damaging applications. We do not object to adapting Holland House for office use nor to the redevelopment of the Bury House site in principle but take issue with the approach proposed and would like to see a more conservation-led scheme come forward.

We hope that these comments are of use to you. We would be grateful if you could please inform us of your decision on this application.

Yours sincerely,

Remit: The Twentieth Century Society was founded in 1979 and is the national amenity society concerned with the protection, appreciation, and study of post-1914 architecture, townscape and design. The Society is acknowledged in national planning guidance as the key organisation concerned with the modern period and is a constituent member of the Joint Committee of the National Amenity Societies. Under the procedures set out in the Arrangements for Handling Heritage Applications – Notification to Historic England and National Amenity Societies and the Secretary of State (England) Direction 2021, all English local planning authorities must inform the Twentieth Century Society when an application for listed building consent involving partial or total demolition is received, and they must notify us of the decisions taken on these applications.

17 May 2024

Dear Anna Tastsoglou,

RE: Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works.

Thank you for consulting the Victorian Society about this application. We **strongly object** to the proposed scheme.

Significance and Harm

Holland House is a Grade II* listed building constructed between 1914-1916 and designed by the eminent architect Hendrik Petrus Berlage. It is considered a key transitional building between the Art Nouveau and Art Deco styles, noted for its faience cladding, its sculpted corner resembling the bow of a ship, and its elaborately tiled entrance lobby. The heritage asset also forms a key building within the newly established Creechurch Conservation Area.

Renown House is a non-designated heritage asset constructed in 1912, designed by Delissa Joseph for the Bunge & Co import-export trading business. The building positively contributes to the immediate setting of Holland House and the Creechurch Conservation Area.

Registered Charity No. 1081435. Company Limited by Guarantee, Registered in England No. 3940986. Registered office as above.

The four-storey extension to both Holland House and Renown House is excessive and top-heavy, disrupting the careful architectural proportions of both buildings. The extension would also result in the loss of historic fabric, including the loss of stone chimney stacks on Renown House and the complete removal of the top floor of Holland House, causing less than substantial harm.

To accommodate an open connection with the proposed new tower at No. 31 Bury Street, further losses to Holland House are proposed, including the rear wall, the insertion of a large new staircase, and the enclosure of a light well. Listing applies to all the building's fabric; the cumulative effect of these changes would heavily reduce the integrity of this heritage asset.

Renown House will lose all its interiors, roof mansard, and stone chimney stacks. New floor levels inserted to accommodate the connection with the proposed tower at 31 Bury Street and Holland House would not align with existing windows. The proposed interventions aggressively attack the integrity and design of this non-designated heritage asset.

The construction of a 43-storey building at 31 Bury Street would negatively impact the surroundings in which these heritage assets are experienced. The scale of the proposal would have the effect of overpowering the assets by absorbing them into the wider proposal, affecting the ability to appreciate the individual significance of both Holland House and Renown House.

Creechurch Conservation Area

The proposed scale and design of the development would have a far-reaching effect on the appearance and special architectural and historic character of the Creechurch Conservation Area, defined by intricate lanes and medium-rise buildings. This proposal would compromise this character by introducing an inappropriate scale and materiality, affecting the predominant setting of a number of designated and undesignated heritage assets, causing less than substantial harm to this conservation area, and damaging one of the key aspects of its significance.

Policy

National Planning Policy Framework (NPPF):

> Para. 205 'When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance'.
>
> Para 206' Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification. Substantial harm to or loss of:
>
> b) assets of the highest significance…grade I and II* listed buildings…should be wholly exceptional'

The NPPF outlines the test for justifying harm to grade II* listed buildings as wholly exceptional. This application woefully fails to provide a clear or adequate justification that the scale and bulk of the proposed development, and that the subsequent substantial harm to a grade II* listed building, are absolutely necessary to unlock public benefits or to demonstrate that these benefits are indeed substantial, let alone wholly exceptional.

City of London's Adopted Local Plan (2015):

The Core Strategic Policy CS10: Design requires "that the bulk, scale, massing and height of buildings are appropriate to the character of the City and the setting and amenities of surrounding buildings and spaces" and CS14: Tall buildings "Refusing planning permission for tall buildings within inappropriate areas, comprising of conservation areas" The proposed site sits within the Creechurch conservation area characterised by a mixture of low-rise and medium-height buildings. The approval of this scheme would directly contradict the extant local plan by introducing a building of bulk, scale, massing and height inappropriate for this area. We ask whether the City of London can confirm whether it intends to abide by policies set out in its extant local plan?

NPPF 212 states "Local planning authorities should look for opportunities for new development within Conservation Areas… and within the setting of heritage assets, to enhance or better reveal their significance. Proposals that preserve those elements of the setting that make a positive contribution to the asset (or which better reveal its significance) should be treated favourably."

It is difficult to see how this proposal could possibly enhance or 'better reveal' the significance of this conservation area.

1990 Planning (Listed Buildings and Conservation Areas) Act:

> Section 16(2): Decision-makers must give 'special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest.'
>
> Section 72(1): 'Special attention shall be paid to the desirability of preserving or enhancing the character or appearance of Conservation Areas.'

The application simply fails to adequately preserve a building of special architectural and historic interest due to the loss of historic fabric, disruptive additions, and the compromise of its immediate setting, in addition to the wider negative impact on a conservation area.

I would be grateful if you could inform the Victorian Society of your decision in due course.

Yours sincerely,

Guy Newton

Conservation Adviser

ICOMOS Technical Review

Property	**Tower of London**
State Party	**United Kingdom of Great Britain and Northern Ireland**
Property ID	**488**
Date of inscription	**1988**
Criteria	**(ii)(iv)**
Project	**Bury House development**

On 9 February 2021, ICOMOS received information from the State Party, via the World Heritage Centre, regarding a development proposal at 31 Bury Street. There are 392 documents associated with this planning application.

The project proposal is as follows: Demolition of Bury House, 31 Bury Street, London and construction of a newbuilding comprising 2 basement levels (plus 2 mezzanines) and ground floor plus 48 upper storeys (197.94m AOD) for office use (Class E), flexible retail/cafe use (Class E), publicly accessible internal amenity space (Sui Generis) and community space (Sui Generis); a new pedestrian route and new and improved Public Realm; ancillary basement cycle parking, servicing and plant.

This Technical Review assesses the impact of the proposed development on the Outstanding Universal Value (OUV) of the Tower of London World Heritage property. The proposed development is located approximately 550 m northwest of the property. The proposed development at Bury Street is adjacent to London's 'Eastern Cluster'[1] of high-rise developments.

Summary of this Technical Review

The proposed development in its current form would result in harm to the authenticity and integrity of the Outstanding Universal Value (OUV) of the Tower of London World Heritage property. Neither is it wholly exceptional, nor is the harm justified or redressed by the public benefits to the proposal. The cumulative effect of existing buildings planning proposals that are pending and proposals that have received consent but are not yet built is already severe, and the proposed development would cause harm to the setting of the Tower of London World Heritage property, contrary to the Visual Management Guidance in the LVMF. The development proposal is not in accord with the Management Plan 2015. Separation of the White Tower retaining the clear view of the sky in its backdrop has not been successfully achieved. The Environmental Assessment accepts that the judgment in relation to the attributes of the Tower of London is a finely balanced one, but the Tower must remain the dominant building, separated from the City and respected by new developments.

The Advisory Body provides its detailed comments on the project below.

Background information relating to the property

Joint World Heritage Centre / ICOMOS Reactive Monitoring missions took place in 2006 and 2011, to address concerns in relation to the Tower of London World Heritage property. Technical Reviews carried out by ICOMOS in March 2019 and July 2020 further highlighted threats to the property. The

[1]Covered by the London Central Activities Zone (CAZ), this area is home to 30 St Mary Axe (the Gherkin, located approx. 50 m west of the site), the Leadenhall Building (the Cheesegrater, located approx. 170 m west of the site) and 52-54 Lime Street (the Scalpel, located approx. 10 m southwest of the site), plus emerging schemes such as 1 Undershaft, located approx. 125 m west of the site) and 100 Leadenhall Street. The area is responsible for close to 10% of the economic output of the UK.

retrospective Statement of Outstanding Universal Value (SOUV) for this property, adopted by the World Heritage Committee in 2013, notes in its section on management issues that there are threats and challenges to the property because of the urban development pressure in its close vicinity, and the potential negative impact of this process on integrity is indicated.

The 2006 Reactive Monitoring mission reviewed both approved and proposed development projects around the property, and in particular their possible impacts on significance, setting and views to and from the World Heritage property. It was accepted that the setting had been compromised since the 1960s due to the construction of several tall buildings around the City of London. These included the planning applications for the Minerva Tower (Houndsditch, 216 m) and the London Bridge Tower ("Shard of Glass", 303 m), due to a lack of adequate tools to assess visual impacts on qualities and values of cultural heritage, and thus (visual) damage to the setting.

The Mission noted that each new planning application is considered in isolation, notwithstanding the fact that several new developments taken together can have a magnified impact on the deterioration of cultural values. The 2006 Mission advised that finalisation of the Management Plan for the Tower of London and its environs was key and that Supplementary Planning Guidance should be provided to statutorily protect the remaining iconic views of the Tower, being from the south and south-west, both over the River Thames. The Mission also advised that the views to and from the property are critical for maintaining the property's integrity and for fully appreciating its setting. At that time, the Mission recommended that any tall buildings planned should not exceed the height by which they would become visible above the on-site historic buildings that are part of the Tower complex. The Mission was of the view that development of more tall buildings that would become visible would have a significantly negative visual impact on the integrity and seriously damage the Tower's OUV, possibly beyond repair.[2] Looking to future development, the Mission advocated the need for tight co-operation between the Borough Planning Authority, English Heritage and designers on planned development.

The second Reactive Monitoring mission took place in 2011 to review and discuss with national and local authorities the state of conservation of the property in its urban context, particularly its integrity in terms of visual impact; to review progress with the recommendations of the earlier mission; to assess how incremental changes as well as current and proposed major development projects in the immediate and wider setting of the property impact adversely or might impact adversely on its OUV; to discuss how in the absence of a buffer zone the immediate and wider setting of the property might be defined as a basis for evaluating the impact of proposed development on OUV and putting in place appropriate, specific protection; and to review the mechanisms and those under development for protecting the property and its setting.

The 2011 Mission reviewed the standards for World Heritage protection through the planning system and through the development of a system of management in Development Plans and Management Plans, and indicated that the "*Tower of London Local Setting Study*" constituted an important step towards the protection of the property's setting.[3] The management of the Tower of London and its setting is facilitated through that study. The Mission reiterated the advice to tightly regulate the construction of tall buildings in the vicinity of the property to maintain the property's integrity and to protect its OUV. It was noted that the incremental developments around the Tower over the past five years[4] had resulted in adverse visual impacts on its integrity. The World Heritage Committee requested the State Party "to evaluate the impact of proposed changes to the visual setting of the property on

[2] The Mission referred to a 38 storey high building under construction in the financial district, the 20 Fenchurch project, which it indicated would have a cumulative negative visual impact on the integrity of the Tower of London World Heritage property.
[3] prepared for the Tower World Heritage Site Consultative Committee in August 2010.
[4] Since the 2006 Reactive Monitoring mission.

its Outstanding Universal Value, and to develop and apply effective mechanisms for the protection of the setting as a matter of urgency" (Decision 35 COM 7B.114).

The Technical Review carried out by ICOMOS in March 2019 responded to information received from the State Party via the World Heritage Centre concerning a high rise 'landmark' development project named "*The Tulip*" to be constructed within the setting of the World Heritage property. The ICOMOS Technical Review of July 2020 followed the reception of information from the State Party via the World Heritage Centre regarding the development of a tall office building of 262 m at 100-107 Leadenhall Street, London. For each of those proposed developments within the London City area, more precisely called the "*Eastern Cluster*", the conclusions of those Technical Reviews indicated that the proposed developments were not compatible with the preservation of the integrity of the Tower of London World Heritage property. Their findings expand concerns about the impact of development on setting.

Key attributes that express the OUV of the Property

The retrospective Statement of Outstanding Universal Value (SOUV) for the property was adopted in 2013 (Decision 37 COM 8E).

The SOUV notes that the Tower of London is an internationally famous iconic complex, "the most complete example of an 11th century fortress palace remaining in Europe", and "a rare survival of a continuously developing ensemble of royal buildings". It was strategically sited on the river Thames acting as "a symbol of Norman power". It further states that "The Tower's landmark siting and visual dominance on the edge of the River Thames, and the impression of great height it once gave are all key aspects of its significance". The Tower "helped shape the story of the Reformation in England" and the ensemble is "a major reference for medieval military architecture". The ensemble "has strong associations with State institutions" that "incorporated such fundamental roles as the nation's defence, its records and its coinage" and was "a major repository for official documents and precious goods owned by the Crown". In terms of integrity, it is noted that the strategic siting lends itself to "the Tower's historic physical relationship to both the River Thames and the City of London, as fortress and gateway to the capital, and its immediate and wider setting, including long views, will continue to be threatened by proposals for new development that is inappropriate to the context. Such proposals could limit the ability to perceive the Tower as being slightly apart from the City, or may have an adverse impact on its skyline as viewed from the river". These aspects of significance "have to some extent been eroded by tall new buildings in the eastern part of the City of London, some of which predate inscription".

Management Plan 2016

The current Management Plan for the Tower of London World Heritage property was published in 2016 by Historic Royal Palaces. It articulates that the greatest challenge to the property is the impact of development on its setting and tall buildings. In terms of authenticity, the form, design and materials of the property remain intact and legible but its strategic siting and historic relationship with the City of London is considered to be vulnerable to proposals for development that do not respect its context and setting.

Legal and Policy Framework

The State Party meets its obligations under the World Heritage Convention through the National Planning Policy Framework (NPPF), National Legislation and other Guidance.

Paragraph 189 of the NPPF (2021) states that: *"Heritage assets range from sites and buildings of local historic value to those of the highest significance, such as World Heritage Sites which are internationally*

recognised to be of Outstanding Universal Value. These assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of existing and future generations." In accordance with the NPPF, it is the applicant who is required to describe the significance of any heritage assets affected including any contribution made by their setting. This in effect provides a basis for Heritage Impact Assessment (HIA) reports and decisions being taken on an informed basis.[5,6]

Paragraph 193 of the NPPF indicates that: *"When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance"*.

Paragraph 200 states that: *"Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification*". It suggests that substantial harm to or loss of "*assets of the highest significance, notably* […] *World Heritage Sites*, *should be wholly exceptional"*. And Paragraph 202 states that: *"Where a development proposal will lead to less than substantial harm to the significance of a designated heritage asset, this harm should be weighed against the public benefits of the proposal including, where appropriate, securing its optimum viable use".*

The National Planning Practice Guidance **(**NPPG), 2019, provides detailed information on how the NPPF should be implemented in practice and on protection of World Heritage.[7] The NPPG includes detailed advice on protection of setting and refers to the Operational Guidelines for the Implementation of the World Heritage Convention in terms of the protection of important views or attributes that are functionally important as a support to the property. The ICOMOS Guidance on Heritage Impact Assessments for Cultural World Heritage Properties, 2011, is referenced.[8] The precautionary principle is confirmed as being appropriate and applies to World Heritage properties' attributes; so that levels of harmful change may be reviewed and justifications for it may be turned down.

The Greater London Authority (GLA) has the obligation to produce and keep under review a spatial development strategy which is known as the London Plan.[9] The current 'New London Plan' dates from 2021 (LonP 2021) and forms part of an integrated policy framework of protection for World Heritage

---

[5] Paragraph 194*: "In determining applications, local planning authorities should require an applicant to describe the significance of any heritage assets affected, including any contribution made by their setting".*

[6] Paragraph 195: *"Local planning authorities should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage asset) taking account of the available evidence and any necessary expertise. They should take this into account when considering the impact of a proposal on a heritage asset, to avoid or minimise any conflict between the heritage asset's conservation and any aspect of the proposal*".

[7] Paragraph 32 of the guidance on historic environment states: "*In line with the National Planning Policy Framework, plans, at all levels, should conserve the Outstanding Universal Value, integrity and authenticity* […] *of each World Heritage Site and its setting, including any buffer zone or equivalent.*" Requirements for policies to protect and enhance World Heritage properties should aim at "*protecting the World Heritage Site and its setting, including any buffer zone, from inappropriate development; striking a balance between the needs of conservation, biodiversity, access, the interests of the local community, the public benefits of a development and the sustainable economic use of the World Heritage Site in its setting, including any buffer zone; protecting a World Heritage Site and its setting from the effect of changes which are relatively minor but which, on a cumulative basis, could have a significant effect*".

[8] The NPPG indicates that proposals that would result in harm to the authenticity and integrity of the OUV should be wholly exceptional; that less than substantial harm must be justified, and that proposals causing harm will be weighed against the substantial public benefits of the proposal and whether it has been demonstrated that all reasonable efforts have been made to mitigate the extent of the harm.

[9] A strategic social, economic, transport and environmental framework for London's future development over 20-25 years.

in the city.[10] Policy HC2 within the plan, on 'World Heritage Sites'[11] indicates that "boroughs with World Heritage Sites, and those which are neighbours to authorities with World Heritage Sites" should work together to protect the OUV; and that the obligations concerning development proposals "in World Heritage Sites and their settings, including any buffer zones"[12] should not compromise the ability to appreciate their OUV or the authenticity of their attributes. The need to support development proposals by Heritage Impact Assessments; the need for up-to-date World Heritage Site Management Plans; and the need to give that Management Plan appropriate weight is emphasised.[13]

Policy HC3 of the LonP 2021 relates to strategic and local views and commits to identifying and protecting "aspects of views that contribute to a viewer's ability to recognise and appreciate a World Heritage Site's authenticity, integrity, and the attributes of Outstanding Universal Value. This includes the identification of protected silhouettes or key features in a World Heritage Site" and the setting of London's World Heritage Sites, considered to be "the surroundings in which they are experienced". It indicates that "the consideration of views is part of understanding potential impacts on setting".

The 'London View Management Framework, Supplementary Planning Guidance, 2012'[14] (LVMF SPG*),* indicates views where proposed development has potential to have an impact on this World Heritage property.[15] The purpose of that document is to explain in detail a policy approach so that boroughs, applicants and other statutory authorities can assess a proposal's compliance with the LonP 2021.[16] The LVMF SPG document provides a robust basis for the protection of identified views, vistas and silhouettes.[17] It also requires that development that might affect views identified by other statutory authorities should, where relevant, be assessed to determine its potential effect on those views.[18] It stipulates that these should be set out in the World Heritage Site Management Plan and should be

[10] It contains policies to protect and enhance the historic environment in general and World Heritage properties in particular.

[11] "*Boroughs with World Heritage Sites, and those which are neighbours to authorities with World Heritage Sites, should include policies in their Development Plans that conserve, promote, actively protect and interpret the Outstanding Universal Value of World heritage sites, which includes the authenticity and integrity of their attributes and their management*."

[12] "*Development proposals in World Heritage Sites and their settings, including any buffer zones, should conserve, promote and enhance their Outstanding Universal Value, including the authenticity, integrity and significance of their attributes, and support their management and protection."*

[13] The LonP 2021 indicates that "development proposals with the potential to affect World Heritage Sites or their settings should be supported by Heritage Impact Assessments" as well as the need for "up-to-date World Heritage Site Management Plans"; and that "when considering planning applications, appropriate weight should be given to implementing the provisions of the World Heritage Site Management Plan".

[14] The LVMF SPG as adopted, prepared for the Greater London Authority, remains operative in the implementation of the LonP 2021.

[15] There are three types of Strategic Views designated in the New London Plan 2021: "L*ondon Panoramas, River Prospects, and Townscape Views (including Linear Views). Each view can be considered in three parts; the foreground, middle ground and background*". 'Protected Vistas' towards Strategically-Important Landmarks are composed of two parts: a Landmark Viewing Corridor and a Wider Setting Consultation Area. The Mayor, through the LVMF SPG, has indicated that he "*will seek to protect the composition and character of these views, particularly if they are subject to significant pressure from development. New development can make a positive contribution to the views and this should be encouraged, but where development is likely to compromise the setting or visibility of a key landmark it should be resisted*".

[16] In the LVMF SPG, in relation to all designated views, visual management guidance is given, landmarks are identified, and incremental change must contribute positively to the view or it will not be considered. Careful considerations should be made concerning tall buildings which will need to "*preserve or enhance the setting of key landmarks and to relate to and strengthen the composition of the emerging clusters of tall buildings*". The importance of not altering the protected silhouette is strongly flagged.

[17] While many views have been addressed in the LVMF SPG, it is important to realise that once the attributes (in the context of the Management Plan) have been considered, it is likely that additional views within and looking towards or from the World Heritage property may need to be considered. The LVMF SPG does not seek to give guidance on every aspect of visual impact assessment.

[18] The LVMF SPG gives further technical information in an appendix covering the selection of appropriate field of view for each "Accurate Visual Representation" (AVR) and it recommends a procedure to be followed to indicate the location of a proposed development as accurately as possible; "*it may also indicate the degree to which a development will be visible, its detailed form or the proposed use of materials. An AVR must be prepared following a well-defined and verifiable procedure so that it can be relied on by assessors to represent fairly the visual properties of a proposed development*".

supported by using accurate 3D modelling and other best practice techniques. Critically, the LVMF SPG states that local Planning Authorities should incorporate the principles of the LonP 2021 and the LVMF SPG into development plans and should monitor any potential changes to the designated views and their effect on the quality of the view. It goes on to highlight that development plan documents must support the setting of the World Heritage property. An assessment process is described for planning applications with proposals that could affect designated views.[19]

Two views identified in the LVMF SPG are relevant to this Technical Review: View No. 10 – 'River prospect Tower Bridge', and View No 25A.1-3 - Townscape View - 'The Queen's Walk to Tower of London'. View No. 10 has a viewing location from the North Bastion on Tower Bridge upstream. From the assessment point 10A.1, there is a deep and wide panorama where, as described in the LVMF SPG, "*The location enables the fine detail and the layers of history of the Tower of London to be readily understood. This understanding and appreciation is enhanced by the free sky space around the White Tower. Where it has been compromised its visual dominance has been devalued."* The Visual Management Guidance in the LVMF SPG states that *"The Tower of London should not be dominated by new development close to it."*[20] It states in relation to the background that "*Development proposals likely to affect the World Heritage Site should pay regard to the guidance set out in the Tower of London World Heritage Site Management Plan published by Historic Royal Palaces (HRP)* […] *It is recommended that HRP and English Heritage[21] are consulted on all relevant proposals at an early stage."*[22]

Paragraph 407 of the LVMF SPG relates to the view from the Queen's Walk to the Tower of London from the South Bank with a viewing location, No. 25A, close to the river. Paragraph 409 of the LVMF SPG indicates that three Assessment Points (numbered 25A.1, 25A.2 and 25A.3) are placed in this location. They provide good views of the Tower of London, and "*the relatively clear background setting of the White Tower, in particular"*. A Protected Vista is included from Assessment Point number 25A.1 and "*a Protected Silhouette is applied to the White Tower*" between Assessment Points numbers 25A.2 and 25A.3.

Paragraph 411 of the LVMF SPG indicates that "*The Tower of London was built to dominate the City, and to control the river at its entrance. The City has now grown to encompass the World Heritage Site, the latter retaining only its essential historical relationship with the river and a clear backdrop silhouette to the White Tower from the south-west.*"

Paragraph 412 of the LVMF SPG states that "*This view* [from assessment point No. 25A.1] *provides the greatest understanding of the World Heritage Site ensemble where there are clear views of the southern and western faces of the White Tower down to the roof of the Waterloo Block. The clear view of the sky in the backdrop of the White Tower is an important attribute."*

In terms of visual management guidance, paragraph 415 of the LVMF SPG sets out that "*New development should respect the setting of the Tower of London and should not dominate the World Heritage Site – especially the White Tower. Consideration should be given to advice set out in the Tower of London World Heritage Site Management Plan, published by Historic Royal Palaces (HRP)."*

'London's World Heritage Sites – Guidance on Settings, Supplementary Planning Guidance, 2012,' (LonWHS SPG) provides information on World Heritage properties and their settings; information on the elements that contribute to a property's OUV, so as to ensure these are conserved and enhanced

[19] It should be accompanied by "*an analysis that explains, evaluates and justifies any visual impact on the view. The analysis will demonstrate that the proposal is consistent with the relevant London Plan policies, including 7.10 World Heritage Sites, 7.11 London View Management Framework and 7.12 Implementing London View Management Framework*".
[20] LVMF SPG, Paragraph 183, p. 100.
[21] Now Historic England.
[22] LVMF SPG, Paragraph 184, p. 100.

by developers, policy makers and other stakeholders; and guidance for assessing the effect of potential development on London's World Heritage properties and their settings.[23] The LonWHS SPG does not address the specific setting for each individual World Heritage property, but states that this is more appropriately done through the Steering Groups and Supplementary Committees established for each property.[24] The LonWHS SPG goes on to address Local Development Framework (LDF) preparation where it indicates that LDFs should contain policies to protect, promote, interpret and conserve the historic significance of World Heritage properties and their OUV, integrity and authenticity. They should safeguard, and where appropriate, enhance them and their settings. The LonWHS SPG indicates that, where available, World Heritage Site Management Plans should be used to inform the plan-making process.

Locally, the Tower of London falls within the London Borough of Tower Hamlets and is adjoined by the City of London and the London Borough of Southwark. Each of these local planning authorities has a Local Development Plan, which provides a framework of policies to protect and promote the Tower of London World Heritage property.

Documentation from the Applicant

A Townscape, Built Heritage and Visual Impact Assessment ('TBHVIA') was prepared as part of the planning application submitted to the City of London in October 2020, which formed Volume 2 of the Environmental Statement. This considers the impact of the proposed development upon all heritage receptors which are given a value. In addition to the TBHVIA, at the request of the City of London, a separate and freestanding Heritage Impact Assessment (HIA) was prepared outlining the effect of the proposed development on the OUV of the Tower of London World Heritage property. The HIA considers the impact of the proposed development on important views and concludes that the proposed development does not harm the OUV of the World Heritage property. The HIA also notes that "some commentators may form a different judgement and find that the Proposed Development causes harm to the Outstanding Universal Value" of the property. A Design and Access Statement was also prepared.

A matrix has been used by the Applicant to review the magnitude of effects based on the value of the heritage receptors. The TBHVIA acknowledges that professional judgment is required to determine significant likely effects. When cumulative effects are being considered, the TBHVIA states that the 2011 ICOMOS Guidance does not have a specific section on cumulative effects. However, it states that those effects have been considered. The approach taken by the Applicant has been to focus on additional effects of the development over and above the cumulative baseline. This is an acknowledgment that cumulative effects may be complex in an urban environment. The assessment refers to the 'Tower of London Setting Study, 2010', which concluded that the Tower must remain the dominant building, separated from the City and respected by new developments.

The TBHVIA accepts that the judgment in relation to the Tower of London is a finely balanced one, which considers the separating distance between the World Heritage property and the proposed development, the skyline composition, and the slender appearance of the tallest element. It suggests there is no impact on the silhouette of the Tower of London World Heritage property in strategic views. It states that the proposed pantone blue colour palate will soften the appearance of the building against the skyline and the matt materials will reduce potential glare. It goes on to state that "*if this*

[23] Setting is described in that document as "*the surroundings in which an asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, may affect the ability to appreciate that significance or may be neutral*."

[24] The intention of the LonWHS SPG is to "*ensure a more consistent interpretation of settings and an understanding of their importance in contributing to an appreciation of OUV to help support consistency in decision making to conserve the World Heritage Sites' Outstanding Universal Value, integrity, authenticity and significance*".

judgment is formed then we consider that the harm identified must be 'less than substantial' in the terms of paragraph 196 of the National Planning Policy Framework and, on a sliding scale, at the very bottom of that spectrum. We would invite the decision maker to consider the level of harm against the significant package of public benefits generated by the Proposed Development".

The Applicant indicates that the proposed development would be visible in River Prospect views identified in the LVMF SPG, including view 10A.1, which looks from the north bastion viewing area of Tower Bridge towards the Tower of London. The proposed development would also be visible in Townscape view 25A.1-3 identified in the LVMF SPG (Queen's Walk to Tower of London), which looks to the Tower of London from the south of the river. The Design and Access Statement suggests that the proposed development has been sensitive to these views. The HIA, concerning view 10A.1, states that the "*Proposed Development would have a Negligible magnitude of Impact on the setting of the WHS in this view. This would give rise to a Slight Adverse effect*". In the cumulative view, the finding is the same. It concludes that the proposed development does not harm the significance of the Tower of London World Heritage property.

The Eastern Cluster Zone contains a high density of businesses and jobs and, in the future, this area will contain even more tall and large buildings.[25] A key vision for this area according to the draft City Plan includes increasing the provision of world class buildings, delivering tall buildings that make a positive contribution to the City's skyline, enhancing the public realm to improve pedestrian connectivity, and providing a range of complimentary land uses ensuring active frontages at ground level. The application describes the potential benefits of the development.[26] The Design and Access Statement refers to the surrounding context and suggests that the proposal provides an elegant form in the setting of the Eastern Cluster from strategic views.

On the issue of height, the Design and Access Statement suggests that the team has worked to design a building of appropriate height in its context as part of the eastern cluster but with awareness or sensitivity towards important heritage assets including the World Heritage property. The massing analysis in the Design and Access Statement suggests that the scale and form of the proposed development has been informed first[27] by consideration of the setting of the Tower of London, World Heritage property, particularly as described in the Management Plan (2016), and as seen in River Prospect 10A.1 and Townscape View 25A.1-3 of the LVMF SPG (2012); second, by the shape of the existing and emerging Eastern Cluster in the City of London; and third, the appearance and proportion of the proposed building as a piece of architecture in its own right. It goes on to indicate that the starting point for the proposed massing is driven by three key factors which include maintaining visual separation from the Tower of London silhouette between London Tower and One Bishopsgate Plaza; the shoulder line datum; and the exploration zone of the potential increased height. It is also suggested in the Design and Access Statement that the design takes into account maintenance of visual separation from the Tower of London silhouette by keeping the primary massing of the form to shoulder height and keeping the structure above the shoulder line as a slender element in order to respect the visible sky component around the silhouette.

[25] According to the City of London Local Plan, the majority of new office space will be built in the Eastern Cluster Zone accounting for 50-60% of all projected City office space. Furthermore, within the draft City Plan 2036, the site lies within 'The City Cluster Key Area of Change'.

[26] to include publicly accessible internal amenity space and community space; a new covered pedestrian route reintroducing an historic route in the city and enhancing permeability; a new pocket park; prioritisation of pedestrian and cycle accessibility; provision of small and flexible retail space; activated spaces at street level; creation of high quality office space; provision of flexible affordable workspace to meet local demand; introduction of a high quality tall building as part of the "Eastern City Cluster"; acting as a positive catalyst for investment in London; building on the accessible location to integrate with public transport; delivering a sustainable development; incorporation of innovative technologies reducing carbon emissions; a fossil fuel free building; extensive greening; and new and improved public realm.

[27] Design Access Statement, Part 1, p. 66.

Documents submitted by Consultees and others

Historic Royal Palaces' (HRP) submission as guardians of the Tower of London World Heritage Property asserts that the proposed development would have a damaging visual effect on aspects of the Outstanding Universal Value of the World Heritage property.[28] Their response indicates that while they recognise that the design approach of the applicant sought to cut back at a high level the upper part of the proposed tower in order to maintain some visual separation from the White Tower silhouette protected in the LVMF SPG, view number 10A.1, this approach will allow only a sliver of sky space separating the proposed structure from the Tower of London, and notes that the proposal will not really achieve the desired strength of the silhouette. Also, HRP notes that this view is not static and suggests that with movement the proposed spire loses even that tiny degree of separation.

The submission of HRP acknowledges that the designer has tried to address the concerns about the Tower's dominance, but states that the effect of the proposal would be to compromise the free space around the White Tower. In pre-application discussions, HRP had suggested that "*a different approach might see a lower, broader building that is not so intrusive in the local views and would not extend the eastern shoulder so definitively, providing that it would not rise above the turrets of the White Tower in LVMF view 10A.1*". HRP also cites further damaging visual effects in the dynamic journey across Tower Bridge and in local views identified in the Local Setting Study 2010. Historic Royal Palaces' submission on the applicant's proposal concluded that it would cause harm to the OUV of the Tower of London.

Historic England's submission on the Applicants development proposal indicates that it would cause harm to the OUV of the World Heritage property principally because of "*the visual impact presented by the proposed development in the view from the North Bastion of Tower Bridge (LVMF View 10A.1) which would reduce the ability to appreciate the Tower of London's strategic and dominant position along the river, set apart from the mercantile city*." Historic England asserts that they "*have not seen clear and convincing justification for this harm or evidence that this harm would be outweighed by public benefits*." Thus Historic England's submission recommends *"that a significant reduction in height is explored so the proposals would no longer affect the setting of the World Heritage Site from this viewpoint, avoiding the harm identified.*"

The submission of Historic England considers the tension between the juxta-positioning of the Tower in relation to the river and the city as fortress and gateway and its wider setting including long views, which "*will continue to be threatened by proposals for new development that is inappropriate to the context.*" It is their view that "*such development could limit the ability to perceive the tower as being slightly apart from the City, or have an adverse impact on its skyline.*"

According to Historic England, the proposal would be particularly noticeable in LVMF view 10A.1. It would diminish the visual dominance of the Tower, one of three Strategically-Important Landmarks for London, exceeding the height of its corner turrets. It would erode the appreciation of the Tower of London's strategic siting on the river set apart from the mercantile city by blocking part of the skyline between the eastern cluster and the White Tower. This would harm an attribute of the OUV.

[28] The LVMF SPG for view 10A.1 states that "*The location enables the fine detail and the layers of history of the Tower of London to be readily understood. This understanding and appreciation is enhanced by the free sky space around the white tower. Where it has been compromised its visual dominance has been devalued*." Regarding the background to the Tower, the LVMF SPG notes state "*views from this place include the relationship between the Tower of London and the City in the background. It is important that the background of the landmark in these views is managed sensitively and should not compromise a viewer's ability to appreciate the Outstanding Universal Value of the World Heritage Site*."

Historic England also states that it considers the impact on the cross river views (LVMF views 25A.2-3) from the Queen's Walk at City Hall to be relatively minor in this view. Historic England indicates, however, that the proposed development would also be visible within the Tower of London Inner Ward, and particularly noticeable in the view towards the Grade 1 Listed Chapel Royal of St Peter ad Vincula and would be an intrusion into the self-contained ensemble of historic buildings.

The submission concludes that in relation to tall buildings, policy requires that buildings in the setting of a World Heritage property must preserve and not harm the OUV of the property nor the ability to appreciate it. Historic England is of the view that the proposed development in its current form would harm the integrity of the World Heritage property and that the public benefits of the proposal do not outweigh the harm. In conclusion, Historic England states that the proposed development would give rise to substantial harm to the significance of the World Heritage property and is not in accord with the Management Plan.

ICOMOS' Observations and Conclusions

ICOMOS considers that the most significant challenges lie in managing the environs of the Tower of London World Heritage property so as to protect its OUV and setting. At a strategic level, these challenges are generally recognised and a series of documents form a framework of policies aimed at conserving, protecting and enhancing the OUV of the Tower and its setting. The challenges are also identified in the Management Plan, which defines the local setting of the Tower and key views within and from it.[29] The proposed development is not in accord with the Management Plan. It would harm the integrity of the Tower of London World Heritage property and it would harm the significance of the property.

From the framework of protection for World Heritage in London, it is recognised that proposals that would result in harm to the authenticity and integrity of the Outstanding Universal Value should be wholly exceptional; that less than substantial harm must be justified; and that any harm will be weighed against the substantial public benefits of the proposal. It must also be shown that all reasonable efforts have been made to mitigate the extent of the harm. The public benefits from the proposal would not justify the granting of planning permission when weighed against the harm that would be caused to the setting of the Tower of London World Heritage property. There are, in practice, numerous examples of proposals involving less than substantial harm to the OUV of a World Heritage property having been refused on the basis that the benefits do not justify the harm to a World Heritage property, as a heritage asset of the highest significance.

The application describes the potential benefits of the development and asserts that the development would cause "*Negligible magnitude of impact on the setting of the WHS* […] *This would give rise to a Slight Adverse effect*". The arguments put forward on behalf of the Applicant admit that there will be some change to the setting of the World Heritage property. However, they appear to consider the proposed development as a way of improving the setting and to weigh this potential impact more highly as a positive contribution. This approach is not balanced in terms of the consideration that is given to the proposed development's potential negative impact on the OUV of the Tower of London World Heritage property and its supporting attributes. The NPPF highlights "*the surroundings in which a heritage asset is experienced"* and indicate that *"its extent is not fixed and may change as the asset and its surroundings evolve*."

[29] The Management Plan states that "Objectives in the Management Plan to address the challenges are being implemented (for example, through a local setting study that informed understanding of the immediate setting of the property, and through work on the property's attributes), although pressures remain significant, particularly in the wider setting".

The Applicant suggests that there is no clarity in submissions received from consultees about which attributes are harmed by the proposal. Regarding the interaction of the property with the Eastern Cluster, it suggests that "*the management guidance in LVMF 10A.1 does not identify the White Tower's silhouette as a geometrically protected threshold; it is simply a point of sensitivity to test and assess*". Finally, it states that the proposed development will "make it clearly part of the composition of the Eastern Cluster" whilst helping "*to mediate between the very tall recently consented" schemes and the Tower*". It relies on an interpretation of View 10A as being static and geometrically defined. This interpretation is not correct, and the LVMF SPG and associated guidance was never intended to exclude further important ways of appreciating the attributes which support OUV from being referenced. The LVMF SPG, written over a decade ago, is a tool, but the views experienced are not finite and they do not exclude other ways of experiencing the OUV from being protected. The proposed development will narrow the gap between the Eastern Cluster and the Tower and will reduce the separation of the Tower from the City. It has been acknowledged in the Management Plan and elsewhere that the OUV of the Tower of London World Heritage property has been compromised, but it cannot be argued that other structures impacting on OUV mean that the impact of a new proposal impacting negatively is to be tolerated.

Both Historic England and Historic Royal Palaces in pre-application discussions advocated for caution in relation to the potential impact of development on the attributes of the World Heritage property. This advice was not adopted. Similarly, neither the pragmatic proposal of Historic England for height reduction, nor that of HRP for a wider lower building, were taken up. While it is clear that attempts have been made on behalf of the Applicant to consider the visual separation of the White Tower, in terms of adjustment of the massing, form and materials, this Technical Review does not find that separation of the White Tower has been successfully achieved. The "*clear backdrop silhouette to the Tower from the south-west*" will be breached by the proposed development and there will be an impact on "*the clear view of the sky in the backdrop to White Tower* [which] *is an important attribute*". When that same protected view is considered from a kinetic perspective, the work to maintain a separateness from the Tower is completely unsuccessful. It is considered that the harm to the setting of the Tower of London World Heritage property should be given very considerable weight against the proposal.

The degree of separation of the Eastern Cluster to the Tower is compromised as the proposed development would mark a further extension of the city eastwards, reducing the visual separation between the City and the Tower of London World Heritage property. The prominence of the proposed development would draw increased attention towards the City cluster. This would distract from the prominence of the Tower and would affect the sense of intended enclosure at the concentric defences which culminate in the White Tower. It would also impact negatively on the property's attributes, namely the physical prominence of the White Tower, its strategic and landmark setting, and its iconic monumental status.

The cumulative effect of existing buildings, planning proposals that are pending and proposals that have received consent but are not yet built is already severe, and the proposed development would cause harm to the setting of the Tower of London World Heritage property, contrary to the Visual Management Guidance in the LVMF. ICOMOS in its March 2019 Technical Review of an earlier application for a tall structure at land adjacent to Bury Street[30] stated that *"the cumulative effect of new developments, in relation to the possible negative visual impact on the integrity of the property in question, should not be diminished. The integrity of the World Heritage property the Tower of London has already reached its limit in terms of visual impact, and it is clear from the visual project documentation that there is no room for additional challenges to it. Neither is it an acceptable*

[30] City of London ref: 18/01213/FULEIA

approach to allow further negative visual impact on the property's integrity when it is already threatened." This argument is maintained.

ICOMOS advises that the State Party consider:

- utilising the findings of the earlier Reactive Monitoring missions and the ICOMOS Technical Reviews of March 2019 and July 2020 concerning proposed development in the setting of the World Heritage property;
- appreciating that where change occurs to setting it needs to be considered in a manner that relates it more directly to the supporting attributes of the property;
- reviewing the proposed project and recommending adjustments such as height reduction that would ensure it does not impact on the Outstanding Universal Value or on any of its supporting attributes, all of which are equally important;
- availing of additional more recent technologies and tools to understand three dimensionally and kinetically the potential impact of proposed changes on the Outstanding Universal Value of the property and its setting and the attributes which support it.

ICOMOS remains at the disposal of the State Party for further clarification on the above or assistance as required.

ICOMOS, Charenton le Pont

London
EC2P 2EJ

Dear Sir/Madam

DECISION

Town and Country Planning Act 1990 (as amended)

Request for Observations to Adjoining Borough - No objection

Address:
1-4
31-34 Bury Street
London
EC3A 5AR (for 24/00021/FULEIA) and
Holland House
1 - 4
32 Bury Street
London
EC3A 5AW (for 24/00011/LBC)

Proposals:

24/00021/FULEIA: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

24/00011/LBC: Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell,

reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works.

Drawing Nos: City of London Cover Letter Dated 14th March 2024.

The Council, as a neighbouring planning authority, has considered your request for observations on the application referred to above and hereby raises no objection.

Informative(s):

1 Reason for raising no objection:

The proposal includes the demolition subsequent redevelopment of the whole site as outlined in the description of development. The application for planning permission is an EIA application.

The application site is a significant distance from the London Borough of Camden boundary. The development would have no material impacts on the significance of any protected views, on the amenity of any Camden occupiers or visitors, or on transport, environmental, or ecological conditions. The London Borough of Camden therefore raises no objections to the application.

Yours faithfully

Daniel Pope
Chief Planning Officer

APPLICATION COMMENT FORM

From: Ella Brown, Environmental Resilience Officer

Application No: 24/00021/FULEIA

Development Management Case Officer: Anna Tastsoglou

Site Address: Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

Proposal: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

Application Received: 8th January 2024

Request for Comment Received: 14th March 2024, updated CCRSS received on 22nd August 2024

Comment:

Application submission documents relating to climate change resilience and adaptation have been reviewed, including:

- Climate Change Resilience Sustainability Statement (Hoare Lea, August 2024)
- Sustainability Statement (Hoare Lea, October 23)
- Design and Access Statement (Stiff+Trevillion, January 2024)
- Flood Risk Assessment and Drainage Strategy (Thorton Tomasetti, January 2024)
- Outdoor Thermal Comfort Assessment (GIA Chartered Surveyors, October 2023)
- Preliminary Ecological Appraisal and Biodiversity Net Gain Report (Hilson Moran, September 2023)
- Health Impact Assessment (Quod, January 2024)

Overheating and the urban heat island effect

Section 8.3 within the CCRSS covers the risk of heat stress and assesses the following hazards:

- Increase in temperature may result in a risk of overheating and reduction in building user health and comfort levels within their internal environment (High Risk)
- Increased in temperature may result in reduction in building user comfort within the external environment (Moderate Risk)
- Increased temperatures will have a direct impact of the urban heat island effect (Moderate Risk)

Date & Initials

- High levels of sun exposure may cause UV damage to building fabric and reduction in material durability and robustness (Moderate Risk)
- Increased risk of dust and damage results in increased repairs and maintenance (Moderate Risk)
- Building degrading, subsidence and reduced robustness due to dry and hot conditions (Moderate / Low Risk)
- Increased risk of damage to building materials (Moderate Risk)

To manage the above risks, the CCRSS states that the following design features and techniques will be included:

- Mechanical ventilation installed with heat recovery mechanisms and plant located away from pollution sources
- Facade and building services have been designed with a fan coil cooling solution
- Dynamic thermal modelling using TM49 DSYs has been conducted to demonstrate the Proposed Development is not at risk of overheating against the criteria of CIBSE TM52 and justify the inclusion of active cooling
- An external (outdoor) thermal comfort assessment has been completed (using high resolution Computational Fluid Dynamics - CFD) to evaluate external thermal comfort conditions based on the design proposals. The assessment concluded that:
    - All ground level conditions were suitable for intended use, or no worse than the baseline conditions.
    - The Proposed Development is having a beneficial impact on existing benches to the north of 30 St Mary's Axe.
    - Conditions for all existing off-site terraces are suitable for the intended use.
    - Conditions for all proposed terraces are suitable for the intended use
- Air source heat pumps will be located at roof level, minimising the amount of heat being rejected to the external environment at low level, where heat absorbing surfaces are present
- Building maintenance strategy will be implemented to check and treat materials for UV damage
- Materials on exposed areas will be designed and installed to weather effectively
- Structural foundations and frame have been designed to accommodate a range of soil stiffness values

All heat stress hazards residual risks have been assessed as Low.

Flooding

Section 8.1 of the CCRSS includes the risk assessment for flooding and includes the following hazards:

- Rising sea levels could increase the risk of flooding to the building and the surrounding area (High risk)

- Increased duration of prolonged rainfall could cause an increased risk of surface water flooding (Very High risk)
- Increased risk of flooding causing significant damage to the development and requirements for weather proofing (Moderate risk)

The CCRSS states that the proposed development is in Flood Zone 1 and has been assessed to be at low risk of flooding from all sources. The proposed drainage system will be sized to attenuate storms up to the 1 in 100 year event plus a 40% allowance for climate change, comprising a blue roof and two attenuation tanks. Flows will be restricted to 5 l/s, which provides an 83% reduction on the equivalent brownfield rate during the 2 year storm event. Based on the above, the CCRSS assesses the residual risk for flooding to the proposed development to be Moderate/low.

Water stress

Section 8.2 of the CCRSS includes the risk assessment for water stress and includes the following hazards:

- Increased risk of drought (Moderate risk)
- Increased duration of prolonged rainfall could cause impacts on structural stability within the building (Moderate risk)
- Risk of material degradation due to extended exposure of building materials to increased moisture levels (Moderate/ low risk)
- Increased risk of extended duration of water stress and high water costs (Moderate risk)

In terms of risk management, the CCRSS states that the following design features and techniques will be incorporated to adapt and mitigate for the above risks:

- Project will prioritise native, locally sourced plants for the public realm landscape strategy
- Landscape strategy supported by ecologists and landscape architect's recommendations such as appropriate species which are resilient to periods of water scarcity
- Roof drainage will be used for irrigation of green walls and roofing
- SuDS in the form of blue roofs and tanks will attenuate rainfall
- Site is not at risk from groundwater flooding
- Lowest level basement slab will be designed for Grade 3 waterproofing which will protect against future risk
- Internal linings proposed in retained basements
- Efficient water fittings installed to reduce water consumption

All water stress hazards' residual risks have been assessed as Low.

The FRA & DS states that "*roofwater recycling has been discounted on the basis that the roof area is small compared to the number of potential users and disproportionate investment required to distribute a small water resource over a large number of occupants.*"

Biodiversity and pests and diseases

APPLICATION COMMENT FORM

Section 8.4 of the CCRSS assesses the risk to natural capital and includes the following hazard:

- Risk of loss of biodiversity and high quality green space (Moderate Risk)

The CCRSS states this risk will be managed through:

- Introducing increased vegetation on site, in green roofing, terrace planting and public realm planting
- Habitat infrastructure such as bird and insect boxes to be installed
- Project will prioritise native, locally sourced plants for the landscape strategy

The CCRSS classes the residual risk as Low.

Section 8.5 of the CCRSS assesses the risk of pests and diseases and assesses the following hazards:

- Increased temperatures mean new warm-climate pests migrate to the UK and spread new diseases to humans (Moderate Risk)
- Increased temperatures mean new warm-climate pests migrate to the UK and spread new diseases to plants (Moderate Risk)

The CCRSS states this risk will be managed through:

- Implementation of a pest management plan or implementation of an accredited Pest Management program
- Regular monitoring and maintenance of ventilation systems
- Consideration of new warm-climate pests will be factored into final species selection for planting

The CCRSS assesses the residual risk to be Moderate /Low.

A Preliminary Ecological Appraisal (PEA) has been produced by Bowes & Wyer. The survey deemed the site to be of low ecological value with limited opportunities to support nesting birds. The proposed development incorporates multiple biodiversity enhancements measures which will result in an Urban Greening Factor (UGF) exceeding 0.3. Ecological enhancements will be delivered through the inclusion of green roof habitats, terraced landscaping, a green wall and planting at the public realm level. Habitat infrastructure such as bird and insect boxes will also be installed.

A Health Impact Assessment was prepared by Quod which found the proposed development has a positive impact on health through:

- New jobs associated with the uplift in office floorspace and affordable co-working space supporting access to local employment;
- Provision of flexible community/education/cultural space meeting an identified need in the area;
- 'City Cycles' – a new social enterprise in the retail space on site supporting unemployment adults into employment through training and work experience of bike mechanics, as well as meeting a need for bike servicing in the area;

APPLICATION COMMENT FORM	
• A car-free building minimising vehicles travelling to the Site alongside extensive provision of bike parking to support active travel (and improved pedestrian permeability, as set out above); • Provision of new open space at James' Court and external building terraces providing much needed amenity provision; • Heneage Arcade providing a new north-south through route improving connectivity and permeability, as well as enhancing the attractiveness of the physical environment; • Inclusivity and accessibility as placemaking principles; • Building and landscape design considering sustainability and climate change, with ASHPs and a 'fabric first' approach significantly reducing the carbon footprint, and extensive urban greening measuring enhancing biodiversity; • The building and landscape design also provides an enhanced environment for workers and site users (along with the wider public) through high quality design aspiring towards • BREEAM 'Outstanding' and WELL 'Platinum' rating, an attractive public realm, greening measures and supporting active travel measures Food, trade and infrastructure The Sustainability Statement writes that the project aims to deliver a 'WELL' certified building thereby incorporating industry best practice on health and wellbeing. Measures encouraging physical exercise such as the provision of cycle spaces will incentivise active commuting. The positive health impacts taken from the Quod Health Impact Assessment can also be applied to positive improvements to trade and infrastructure. Recommendation: The proposed development is compliant with Local Plan Policy DM 15.5 (Climate change resilience), Draft City Plan 2040 Strategic Policy S15 (Climate Resilience and Flood Risk) and associated City Plan 2040 Policies CR1 and CR2. Subject Bury House 1-4 31-34 Bury Street London EC3A 5AR

In response to your request for comments in relation to SUDS/drainage the Lead Local Flood Authority has the following comments to make:

The Lead Local Flood Authority has reviewed submitted information for the above application and would recommend the following conditions should the application be approved:

Before any construction works hereby permitted are begun the following details shall be submitted to and approved in writing by the Local Planning Authority in conjunction with the Lead Local Flood Authority and all development pursuant to this permission shall be carried out in accordance with the approved details:
(a) Fully detailed design and layout drawings for the proposed SuDS components including but not limited to: attenuation systems, rainwater pipework, flow control devices, design for system exceedance, design for ongoing maintenance; surface water flow rates shall be restricted to no greater than 5 l/s. Provision should be made for an attenuation volume capacity capable of achieving this, which should be no less than 123 m^3;
(b) Full details of measures to be taken to prevent flooding (of the site or caused by the site) during the course of the construction works.
(c) Evidence that Thames Water have been consulted and consider the proposed discharge rate to be satisfactory.

Before the shell and core is complete the following details shall be submitted to and approved in writing by the Local Planning Authority in conjunction with the Lead Local Flood Authority and all development pursuant to this permission shall be carried out in accordance with the approved details:
(a) A Lifetime Maintenance Plan for the SuDS system to include:
- A full description of how the system would work, it's aims and objectives and the flow control arrangements;
- A Maintenance Inspection Checklist/Log;

- A Maintenance Schedule of Work itemising the tasks to be undertaken, such as the frequency required and the costs incurred to maintain the system.

REASON: To improve sustainability, reduce flood risk and reduce water runoff rates in accordance with the following policy of the Local Plan: DM18.1, DM18.2 and DM18.3.

Subject: RE: Consultation in relation to Accessible Dwellings (24/00021/FULEIA)
Date: 08 October 2024 12:24:52

Anna,

The legislation is such that Planning policy sets the number of each type of accessible dwelling and Building Regulations enforces the standard.

In this regard, I do not believe you need to do more than set the requirement.

If you do wish advice on accessibility matters I would suggest you contact Harriet as this is her role.

Mark

Date 09 October 2024
Our Ref 24
Your Ref 24/00021/FULEIA

Subject Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works. RE-CONSULTATION due to the submission of additional information and revised drawings

Thank you for your memorandum. I have reviewed the application and I recommend that the following conditions be attached to any consent :

No servicing of the premises shall be carried out between the hours of 23:00 on one day and 07:00 on the following day from Monday to Saturday and between 23:00 on Saturday and 07:00 on the following Monday and on Bank Holidays. Servicing includes the loading and unloading of goods from vehicles and putting rubbish outside the building.

REASON: To avoid obstruction of the surrounding streets and to safeguard the amenity of the occupiers of adjacent premises, in accordance with the following policies of the Local Plan: DM15.7, DM16.2, DM21.3.

The office terraces hereby permitted shall not be used or accessed between the hours of 23:00 on one day and 07:00 on the following day and not at any time on Sundays or Bank Holidays, other than in the case of emergency. The public terraces hereby permitted shall not be used or accessed between the hours of 23:00 on one day and 07:00 on the following day

REASON: To safeguard the amenity of the adjoining premises and the area generally in accordance with the following policies of the Local Plan: DM15.7, DM21.3.

No amplified or other music shall be played on the roof terraces.

REASON: To safeguard the amenity of the adjoining premises and the area generally in accordance with the following policies of the Local Plan: DM15.7, DM21.3.

There shall be no demolition on the site until a scheme for protecting nearby residents and commercial occupiers from noise, dust and other environmental effects has been submitted to and approved in writing by the Local Planning Authority. The scheme shall be based on the Department of Markets and Consumer Protection's Code of Practice for Deconstruction and Construction Sites and arrangements for liaison and monitoring (including any agreed monitoring contribution) set out therein. A staged scheme of protective works may be submitted in respect of individual stages of the demolition process but no works in any individual stage shall be commenced until the related scheme of protective works has been submitted to and approved in writing by the Local Planning Authority. The demolition shall not be carried out other than in accordance with the approved scheme (including payment of any agreed monitoring contribution).

REASON: In the interests of public safety and to ensure a minimal effect on the amenities of neighbouring premises and the transport network in accordance with the following policies of the Local Plan: DM15.6, DM15.7, DM21.3. These details are required prior to demolition in order that the impact on amenities is minimised from the time that development starts.

There shall be no construction on the site until a scheme for protecting nearby residents and commercial occupiers from noise, dust and other environmental effects during construction has been submitted to and approved in writing by the Local Planning Authority. The scheme shall be based on the Department of Markets and Consumer

Protection's Code of Practice for Deconstruction and Construction Sites and arrangements for liaison and monitoring (including any agreed monitoring contribution) set out therein. A staged scheme of protective works may be submitted in respect of individual stages of the construction process but no works in any individual stage shall be commenced until the related scheme of protective works has been submitted to and approved in writing by the Local Planning Authority. The development shall not be carried out other than in accordance with the approved scheme (including payment of any agreed monitoring contribution).

REASON: In the interests of public safety and to ensure a minimal effect on the amenities of neighbouring premises and the transport network in accordance with the following policies of the Local Plan: DM15.6, DM15.7, DM21.3. These details are required prior to construction in order that the impact on amenities is minimised from the time that the construction starts.

Prior to the commencement of development the developer/construction contractor shall sign up to the Non-Road Mobile Machinery Register. The development shall be carried out in accordance with the NRMM Regulations and the inventory of all NRMM used on site shall be maintained and provided to the Local Planning Authority upon request to demonstrate compliance with the regulations.

REASON: To reduce the emissions of construction and demolition in accordance with the Mayor of London Control of Dust and Emissions during Construction and Demolition SPG July 2014. Compliance is required to be prior to commencement due to the potential impact at the beginning of the construction.

Throughout the duration of the demolition and construction works the site shall be fitted with live noise, dust and vibration monitoring equipment. The numbers and locations of monitoring equipment shall be agreed with the City of London Pollution Control Team prior to installation. The City of London Pollution Control Team shall be provided with live access to all monitoring data throughout the works.

REASON: To safeguard the amenity of the adjoining premises and the area generally in accordance with the following policies of the Local Plan: DM15.7, DM21.3.

Before any works thereby affected are begun, a scheme in the form of an acoustic report compiled by a qualified specialist shall be submitted to and approved in writing by the Local Planning Authority specifying the materials and constructional methods to be used to demonstrate that noise levels from the proposed Rehearsal & event space/Sports facilities area shall not exceed the existing background level (lowest $L_{A90(15min)}$) at 1m from the nearest noise sensitive receptor. The development pursuant to this permission shall be carried out in accordance with the approved scheme and so maintained thereafter.

REASON: To safeguard the amenity of the adjoining premises and the area generally in accordance with the following policies of the Local Plan: DM15.7, DM21.3.

The proposed office development sharing a party element with non-office premises shall be designed and constructed to provide resistance to the transmission of sound. The sound insulation shall be sufficient to ensure that NR40 is not exceeded in the proposed office premises due to noise from the neighbouring non-office premises and shall be permanently maintained thereafter.

A test shall be carried out after completion but prior to occupation to show the criterion above has been met and the results shall be submitted to and approved in writing by the Local Planning Authority.

REASON: To protect the amenities of occupiers of the building in accordance with the following policy of the Local Plan: DM15.7.

Before any works thereby affected are begun, a scheme shall be submitted to and approved in writing by the Local Planning Authority which specifies the fume extract arrangements, materials and construction methods to be used to avoid noise and/or odour penetration to the upper floors from the proposed café use. Flues must terminate at roof level or an agreed high level location which will not give rise to nuisance to other occupiers of the building or adjacent buildings. The details approved must be implemented before the commercial kitchen use takes place.

REASON: In order to protect residential/commercial amenities in the building in accordance with the following policies of the Local Plan: DM15.6, DM15.7, DM21.3.

(a) The level of noise emitted from any new plant shall be lower than the existing background level by at least 10 dBA. Noise levels shall be determined at one metre from the window of the most affected noise sensitive premises. The background noise level shall be expressed as the lowest LA90 (10 minutes) during which plant is or may be in operation. Noise sensitive premises includes office accommodation.

(b) Following installation but before the new plant comes into operation measurements of noise from the new plant must be taken and a report demonstrating that the plant as installed meets the design requirements shall be submitted to and approved in writing by the Local Planning Authority. Noise levels should be measured adjacent to the plant where possible and the levels at the receptor extrapolated from the measured data.

(c) All constituent parts of the new plant shall be maintained and replaced in whole or in part as often is required to ensure compliance with the noise levels approved by the Local Planning Authority.

Reason: To protect the amenities of neighbouring residential/commercial occupiers in accordance with the following policies of the Local Plan: DM15.7, DM21.3.

Before any mechanical plant is used on the premises it shall be mounted in a way which will minimise transmission of structure borne sound or vibration to any other part of the building in accordance with a scheme to be submitted to and approved in writing by the Local Planning Authority.

REASON: In order to protect the amenities of commercial occupiers in the building in accordance following policy of the Local Plan: DM15.7.

Before any piling or construction of basements is commenced a scheme for the provision of sewer vents within the building shall be submitted to and approved in writing by the local planning authority. Unless otherwise agreed in writing by the local planning authority the agreed scheme for the provision of sewer vents shall be implemented and brought into operation before the development is occupied and shall be so maintained for the life of the building.

REASON: To vent sewerage odour from (or substantially from) the development hereby permitted and mitigate any adverse air pollution or environmental conditions in order to protect the amenity of the area in accordance with the following policy of the Local Plan: DM10.1. These details are required prior to piling or construction work commencing in order that any changes to satisfy this condition are incorporated into the development before the design is too advanced to make changes.

No work except demolition to basement slab level shall take place until an investigation and risk assessment has been undertaken to establish if the site is contaminated and to determine the potential for pollution in accordance with the requirements of DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11'.

Where remediation is necessary a detailed remediation scheme to bring the site to a condition suitable for the intended use by removing unacceptable risks to human health, buildings and other property and to the natural and historical environment must be submitted to and approved in writing by the Local Planning Authority. Unless otherwise agreed in writing by the Local Planning Authority the remediation scheme must ensure that the site will not qualify as contaminated land under Part 2A of the Environmental Protection Act 1990 in relation to the intended use of the land after remediation.

Following completion of measures identified in the approved remediation scheme a verification report must be submitted to and approved in writing of the Local Planning Authority.

REASON: To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with the Local Plan DM15.8. These details are required prior to commencement in order that any changes to satisfy this condition are incorporated into the development before the design is too advanced to make changes.

Within five working days of any site contamination being found when carrying out the development hereby approved the contamination must be reported in writing to the Local Planning Authority and an investigation and risk assessment must be undertaken in accordance with the requirements of DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11'.

Where remediation is necessary a detailed remediation scheme to bring the site to a condition suitable for the intended use must be submitted to and approved in writing by the Local Planning Authority. Unless otherwise agreed in writing by the Local Planning Authority the remediation scheme must ensure that the site will not qualify as contaminated land under Part 2A of the Environmental Protection Act 1990 in relation to the intended use of the land after remediation.

Following completion of measures identified in the approved remediation scheme a verification report must be submitted to and approved in writing of the Local Planning Authority.

REASON To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with the Local Plan DM15.8. These details are required prior to commencement in order that any changes to satisfy this condition are incorporated into the development before the design is too advanced to make changes.

Dear Sir/Madam,

We have now assessed the above application against safeguarding criteria and can confirm that we have no safeguarding objections to the proposed development.

However, we would like to draw your attention to the following:

CAA Crane Notification
where a crane is 100m or higher, crane operators are advised to notify the CAA (aerops@caa.co.uk) and Defence Geographic Centre (dvof@mod.gov.uk) via Crane notification | Civil Aviation Authority (caa.co.uk)
https://www.caa.co.uk/Commercial-industry/Airspace/Event-and-obstacle-notification/Crane-notification/

The following details should be provided before the crane is erected:

- the crane's precise location
- an accurate maximum height
- start and completion dates

Good Afternoon,

Thank you for your e-mail.

Please can you clarify what the main changes are to the above planning application. I do not see any new relevant documents regarding Thames Water assets and Clean Water capacity.

If there are no new changes to the SQM figures for the site, we have no further comments to make and our previous response still stands.

Kind Regards,

Site Address: BURY HOUSE, 31 BURY STREET, LONDON, EC3A 5AR

Proposal: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

Standing Advice

Dear Sir/Madam,

Thank you for your email.

In relation to the above planning consultation and given the role of Transport for London (TfL) in promoting and supporting active travel through the planning process, Active Travel England (ATE) will not be providing detailed comments on development proposals in Greater London at the current time. However, ATE and TfL have jointly produced a standing advice note, which recommends that TfL is consulted on this application where this has not already occurred via a Stage 1 referral to the Mayor of London. Our standing advice can be found here: https://www.gov.uk/government/publications/active-travel-england-sustainable-development-advice-notes

In response to your request for comments in relation to the application the District Surveyors Office has the following comments to make:

I have reviewed the submitted fire statement and have no comments.

I consider that policies D5 and D12 have been met.

LPA Ref: 24/00021/FULEIA

London City Airport Ref: 2024/LCY/230

Date: 15/10/2024

Dear Anna Tastsoglou,

Thank you for consulting London City Airport. This proposal has been assessed from an aerodrome safeguarding perspective. Accordingly, it was found **to have the potential to conflict** with London City Airport's safeguarding criteria. If the local planning authority is of a mind to approve this application, then London City Airport suggests the following condition contained in this letter is applied to any future approval.

LPA Reference	24/00021/FULEIA
Proposal	Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.
Location	Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR
Borough	City of London
Case Officer	Anna Tastsoglou

London City Airport's response must change to an objection unless this condition is applied to this planning permission.

Building Obstacle Lighting Condition

Details of obstacle lights shall be submitted to and approved in writing by the Local Planning Authority. The obstacle lights must be in accordance with the requirements of regulation CS ADR-DSN Chapter Q 'Visual Aids for Denoting Obstacles' and will be installed and illuminated prior to the decommissioning of any temporary obstacle lighting associated with the construction of the development.

Reason: Aviation obstacle lights are required on the development to avoid endangering the safe movement of aircraft and the operation of London City Airport.

We would also like to make the following observations:

CAA Building Notification

If any part of the development exceeds 91.4m AGL, upon grant of permission, City of London are required to notify the Civil Aviation Authority (CAA) as required under Annex 2 paras 30 – 32 of DfT/ODPM Circular 01/2003 'Safeguarding of Aerodromes & Military Explosives Storage Areas'.

CAA Crane Notification

Where a crane is 100m or higher, crane operators are advised to notify the CAA (arops@caa.co.uk) and Defence Geographic Centre (dvof@mod.gov.uk). Crane notification | Civil Aviation Authority (caa.co.uk)

The following details should be provided before the crane is erected:

- the crane's precise location
- an accurate maximum height
- start and completion dates

This response represents the view of London City Airport Ltd as of the date of this letter and applies solely to the above stated application. This letter does not provide any indication of the position of any other party, whether they are an airport, airspace user or otherwise. It remains your responsibility to ensure that all the appropriate consultees are properly consulted.

If any changes are proposed to the information supplied to London City Airport in regard to this application which become the basis of a revised, amended or further application for approval, then as a statutory consultee London City Airport Ltd requires that it be further consulted on any such changes prior to any planning permission, or any consent being granted.

It is important that any conditions requested in this response are applied to a planning approval. Where a Planning Authority proposes to grant permission against the advice of London City Airport or not to attach conditions which London City Airport has advised, it shall notify London City Airport and the Civil Aviation Authority as specified in the Town & Country Planning (Safeguarded Aerodromes, Technical Sites and Military Explosive Storage Areas) Direction 2002.

Kind regards,

Lucy Dale
On behalf of London City Airport

From Paul Bentley
Air Quality Officer
Telephone [redacted]
Email [redacted]

Date: 16/10/24
Your Ref: 24/00021/FULEIA

Subject: Bury House, 1 - 4, 31 - 34 Bury Street London EC3A 5AR

Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/cafe (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

The proposed development will be car free and heating/cooling will be through air source heat pumps which is welcomed. The development meets both the transport and building emissions benchmarks for the Air Quality Neutral Assessment.

Secondary power is proposed to be supplied by a second mains connection, and it has been confirmed there is to be no backup generator installed.

Particulate filtration has been proposed as part of the full mechanical ventilation strategy. Due to the majority of predicted NO_2 annual mean concentrations being within 10% of the annual mean objective, and the uncertainty value of the modelling being >10% NO_x filtration will also be required.

Should the development be approved please attach the following conditions:

Generators
There shall be no installation of diesel generators to the building hereby approved.

Reason
In accordance with the following policy of the Local Plan: DM15.6 and to maintain local air quality and ensure that exhaust does not contribute to local air pollution, particularly nitrogen dioxide and particulates PM10, in accordance with the City of London Air Quality Strategy 2019 and the London Plan Policies SI1 and SD4 D.

Filtration
Prior to occupation evidence that an appropriate NO_x and Particulate filtration system has been installed as part of the ventilation strategy, and a detailed mechanism to secure maintenance of this system should be submitted and approved in writing.

Reason
To ensure that future occupants of the proposed development are not subject to elevated levels of air pollution that have been predicted in the local ambient atmosphere.

Condition M32 NRMM
Prior to the commencement of the development, the developer/ construction contractor shall sign up to the Non-Road Mobile Machinery Register. The development shall be carried out in accordance with the Mayor of London Control of Dust and Emissions during Construction and Demolition SPG July 2014 (Or any subsequent iterations) to ensure appropriate plant is used and that the emissions standards detailed in the SPG are met. An inventory of all NRMM used on site shall be maintained and provided to the Local Planning Authority upon request to demonstrate compliance with the regulations.

Reason
To reduce the emissions of construction and demolition in accordance with the Mayor of London Control of Dust and Emissions during Construction and Demolition SPG July 2014 (or any updates thereof), Local Plan Policy DM15.6 and London Plan Policy SI1D. Compliance is required to be prior to commencement due to the potential impact at the beginning of the construction.

Standing Advice

Dear Sir/Madam,

Thank you for your email.

In relation to the above planning consultation and given the role of Transport for London (TfL) in promoting and supporting active travel through the planning process, Active Travel England (ATE) will not be providing detailed comments on development proposals in Greater London at the current time. However, ATE and TfL have jointly produced a standing advice note, which recommends that TfL is consulted on this application where this has not already occurred via a Stage 1 referral to the Mayor of London. Our standing advice can be found here: https://www.gov.uk/government/publications/active-travel-england-sustainable-development-advice-notes

Dear Sir/Madam,

We have now assessed the above application against safeguarding criteria and can confirm that we have no safeguarding objections to the proposed development.

However, we would like to draw your attention to the following:

CAA Building Notification
As the proposed development exceeds 91.4m AGL, upon grant of permission, City of London are required to notify the Civil Aviation Authority (CAA) as required under Annex 2 paras 30 – 32 of DIT/ODPM Circular 01/2003 'Safeguarding of Aerodromes & Military Explosives Storage Areas'.

CAA Crane Notification
where a crane is 100m or higher, crane operators are advised to notify the CAA (aerops@caa.co.uk) and Defence Geographic Centre (dvof@mod.gov.uk) via Crane notification | Civil Aviation Authority (caa.co.uk)
https://www.caa.co.uk/Commercial-industry/Airspace/Event-and-obstacle-notification/Crane-notification/

The following details should be provided before the crane is erected:

- the crane's precise location
- an accurate maximum height
- start and completion dates

Please send, by email, all planning application consultations that are captured by the SoS Crossrail Safeguarding Direction to CRL_Safeguarding@tfl.gov.uk
……

The Elizabeth line (Crossrail) is a new railway that links Heathrow, Maidenhead and Reading in the west to Shenfield and Abbey Wood in the east, using existing Network Rail tracks and new stations and tunnels under Central London.

Transport for London (TfL) administers the Crossrail Safeguarding Direction made by the Secretary of State for Transport on 24 January 2008. The Direction was extended on 29 April 2009 (Maidenhead to Reading) and 14 October 2009 (Abbey Wood to Gravesend and Hoo Junction).

LPA Ref: 24/00021/FULEIA

London City Airport Ref: 2024/LCY/250

Date: 01/11/24

Dear Anna Tastsoglou,

Thank you for consulting London City Airport. This proposal has been assessed from an aerodrome safeguarding perspective. Accordingly, it was found to have the potential to conflict with London City Airport's safeguarding criteria. If the local planning authority is of a mind to approve this application, then London City Airport suggests the following condition contained in this letter is applied to any future approval.

LPA Reference	24/00021/FULEIA
Proposal	Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works. RE-CONSULTATION due to the submission of additional information and revised drawings
Location	1-4, 31-34 Bury Street, London, EC3A 5AR
Borough	City of London

Case Officer	Anna Tastsoglou

London City Airport's response must change to an objection unless this condition is applied to this planning permission.

Building Obstacle Lighting Condition

Details of obstacle lights shall be submitted to and approved in writing by the Local Planning Authority. The obstacle lights must be in accordance with the requirements of regulation CS ADR-DSN Chapter Q 'Visual Aids for Denoting Obstacles' and will be installed and illuminated prior to the decommissioning of any temporary obstacle lighting associated with the construction of the development.

Reason: Aviation obstacle lights are required on the development to avoid endangering the safe movement of aircraft and the operation of London City Airport.

We would also like to make the following observations:

CAA Building Notification

If any part of the development exceeds 91.4m AGL, upon grant of permission, City of London are required to notify the Civil Aviation Authority (CAA) as required under Annex 2 paras 30 – 32 of DfT/ODPM Circular 01/2003 'Safeguarding of Aerodromes & Military Explosives Storage Areas'.

CAA Crane Notification

Where a crane is 100m or higher, crane operators are advised to notify the CAA (arops@caa.co.uk) and Defence Geographic Centre (dvof@mod.gov.uk). Crane notification | Civil Aviation Authority (caa.co.uk)

The following details should be provided before the crane is erected:

- the crane's precise location
- an accurate maximum height
- start and completion dates

This response represents the view of London City Airport Ltd as of the date of this letter and applies solely to the above stated application. This letter does not provide any indication of the position of any other party, whether they are an airport, airspace user or otherwise. It remains your responsibility to ensure that all the appropriate consultees are properly consulted.

If any changes are proposed to the information supplied to London City Airport in regard to this application which become the basis of a revised, amended or further application for approval, then as a statutory consultee London City Airport Ltd requires that it be further consulted on any such changes prior to any planning permission, or any consent being granted.

If you need guidance, templates, documents or have any queries please contact safeguarding@londoncityairport.com

Kind regards,

Simon Vince
On behalf of London City Airport

THIS IS AN EXTERNAL EMAIL

Dear Ms. Tastsoglou,

Our ref: **492545**
Your ref: **24/00021/FULEIA**

Thank you for your consultation.

Natural England has previously commented on this proposal and made comments to the authority in our response dated **08 May 2024**, our reference number **470087** (attached).

The advice provided in our previous response applies equally to this **amendment.** The proposed amendments to the original application are unlikely to have significantly different impacts on the natural environment than the original proposal.

Should the proposal be amended in a way which **significantly** affects its impact on the natural environment then, in accordance with Section 4 of the Natural Environment and Rural Communities Act 2006, Natural England should be consulted again. Before sending us the amended consultation, please assess whether the changes proposed will materially affect any of the advice we have previously offered. If they are unlikely to do so, please do not re-consult us.

Yours faithfully
Joseph Cutler

www.gov.uk/natural-england

We strongly recommend using the SSSI Impact Risk Zones (SSSI IRZs) to decide when to consult Natural England on development proposals that might affect a SSSI. The SSSI IRZs tool is quick and simple to use and gives instant planning advice as a formal consultation response in certain circumstances and can reduce unnecessary delays in the planning process.

Natural England offers two chargeable services - the Discretionary Advice Service, which provides pre-application and post-consent advice on planning/licensing proposals to developers and consultants, and the Pre-submission Screening Service for European Protected Species mitigation licence applications. These services help applicants take appropriate account of environmental considerations at an early stage of project development, reduce uncertainty, the risk of delay and added cost at a later stage, whilst securing good results for the natural environment.

For further information on the Discretionary Advice Service see here
For further information on the Pre-submission Screening Service see here

F.A.O Anna Tastsoglou

Our ref 199453

Your ref 24/00021/FULEIA

Bury House, 31 Bury Street, City of London EC31 5AR

Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

Dear Anna

Thank you for notifying the SPAB of the additional information provided in support of the above application.

We refer to our objection dated 14 May 2024 which has been registered incorrectly as a representation rather than a consultation response, as a result our response has not been included within the Response to Comments on Matters relating to Heritage, Townscape and Visual Impact of 16 October 2024. We request that this error be corrected promptly.

We also wish to reiterate our objection, particularly concerning the harm that the tall building would cause to the Bevis Marks Synagogue. The overbearing structure and the overshadowing of the courtyard constitute an unacceptable level of harm to the historic interest of the asset.

Additionally, the application fails to demonstrate that the proposals would enhance the Creechurch Conservation Area or provide any Heritage Benefit.

We therefore strongly object to the application and recommend that permission is refused.

We hope these comments are helpful to you.

Best wishes

Gill

CONSULTATION RESPONSE: OBJECT

Anna Tastsoglou
City of London Corporation
PO Box 270
Guildhall
London
EC2P 2EJ

By email to: [redacted]

Our reference: 24025

6th November 2024

Dear Anna Tastsoglou,

24/00021/FULEIA | Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys; partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House and three storey extension resulting in ground plus 5 storeys at Renown House | Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

Thank you for reconsulting SAVE Britain's Heritage on the above planning application following the submission of revised planning documentation. Following careful assessment of the amended documentation, we wish to reiterate our strong objection on the heritage and climate grounds set out in our previous detailed letter dated 1st May 2024, which this letter should be read alongside.

The revisions submitted by the applicant do not alter the fundamental nature of the application. We maintain our view that the proposed ground plus 43-storey tower at No. 31 Bury Street would cause substantial harm to the Grade I listed Bevis Marks Synagogue and its setting, and the Creechurch Conservation Area within which the application site is fully located. The vastly increased scale of Bury House would overshadow a number of highly designated heritage assets which the conservation area is designated to protect. A building of this height would be visible from within the courtyard of Bevis Marks Synagogue, one of England's most important religious buildings of the highest significance, and would cause substantial harm to the building's setting and secluded nature. The sky view from within the courtyard has religious importance and allows daylight into the synagogue's interior.

The works proposed to Renown House and the Grade II* listed Holland House (in the associated application 24/00011/LBC) remain strongly concerning. We reiterate our view that the proposed scale and massing of a 4-storey rooftop extension to Holland House would be substantially harmful to this designated heritage asset.

70 Cowcross Street London EC1M 6EJ
T 020 7253 3500 E office@savebritainsheritage.org
www.savebritainsheritage.org
Registered Office No 2919??

This planning application has received over 1,300 objections. The government's own heritage advisor, Historic England, has strongly objected to the proposals, and five other national heritage bodies including Historic Royal Palaces, Georgian Group, Victorian Society, Twentieth Century Society and Historic Buildings and Places have registered their objections to the scheme. We consider this high-level of opposition adds considerable weight to SAVE's call that the Local Planning Authority refuse planning permission.

If your authority proposes to determine the applications in their current form and is minded to grant consent, we will request them to be called in for determination by the Secretary of State.

I trust that these comments are useful to you, and I ask that you keep SAVE informed of further decisions or consultation regarding this application.

Yours sincerely,

[redacted]

CITY OF LONDON REF: 24/00021/FULEIA

TOWER HAMLETS REF: PA/24/01869

ADDRESS: Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

PROPOSAL:

24/00021/FULEIA – Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

Dear Anna Tastsoglou,

Thank you for your correspondence dated 29th October 2024, informing the London Borough of Tower Hamlets (LBTH) about the City of London's receipt of additional information and revised drawings for the aforementioned Planning application.

Tower Hamlets Council
Tower Hamlets Town Hall
160 Whitechapel Road
London
E1 1BJ

LBTH previously submitted comments on 14th May 2024 objecting to 24/00021/FULEIA, and related LBC application 24/00011/LBC, due to the harmful impact of the proposals toward the Tower of London World Heritage Site.

As the revised drawings do not alter the height, scale, design or massing of the proposed new building, we maintain our original objection without further comment.

Yours sincerely,

Catarina Cheung
Planning Officer
For and on behalf of The Director of Planning and Building Control

Dear Anna Tastsoglou,

Thank you for re-consulting the Twentieth Century Society on the applications 24/00011/LBC & 24/00021/FULEIA. We have reviewed the submitted documents including KM Heritage's response to consultee comments dated 10 October 2024. We maintain our objection to the proposals as outlined in our letter of the 17 May 2024, remaining seriously concerned about potential harm caused to the Grade II* listed Holland House and Creechurch Conservation Area.

Kind regards,
Coco

Dear Sir or Madam

Planning consultation: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.
Location: 1-4, 31-34 Bury Street, London, EC3A 5AR (for 24/00021/FULEIA) and Holland House, 1 - 4, 32 Bury Street, London, EC3A 5AW (for 24/00011/LBC)

Thank you for your consultation on the above dated 14 March 2024 which was received by Natural England on 14 March 2024.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

SUMMARY OF NATURAL ENGLAND'S ADVICE

NO OBJECTION

Based on the plans submitted, Natural England considers that the proposed development will not have significant adverse impacts on statutorily protected nature conservation sites or landscapes.

Natural England's generic advice on other natural environment issues is set out at Annex A.

Sites of Special Scientific Interest Impact Risk Zones
The Town and Country Planning (Development Management Procedure) (England) Order 2015 requires local planning authorities to consult Natural England on "Development in or likely to affect a Site of Special Scientific Interest" (Schedule 4, w). Our SSSI Impact Risk Zones are a GIS dataset designed to be used during the planning application validation process to help local planning authorities decide when to consult Natural England on developments likely to affect a SSSI. The dataset and user guidance can be accessed from the data.gov.uk website

Further general advice on the consideration of protected species and other natural environment issues is provided at Annex A.

We would be happy to comment further should the need arise but if in the meantime you have any queries please do not hesitate to contact us.

For any queries regarding this letter, for new consultations, or to provide further information on this consultation please send your correspondences to consultations@naturalengland.org.uk.

Yours faithfully

EC3A 5AR

Proposal:
Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.
Drawing Nos: City of London Cover Letter dated 8th October 2024.

The Council, as a neighbouring planning authority, has considered your request for observations on the application referred to above and hereby raises no objection.

Informative(s):

1 Reasons for raising no objection:-

The proposal includes the demolition subsequent redevelopment of the whole site as outlined in the description of development. The application for planning permission is an EIA application (24/00021/FULEIA). The London Borough of Camden were consulted on the original application in March 2024 and raised no objection advising that the application site is a significant distance from the London Borough of Camden boundary. The development would have no material impacts on the significance of any protected views, on the amenity of any Camden occupiers or visitors, or on transport, environmental, or ecological conditions.

In light of the submission of additional information and revised drawings the London Borough of Camden continues to raise no objections to the application.

Yours faithfully

Daniel Pope
Chief Planning Officer

Memo

To Assistant Director (Development Management)

Date:
Our Ref: 24/00021/FULEIA
Address: 31 Bury St

The planning Guid application has been assessed to ensure that the proposal meets the highest standards of accessibility and inclusive design required by the NPPF paras 96 and 135, London Plan 2021 Policy D5, Local Plan 2015 Policy DM 10.8 and City Plan 2040 – Revised Proposed Submission Draft HL1.

The Access Team promotes good practice standards of inclusive design and encourages early consideration of accessibility in the design process so that a truly inclusive environment can be achieved that everyone will be able to visit, use and enjoy.

The proposal is for: **Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works**

Comments are structured to follow the journey through from planning a visit, arrival, entrance, travel through, and out from the site.

Summary of key issues

Engagement

Guidance in the London Plan is that there should be engagement with relevant user groups such as disabled, or older people's organisations. Some relevant groups are listed within the Statement of Community involvement.

There is no reference to a review of the current proposals by the City of London Access Group (CoLAG).

Good practice evidence provided

RIBA ID Overlay used?	CoLAG review	Access audit of existing buildings	EqIA	CoLSAT used?
No	No	No	Yes	No

Planning a visit

Preview, or prior information that is made available on websites is key to removing barriers to access for many disabled people. It is recommended this should be reserved by condition as part of the Inclusive Access Management Plan.

Arrival and departure

Aldgate station is 350m from the site and Aldgate East is 600m from the site. These stations do not provide step free access to the train. The nearest station providing step-free access is Tower Hill at 600m from the site. The nearest bus stop is 150m away on St Katherine Cree. It is noted that buses are not suitable for all people.

Parking

Whilst there is a high PTAL, step-free public transport routes to the site are significantly further than the recommended 50m from principal entrance points as set out in Inclusive Mobility and British Standard BS 8300 (1). Accordingly, disabled people may require access to parking, or drop-off at the site. It is recommended that details of rest points at 50m intervals and dropping-off are reserved through the Transport Management Plan and S278.

The Red Badge parking scheme is for disabled residents and workers in the City. Red Badge holders may park in pay and display and disabled persons parking bays in the City without time limits. Blue Badge holders may park for up to four hours in these bays and six hours in the bays nearest to St Bartholomew's hospital. Disabled people who hold a Blue Badge, but not a Red Badge, are be limited to four hours of on-street parking. London Plan T6.5 says for non-residential uses that 'at least one on or off street' disabled persons parking space is provided. A relevant

space is provided to be shared with the servicing bay. This should be reserved for use for free by the disabled persons parking bay only between the hours of 7.00am and 11.00pm for the life of the development. Details of controlled entry and use of the space, its layout and surface are reserved by condition. Arrangements for booking the space and its management are reserved as part of the Inclusive Access Managment Plan.

There are three existing on-street disabled persons parking bays in the vicinity of the development which should be re-provided if any are affected during the construction period and details reserved through the Construction Management Plan.

The servicing bay incorporates two short-stay cycle parking stands for cargo bikes. it is proposed that the servicing bay incorporates a disabled persons parking space for use between the hours of 7.00am and 11.00pm. Details of the space will need to be reserved by condition though the Transport Plan to ensure that it is adequately sized and set out with suitable protected zones, and available for the life of the development. These should be supported by details of its management secured through the Inclusive Access Management Plan (IAMP) and including information about priorities for booking and confirming that it will be free for use and available for disabled persons only for the lifetime of the development.

Dropping-off

Good practice guidance is that setting-down points should be positioned close to the accessible entrance of a building on firm and level ground. No drop-off points are identified in the proposals. It is recommended that details of secure drop-off on firm and level ground are reserved by condition and secured through Section S278 works.

Commented [BH1]: Let me know if we need to discuss.

Cycle parking

Cycle parking should accommodate a range of people, so as not to exclude or disadvantage riders of certain types of cycle. London Plan policy and London Cycle Design Standards recommend that 5% of cycle spaces should be suitable for larger cycles with associated, and appropriately-sized lifts and end-of-trip facilities. The 5% should be spread across both short and longer stay spaces. Routes to cycle parking should include no more than two sets of doors and those should be automated.

The application states that 5% of spaces for larger cycles will be provided.

Larger cycle storage spaces are provided at level B1 and Lower Ground Floor, accessed by a stepped entrance with cycle ramp or a cycle lift from the northern end of Heneage Arcade. The cycle lift is dual purpose, shared with refuse transfer. There is larger cycle parking at the southern end of the Lower Ground Floor which is not accessible by lift by larger and adapted cycles. It is recommended that details of accessible cycle parking, including controlled points of entry, swept paths, and end of trip facilities are reserved by condition in the TMP to ensure that all spaces are easy to access and are consistent with LCDS.

Larger cycle storage is at B1 or Lower Ground Floor. Cyclists will move between levels from the cycle storage via lifts A and F to access end of trip facilities on level B2. Cyclists requiring step-free routes will transfer from the cycle lift, put the cycle into storage and then move across to the passenger lifts in the central lift lobby. The cycle lift allows access to B2 but connects directly into the refuse store. Details of how this lift will be managed and cleaned are reserved by condition through the IAMP to maintain independent and dignified access and avoid inadvertent access to the refuse store. No mobility scooter storage charging or storage points are provided which is regrettable.

It is recommended that passive EV charging should be provided for all larger cycle spaces and details reserved through the Travel Plan.

Entrances

Guidance in the London Plan is that entrances should be easy to identify and accessed without undue effort, special treatment or separation. Automated sliding doors are proposed to principal entrance points, and for which step free access is provided. Step free access routes and sliding doors are welcomed. Sliding doors are more inclusive of a range of people than revolving doors, which reinforce separation and are not considered inclusive.

A new arcade will be created which will improve the permeability of the site and is welcome. Some of the units are shallow and may not have sufficient passing or turning space for wheelchair users. Details of all shopfronts should be reserved by condition to ensure that doors are of sufficient width and have suitable door furniture and surface contrast

Reception faciliites should be consistent with AD M(2) 3.6 and include facilities for both standing and seated visitors, have non-slip surfaces, lowered sections of any desks, options for seating and an audio induction loop. As these are not currently shown on the drawings details of reception facilities should be reserved by condition.

Vertical access

London Plan 2021 Policy D5 requires that at least one lift per core is a fire evacuation lift suitably sized for step-free access out from the building in addition to fire-fighting lifts. Two evacuation lifts are identified in the central lift core, with separate firefighting lifts.

Details of the management protocol for assisting people who require Personal Emergency Escape Plans (PEEPs), including staff training and guidance, should be reserved by condition through the IAMP to ensure that there is sufficient training and awareness as part of the the building's management.

Reference is not made to the use of Easy Access to Historic Buildings. However, the proposals would bring greater access to the listed buildings and which is welcome in principle. The SCI indicates that some relevant disabled persons user groups were engaged during project development although there is not detail of how this has shaped the proposals. The proposals were not reviewed by CoLAG.

Culture/education space

An end-user has not been secured for the culture use and conditions are recommended to ensure that the cultural offer is inclusive of the greatest

range of people at all levels of operation with opportunities for co-creation, co-curation, mentoring and volunteering for relevant groups.

Sanitary facilities

Policy in the London Plan and Local Plan requires free, publicly accessible toilets for a range of people where there is major development, particularly when they are near significant attractions, public open spaces or existing transport interchange. Sanitary facilities will need to meet standards in both Approved Documents M and, the updated, T.

Changing Places toilets are a requirement of Building Regulations for certain types and/or scales of development. The criteria are set out in Approved Document M of the Building Regulations. Changing Places toilets are intended for people with multiple and/or complex impairments. They are not intended for independent use. A 'Changing Place' toilet is indicated on the proposed drawings, accessed from Heneage Arcade. This is not currently shown fitted out as a Changing Places toilet.

Under the reqiurements of current Building Regulations and relevant policy, separate wheelchair accessible toilet and baby changing facilities should also be provided as well as ambulant accessible toilets. Whilst indicative layouts show some scope for inclusive toilet provision this needs further development and an Inclusive Toilet Strategy is recommended to be reserved by condition encompassing the whole development. This should include , plans and relevant details at a scale of no less than 1:20 of Changing Places, wheelchair accessible, ambulant accessible, single sex and universal provision as well as baby changing facilities.

Landscape

Terraces and external spaces have the opportunity to create areas of calm and engagement with nature. They should allow easy and step-free access for a range of people. Paths should be slip-free and allow room for people using wheelchairs to pass and options for lone, or grouped seating, shelter and planting that is not highly scented and does not result in unwelcome touch. Seating should be at a range of heights and provide recesses in seating lines to allow wheelchair users or people with assistance animals to sit alongside companions, options for seating with backs and arm-rests for support when rising, as well as a wheelchair user to transfer.

Spend areas for assistance animals are not currently identified but could be reserved by condition.

It it recommended that details of all landscaping are reserved by condition including surface materials, planting, seating – with options to include seating with backs and arm rests for support- and spend areas.

Suggested conditions

Accessibility

Prior to commencement of development conditions:

Location of drop-off points on level surfaces within 50m of entrances (may go in Transport Plan?)

Details of disabled persons parking space including markings, protected access zones, hours of operation and signage to entrance points . This should include provision for passive EV charging. (again probably in TP?)

Details of to demonstrate how accessible cycle parking will meet London Cycle Design Standards Chapter 8 including: provision for passive EV charging, plans at a scale of no less than 1:20 to show layout, swept paths and dimensions, lift dimensions including internal cqr and door sizes; operational management to ensure that users requiring step-free routes cannot inadvertently access the refuse store and cleaning and maintenance of dual-function lifts

Details of access to inclusive end of trip facilities with relevant information made availalbe on the building management website

Statement for the construction period to demonstrate that disabled persons parking bay provision is maintained or the equivalent provided in alternative locations for the course of the works (CMP or TP?)

Details of all shopfronts including plans and elevations at a scale of no less than 1:20 to ensure that doors are of sufficient width and have suitable door furniture and surface contrast

Reception facilities to include non-slip surfaces, lowered sections of desks, options for seating and a hearing induction loop

Submission of an Inclusive toilet strategy including plans at a scale of no less than 1:20 of:

Location of wheelchair accessible toilets and proximity to all entrance points
Changing Places – identifying how the Changing Places standards set out in Approved Document M have been met, location and fit out and registration with the Changing Places Consortium
Details of ambulant accessible toilets and statement of how provision of ambulant accessible toilets meets Approved Documents M and T
Details of single sex toilets and universal toilet facilities
Location of baby changing facilities associated with cultural and retail use
Spend facilities for assistance dogs

Landscape and public realm details to include access to, and circulation routes including: door widths from the building, threshold and mat details, path widths and surfaces, passing places for wheelchair users, seating and furniture, planting to avoid highly scented plants or opportunities for unwelcome touch and lighting

All seating and furniture which should include recesses for wheelchair users or people with assistance animals to sit alongside companions, a range of seating heights, and options with of arm supports for rising, and back rests.

Inclusive Access Managent Plan

Prior to occupation of the development, an Inclusive Access Management Plan shall be submitted to the Local Planning Authority which shall provide specific details on how the development will be constructed, operated and managed to ensure that the highest possible standard of accessibility is provided. This management plan shall include accessibility details of:

Preview information for website for each building use including travel distances, dimensions and photographs/visual stories to assist with visit planning for all building users:

Details of use of the disabled persons parking bay incudig its management, booking and frequency of relevant staff training

Details of any equipment loan for the building including, but not limited to wheelchair, noise cancelling headphones, information for culture spaces in alternative formats

Wayfinding strategy including how Information will be available in more than format

Information on publicly accessible toilet facilities including maintenance schedule and access to Radar keys and slings, as necessary

Cleaning and maintenance schedule for lifts to ensure that the lifts are kept clean, in good working order, and available at all times, with lift users kept separate from the refuse store

Inclusive cultural provision with reference to relevant guidance including opportunities for inclusive procurement, interpretation, co-creation, co-curation, mentoring and volunteering

Planting maintenance schedule

An inclusive emergency escape plan including relevant training and frequency as well as the protocol for the preparation of Personal Emergency Exit Plans (PEEPs)

REASON: To ensure an inclusive and accessible development in accordance with Policy DM10.8 and Policy D5 of the London Plan

Yours sincerely

Harriet Bell

18 November 2024

Dear Ms Tastsoglou

Arrangements for Handling Heritage Applications Direction 2021
& T&CP (Development Management Procedure) (England) Order 2015
& Planning (Listed Buildings & Conservation Areas) Regulations 1990

HOLLAND HOUSE 1 - 4, 32 BURY STREET LONDON EC3A 5AW
BURY HOUSE 1 - 4, 31 - 34 BURY STREET LONDON EC3A 5AW
Application Nos 24/00011/LBC & 24/00021/FULEIA

Thank you for your letters of 29 October 2024 regarding further information on the above applications for listed building consent and planning permission. On the basis of this information, we offer the following advice to assist your authority in determining the applications.

Summary

In 2021 your authority considered a similar scheme for the replacement of Bury House with a 48-storey tower. That application was refused, which we welcomed. This was because the proposals would have harmed the Outstanding Universal Value of the Tower of London World Heritage Site. The application was also refused because the proposed tall building would have harmed the grade I listed Bevis Marks Synagogue due to its overbearing and overshadowing impact on the synagogue and its courtyard.

The current proposal, an amended scheme on a larger site, would not overcome either of the previous reasons for refusal. Indeed, further harm caused by the proposed alterations to Holland House and the development's impact on the Creechurch Conservation Area mean that this scheme is worse than that refused from a heritage perspective.

Historic England objects strongly to the applications and recommends they should be withdrawn or refused.

Historic England Advice

Historic England is subject to both the Freedom of Information Act (2000) and Environmental Information Regulations (2004). Any Information held by the organisation can be requested for release under this legislation.

We have set our position on these applications in detail in our letter of 15 May 2024 and continue to refer you to this advice. The recent amendments concern aspects of the detailed design which do not materially change the impacts on significance. The heritage commentaries submitted by the applicant in response to our advice do not provide any new information which changes our position.

We wish to draw the City Corporation's attention to the following points in light of further correspondence and information which has been submitted.

In our previous response we advised that given the similarities between the refused application and the current proposals, ICOMOS's previous advice remains relevant to the current application. As indicated in our email to the case officer on 24 July 2024, UNESCO's World Heritage Centre has welcomed Historic England's advice that the comments made by ICOMOS in its 2022 Technical Review of the previous application for this site remain relevant and should be taken into consideration in the local planning authority's determination of the current scheme. Please find this email and ICOMOS's Technical Review appended. We would encourage careful consideration to be given to ICOMOS's advice given the potential implications for the World Heritage Site.

We note the submission of the Lunar Transit Study Above The Bevis Marks Synagogue (GIA August 2024). This pertains to the Sephardi community's ability to practice the Kiddush Levana ritual - prayers performed outside at night to bless the new moon. A review of the Transit Study (BRE 04 November 2024) notes a significant reduction of visibility of the moon at relevant times of the lunar cycle as a consequence of the application proposals.

In our previous response, we highlighted the importance of the clear sky backdrop in the setting of the Synagogue to its significance, both in terms of its tangible and intangible contributions. As set out in 'The Setting of Heritage Assets' (GPA3) 'the asset's intangible associations with its surroundings, and patterns of use' and 'intentional intervisibility with other historic and natural features' (which we take to include the celestial bodies) are relevant to the consideration of impacts on significance. We defer to the expertise of the Sephardi community on their traditions and the impact of the proposals on their ability to worship, but note the clear link to heritage significance raised by this point.

In addition to the harm to the Tower of London and Bevis Mark Synagogue, we have also previously set out how the proposals would harm the significance of Holland House and the Creechurch Conservation Area. For the purposes of the NPPF, we find that the harm to the former would be in the middle of the range of 'less than substantial' and in the lower part of that range for the latter.

Historic England continues to object strongly to the current proposals. We consider

they would harm designated heritage assets of the highest possible significance, including the Tower of London and Bevis Marks Synagogue, contrary to planning legislation, policy and guidance. We do not support the development of a building of the scale proposed in this location due to the inevitable harmful impact it would have on the historic environment.

We consider that the reasons for refusal for the previous application remain entirely applicable to these proposals. That application was refused because the proposals were considered to harm the contribution to the OUV of the Tower of London World Heritage Site made by its setting, in particular in views that best allow that OUV to be appreciated. A second reason for refusal was the overbearing and overshadowing impact on the synagogue and its courtyard. The current proposal would result in a worse impact in this case.

Recommendation

Historic England strongly objects to these applications. We recommend that they are refused or withdrawn.

We will update the Department for Culture, Media & Sport (DCMS) in its role representing the UK State Party to the 1972 World Heritage Convention, about the recommendation in your report and the decision of your Planning Committee. This is in order that they can update UNESCO World Heritage Centre on this case in accordance with Paragraph 172 of the Operational Guidelines.

We have not authorised the granting of listed building consent and will review our position on that matter after your Planning and Transportation Committee has met.

This response relates to designated heritage assets only. If the proposals meet the Greater London Archaeological Advisory Service's published consultation criteria we recommend that you seek their view as specialist archaeological adviser to the local planning authority.

The full GLAAS consultation criteria are on our webpage at the following link:

https://www.historicengland.org.uk/services-skills/our-planning-services/greater-london-archaeology-advisory-service/our-advice/

Yours sincerely

FAO Ms Anna Tastsoglou
By email to [redacted]

21 November 2024

Bury House, Bury Street, London EC3A 5AR
Planning Ref: 24/00021/FULEIA and 24/00011/LBC

Dear Ms Tastsoglou,

We write in relation to the recent re-consultation on the above referenced planning and listed building consent applications, to reiterate HRP's strong objection to the scheme, which relates to the redevelopment of the site that includes Bury House, on the basis of its impact on the Outstanding Universal Value (OUV) of the Tower of London (ToL) World Heritage Site (WHS).

HRP previously made representations to the City of London (CoL) in respect of this application in May 2024, during the initial consultation period. We do not repeat the detail of that representation here but note that the scheme does not appear to have changed in any meaningful way since then and therefore the **original objection** (dated 13 May 2024) still stands. While we note the response to comments made by HRP prepared by The Townscape Consultancy, **HRP remains strongly of the belief that the proposed development would significantly harm the Outstanding Universal Value (OUV) of the ToL WHS** by virtue of the position and height of the proposed buildings and their impact on key views from and of the ToL.

In this letter we provide more detail about some of the issues raised in the original objection, highlight the changing policy context for consideration of the proposals, and raise a new concern about the misrepresentation of HRP's opinion of the emerging scheme during pre-application consultation which we ask CoL Officers to consider alongside HRP's original letter of representation in the determination of this application.

HISTORIC ROYAL PALACES

Growth of the City Cluster

The growth of the CoL tall buildings cluster over the last 15 years, particularly the rapid development of new high-rise buildings, represents growth beyond that which was first envisaged when the LVMF was first published in 2012. The growth in tall buildings has resulted in cumulative impacts which HRP considers are threatening the OUV of the ToL WHS. HRP considers the emerging CoL Local Plan to 2040, which proposes additional height in the cluster, would further exacerbate the harm to the OUV through its promotion of an expanded eastern edge to the cluster and additional height. HRP believes that the Bury House development, along with the emerging CoL Local Plan 2040, to be a significant threat to the status of the WHS and as such maintains its objection both to this application and the emerging City Plan 2040.

Harm to the OUV of the ToL WHS

HRP remains of the view that the proposed development would harm the OUV of the ToL WHS. The original representation (May 2024) set out the unacceptable impact of the proposals on views of the Tower of London from Tower Bridge (LVMF 10A.1), in the dynamic journey across Tower Bridge, in the local views from within the inner ward of the Tower (in particular the view north-west from the centre of Tower Green over the roof of St Peter and Vincula), and on views of the White Tower, which is compromised by the erosion of the visual separation from the emerging City Cluster.

This is contrary to the guidance of the LVMF, in relation to View 10A.1 which states that '*Views from this place include the relationship between the Tower of London and the City in the background. It is important that the background of the landmark in these views is managed sensitively and should not compromise a viewer's ability to appreciate the Outstanding Universal Value of the World Heritage Site*' (LVMF para 186).

HRP notes the Townscape Consultancy response to the HRP comments made in May 2024. However, HRP maintains its position and does not agree with the conclusions in that response. In relation to View 9 in the TVIA (LVMF View 10A.1), HRP does not agree that '*in the cumulative condition the height of the proposed development would better mediate the cliff edge caused by the consented scheme at 100 Leadenhall*'. HRP considers the height would in fact exacerbate the abrupt vertical cliff edge in this view, resulting in a domineering and overbearing relationship to the ToL White Tower in this view.

Historic Royal Palaces
Tel +44(0)20 3166 6000 www.hrp.org.uk
Historic Royal Palaces is a Registered Charity (No. 1068852) and Historic Royal Palaces Enterprises Ltd, a company registered in England (No. 3418583)
The registered office and address for services of both bodies is Hampton Court Palace, Surrey, KT8 9AU

In relation to the Townscape Consultancy comments on View 22, from the ToL Inner Ward, HRP maintains its comments. While the wire line shows the proposed development occluded in this view, the cumulative impact view in the TVIA clearly shows a development visible over the top of the Royal Chapel of St Peter and Vincula. This further highlights HRP's concerns about the growth of the city cluster overall and the damaging impact this is having on the ToL.

Policy Considerations

The proposals are contrary to numerous policies in the adopted CoL Local Plan (2015) and draft City of London Plan 2040 which seek to protect the ToL WHS and its setting. In the adopted Plan: Policy CS12 (Historic Environment) requires development to preserve and where appropriate enhance the OUV of the ToL WHS and its local setting; Policy CS13 (Protected Views) requires development to protect and enhance significant City and London views of important buildings, townscape and skylines (including the ToL); and, Policy CS14 (Tall Buildings) requires tall buildings proposals to have regard to the significance of heritage assets and their settings. HRP considers that the current proposals are not in accordance with these policies because they demonstrably harm the OUV of the ToL WHS, impacting on its setting and views of the White Tower. The application should therefore be considered a departure from the development plan and refused.

In the emerging Plan, strategic policy S11 (Historic Environment) states that the CoL will preserve and seek to enhance the OUV, architectural and historic significance, authenticity and integrity of the ToL WHS and its setting; Policy HE1 (Managing change to the historic environment) requires that development preserves and where possible enhances and better reveals the special architectural or historic interest and the significance of heritage assets and their settings; and, Policy HE3 (Setting of the Tower of London World Heritage Site) requires proposals affecting the setting of the ToL WHS to preserve and enhance its OUV, architectural and historic significance, authenticity and integrity. Furthermore, strategic policy S12 (Protected Views) states that CoL will secure an appropriate setting of and backdrop to the ToL WHS and ensure its OUV. HRP therefore considers that the proposals for Bury House, given the harm they will cause to the OUV of the ToL WHS, are also contrary to emerging CoL policy.

HRP's concerns about the harm to the ToL OUV are made clear in the images provided in the ToL HIA submitted with the Application, particularly Figures 5.3 and 5.4. These images show that the proposed development sits demonstrably apart from the established City Cluster and that this is beyond what could reasonably be interpreted as denoting the

Historic Royal Palaces is a Registered Charity (No. 1068852) and Historic Royal Palaces Enterprises Ltd, a company registered in England (No. 3418583)
The registered office and address for services of both bodies is Hampton Court Palace, Surrey, KT8 9AU

‘edge’ of the cluster, clearly intruding on views of the ToL and particularly the White Tower. Moreover, the reference in the ToL HIA to the proposed development representing a stepping down to the ’foothills’ of the Cluster is also contradicted by these images, which clearly demonstrate that –even at its ‘reduced’ height, compared with the previous, rejected proposals - it is a similar height to other buildings in the centre and foreground of the cluster and not significantly or visibly diminutive.

In its response to the CoL draft City Plan 2040 (letter dated 29 May 2024), HRP referenced the growth of the City Cluster and highlighted that the proposed profile of the cluster set out in the draft Plan (which appears to be designed to incorporate the Bury Street proposal) pushes the tall vertical edge of the eastern shoulder too close to the White Tower. HRP has regularly and consistently highlighted the danger posed by the proposed development to the ToL WHS over a prolonged period of time and strongly requests that all of these representations are carefully considered in the determination of this application.

Changing policy context

In its original objection to this 2024 scheme, HRP highlighted the reliance in the submitted Planning Statement on the draft policies of the City Plan in seeking to justify the excessive height and position of the proposal, pointing out that only limited weight could be attributed to the emerging plan given the early stage of its preparation, with significant objections remaining to the tall buildings policies and proposals in the draft document. Since then, the draft Plan has been submitted for Examination in Public, however the process is in the relatively early stages (it was submitted at the end of August and Inspectors were appointed in September; no date is currently indicated for the hearings) and therefore only limited weight can continue to be attributed to these draft policies. Furthermore, we have demonstrated above that elements of the proposals are not compliant with either emerging or adopted policy. HRP believes that the extent to which the proposals can demonstrate compliance with CoL policy, particularly in relation to heritage harm and tall buildings, is overstated in the application submission documents.

It is also clear that the development of the City Cluster, in both scale and height, is now beyond anything that was envisaged when the current version of the LVMF was published. HRP is aware that the LVMF is currently under review and understands that further protections will be afforded to the Tower of London and the White Tower to recognise the threat to its OUV from development in a future version. HRP requests that CoL Officers have regard to this likely update to the LVMF and consider its implications in the determination of this application.

HISTORIC ROYAL PALACES

Misrepresentation of HRP comments on the emerging scheme

HRP notes the statement in the Planning Statement (para 2.30) which refers to the way in which the 2024 submission seeks to address the reasons for refusal of the 2020 scheme: that '*The Applicant has also worked with key stakeholders including the GLA, Historic Royal Palaces ('HRP') and Historic England ('HE') to address the second reason for refusal. In this regard, HRP feedback acknowledged that there was "much to welcome in the new design proposals, particularly in respect of the existing incongruous extensions to Holland House, bringing public use to Holland House, and the reduction of height and introduction of shoulder elements to the tall building", which were described as helpful in key views. It was acknowledged that the "height of the massing would re-establish a softer edge in the foothills of the City Cluster that would mitigate to some extent against the 'cliff edge' created by consented developments*". The Planning Statement concludes on this point (para 2.31) that there is '*consensus from the GLA, HRP and the HE that the height reduction represents a positive change from the previous scheme, but some concern remains in respect of the overall height of the scheme*.'

HRP takes issue with this presentation of its view of the current scheme, which overstates its assessment of the advantages of the current scheme compared with the previous rejected scheme, and suggests that its remaining concerns are minimal and entirely addressed in the Heritage Assessment, HTVIA and Design and Access Statement submitted as part of the current application. The quotes presented in the Planning Statement are from an email exchange immediately following an online presentation of the scheme by the Applicant to HRP, and omit other important issues raised by HRP in that email, including that '*the massing in LVMF view 10A.1 (from the northern bastion of Tower Bridge) still appeared tall and close to the White Tower*'. This position was set out in more detail in HRP's follow-up formal objection letter dated 13 May 2014.

Historic Royal Palaces therefore continues to strongly object to the proposed development, which would harm the OUV of the Tower of London WHS and which therefore does not comply with CoL adopted or emerging Local Plan Policies, the LVMF and NPPF. We therefore request that the City of London refuses the application as currently presented.

Hi Anna,

The proposed waste and storage collection facilities indicated on drawings no. 4458-ST-PR-02-100 & 4458-ST-PR-02-097 and in the Delivery and Servicing Plan, Jan 2024, comply with our requirements. Therefore, this division will not object to this proposal.

Thanks

Cimal

Dear Ms Tastsoglou

TOWN AND COUNTRY PLANNING (DEVELOPMENT MANAGEMENT PROCEDURE) (ENGLAND) ORDER 2015

Application by WELPUT for the demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works at Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR. Planning Application Numbers: 24/00021/FULEIA and 24/00011/LBC.

1. I am directed by the Secretary of State to refer to the above planning application.

2. In exercise of her powers under Article 31 of the Town and Country Planning (Development Management Procedure) (England) Order 2015, the Secretary of State hereby directs your Council not to grant permission on this application without specific authorisation. This direction is issued to enable her to consider

LONDON

21 March 2024
Crossrail Ref: CRL-IP-3125

Dear Anna Tastsoglou,

24/00011/LBC : 1-4, 31-34 Bury Street, London, EC3A 5AR
Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works.

Transport for London (TfL) administers the Crossrail Safeguarding Direction made by the Secretary of State for Transport on 24 January 2008.

Thank you for your letter 14 March 2024, requesting the views of CRL_Safeguarding on the above application. I confirm that the application relates to land outside the limits of land subject to consultation by the Crossrail Safeguarding Direction.

I have no comment on the application.

If you require any further information, please contact:
CRL_Safeguarding@tfl.gov.uk

Yours sincerely,

Will Orlik
Safeguarding Officer (Elizabeth line)

Dear Anna,

TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED)
NATIONAL PLANNING POLICY FRAMEWORK 2021

Holland House 1 - 4, 32 Bury Street London EC3A 5AW

Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works

Recommend Archaeological Condition(s)

Thank you for your consultation received on 14th March 2024.

The Greater London Archaeological Advisory Service (GLAAS) gives advice on archaeology and planning. Our advice follows the National Planning Policy Framework (NPPF) and the GLAAS Charter.

Assessment of Significance and Impact

The proposed development is in an area of archaeological interest. The City of London was founded almost two thousand years ago and London has been Britain's largest and most important urban settlement for most of that time. Consequently, the City of London Local Plan 2015 says that all of the City is considered to have archaeological potential, except where there is evidence that archaeological remains have been lost due to deep basement construction or other groundworks.

The site lies in an area which was formerly within the walls of the Roman city of Londinium. A large Roman ditch was identified to the west of the site at St Mary Axe and a Roman road was identified to the south of the site, both of which are likely to have continued through the site. Roman buildings have also been identified close to the site. The Augustinian Holy Trinity Priory (founded 1108) was formerly located partially within the east of the site. The site was occupied by a series of buildings during the post-medieval period, including a school.

All three of the current buildings on the site have a basement. The deepest basement appears to be under Holland House although no OD height has been provided for it. Shallower basements appear to be present beneath Bury House and Renown House. The archaeological desk based assessment (AOC 2023) submitted with the application suggests that the Bury House basement has removed all archaeological deposits to a depth of c 11m OD. No depth for the basement of Renown House has been provided but a similar level of impact may be expected. Remains of the Abbey previously excavated to the east of the site have confirmed that the lower parts of the Abbey remains extend to below 11m OD in places. It is also possible that deeper cut features of Roman date may also survive beneath the current basements. No archaeological evaluation or investigation has been previously carried out on the site to ascertain likely levels of truncation.

The proposed development includes a basement under Bury House that will extend to four levels. This will cause complete truncation of any surviving archaeological deposits. In Holland House, no new basements are proposed but a crane base and new foundation will be inserted into the current lightwell. Renown House will retain its facade, which is likely to need propping. The supports for the propping are likely to extend below the current basement. Underpinning may also be required here.

It is therefore possible that remains of Roman and medieval date survive on the site, although remains of high significance are not expected due to truncation from the current buildings. The proposed development will have a high impact on these potential remains. It is therefore recommended that an archaeological evaluation take place, if consent is granted, in order to establish the nature and extent of archaeological survival. in the first instance, geotechnical investigations should be monitored by an archaeologist as they are carried out. If archaeological remains are encountered, a full programme of archaeological mitigation, which covers all below ground impacts should be carried out.

A cultural and education space is to be provided within the proposed development. The archaeological work should therefore include public engagement to feed into the cultural and education programme for the site. The story of Holy Trinity Priory is of particular interest as little information about this site is available to view within the City.

Planning Policies

NPPF Section 16 and the London Plan (2021 Policy HC1) recognise the positive contribution of heritage assets of all kinds and make the conservation of archaeological interest a material planning consideration. NPPF paragraph 200 says applicants should provide an archaeological assessment if their development could affect a heritage asset of archaeological interest.

NPPF paragraphs 195 and 203 and London Plan Policy HC1 emphasise the positive contributions heritage assets can make to sustainable communities and places. Where appropriate, applicants should therefore also expect to identify enhancement opportunities.

If you grant planning consent, paragraph 211 of the NPPF says that applicants should record the significance of any heritage assets that the development harms. Applicants should also improve knowledge of assets and make this public.

Recommendations

I advise that the development could cause harm to archaeological remains and field evaluation is needed to determine appropriate mitigation. However, although the NPPF envisages evaluation being undertaken prior to determination, in this case consideration of the nature of the development, the archaeological interest and/or practical constraints are such that I consider a two-stage archaeological condition could provide an acceptable safeguard. This would comprise firstly, evaluation to clarify the nature and extent of surviving remains, followed, if necessary, by a full investigation.

I therefore recommend attaching a condition as follows:

Condition No demolition or development shall take place until a stage 1 written scheme of investigation (WSI) has been submitted to and approved by the local planning authority in writing. For land that is included within the WSI, no demolition or development shall take place other than in accordance with the agreed WSI, and the programme and methodology of site evaluation and the nomination of a competent person(s) or organisation to undertake the agreed works.

If heritage assets of archaeological interest are identified by stage 1 then for those parts of the site which have archaeological interest a stage 2 WSI shall be submitted to and approved by the local planning authority in writing. For land that is included within the stage 2 WSI, no demolition/development shall

take place other than in accordance with the agreed stage 2 WSI which shall include:

A. The statement of significance and research objectives, the programme and methodology of site investigation and recording and the nomination of a competent person(s) or organisation to undertake the agreed works
B. Where appropriate, details of a programme for delivering related positive public benefits
C. The programme for post-investigation assessment and subsequent analysis, publication & dissemination and deposition of resulting material. This part of the condition shall not be discharged until these elements have been fulfilled in accordance with the programme set out in the stage 2 WSI.

Informative Written schemes of investigation will need to be prepared and implemented by a suitably professionally accredited archaeological practice in accordance with Historic England's Guidelines for Archaeological Projects in Greater London. This condition is exempt from deemed discharge under schedule 6 of The Town and Country Planning (Development Management Procedure) (England) Order 2015.

This pre-commencement condition is necessary to safeguard the archaeological interest on this site. Approval of the WSI before works begin on site provides clarity on what investigations are required, and their timing in relation to the development programme. If the applicant does not agree to this pre-commencement condition, please let us know their reasons and any alternatives suggested. Without this pre-commencement condition being imposed the application should be refused as it would not comply with NPPF paragraph 211.

I envisage that the archaeological fieldwork would comprise the following:

Geotechnical Monitoring

Archaeological monitoring of geotechnical pits and boreholes can provide a cost-effective means of establishing the potential for archaeological remains to survive on previously developed land or where deep deposits are anticipated. It is usually used as part of a desk-based assessment or field evaluation.

Evaluation

An archaeological field evaluation involves exploratory fieldwork to determine if significant remains are present on a site and if so to define their character, extent, quality and preservation. Field evaluation may involve one or more techniques depending on the nature of the site and its archaeological potential. It will normally include excavation of trial

trenches. A field evaluation report will usually be used to inform a planning decision (pre-determination evaluation) but can also be required by condition to refine a mitigation strategy after permission has been granted.

Public engagement

Where appropriate, local planning authorities and the developer are advised to make investigative works open to and interpreted for the public and to include that as part of the WSI. Opportunities for public engagement, proportionate to the significance of the investigation, could, for example, include enabling participation in investigation, providing viewing platforms and interpretation panels, jointly designed open days in partnership with the local community, public talks and online forums as well as coverage in local media. Once analysed, the results and the knowledge gained may be communicated, in addition to formal publication and deposition of the archive, through displays, exhibitions and popular publications and might inform site design and public art.

You can find more information on archaeology and planning in Greater London on our website.

This response relates solely to archaeological considerations. If necessary, Historic England's Development Advice Team should be consulted separately regarding statutory matters.

Yours sincerely

Helen Hawkins

REFVAL	SURNAME	FIRST NAME	COMMENT	RESTRICTED COMMENT	HOW RECEIVED	DATE
24/00021/FULEIA	Harris	Geraldine	This is totally inappropriate when a previous proposal was rejected. The building would be too near to the Synagogue and would block the light inside and would take away the beauty of the building.	NO	Public Access website	15-Mar-24
24/00021/FULEIA	Kovalskyi	Volodymyr	I don't understand the previous objections regarding the endless "we are plunged into the darkness" - utterly absurd, as this scheme should have been given a green light a while ago. A waste of time and money when the city really needs it. I think it's gonna be a game-changer for our city skyline, adding some serious flair and modernity to the scene. The most eye catching element here is the terracotta cladding. This area is one of the few places where tall building are allowed. You can not stop the progress. Many big companies are leaving Canary Wharf for City of London - the building would not stay empty for long.	NO	Public Access website	15-Mar-24
24/00021/FULEIA	Shollar	Leah-Perl	I was shocked to hear about the recycled proposal for a tower to be built adjacent to the historic Bevis Marks synagogue. This is a building that stands as a testament to a unique period in British and Jewish history. The synagogue and it's congregation are one branch in an association of Spanish-Portuguese Jewish communities around the world. This is the synagogue of Benjamin Disraeli 's father and of Moses Montefiore. It's unconscionable that its standing or functioning should be harmed or impinged upon. If this were an historic church or mosque would this step even be considered? Please come down on the right side of history. We owe it to our future generations.	NO	Public Access website	15-Mar-24
24/00021/FULEIA	Fox	Nicola	protection of a unique historical synagogue of which so few remain in London - our cultural heritage must be secured	NO	Public Access website	15-Mar-24
24/00021/FULEIA	Marrache	Jacob	Save the historic nature of the neighbourhood. So much of it has already been lost. Save Bevis Marks synagogue from being overshadowed and lost between a jungle of skyscrapers.	NO	Public Access website	15-Mar-24
24/00021/FULEIA	Martin Wright	Julia	Having read the new application I cannot see how this is materially different from the previously rejected application of two years ago which would have had a deleterious impact on Bevis Marks. As Bevis Marks now sits within a conservation area, the building and its immediate environs has been recognised as an area of the City of special historic and architectural interest worth preserving now and for generations to come. This new planning proposal will do nothing to preserve the particular character and historic significance of Bevis Marks and the surrounding area.	NO	Public Access website	15-Mar-24
24/00021/FULEIA	Shelper	Jonathan	Keep it looking traditional. That's what we have to preserve.	NO	Public Access	15-Mar-24
24/00021/FULEIA	GURNEY	DAVID	I'm not Jewish but I work in the city round the corner from bevis marks on mark lane. Please don't destroy the history of the CoL for yet another massive tower we don't need as occupancy rates plummet. Enhance the environment to increase take-up. Please don't build another soleless block to sit empty for years	NO	Public Access website	15-Mar-24
24/00021/FULEIA	Skellon	Katherine	Bevis Marks synagogue is a unique and significant historic building that needs to be protected from this planning proposal and future ones.	NO	Public Access website	16-Mar-24
24/00021/FULEIA	Hughes	Tricia	To preserve and not overshadow synagogue and historical area of London.	NO	Public Access	16-Mar-24
24/00021/FULEIA	Lawson	Robert	This should be objected to as it would leave the nearby historical synagogue in darkness.	NO	Public Access	16-Mar-24
24/00021/FULEIA	Odebi	Idris	The tower looks high quality and sleek and will enhance londons skyline and forge greater growth in high quality office space which is imperative for londons economic development.	NO	Public Access website	16-Mar-24
24/00021/FULEIA	Crew	Steve	Great proposal, fitting for our global city. Why was it ever refused in the first place?	NO	Public Access	16-Mar-24
24/00021/FULEIA	Arenas Martinez	Ivan	Really like the facade of this building, I think it would be a phenomenal addition to the skyline.	NO	Public Access website	16-Mar-24
24/00021/FULEIA	W	A		NO	Public Access	18-Mar-24
24/00021/FULEIA	Brady	R	I support this development as its a high quality design which will help maintain London's position as a premier financial centre and a can do global city in which to do business, invest and create jobs and thus be a net benefit to the local economy and wider UK economy. The current office buildings are tired, unattractive to business and hard to let. New office space will attract business, create jobs and help support local service based businesses and pay much needed local taxes. The usage of the synagogue is unaffected by this proposed development, likewise the opinion of a religious organisation who's building is used occasionally by a small group of people and should not be detrimental to job growth and tax income for the local community.	NO	Public Access website	18-Mar-24
24/00021/FULEIA	Varsamis	Dimitri	* We really really really don't need another super tall empty office block to sit there, or for companies to move into it by vacating other existing offices in the City. * Despite the long reports by 'specialists' who will write what you pay them to write, ultimately this design will overshadow literally and figuratively the nearby synagogue. * A similar design with little material difference was objected 3 years ago. * The carbon emissions due to building a 40+ storey building are unacceptable. * The Holland House design is not sensitive to the original art deco look. The addition of white tiles doesnt go with the austere look. * And definitely the addition of yet more 2 floors on top, cladded in awful white stripes dont either just because they are the same width apart as the original lines, it doesnt make the extra floors look right. Any changes to Holland House need to be in muted weathered concrete look (and ideally not add yet 2 more floors). * Update the existing Holland House, and ideally Bury House, by retrofitting.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Beloff	Jonathan	I do not understand the City of London's constant threat to my synagogue, Bevis Marks. This synagogue is over 300 years old as it contains the first Jews allowed back into the United Kingdom after the 13th-century expulsion. At this time, with increased anti-semitism and attacks at Jewish institutions, I would suspect that the City of London would try to show itself as an international city that respects all faiths. However, it continues to illustrate that some people can be ignored, which justifies anti-semites' belief that Jews are not welcome. The developers of the tower block have not, in good faith, engaged with Bevis Marks Synagogue or the Jewish community, which uses the synagogue as their religious centre. The tower will overshadow the synagogue, posing a significant security threat and hampering Jewish practice, which requires uninterrupted access to the southwestern corner for light in our religious practices. The proposed Creechurch Conservation Area was to protect not only Bevis Marks Synagogue but the unique architecture and history of the region. However, many within the community feel that they were intentionally misled, with the exception of this 45-storey building. If the City of London does not care about Jews or protected minorities, especially in this climate of divisionism and hatred, it must be at least honest with its intentions. History is now being made. Will the City of London repeat the mistakes of the past by dismissing Jewish concerns or stand on the right side of history and actually follow through on their commitments to protect all those who reside and engage in the City and protect Bevis Marks Synagogue? Don't allow this massive building to be built that will greatly harm the longest-serving Jewish community in the UK just for some office space that will most likely be empty with the hope of 'future occupency'. Do the right thing. Bevis Marks Synagogue must be protected from this unnecessarily large construction protect that will	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Garson	Raphael	This special site should not be blocked by a new tower block. The lighting is limited it as it is. It would be a disaster for worshipers.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Bonnet	Joel	Bevis Marks Synagogue is a Grade 1 listed building and the oldest continuously used synagogue in Britain, dating from 1701. A 45-storey structure would completely overwhelm the synagogue by overshadowing its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations and would further reduce daylight in the synagogue, making it even more difficult to conduct worship. The proposed building would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Kimhi	Emmeli	Will destroy the setting at this important historical sight for Jews in London but also Jews all over the world visiting the synagogue	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Millunchick	Samuel	This tower along the synagogue's southern horizon would destroy the setting of the synagogue, which is so important to traditional ritual and to what makes the synagogue a community hub, and would reduce the synagogue's natural light levels beyond usability.	NO	Public Access website	19-Mar-24

24/00021/FULEIA	Knott	Wendy	At 300 years old Bevis Marks Synagogue runs along the edge of this development. Building a 45 storey towerblock will reduce the natural light within the Synagogue to an unusable level. It will make holding prayer services and community events untenable. It will also destroy the unique setting of the Grade 1 building, which is so crucial to the community and to the ritual of its hub.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Reginald	S	London's status as a global city has been on decline since 2020 when we stopped dreaming big and focus on the opinions of small but very vocal groups of people. - The City is already cornered on all sides by restrictions, from St Paul's sightlines in the West, Tower of London silhouettes in the East, height limits imposed by the CAA, ancient roman streets and many, many conservation areas. - Why we stopped progressing and lost our vision for the future, I'm not sure. - This tower is of high quality design, much better than the glass blocks i've seen going up around it. It's not too tall and would fit wonderfully in the 'mountain' that is our City cluster. - The City's 2040 plan highlights the need for millions of square feet of office space, where will you find that space if you keep rejecting every new tower proposal? - I think Councillors should seriously rethink what position London stands at in the world and whether focusing on NIMBYism and economic regression is really the way forward here?	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Toff	Penelope	The Bevis Marks synagogue is the jewel in the crown of British Jewry and I am personally connected to it, as my ancestors were among those who sold their land in the 17th century, so that this beautiful and significant landmark could be built. Having recognised its historical, cultural and architectural significance, it is beyond credibility that the prestigious City Corporation would not immediately act to protect the building's integrity inside and out, as well as that of other heritage buildings nearby, by rejecting this re-application to build a 45-storey tower - utterly out of keeping with this unique setting, which is furthermore a conservation area. It has already been clearly demonstrated that the proposed tower would block natural daylight and obscure the view of the sky, which are both so vital a part of the worshipper and visitor experience of being in this unique and sacred environment. The synagogue courtyard would be overshadowed, making it impossible to conduct meaningful rituals and services outside - in effect destroying the rights of those using the building to enjoy it peacefully and in full for the purpose for which it is intended. The City Corporation is entrusted with guardianship of the area in its entirety and as a whole and welcome as its efforts toward sustainability and reducing traffic are, these would be expected as part of any contemporary planning and are not a substitute for the proper preservation of each historical asset, with their and their users' own unique needs, in line with equality legislation and good practice. This also includes greater efforts to conserve buildings wherever possible, for example Holland House, rather than destroy and rebuild. I hope that the City Corporation will seize this opportunity to be on the right side of history and reject this building application, in order to properly protect the integrity of this precious resource for future generations.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Green	Michael	I am regular worshipper at Bevis Marks and I am concerned about the impact this building will have on the available light and access to Bevis Marks Synagogue	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Orenstein	Joe	As before with the last application the proposed design is not of a design which is in keeping with the scale, character, or appearance of the conservation area and will impact the 300 year old Grade 1 Listed Bevis Marks synagogue which should be protected at all cost. This proposal along the synagogue's southern horizon would destroy the setting of the synagogue, which is so important to the community and its rituals and would reduce the synagogue's natural light levels beyond usability as the synagogue relies predominately on candlelight. I therefore consider that the proposal is contrary to the new conservation area that was meant to protect synagogue from over development and request that the planning application is refused.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Ledman	Rebecca	It would overshadow the Historical Buildings of Central London and put the Historical Synagogue in the dark.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Cabrera	Carlos	For the second time in two years a developer is proposing a 45 storey tower a stone's throw from Britain's Jewish "cathedral" - the 300 year old Grade 1 Listed Bevis Marks synagogue. This tower along the synagogue's southern horizon would destroy the setting of the synagogue, which is so important to traditional ritual and to what makes the synagogue a community hub, and would reduce the synagogue's natural light levels beyond usability. The City does not need another useless behemoth skyscraper.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	O'Connell	Theresa	These plans will seriously impact the southern light aspect of Bevis Marks Synagogue and therefore will have an impact on religious rituals and rites. Bevis Marks Synagogue is an important part of the heritage of the City of London and many people would like the character of this beautiful building to remain unchanged and to be able to fully function as a Synagogue within the City of London.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Van den Bergh	Martin	Like the previous proposal which was rejected, this proposal will be detrimental to the historic Bevis Marks Synagogue. The Synagogue not only serves its members and visitors. It has been the venue for many City of London occasions as well as national and international celebrations and commemorations. For the short time that I served as interim Rabbi I personally officiated many such events as well as weddings and life cycle events. The building proposal will diminish the unique character of the Synagogue and will also impact on its standing as a national treasure, not only for the Jewish community, but also for the City of London and as centre of interest for visitors from over the whole world.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Kendall	Rebecca	Bevis Marks is over 300 years old and an incredibly important place of worship for the Jewish community. This 45 storey tower will greatly diminish the synagogue's natural light and reduce usability for this important and historic landmark.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Altneu	Emily	I have previously objected to this development. I have visited Bevis Marks synagogue many times. It is vital that this synagogue does not sit in darkness. Equally that it keeps the privacy of a place of worship - not towered over by an office block. London is a unique city for it's history. Too often this is now being overshadowed. It will lose it's character. If this building was next to somewhere like St Paul's it would never be built. We cannot overshadow our Grade 1 listed buildings. Too many were bombed in our previous wars. Let's preserve what we have left. Why not refurbish the existing building? What use is a conservation area if this is allowed to be built - you are undermining the quality of London.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Barnett	Ian	Total inappropriate and unnecessary infringement of both h space and light in this historic religious building in constant use. It would be a total dereliction of your duty to allow this or any other similar structure to be erected . There is already an abundance and oversupply of commercial etc buildings nearby and saturation of new developments . The recent decision of two years or so ago to refuse permission for another similar structure on much the same grounds should carry forwards indefinitely.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Souroujon	Stephanie	This is being built adjacent to one of the most important jewish buildings in Europe. The proposed construction would ruin an important architectural feature as it would block the courtyard. There shouldn't be any tall buildings next to such an important monument.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Stone	Lee	The nearby synagogue is an institution and a landmark. It is crucial and part of its essence to have clear views to to the South to preserve the natural light and no tower block should even be built which would obscure this.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Pitts	Jonathan	Bevis Marks synagogue was opened in 1701. It's very sad to see over 300 years of history potentially being overshadowed by a big new building.	NO	Public Access website	19-Mar-24
24/00021/FULEIA	Forbes	Karen	Why do you need this building next to a snyagoge	NO	Public Access	20-Mar-24

24/00021/FULEIA	Querfurth	Keren	Creechurch CA sits within the City Cluster - an area considered sensitive to tall buildings. City Plan 2040 Jan 2024, cites the importance in considering, 'inappropriately sited tall buildings can have an adverse impact on [..] designated heritage assets [..] and their settings. They can undermine the character of a place [..] cause adverse environmental impacts such as reduction in daylight [..] and overshadowing.' [Pt 3.5, CP 2040]. The paper highlights the importance of setting to BM Synagogue: 'Where the setting, immediate or otherwise, of a listed building contributes to its significance, then tall building proposals would be sensitive. An example would be BM Synagogue, where the low-midrise buildings enclosing the synagogue and its courtyard are an element of setting which contribute positively to its significance. This sense of enclosure is therefore sensitive to tall building development.' [Pt 9.105, CP 2040] Observations relating to tall buildings and the future of the City Cluster are made by Historic England Note 4 Tall Buildings (HEAN 4): '[..] the tall buildings proposals were likely to [..] come forward in locations and at heights that would cause serious harm to [..] key heritage assets.' Historic England require planning apps to be supported by Heritage Impact Assessments (Pg 31, HEAN 4). This application provides a Heritage Statement relating to the development of Holl Hse (low rise) and a Heritage Impact Statement relating to the impact on the TofL. We see no Heritage Statement relating to the impact of the proposed tall building on the setting of BM Synagogue, a listed heritage asset. CP 2040 requires the testing of individual tall building proposals against the requirements of the NPPF. This includes giving 'weight to the conservation any heritage asset's significance, including how this is appreciated through the asset's setting. (Pt 25.4, CP 2040).	NO	Public Access website	20-Mar-24
24/00021/FULEIA	Waterman	Dov	My family and I are regular users of Bevis Marks Synagogue. The courtyard setting, with its mid rise buildings allowing views to the southern sky, are imperative and form a cohesive part of the heritage of the synagogue and of the experience of the user. The setting of this heritage asset will be adversely impacted, and diminished, with the blocking of the southern sky by the proposed tall building.	NO	Public Access website	20-Mar-24
24/00021/FULEIA	Lebon	Scott	I support this impressive proposal. The provision of affordable workspace to small companies will be very beneficial to new and starting enterprises. At a time of increased cost of doing business, this is very welcome. This location is very close to the Gherkin and other major developments, so suitable for a tall building. It is aesthetically pleasing and constitutes a step down from the taller elements in the cluster. It will contribute to the visual coherence of the City cluster London is a dynamic city and always changes. If one listened to NIMBYs, nothing would ever get built.	NO	Public Access website	20-Mar-24
24/00021/FULEIA	de Vries	Arnold	The application would block the light into a national treasure. It is used by the public and is also a tourist destination that should be celebrated and protected for us and future generations.	NO	Public Access website	22-Mar-24
24/00021/FULEIA	Ehrenzweig	M	This development would knowingly block the historic views of and from Bevis Marks synagogue which is a crucial landmark in the history of London and the Jewish contribution to London life. It serves as a religious and cultural place of observance which relies on the sun to determine prayer times. If this development is built it will block out the vital sun view and light incoming which makes the synagogue special and functional. It is more important than ever to preserve the historical and cultural way of life special to this part of London City's heritage. Please do not spoil this ancient religious and cultural place of workshop for a building that no one will remember.	NO	Public Access website	22-Mar-24
24/00021/FULEIA	Silver	Lorraine	Bevis Marks is a Grade 1 listed building and its historical presence needs to be preserved. The proposal would cause loss of natural daylight to the Synagogue and its courtyard. The planning application should be refused as construction of the new building would be severely detrimental to the oldest Synagogue in London.	NO	Public Access website	22-Mar-24
24/00021/FULEIA	Stolerman	Professor Ian	The development site is within the Creechurch Conservation Area. Its placement there would make a mockery of the concept of conservation areas and discourage its use in the future. A gigantic tower would bury a Grade 1 Listed building of enormous historic and cultural significance. The building would overshadow the courtyard for much of the day, reducing its usefullness for religious events and for community gatherings. There would be no view of the sky, a vital part of the setting of the synagogue. The tiny amount of daylight that at present reaches the synagogue would be reduced even more.	NO	Public Access website	25-Mar-24
24/00021/FULEIA	Nyman	Susan	the synagogue would be overwhelmed by a 45 storey tower. It is a grade 2 listed building of great historic and cultural importance. It would destroy the southern skyline of which the setting of the synagogue is part. A 45 storey building would completely overshadow the synagogue. I cannot see any planning benefits that such an enormous tower would have in the context of Bevis Marks and the City. I am very sad that we keep having to go through this fight to save our heritage in Bevis Marks.	NO	Public Access website	25-Mar-24
24/00021/FULEIA	Kramer	Miriam	After rejecting the initial application the City is now considering a similar one. To be blunt, a 43-storey building will overwhelm and dwarf Bevis Marks Synagogue, which has been on the site for some three centuries and is Grade 1 listed. The synagogue and its courtyard will be overshadowed for much of the day. In addition the proposed development is in the Creechurch Conservation Area. The City's current planning policy is not to allow tall buildings in conservation areas, so how can this be justified? Its erection would compromise the setting of other heritage areas as well as the quality and integrity of this particular one. The Corporation of London, on the one hand, recognises the importance of Bevis Marks Synagogue but on the other facilitates this eyesore in the wrong place. I object very strongly on all the grounds described above.	NO	Public Access website	25-Mar-24
24/00021/FULEIA	Leon	Jean	I agree with all the other comments about the damage this would do for the synagogue, and the wider Jewish community. At a time when British Jews are facing such isolation and discrimination as it is, this is a horrific and thoughtless proposal. Please reconsider and stick to your own word. Protect the synagogue, this space and the Jewish community.	NO	Public Access website	25-Mar-24
24/00021/FULEIA	Ross	Xander	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. At a time when British Jews are facing such isolation and discrimination as it is, this is a horrific and thoughtless proposal. Please reconsider and stick to your own word. I urge you to refuse this application, to protect the synagogue, this space and the Jewish community.	NO	Public Access website	25-Mar-24

24/00021/FULEIA	WATERMAN	Stanley	A tower of 45 floors would completely engulf the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. As a building such as the one planned would not be permitted to rise next to St Paul's Cathedral, why is Bevis Marks Synagogue not afforded the same preservation? The building would destroy the southward view, an essential part of the setting of the synagogue and important for the intangible qualities it contributes to religious observance. It would block the light fromthe synagogue and the courtyard for much of the day. This would reduce the way in which of the courtyard could be used for religious practice and celebration and would also reduce the already minimal daylight that penetrates into the synagogue even further, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting impractical. Importantly, the development site is within the Creechurch Conservation Area and current planning policy is not to permit tall buildings in Conservation Areas, so the proposal is in direct conflict with the statutory development plan. The current building at 31 Bury Street is only 40 years old and could be refurbished and thereby provide good service for many more years. This planned and inessential demolition simply fritters away the energy embodied in the building. Moreover, the proposed building would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole. The City Corporation is being insincere here, by claiming to recognize the importance of the synagogue, yet at the same time facilitating this grotesque development.	NO	Public Access website	25-Mar-24
24/00021/FULEIA	Seres	David	This proposed development would be detrimental to the beauty of a historical landmark in the City of London and would seriously affect its light . This buiding is not only the oldest place of worship in the City but is a great tourist attraction bringing many visitors to view its unique architecture.	NO	Public Access website	26-Mar-24
24/00021/FULEIA	Levene	Peter	You will be aware that this is not the first application for a very tall building in the area and when the previous application was turned down, I believe erroneously, that the Planning Committee had decided that such buildings at such a height close to the synagogue should not be permitted to be built. The fact that this synagogue is the oldest, both in the UK and in Europe, and is also a Grade 1 listed building with all its historical and cultural interest should, in my view, in itself be sufficient cause to reject this application. At the time of the Bishopsgate bomb, I formed a group to campaign for funds for the repair of the synagogue following the damage that has been caused. The contributions to this appeal were led with a large and generous donation from the Corporation of London, who fully appreciated the importance and significance of this building. It was thus subsequently repaired, and able to continue as a highly respected place of worship. This new building not only overshadows the synagogue and its courtyard but, more importantly, reduces the already minimal day light that penetrates the synagogue making it even more difficult to conduct worship. Additionally, the development site is within the conservation area. Currently planning policy is not to allow buildings in conservation areas so there is a direct conflict with the statutory development plan. The planning benefits that are outlined in the application do not stand up to close scrutiny. Many are simply features that would be expected in any modern commercial building and do not represent any gain to the community. The considerable outcry which would meet the granting of planning permission would rebound significantly against the reputation of the Corporation of London. This building of the synagogue is not only the oldest synagogue in Europe, as I have mentioned, it is also one of the oldest buildings of religion in the whole of the City of London, predating many of the churches which ar	NO	Public Access website	26-Mar-24
24/00021/FULEIA	Montagu	Sarah	I am truly disappointed that the developers have once again submitted a proposal of an enormous building for this site. As a member of the Jewish community, the importance of this immediate area cannot be overstated; the historic building of Bevis Marks which has been a landmark of this area for centuries will be completely boxed in by this building, preventing light from reaching the windows (and due to the ancient fabric of the building, it is not possible simply to increase the electric light fittings to the interior to compensate) and destroying the setting and atmosphere of the synagogue courtyard. The synagogue is a Grade 1 listed building, and it is of enormous cultural and religious significance, as the oldest synagogue in the country, the flagship synagogue of the Sephardi Jewish community and still in regular This proposal drives a coach and horses through the nature of the Conservation Area within which this site lies, where no tall buildings are supposed to erected, which will affect not just the synagogue but the whole conservation area and the other historic buildings within it. I do not think that the claimed benefits to the community will outweigh the profound damage to this sensitive site and I do not think that the claimed eco benefits can be set against the detriments of demolishing the embodied carbon within the existing building of 31 Bury Street.	NO	Public Access website	26-Mar-24
24/00021/FULEIA	Bower	Patrick	As a user of Bevis Marks synagogue I am upset to see that you are again considering a planning application which would have such a adverse impact on this Grade 1 listed building, the most important Jewish site in the UK. This unique 18th century building is a haven of peace in the midst of a concrete jungle. Would you allow new tower blocks of this kind to overshadow St. Paul's cathedral? The proposals would further diminish this sanctuary, by stealing its light and blotting out its view of the sky. It would be disingenuous in the extreme to create the Creechurch Conservation Area and then to permit this massive overdevelopment next to the synagogue.	NO	Public Access website	26-Mar-24
24/00021/FULEIA	Somekh	Jonathan	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Graziani	Lia	This is not good for the Jewish community and those attending Bevis Marks Synagogue.	NO	Public Access	27-Mar-24

24/00021/FULEIA	Holland	Sasha	As a concerned member of the public, I strongly object to the proposed construction of a massive skyscraper near one of the oldest synagogues in London. This iconic synagogue holds immense historical and cultural significance, representing a vital part of London's heritage. The construction of such a towering structure nearby would not only disrupt the aesthetic harmony of the area but also pose potential threats to the synagogue's architectural integrity and religious sanctity. Additionally, the increased congestion, noise pollution, and overshadowing caused by the skyscraper would diminish the tranquility and solemnity of this sacred site. Preserving the character and sanctity of our religious landmarks should be prioritized over the development of imposing commercial structures.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Sorani	Ornella	This is not good for the Jewish congregation who go the Bevis Marks synagogue and also for the area.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Levy	Oliver	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member and regular attendee of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. 24/00021/FULEIA	Lebrecht	Elspeth	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Setton	Malcolm	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a regular visitor to this part of The City and am distressed to see this new proposal, especially after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. The application has not changed since the last time it was submitted, is not in keeping with the conservation of a close by Grade-1 listed building, which is now also in a conservation area. The area is already overun with sky scrapers. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral or The Royal Exchange to mention other proected areas in the vicinity. I urge you to refuse this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Ison	Michael	I am writing to express my strong opposition to this new application (24/00021/FULEIA). I have been a member of Bevis Marks' Spanish & Portuguese Jewish community for over 30 years and have held important family occasions there. I am very upset to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted a short distance from British Jewry's 'Cathedral' Synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	lee	corinne	Having gone through the last consultation in respect of the protection of an area surrounding Bevis Marks synagogue, and that consultation resulting is what was thought to be a permanent 'exclusion' zone that would allow the synagogue to finally be assured that its need for natural light was guaranteed, City planning appear to have moved the goalposts to enable the application for another enormous structure to tower over the synagogue to go ahead. Quite frankly, it beggars belief. The historic importance of Bevis Marks to both the City and the Jewish Community should be at the forefront of the decision making, not viewed as an inconvenience as it now seems to be. It brings shame on the Corporation that this should even be considered.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Sopher	Rick	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). As a member of the Spanish & Portuguese Jewish community which includes Bevis Marks synagogue, I ask: How is the current proposal substantially different from the one you refused refusal two years ago? Is this proposal not in a conservation area? The new application blocks the light of the synagogue, does it not? I urge you to refuse this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	SUEKE	JOHN	it is utterly distressful and a disgrace that permission has been granted for a building to overshadow and block out light of one of the oldest if not the oldest religious buildings in the area and one of the oldest in the country my protest has nothing to getting the developer to pay any compensation but the callousness of the Planning authority which is shameful and questions their competence to protect the historic and religious sites of the great capital city of our country.	NO	Public Access website	27-Mar-24

24/00021/FULEIA	Cohen	David	Dear Cit of London Council, I am writing to register my vehement objection to application number 24/00021/FULEIA. As a member of the Spanish & Portuguese Jewish community in Bevis Marks, I am deeply troubled by this renewed proposal, especially considering its rejection just two years ago and the recent establishment of the Creechurch Conservation Area. This application, demonstrably similar to the previous one, appears completely insensitive to the preservation needs of a Grade-I listed building. Let me remind you, this very building is not only the most significant Jewish site in the UK, but also resides within a designated conservation zone. The proposed tower, positioned directly south of the synagogue, would be a towering intrusion on the surrounding environment. It would not only obstruct the religiously significant southern sky-view, but also cast a shadow over the synagogue and its courtyard, drastically reducing its already limited natural light. Surely, such a proposal would never be entertained near St Paul's Cathedral. Why then, should it be considered just meters away from the "Cathedral Synagogue" of British Jewry, particularly on its most sensitive southern side? I implore you to decisively reject this application. Sincerely, David	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Gomes da Costa	Marcus	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. 24/00021/FULEIA	Green	Charlotte	I am really shocked by this proposal and am writing to say that I very much object to this new application. (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and my family has a long association with it, and my daughter was married there. I am also a member of the Worshipful Company of Spectacle Makers. I am absolutely appalled to see this new proposal in what is a Conservation Area (the Creechurch Conservation Area.) I am all the more appalled, given its refusal two years ago. I would also like to point out that this new application, (pretty much the same as it was last time) is completely out of keeping with the conservation of the Grade 1 Listed Building, our Synagogue, which is the most important Jewish site in the UK. The proposed tower to the immediate South of the Synagogue, would completely dominate it and its courtyard, and it would block out the religiously important southern sky-view. This kind of proposal would never be allowed near St Paul's Cathedral, and should certainly not be allowed just metres from British Jewry's Cathedral Synagogue, particularly along its sensitive southern exposure. Please refuse this application. Charlotte Green	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Leon	Roger	Bevis Marks Synagogue is a treasured landmark, not just in the City of London but as part of our heritage, as a Sephardi Jew and as a British Citizen. Services have been carried out there for centuries and are still taking place there every single day. It is not just a religious landmark, but part of out history as a free and tolerant society. A skyscraper as envisaged by the developer would be a disaster, not just for Bevis Marks Synagogue, but for the area around it.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Leon	Roger	Bevis Marks Synagogue is a treasured landmark, not just in the City of London but as part of our heritage, as a Sephardi Jew and as a British Citizen. Services have been carried out there for centuries and are still taking place there every single day. It is not just a religious landmark, but part of out history as a free and tolerant society. A skyscraper as envisaged by the developer would be a disaster, not just for Bevis Marks Synagogue, but for the area around it. A previous application was turned down, This one should as well. 24/00021/FULEIA	Dawood	Cindy	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application. Yours sincerely Cindy Dawoo	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Marshall	Vivien	I wish to protest against the 45 floor high rise building that is being planned near the Bevis Marks Synagogue. Every time we get a ruling saying that the application has been denied another planning application pops up with just a few tweaks on it. Please could you make sure that the Synagogue is protected from further incursions of light and space. It seems so unnecessary to waste money in fighting planning applications when the money could be used for the local community. With best regards, Vivien Marshall	NO	Public Access website	27-Mar-24
24/00021/FULEIA	salem	phili	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am very concered to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely revised fromthe last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its already compromised remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	27-Mar-24

24/00021/FULEIA	Webber	Michael	It is understandably upsetting to see the above revised planning application, despite the previous one having been rejected only circa 2 years ago. As the area around the Bevis Marks Synagogue is now classified as a Conservation Area it is puzzling to understand how there can be a new planning application for a 45 floor tower just 3 less floors than the one refused circa 2 years ago. The proposed new building, as will undoubtedly be readily appreciated by the City of London Corporation, will have a significant, material & detrimental effect on the Bevis Marks Synagogue in terms of blocking out the southern sky view, and overshadowing the synagogue itself and its courtyard, which already has limited light. It should be noted that the Bevis Marks Synagogue is the oldest synagogue in the United Kingdom, in continuous use. The synagogue was built in 1701 & is the only synagogue in Europe which has held regular services continuously for more than 320 years. Bevis Marks Synagogue is therefore an important heritage asset of the UK & I hope that the City of London Corporation will use its best efforts & all the powers at its disposal to appropriately protect & safeguard this important heritage building.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Fellerman	Naomi	The proposed development would completely overshadow Bevis Marks Synagogue a historic and culturally important Grade 1 listed building. I cannot imagine any building of this height being allowed near other important religious centre's such as St Paul's Cathedral. This building if developed would completely overshadow the synagogue and its courtyard for much of the day, virtually rendering the courtyard unusable for rituals and celebrations. The amount of daylight within the synagogue would be further reduced making it difficult for worshippers and it is impossible to add further lighting because of the age and status of the building. This is a conservation area, so why would any development of this type be allowed?	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Adler	Fiona	The proposed 45-storey tower fundamentally disregards the sanctity and significance of the Grade 1 Listed synagogue, a cornerstone of historical and cultural heritage. Its towering presence would not only overshadow the sacred site but also obstruct essential religious observances such as celestial observations integral to rituals. Furthermore, the development contradicts existing planning policies barring tall structures in conservation areas, directly conflicting with statutory guidelines. The City Corporation's facilitation of this project reflects a stark hypocrisy, claiming to value heritage while condoning its desecration. The purported benefits pale against the irreversible harm to the synagogue and its surroundings. Moreover, the demolition of a structurally sound building signifies wastefulness and environmental neglect. This proposal jeopardises the integrity of the entire Conservation Area, betraying the trust of the community and failing to uphold the standards expected of the Corporation of London.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Salem	Freddy	The erection of the proposed building will overshadow Bevis Marks synagogue and will cast a shadow over the entirety of the site putting the synagogue in the shade all year round. Bevis Marks trustees have invested time and money to create a destination viewing of the synagogue and it's artefacts which will be enjoyed by locals and tourists from all over the world. Placing the synagogue in the shade 24/7 is not attractive to visitors.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Garcia	Barry	I must oppose to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This application, hardly changed since the last time it was submitted, it is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. Please stop this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Kaplan	Myles	A 300 year old Grade 1 listed building must be protected from unsympathetic designs and architectural blindness and be afforded the same dignity as St Paul's Cathedral. Is this an example of "Jews Don't Count" once again? Are these tower's even necessary? I would object to the building of any towers in this already densely built-up area.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Brooke	Jennifer	27th March 2024 FAO: Case Officer Anna Tastsoglou I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. 24/00021/FULEIA	Martin	Maurice	As a regular worshipper at Bevis Marks Synagogue I object as the proposed building would block out the light for our prayers	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Martin	Maurice	As a regular worshipper at Bevis Marks Synagogue I object as the proposed building would block out the light for our prayers	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Ofer	Lina	I vehemently oppose this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community. I know a very similar proposal was refused two years ago. I cannot understand why this proposal has been put forward when it had already rightly so been denied. This application, contradicts the conservation of a Grade-1 listed building. It is also now in a conservation area, and also an incredibly important Jewish site in the UK. The new tower would Overshadow the setting of the synagogue and its courtyard as well as block out the religiously important southern sky-view. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application. Lina Ofer	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Mendoza	Alan	I am reaching out to vehemently oppose the recent submission of application 24/00021/FULEIA. I find the reintroduction of this proposal deeply troubling, especially considering its previous rejection two years prior and the subsequent designation of the Creechurch Conservation Area, which this application undermines. The proposal, which shows minimal alterations from its prior submission, fails to respect the architectural and historical integrity of the Grade-1 listed Bevis Marks Synagogue, now located within a conservation area. This site holds unparalleled significance for the Jewish community in the UK. The construction of the proposed tower directly to the south of the synagogue would severely impact the site, obscuring the religiously significant view of the southern sky and significantly reducing the natural light reaching the synagogue and its courtyard. It is unthinkable that such a project would be entertained near St Paul's Cathedral. It is equally inconceivable that it should be allowed so close to what could be considered the cathedral synagogue of British Jewry, especially given its vulnerable southern aspect. I strongly advocate for the rejection of this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Zubaida	David	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. 24/00021/FULEIA	Garson	Meir	hugely detrimental to listed building,-Bevis Marks-a landmark which should be better protected especially natural light in a building of such importance.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Simon	Ann	For the second time in two years a developer is proposing a 45 storey tower a stone's throw from Britain's Jewish "cathedral" - the 300 year old Grade 1 Listed Bevis Marks synagogue. This tower along the synagogue's southern horizon would destroy the setting of the synagogue, which is so important to traditional ritual and to what makes the synagogue a community hub, and would reduce the synagogue's natural light levels beyond usability. Please refuse this application and any future similar applications. The city should be proud to have this "jewel" without letting it become dwarfed by such a monstrosity.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Dwek	Marie-Anne	Sad that this is even being suggested and the blocking of one of Britain's historic buildings at a time when there is such a rise in antisemitism and London being seen as a no go zone for Jews. It adds to the negative sentiments being felt	NO	Public Access website	27-Mar-24

24/00021/FULEIA	Davidson	David	I strongly oppose this new application. Several generations of my wife's family have worshipped at Bevis Marks Spanish & Portuguese Synagogue. My wife and I have attended services there. I am appalled at this new proposal particularly after the refusal of an almost identical one and the recent adoption of the Creechurch Conservation Area. This new application, a barely revised version of the last one, is not in keeping with the conservation of a Grade 1 Listed Building, which is now also in a Conservation Area and is the most important Jewish site in the UK. The new tower to the Synagogue's immediate south, would dominate the setting of the Synagogue, block out the religiously important southern sky view, and overshadow the Synagogue and its courtyard, dwindling its remaining light. A proposal of this nature would never be considered in the vicinity of St Paul's Cathedral. It should not be permitted just metres from British Jewry's oldest Synagogue, in effect its Cathedral Synagogue. I urge you to refuse this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Arwas	Jenny	I am writing to express my strong opposition to this new application (24/00021/FULEIA) I am a member of the Bevis Marks Spanish and Portuguese Jews' Synagogue and the recent adduction of the Creech conservation area. This new application barely changed is not in keeping with the conservation of a grade one listed building which is now also in a conservation area. The new tower would dominate the setting of the synagogue block out the religiously important southern Skyview and overshadow the synagogue and its courtyard. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should not be permitted meters from the British juries Cathedral synagogue. I urge you to refuse this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Bekhor	Jack	I'm a member of the Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. The proposed building would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole. I urge you to refuse this application.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Zinkin	Peter	The scale of the development at 43 +4 is massively too large for the Bevis Marks synagogue and obviates the point of the conservation area. The southern view will be devastated and the courtyard over shadowed.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Jacobs	Steven	Concerning the new building: It is welcoming to see this project being revised and resubmitted. I wish to see it approved, and I would look forward to the positive effect it will have on the City's skyline. Despite being shorter than the original proposal (20/00848/FULEIA), the updated design still retains a slender silhouette with a progressive taper. Such a form creates an interesting contrast with the broader, rounded shape of the neighbouring 30 St Mary Axe. When seen from vantage points around Tower Bridge, this proposal would appear to the right of the taller tower approved at 100 Leadenhall Street (22/00790/FULEIA). Its comparatively lower height would provide a more gradual transition between the Eastern Cluster and the low-rise buildings beneath it, balancing the view of the cluster as a whole. Concerning Bevis Marks synagogue: It is necessary to mention that the compromises made to the current proposal address concerns from other correspondents regarding the synagogue at Bevis Marks. According to documents submitted in this application, the loss of light to the synagogue is expected to be minimal. The Impact Assessment lists the Cumulative Magnitude of change on Bevis Marks as Very Small. (See ES Volume 2: Heritage, Townscape and Visual Impact Assessment, page 36.) More precisely, the most significant effect caused by this proposal is a mere four-hour reduction in APSH on two of the synagogue's windows. (See Appendix: Daylight, Sunlight, Overshadowing, Light Intrusion and Solar Glare, Annex 4: Daylight and Sunlight Results, page 9. The ASPH of synagogue windows W4/F01 and W5/F01 would reduce from 14 hours to 10, and from 12 hours to 8, respectively. Every other window incurs an ASPH loss lower than this. Indeed, many windows are unaffected.) I anticipate that compensation for this minor loss of daylight, if at all deemed necessary, could form part of this project's Section 106 contributions.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Yentob	Robert	I'm writing to express my strong opposition to this new application (24/00021/FULEIA).I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area.This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light.This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure.I urge you to refuse this application. 24/00021/FULEIA	Baroness Deech	Ruth	It is disrespectful to the neighbourhood, to an ancient and significant building, Bevis Marks, even to non-Jews, to put this enormous building near it. It is essential to preserve and enhance Bevis Marks.	NO	Public Access website	27-Mar-24
24/00021/FULEIA	Baroukh	Vivien	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). As a member of Bevis Marks' Spanish & Portuguese Jewish community I am shocked to see this new proposal following its refusal two years ago together with the recent adoption of the Creechurch Conservation Area. The Grade 1 listed building is the oldest synagogue in the UK and of great historical importance. The new application is not significantly different to the last, the building with 45 storeys is contrary to the requirements of being in a conservation area and certainly not in keeping with the conservation of a Grade-1 listed building. This tower located to the synagogue's immediate south, would overpower the synagogue's setting, would have the detrimental effect of overshadowing the synagogue and courtyard thereby reducing the minimal light it already has as well as blocking the religiously important southern sky view. The planning benefits proposed by the developers are certainly not a gain to the community. The refurbishment of the existing building which is still relatively new would be environmentally preferable. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. It is imperative that this application is refused.	NO	Public Access website	28-Mar-24

24/00021/FULEIA	Baroukh	Izzak	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). As a member of Bevis Marks' Spanish & Portuguese Jewish community I am shocked to see this new proposal following its refusal two years ago together with the recent adoption of the Creechurch Conservation Area. The Grade 1 listed building is the oldest synagogue in the UK and of great historical importance. The new application is not significantly different to the last, the building with 45 storeys is contrary to the requirements of being in a conservation area and certainly not in keeping with the conservation of a Grade-1 listed building. This tower located to the synagogue's immediate south, would overpower the synagogue's setting, would have the detrimental effect of overshadowing the synagogue and courtyard thereby reducing the minimal light it already has as well as blocking the religiously important southern sky view. The planning benefits proposed by the developers are certainly not a gain to the community. 24/00021/FULEIA	Hougie	Andrew	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of the Spanish & Portuguese Jewish community which includes Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new 45 storey tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue (a Grade 1 Listed building of enormous historic and cultural significance) and its courtyard, dwindling its remaining light. It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is being disingenuous: claiming to recognise the importance of the synagogue, yet simultaneously facilitating this monstrous development. We are entitled to expect much higher standards from Britain's most prestigious local authority. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	28-Mar-24
24/00021/FULEIA	Donoghue	Denise	Dear Sir/Madam, I am writing to express my deep concern and outrage regarding the proposed construction of a 45-storey tower adjacent to the Grade 1 Listed synagogue. The Jewish community is deeply invested in preserving our heritage and cultural significance and I urge you to reconsider this project for the following reasons: The synagogue holds immense historic and cultural significance, akin to structures like St Paul's Cathedral. Just as it would be inconceivable to allow such a towering structure next to the cathedral, the synagogue deserves the same level of protection. The proposed tower would not only overshadow the synagogue but also obstruct vital aspects of its religious rituals, such as the view of the moon's passage. These are crucial for the spiritual experience within the synagogue. Despite claims of sustainability and good design, the tower is simply in the wrong location. Its presence would diminish the usability of the synagogue's courtyard for rituals and celebrations and reduce daylight entering the sanctuary, hindering worship. It is disappointing that the City Corporation, despite recognizing the importance of the synagogue, is facilitating this development. As members of the community, we expect higher standards from our local authorities. The developers contend that they offer numerous planning benefits that offset the potential harm to the synagogue. However, upon closer examination, these purported benefits fail to hold up, such as being car-free, showcasing holistic environmental design, and implementing consolidated deliveries, are standard features typically found in modern commercial buildings. Consequently, they do not truly contribute to the community or offset the adverse impacts on the synagogue. I urge you to reconsider the approval of this project and reject it, prioritizing the preservation of our historic landmarks and cultural heritage. Our community's identity and spiritual well-being depend on it. Regards, Denise Donoghue	NO	Public Access website	28-Mar-24
24/00021/FULEIA	shamash	david	The proposed development at 31 Bury Street is a monstrosity and should not be allowed. The proposed building will completely overshadow the Synagogue at Bevis Marks and reduce its daylight to a minumum thus severely impacting a valuable heritage site. The site for the proposed building is within a conservation area, so why would you entertain such a monstrosity? The proposed development at 31 Bury Street is a monstrosity and should not be allowed. 24/00021/FULEIA	Gostyn	Antony	I object to the proposed development on the following grounds: 1. The development site is within the Creechurch Conservation Area. The proposed development is in direct conflict with current statutory development plan, which does not allow tall buildings in Conservation Areas. 2. A 45 storey tower would completely overwhelm and overshadow the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance as it is the oldest synagogue in Britain. 3. It would reduce the already low level daylight that penetrates into the synagogue, making it even more difficult to conduct worship. I understand that because of the historic nature of the synagogue, installing additional electric lighting is not feasible. 4. I cannot believe that such a building would be allowed next to St Paul's Cathedral, so why is the synagogue not afforded the same protection? 5. The proposed building would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole. 6. The developers' claim that the planning benefits outweigh the harm to the synagogue. The claimed benefits do not stand up to scrutiny as many are simply features that would be expected in any modern commercial building. They do not represent a gain to the community. 7. The existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and providing good service for many more years. Unnecessary demolition simply squanders the energy embodied in the building.	NO	Public Access website	28-Mar-24
24/00021/FULEIA	Caddy	Adam	A beautiful proposal, from an established architects with a proven track record of high quality buildings. This will be a welcome addition to the area and the wider skyline, the tone and materials used on the facade seem to be of high quality and the slenderness of the tower will visually have a positive impact here. Concerns over lighting to the surrounding buildings appears to be minimal at worst. I fully support this project and welcome its addition to an ever changing and growing skyline.	NO	Public Access website	28-Mar-24
24/00021/FULEIA	Benzecry	Kitty	I strongly oppose the new application (24/00021/FULEIA). I am appalled to see this new proposal following its refusal two years ago and the recent adoption of the Creechurch Conservation Area. This proposal has barely changed since the previous submission and still threatens to overshadow the synagogue and block out its remaining light. This is the most important Jewish site in the UK. The towers surrounding have already vastly reduced the light inside the building. Having had my own wedding in the synagogue last summer, I know it would be a travesty to block out the light to such an important building and would prevent others from being able to enjoy special events in the synagogue. One of my most enjoyable moments of my wedding day was greeting all of our guests as they exited the synagogue and congregated in the sun in the courtyard. This tower would completely overshadow that courtyard, taking away that light to celebrations and festivals which bring our community such enjoyment. It would also block out much more of the light inside the building, making it impossible to read prayer books and preventing worship. We are a multicultural society and pride ourselves on it, yet we don't afford the same protections to historic religious buildings outside of Christianity that we do to Christian buildings in this country. St Paul's Cathedral's light and sight lines are protected, including from distances as far as Alexandra Palace, Kenwood House and Richmond Park. If we protect St Paul's Cathedral to that extent, then it would be a travesty to allow this tower to be built on the doorstep of the British Jewry's Cathedral Synagogue. The drawbacks of this proposal far outweigh any proposed benefits that the developer claims and would be extremely harmful to both the synagogue and the community. I urge you to refuse this application.	NO	Public Access website	28-Mar-24
24/00021/FULEIA	Alliance	Homa	To raise a building of such magnitude in the vicinity of an old building dating to 1701, is inconsiderate as the certain damages to Bevis Marks synagogue will be unimaginable and a big shame, historically. Therefore I request that the authorities will turn down the permission for a high rise office building in this location. Many thanks for your consideration.	NO	Public Access website	28-Mar-24
24/00021/FULEIA	Morgan	Cyril	This is for you to kindly consider my strong objection to the new application (24/00021/FULEIA) re this site. As a long-standing member of Bevis Marks' Spanish & Portuguese Jewish community I was shocked to note that yet another proposal has been made, especially considering this was already refused only 2 years ago. There has also been the recent adoption of the Creechurch Conservation Area. This new application is almost identical to the previous one. It is not in line with the conservation expected of a Grade-1 listed building, which is now also in a conservation area, and is the most important and historic Jewish site in the UK. The proposed new tower to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. A proposal such as this would never be entertained anywhere near St Paul's Cathedral. On no account should such a proposed building be considered only yards from the synagogue which represents the equivalent of British Jewry's Cathedral synagogue. Kindly refuse this application in no uncertain terms so the developers do not return again wasting both your time and that of the local community. Thank you.	NO	Public Access website	28-Mar-24
24/00021/FULEIA	Martin	Nicola	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). My husband's family have been members of Bevis Marks since it was built in 1702. Our family are still members of Bevis Marks' Spanish & Portuguese Jewish community and I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	28-Mar-24
24/00021/FULEIA	Moses	Selina	I object. Do we really have to go through this again? Bevis Marks is an irreplaceable historic building and very important to the Jewish community. This wouldn't be done to an important cathedral or a mosque so why are Jewish communities being treated this way? We feel as if we do not get the slightest bit or respect or courtesy for things that are important to us. Stop trying to destroy even the light around the synagogue, especially for the soulless generic building you want to erect. London's history is being eroded and if that doesn't concern you, try and think about having some respect for minorities, especially the oldest minority in England. Jews have been here since 1099. We shouldn't have to keep fighting to preserve what is important to us.	NO	Public Access website	28-Mar-24

24/00021/FULEIA	Ish-Horowicz MBE	Judith	I was shocked to hear that you are again considering a planning application for a development that would impact so negatively on Bevis Marks Synagogue, a site of immense historic Jewish significance and indeed British significance in its place in the history of British Jewry. Just this week, I had an enquiry from a visitor to London asking me to recommend sites of Jewish interest to see and Bevis Marks Synagogue was the top of the list. As a user of the synagogue, I appreciate the way its natural light enhances the spiritual elements of the services. A 45-storey tower block would totally overwhelm it and block out the the sky. Surely the purpose of creating the Creechurch Conservation Area was to protect and enhance buildings of such cultural and historic importance? I hope we are not living in such a dystopian society that the very organisation that is entrusted to protect Bevis Marks would undermine and devalue this historic Grade 1 listed landmark.	NO	Public Access website	29-Mar-24
24/00021/FULEIA	ORENSTEIN	Sara	I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Salem	Muriel	It's a unique historical synagogue oldest in UK still functioning had lottery money to open as museum and educational center will be ruined if deprived of natural light . What a shame for the community, the tourists and the City of London . Planners should be responsable not to deface such precious jewels of building full of history and spiritually meaningful. We must save it at all cost !! How else would we learn anything if we stiffle and try to bury in darkness such beacon's of past society . Also the fact that public money was spent to save it and enhance it . A	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Khalastchi	Tony	I strongly object to this new application which is barely any different to the one submitted and refused 2 years ago-I have been a member of the Spanish and Portuguese Jewish community for over 40 years to which Bevis mark is an integral part-a45 storey tower would overpower the synagogue and there is no way such a tower would be allowed next to st .Paul's -it will definitely affect the light and lastly it is in a conservation area where no tall buildings are meant to be built in summary I strongly urge you to refuse this application.	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Martin	Gusti	The proposed building would block out the light to our Synagogue in Bevis Marks, which would interrupt our prayers	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Mocatta	Edward Charles	I am objecting to this application on the same basis as I objected to the previous planning application for a 48 story tower on the site. It will completely overshadow and block natural light from the Bevis Marks and agog which was constructed in 1701 and have a very damaging effect on this wonderful historic building and its surroundings. This you previously created the conservation area around this so I do not understand why you are changing your stance and even permitting an application for a 46 story building to be made. Quite apart from that, I feel there are more than enough tall buildings in the area, which I know is favoured because of protective sightlines et cetera. However the vast number of people working in these huge buildings, assuming they all work from their offices, must far exceed the ability of the existing, and basically mediaeval, redneck network in the area to cope with them at peak times. Also one has to ask given the oversupply of office space in the city and more generally following the increase in working from home, whether another 46 story office block is needed. Quite apart from that, there's the application to build a 45 story office block above Liverpool Street station which is not very far away. I feel the whole area is over dominated by very tall buildings and that this application should be refused	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Ansell Brauner	G. E.	I feel distressed that construction of an inappropriate tower is again being proposed, overshadowing Bevis Marks Synagogue, a low, historical monument of international note and a Grade 1 listed building, which should be protected under law. Moreover, in daytime, the interior main hall of Bevis Marks where services are conducted is unique in atmosphere, being lit entirely by natural light and this would no longer be possible if all the light is blocked by a high-rise building. It is candle-lit at night. Religious services held there are renowned for a special, ethereal quality afforded by this setting. There is no call or ecological justification to bring more office space and business premises into this area, creating dense land use: furthermore, landmark buildings and access to them should be preserved in their aesthetic surroundings as far as possible. The area is already car-free, to create massive modern buildings would damage it beyond restoration, rather than provide services or enhance it. To claim this as progress is disingenuous - it is pure destruction.	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Jackson	Judith	This is a very serious application - only a few storeys lower than the previously refused permission. It's about Bevis Marks synagogue, a landmark, an in-use place of worship - the oldest synagogue in the United Kingdom. This proposed building will do immense harm to the light going into the synagogue and courtyard and should never be allowed. Several recent applications have been refused. I wonder why this one is even being considered, given all the arguments put forward to protect this important site in the City of London. There will be hundreds of comments backing my view. I am a member of a sister synagogue in Westminster. We were married at Bevis Marks and the continuation of synagogue services is absolutely vital. Please, please consider the views of those who will be so badly affected, should the planning permission be granted.	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Engelbert	Ronald	It seems to me that the City Corporation is acting in an extraordinarily underhand manner. The proposed development went through the planning process in 2022 and permission was refused, primarily, I understand, because of the unacceptable impact on the synagogue. As a result of the work of the Bevis Marks community, the area surrounding the synagogue is now designated as a Conservation Area where tall buildings are banned. However, the City Corporation is proposing to scrap the ban on tall buildings in Conservation Areas. This is outrageous. The Corporation can't help it's developer cronies by playing by the existing rules, so why not change the rules. In what way would the development negatively impact the synagogue? The proposed 45 storey tower would be out of all proportion to the synagogue. The tower would block the southern sky view, an important contributor to religious ritual. It would also overshadow for much of the day the courtyard, which is used for rituals and celebrations.	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Fenton	Susan	Light obstruction Noise during construction Change in local architecture	NO	Public Access website	29-Mar-24

24/00021/FULEIA	Salem	Melody	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. 24/00021/FULEIA	Setton	Raphael	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). In 2020, a 48 storey office building was proposed just 25 metres away at 31 Bury Street. After a worldwide campaign which generated more objections that the City Corporation has ever experienced before, the Corporation refused permission in 2022, primarily because of the unacceptable impact on the synagogue. The developers are audaciously trying again. Tireless work by the Synagogue community has led to the area now being designated as a Conservation Area. However, the City Corporation has given with one hand and is taking away with the other - it is proposing to scrap the ban on tall buildings in Conservation Areas and indications are that the leadership is now supportive of the proposed building. Why has the Corporation bowed to these wealthy developers?? I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. NO	Public Access website	29-Mar-24
24/00021/FULEIA	Hernandez	Maria	The new building certainly looks more presentable than some other towers. It is neither too tall nor too wide, and it will help to fix the City's shortage of offices and cultural spaces. The synagogue at Bevis Marks is already surrounded by taller buildings, including the nearby Gherkin, so I doubt this one will make much difference to the sunlight inside.	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Sopher	Rachel	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. It is only fair as a house of worship we see the light and wonder if a proposal in front a prominent mosque or church would even have reached this stage Thank you for your kind consideration	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Gold	A	What a beautiful building you have chosen to tear down. The first, oldest Synagogue in London. In an area steeped in history. We should be fighting to preserve this building. It has traces of European history too. I refuse to understand your decision. The Sephardi community only make up about 20% of the entire community, a minority. There are far fewer Sephardi buildings and synagogues in London than Ashkenazi ones. The Ashkenazi community	NO	Public Access website	29-Mar-24
24/00021/FULEIA	Gold	A	What a beautiful building you have chosen to tear down. The first, oldest Synagogue in London. In an area steeped in history. We should be fighting to preserve this building. It has traces of European history too dating back to fleeing persecution connected to the Inquisition. I refuse to understand your decision. The Sephardi community only make up about 20% of the entire community, a minority. There are far fewer Sephardi buildings and synagogues in London than Ashkenazi ones. The Ashkenazi community makes up 80% of the Jewish population. We have a right to complain if we feel we are being threatened, or our history eliminated. This cannot go unnoticed. The Sephardi Jewish community connected to this Synagogue is 350 years old. Older than some of the more modern established Ashkenazi communities here. Please consult with an expert before you take any decision to do this. If people from around the world want to visit a building this is their main option. Without it there is nothing to replace it in the city! It is located in the heart of the city and represents all of city life. Do not suggest that the Jewish community does not belong here in the city centre. France has a higher percentage of Sephardi Jews and we have many French Sephardis who have loved visiting this Synagogue when they are in London. In France I visited a historic synagogue which the authorities have recognised as an important piece of history having survived WW2 and the French have refused to just pull it down. Time to become more aware of this as a cultural reference.	NO	Public Access website	29-Mar-24

24/00021/FULEIA	Gubbay	Joshua	Object based on the impact it will have on nearby historical buildings.	NO	Public Access	30-Mar-24

24/00021/FULEIA	schmool	barak	once again it seems that my beloved synagogue, already cornered by high rise neighbours, is under threat of having its remaining natural light impacted upon. I note that the corporation's previous promises of protection amount to little, and I am confident that a church of equal historic importance and grade 1 listing would not be treated in this manner. I reject the concessions made to limit a new neighbouring tower to a mere 45 rather than 48 storeys - this is a conservation area and only if you ignore you own rules would this be permissible. Why have rules if they mean so little? Would you bend them in favour of the Jewish community instead? I somehow doubt that. All of the suggested benefits to the development are either not benefits or irrelevant to the Synagogue. The development will clearly only have a negative impact.	NO	Public Access website	01-Apr-24
24/00021/FULEIA	BAYLIN	RONALD	The building you intend will place this still beautiful, still functioning historic synagogue into an extremely negative space. Please reconsider.	NO	Public Access website	01-Apr-24
24/00021/FULEIA	KRAMER	STEPHEN	Whilst I am not a neighbour I was a judge at the Central Criminal Court for 13 years and attend servies at Bevis Marks from time to time, especially Kol Nidrei (Eve of Day for Atonement). I am also a Past Master of the Worshipful Company of Bakers and my Election Service took place at Bevis Marks synagogue. It has always been an integral part of the experience to start a service in daylight and see the evening approaching in candlelight. That daylight would be jeopardised if this applicaton is granted. However, my objection is not based on sentiment but on the reality of what would happen if it is allowed. It must be remembered at all times that Bevis Marks is a Grade 1 listed building. If ithis proposal is allowed, the 40 plus storey tower would overwhelm the synagogue, destroy the southern sky view and blot out much of the daylight presently enjoyed by the synagogue and courtyard. The site is within the Creechurch Conservation area and the proposal itself is contrary to current planning policy not to allow tall buildings such as the proposed one in such areas. If there is a need for yet another tall building in the City in the foreseeable future, which - looking at the number of empty buildings already there - I very much doubt, this proposed building is totally inappropriate for this site and the surrounding buildings. Accordingly I strongly oppose this application.	NO	Public Access website	01-Apr-24
24/00021/FULEIA	Seres	Jennye	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Lauderdale Road Spanish & Portuguese Jewish community and am extremely upset to see yet another new proposal, which would be if passed very damaging to Bevis Marks Synagogue, particularly after yet another refusal two years ago, and the recent adoption of the Creechurch Conservation Area. It is not fair to keep putting stress on the community to write in opposition to these continued unsuitable applications. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure.	NO	Public Access website	01-Apr-24
24/00021/FULEIA	Cohen	Charles	This is the oldest Synagogue in the country and is a Grade 1 Listed building of enormous historic and cultural significance. It has been used continually by the Sephardi community since its founding in 1701 This makes it just four years younger than St Paul's cathedral, where similar developments have been blocked in the past, so why is the synagogue not afforded the same protection? There is significant office development elsewhere in the City, and there is no evidence of a shortage of office space, given current vacancy rates	NO	Public Access website	01-Apr-24
24/00021/FULEIA	Montefiore	Victor	I am a Freeman of the City and I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK; and one of the most important in Europe. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. How will congregants participate and engage with religious services if the light is so dark that they cannot read and follow services? I insist that you refuse this application.	NO	Public Access website	01-Apr-24
24/00021/FULEIA	Sandler	Patricia	I'm writing to voice my firm opposition against the new application (24/00021/FULEIA). The intended development site lies within the recently designated Creechurch Conservation Area. Given that existing planning policies forbid tall buildings in Conservation Areas, it is troubling to learn that the esteemed City Corporation is giving consideration to a planning application for a 45-story tower, merely three stories less than a proposal that was turned down roughly two years ago. It appears quite disingenuous for the City Corporation to contemplate this proposed development while also enforcing a ban on tall structures in Conservation Areas. It's worth noting the equal historical and religious importance of St Paul's Cathedral and the Bevis Marks Synagogue. It would be unthinkable for such a development to be considered, let alone proposed, near St Paul's Cathedral. The fact that this new application is being considered at all highlights a seeming disregard by the City Corporation for Jewish places of worship.	NO	Public Access website	02-Apr-24
24/00021/FULEIA	OBERMAN	ISABEL	This new proposed development will totally overshadow Bevis Marks Synagogue. This is a historic heritage building mainly lit by candlelight. The height of the proposed development will cut all daylight apart from being far too high in respect to surrounding buildings.	NO	Public Access website	02-Apr-24
24/00021/FULEIA	Morgenthau	Allan	I strongly object to the plans which will have a disastrous impact on the neighbouring historic building and is not in keeping with surroundings	NO	Public Access website	02-Apr-24
24/00021/FULEIA	Morris	Sarah-Lou	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	02-Apr-24

24/00021/FULEIA	Jackson Levy	Caroline	Bevis Marks synagogue- a landmark for British and International Jewry is again being treated as an 'inconvenience' by developers intent on pursuing their building plans with a relentlessness that feels like bullying to those of us who are members of our beloved and precious synagogue. I urge the members of the planning authority to once again understand, consider and respect the significance of this building and the sanctity it provides - and to deny permission for a new 43 floor adjacent building - instead to protect and support this precious grade 1 listed synagogue and the community it serves.	NO	Public Access website	02-Apr-24
24/00021/FULEIA	Epstein	Thelma	This synagogue is the oldest continuously used synagogue in the UK dating from 1701. As such it has enormous cultural meaning and importance to the Jewish community. Though it is located in the City of London it has had many tall buildings erected around it which has meant that it is totally dwarfed save for the southern sky view which means that the sky can be seen from the courtyard with a view of the moon and stars on a clear night. Despite numerous previous applications to erect tall buildings that would dwarf the synagogue a ban was put on these applications, as the area around the synagogue was designated as being in a Conservation area. The Council is now proposing to scrap this designation and consequently an application has been made to erect a 45 storey building which would completely dwarf the synagogue, which is a Grade 1 listed building, and reduce the minimal light that enters the synagogue making it more difficult for prayer. The historical nature of the synagogue precludes adding additional light inside it. The height of the building would also lessen the usability of the courtyard for rituals and celebrations as it would be further overshadowed. The importance of this synagogue is equivalent to the that of St Paul's Cathedral and I am sure that no such a skyscraper would be given permission to be built next to St Paul's. This synagogue is much visited by visitors to the UK and its setting, despite the current buildings around it, make it much appreciated. The benefits that the developers mention would be expected from any new tall building and thus of no matter in this case as a particular benefit. The downside of the development far outweighs any of the proposed benefits. In short, it would be a disaster.	NO	Public Access website	02-Apr-24
24/00021/FULEIA	Banks	Adrienne	This proposed building work is a threat to an extremely important historical building, Bevis Marks synagogue, which has seen continuous worship by the Jewish community for 350 years. Its significance cannot be undervalued as a symbol of the City's openness and tolerant values. It should be protected and cherished Please do not allow this project to go ahead.	NO	Public Access website	02-Apr-24
24/00021/FULEIA	Kemp	Malcolm	This synagogue is the oldest continuously used synagogue in the UK dating from 1701. As such it has enormous cultural meaning and importance to the Jewish community. Though it is located in the City of London it has had many tall buildings erected around it which has meant that it is totally dwarfed save for the southern sky view which means that the sky can be seen from the courtyard with a view of the moon and stars on a clear night. Despite numerous previous applications to erect tall buildings that would dwarf the synagogue a ban was put on these applications, as the area around the synagogue was designated as being in a Conservation area. The Council is now proposing to scrap this designation and consequently an application has been made to erect a 45 storey building which would completely dwarf the synagogue, which is a Grade 1 listed building, and reduce the minimal light that enters the synagogue making it more difficult for prayer. The historical nature of the synagogue precludes adding additional light inside it. 24/00021/FULEIA	Obadiah	Sophie	Dear City of London application team, Please would you consider your decision to allow the tower block build to go ahead. What a great shame to block out yet more light and sky from the original buildings- Grade listed I might add. Please would you take the view of King Charles and keep the tower block away. The City will lose its special appeal and result in a city just like any other in the world. I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application. Many thanks for reading this and reconsidering. Yours faithfully, Sophie Obadiah	NO	Public Access website	02-Apr-24
24/00021/FULEIA	Sackman	Simon	I strongly object to this application.I have been a member of the Spanish & Portuguese Jewish community for over 40 years. I regularly attend services at Bevis Marks Synagogue and I and two of my daughters were married there. I am very familiar with this part of the City, as my office for over 30 years was in Camomile Street. Bevis Marks Synagogue is the jewel in the crown of this country's Jewish community and one of which the City of London should be proud and anxious to preserve. The current application has barely changed from the developer's original application in 2022, to which I also objected. In the context of the setting of the synagogue, the difference between a 45-storey tower and the previous 48-storey tower is negligible. The proposed development, like the original proposal, is totally at odds with the conservation of a Grade 1 listed building, which is now also in the Creechurch Conservation Area established by the City Corporation only a few months ago. The new tower would overshadow the synagogue and its courtyard and crucially reduce the natural light illuminating the synagogue's interior, materially impairing the environment in which religious services take place and have done so continuously since 1701. Further, the incorporation of 4 basement levels in the new building would risk damaging the very structure of the 323-year old synagogue.The City Corporation rightly rejected the 2022 application and should do the same again now; there are more than enough tall buildings in the area. What is the point of creating a conservation area and then allowing irreparable harm to one of the few remaining heritage buildings in that area? Such a proposal would never be entertained near St. Paul's Cathedral and should not be permitted just yards from the most important Jewish building in Britain.I urge the City Corporation to refuse this application and make clear that no application on anything like the proposed scale will ever be entertained. I obje	NO	Public Access website	02-Apr-24

24/00021/FULEIA	Seruya	Donna	I strongly object to this application. I have been a member of the Spanish & Portuguese Jewish community for over 40 years. I regularly attend services at Bevis Marks Synagogue and I and two of my daughters were married there. I am very familiar with this part of the City, as I worked nearby for over 30 years. Bevis Marks Synagogue is the most important Jewish building in Britain and one of which the City of London should be proud and anxious to preserve. The current application has barely changed from that submitted in 2022, to which I also objected. In the context of the setting of the synagogue the difference between the two proposals - a 45-storey tower versus one of 48 storeys - is negligible. The proposed development, like the original proposal, is totally at odds with the conservation of a Grade 1 listed building, especially now that the synagogue is in the Creechurch Conservation Area established by the City Corporation only a few months ago. The new tower would overshadow the synagogue and its courtyard and crucially reduce the natural light illuminating the synagogue's interior, materially impairing the environment in which religious services take place. Furthermore, the incorporation of 4 basement levels in the new building would risk damaging the very structure of the 323-year old synagogue. The City Corporation rightly rejected the 2022 application and should do the same again now. There are already more than enough undistinguished skyscrapers in the vicinity. What is the point of creating a conservation area and then allowing the setting and functioning of one of the heritage buildings that has justified that conservation status being severely compromised? I therefore urge the City Corporation to refuse this application and make clear to the developer that no application on anything like the proposed scale will ever be entertained.	NO	Public Access website	02-Apr-24
24/00021/FULEIA	Jacobs	Steven	Concerning the new building: It is welcoming to see this project being revised and resubmitted. I wish to see it approved, and I would look forward to the positive effect it will have on the City's skyline. Despite being shorter than the original proposal (20/00848/FULEIA), the updated design still retains a slender silhouette with a progressive taper. Such a form creates an interesting contrast with the broader, rounded shape of the neighbouring 30 St Mary Axe. When seen from vantage points around Tower Bridge, this proposal would appear to the right of the taller tower approved at 100 Leadenhall Street (22/00790/FULEIA). Its comparatively lower height would provide a more gradual transition between the Eastern Cluster and the low-rise buildings beneath it, balancing the view of the cluster as a whole. Concerning Bevis Marks synagogue: It is necessary to mention that the compromises made to the current proposal address concerns from other correspondents regarding the synagogue at Bevis Marks. According to documents submitted in this application, the loss of light to the synagogue is expected to be minimal. The Impact Assessment lists the Cumulative Magnitude of change on Bevis Marks as Very Small. (See ES Volume 2: Heritage, Townscape and Visual Impact Assessment, page 36.) More precisely, the most significant effect caused by this proposal is a mere four-hour reduction in APSH on two of the synagogue's windows. (See Appendix: Daylight, Sunlight, Overshadowing, Light Intrusion and Solar Glare, Annex 4: Daylight and Sunlight Results, page 9. The ASPH of synagogue windows W4/F01 and W5/F01 would reduce from 14 hours to 10, and from 12 hours to 8, respectively. Every other window incurs an ASPH loss lower than this. Indeed, many windows are unaffected.) I anticipate that compensation for this minor loss of daylight, if at all deemed necessary, could form part of this project's Section 106 contributions.	NO	Public Access website	02-Apr-24
24/00021/FULEIA	Black	Robert	Scheme disregards the local surroundings and will substantially block light getting into the surrounding buildings.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Samson	Alan	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Mount	Amanda	As a new member of Bevis Marks Synagogue, I am appalled that this planning application has been brought forward again. It is incredibly similar to the application that was previously rejected and will do untold harm to the synagogue and local heritage. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. I urge that this building be rejected as it was before.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Solomons	Lesley	My family have been members of Bevis Marks Synagogue for well over a hundred years. Generations of my family have married there and it is the place that we go to pray, celebrate, mourn and just be together. To think that this irreplaceable building will be put at risk by a tower block that is of questionable need is an abrogation of the City's duties. The sheer size of the building and the fact that it is being proposed in a conservation area are clear indicators that this building should not be given permission to proceed. The impact on the day to day working of Synagogue as well as other heritage assets will be catastrophic and this building must not proceed.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Taylor	Nick	London is both a city of change and historical juxtaposition. Rather than be detrimental to the surrounding environment, the proposal would open up the area, add new amenities, and increase office space (a market that is recovering post-pandemic). I don't see the evidence for material damage to any historic structures, thus it would be erroneous to reject the application.	NO	Public Access website	03-Apr-24

24/00021/FULEIA	Alexander	Victoria	It is impossible to underestimate the importance and relevance of Bevis Marks Synagogue. Not only is it an extremely important religious building for the Spanish and Portuguese Jewish community in London. This proposal should be rejected on many grounds, including taking the natural light of an historical building. This is the same way that any similar proposal would be rejected near St Paul's cathedral. This synagogue was built in 1699, following Jews being readmitted to London in 1657 and has been a symbol of London's tolerance and embrace of other cultures and religions for the following 325 years. To disrespect this building and its history with tower blocks adjacent to it is to desecrate everything that Londoners as well as British Jews have stood for over centuries of peaceful living. At this time this message is needed more than ever and should not be ignored. I urge you to reject this proposal.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Alexander	Victoria	It is impossible to underestimate the importance and relevance of Bevis Marks Synagogue. Not only is it an extremely important religious building for the Spanish and Portuguese Jewish community in London. 24/00021/FULEIA	Sanders	Anna	I strongly object to the proposal of a 45 storey tower at 31 Bury St. As a member of Bevis Marks' Spanish and Portuguese Jewish community I believe that this important and unique place of Jewish heritage and history in the UK should be protected, and such a huge tower should not be built in such close proximity. The courtyard entrance to the synagogue is already very enclosed with limited light and such a tower would reduce the light coming to the courtyard even further. The tower will be located to the south and this is of particular significance as the southern sky has importance in various religious rituals. The developers seem to have taken no notice of the adoption of the Creechurch Conservation Area and I truly hope that a scheme of such magnitude will not be accepted in such a sensitive location. I urge to reject these proposals. Many thanks for your consideration.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Sebag-Montefiore	Victoria	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Elfassi	Angie	The synagogue is a historical grade 1 building. The intended block of over 40 floors will take away the beauty of this building built in 1701 and is part of the city like any other building from over 300 years ago.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Cohen	Michael	This is a religious place of worship and of great importance to the community . Would such a building be proposed to be built adjacent to St Paul's Cathedral .	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Motz	Martin	As a former pupil of City of London School I am highly concerned about this proposal. Bevis Marks Synagogue is a unique Type 1 listed building. Furthermore it is the spiritual home for many Jewish people who live or work in the City. My most joyous experience was at the wedding of friends. The candle lit ceremony combined happiness, hope and continuity, which is so precious. The the proposed building - that one might call a carbuncle - would be overbearing presence. Looming over this precious place it would literally cast a dark shadow over this wonderful community that is steeped in history.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Taylor	Diane	Absolutely appalling that an extremely high building could be put next to a Synagogue which is a listed building. It is a beautiful building which relies on natural light which would be compromised by your proposal. Also its foundations could be affected by the new building and it's foundations. I can't think of a worse type of building to put next to a place of worship. Bevis Marks is very old building and would be greatly affected by the proposed building. I strongly suggest that this building should not be built at the site. It is far too high and too many floors underground. I am sure that this and other buildings would be greatly compromised by the proposed construction. Please do not allow this to go ahead.	NO	Public Access website	03-Apr-24
24/00021/FULEIA	Spencer	Antony	Why are you thinking of changing your decision to allow a tall building next to Bevis Marks synagogue . SHAME ON YOU FOR CONSIDERING TO CHANGE YOUR DECISION , In my opinion you need to preserve this conservation area . Tall buildings are not compatible in this location ,if you wish preserve working of the synagogue and its setting which would be completely changed by the tall building proposed . Please do not grant permission	NO	Public Access website	04-Apr-24
24/00021/FULEIA	Crew	Steve	Preferred the previous proposal and thoroughly support this one. Hoping that ambition and progress can overcome all this political single interest on-line proding and posturing. "The horse has bolted people, look up and around you, The City is right in front of you." No one is tarmacing over anything, this part of London is unique because you can turn a corner and find wonderful old buildings slap bang against modern architecture.	NO	Public Access website	04-Apr-24
24/00021/FULEIA	Solomons	Adrian	As a long standing member of Bevis Marks Synagogue, I am deeply dismayed by this current proposal, especially following its rejection two years ago and the recent establishment of the Creechurch Conservation Area. The barely changed nature of this new application, compared to its previous submission, does not align with the conservation efforts for a Grade-1 listed building, now situated within a conservation area, and recognised as the most significant Jewish site in the UK. The proposed tower, positioned immediately south of the synagogue, would significantly encroach upon the protected ambiance of the synagogue, obstruct the crucial southern sky-view integral to religious observance, and cast an overpowering shadow over the synagogue and its courtyard, further diminishing its natural light. Such a proposal would never be entertained in the vicinity of St Paul's Cathedral and certainly should not be permitted mere metres from the Cathedral synagogue of British Jewry, especially given its sensitive southern orientation. I implore you to reject this application.	NO	Public Access website	04-Apr-24
24/00021/FULEIA	Easey	Reuben	Please do not succumb yet again to a stubborn minority, as happens time and again in this country; the building should clearly be approved. There are plenty of tall buildings in the City already, and they have improved the place no end - it's far less drab and grey these days. Moreover, the blend of old and new is part of its charm - there are plenty of churches and other religious buildings nearby which are abutted by tall buildings and are no worse for it.	NO	Public Access website	04-Apr-24

24/00021/FULEIA	Zarach	Stephanie	I find it hard to understand the difference between this planning request and the previous one for this site. The Bevis Marks synagogue is well over 300 years old and is a mark of the culture of the City and its antecedents. Your preoccupation with faceless towers willl blight this synagogue, totally destroying its access to the sky in daytime or at night and therefore affecting the various ritual services that are so important to it. Moreover, Bevis Marks is in a designated Conservation Area: what is the point of such an area if it isn't to preserve the features within it? Security has never been more important in this country as it is now. This building will overlook the synagogue and therefore destroy the privacy of those who pray in it: you will create opportunities for terrorists. This is undoutedly a matter of the City putting money above the heritage it is supposed to protect. You wouldn't consider allowing an edifice like this to overshadow St Paul's Cathedral: Bevis Marks, built in 1701, is nine years older than Wren's St Paul's. The City is founded on history. It is part of its DNA. Why do you want to destroy this at every opportunity?	NO	Public Access website	04-Apr-24
24/00021/FULEIA	Ainslie	John	I strongly object to this proposal on the following grounds: Harm to the nationally important Grade 1 listed Bevis Marks synagogue by virtue of the overbearing and overshadowing impact on the courtyard, which will give rise to severe adverse effect on the setting of the synagogue, impacting an essential component of the synagogue complex, and thereby substantially eroding the cultural heritage significance of the listed building itself; Substantial harm to, and loss of significance of, the Creechbank conservation area; Contrary to Local Plan policy DM12.2 as the proposal does not preserve or enhance the character and appearance of the conservation area, by virtue of the size, scale, height, massing, appearance and design of the proposal; Severe adverse impact on the amenity and use of a culturally and religiously significant building viz the synagogue, the listing details of which make clear the cultural and religious significance of this particular synagogue, in a national as well as local context; Threat to the ongoing viability of the synagogue by virtue of the destructive impact on the setting of the building, but more importantly to the essential and vitally important courtyard which is intrinsic to the religious function of the building. In addition I believe the EIA is legally deficient in the absence of a detailed, balanced and considered assessment of the proposal in terms of its impact on the conservation area; and on the Grade 1 listed synagogue particularly in terms of the impact on the courtyard which is intrinsic to the overall heritage value and cultural significance of the synagogue; and on the severe impact on the amenity and function of the synagogue as a cultural and religious building in current use. Finally, heritage is not just about bricks and mortar buildings, it is about the historic and cultural resonances of a building and the cultural function which a building currently serves, and the benefit	NO	Public Access website	05-Apr-24
24/00021/FULEIA	Tricot	Anthony	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I have been a member as well as a trustee of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	05-Apr-24
24/00021/FULEIA	Ben-Nathan	Colin	I am strongly opposed to this new application (24/00021/FULEIA). I'm a member of the Spanish & Portuguese Jewish Community and am very disappointed to see this new proposal, particularly after (i) the refusal of a similar proposal two years ago, and (ii) the recent adoption of the Creechurch Conservation Area (the CCA). The current application, virtually unchanged bare since the previous one, is not in keeping with the conservation of a Grade-1 listed building, a building which is now also in the CCA and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. My understanding is that the Council instituted the CCA, which would normally prevent high rise buildings being constructed, and then relaxed the rules to allow for such construction. This seems extraordinary to me and I am puzzled as to what has prompted this change in approach. In any event in this case proceeding with the development would be very much to the detriment of a historic and beautiful building which has been the flagship place of worship for the Jewish Community for over 300 years.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Kay	Deborah	The extent/height of this building will block out the natural light from the listed heritage building Bevis Marks which will substantially negatively impact the experience of visitors and synagogue users.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Sawdaye	Michael	I am writing to formally object to the proposed construction of a tower that would cast a shadow over the courtyard of the synagogue. On a personal note, I held my wedding ceremony in this very courtyard on a beautiful sunny August day. The abundant natural light contributed significantly to the special memories created for myself, my family, and our friends. A lasting sense of joy and light is associated with this space. The proposed tower development, by blocking sunlight from reaching the courtyard, would significantly alter and potentially diminish the character of this important space. The loss of natural light would be a real detriment to the functionality and beauty of the courtyard, a place that holds significance for countless individuals and serves as a venue for various events. Therefore, I strongly object to the granting of permission for this development. The potential negative impact on the synagogue's courtyard, a space steeped in light and cherished memories, outweighs any perceived benefits of the proposed tower.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Raphael	Jeremy	I am deeply concerned over the impact of light and the architectural mismatch with the Grade 1 listed Bevis Marks Synagogue. Like others have said, planning permission would not be granted for such a building next to St Paul's Cathedral.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Radus	Marc	For all the reasons given to you regarding the detrimental impact to the historical treasure - Bevis Marks Synagogue.	NO	Public Access website	07-Apr-24

24/00021/FULEIA	Leifer	Janet	Bevis Marks is very important as a historical building and for over 400 years has been a place of worship for the Jewish community. Jews still worship there. For worshippers and all visitors it is essential that it has natural light in the courtyard and it should not be overshadowed by a high tower block. London should be a city for all its inhabitants and should respect its Jewish heritage .	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Morris	Joshua	Bevis Marks Synagogue is a historical landmark essential to both the Jewish community and the wider history of the city of London. The proposed development will heavily impact the synagogue's natural light.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	ben	Ash	It will block the natural light of the Bevis Mark synagogue which is not acceptable.	NO	Public Access	07-Apr-24
24/00021/FULEIA	Singer	T.	This important & historic building would be totally overshadowed and lose its light by the proposed tower.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Kissin	Ellesheva	Blocking light from incredibly important heritage synagogue for london's Jewish community.	NO	Public Access	07-Apr-24
24/00021/FULEIA	Rebak	Sandra	The building will overshoe the synagogue which is one of the oldest in the country and deserves protected status	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Cohen	Jaime	This would be an absolute travesty should it go through and should undoubtedly be rejected for permissions	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Ezra	Nicola	I wish to oppose in strongest terms this new proposal, particularly after the refusal two years ago and the adoption of the Creechurch Conservation Area. I was utterly shocked by this new application, which hardly differs frpm the previous and is completely inconsistent with the conservation of this Grade-1 listed building, which is now also in a conservation area, and is the most iconic historical Jewish site in the UK. The overwhelming feeling is that the new tower, to the Synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This utterly destructive proposal - metres from British Jewry's iconic, deeply historical religious monumental Synagogue, is totally unacceptable, particularly along its sensitive southern exposure. Please urgently ensure that this renewed application is rejected.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Assor	Marc	The construction of a 44 storeys building will deprave the synagogue from natural light . The synagogue is an historical building and the new tower will denature completely the sight.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Jacob	Deni	It will ruin and block all light into the landmark that is bevis marks synagogue	NO	Public Access	07-Apr-24
24/00021/FULEIA	Gartner	Moira	It saddens me to think that such a building would be considered to be erected in front of this beautiful listed building. The loss of light, and the feeling of such an overwhelmingly imposing building is really not appropriate. Please do not build this here.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Davidson	Pamela	I feel that the proposed 43 storey high tower would be out of character with some of the historical landmarks in the area. In particular, it would dwarf the unique and beautiful Bevis Marks synagogue and reduce its natural light. On these grounds, I urge the committee to turn down the application.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Cowan	Natasha	31 BURY STREET I'm writing to express my strong opposition to this new application (24/00021/FULEIA) of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application. Best Regards Natasha Cowan	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Fish	Adam	This building will overshadow some historically and religiously significant properties. Blocking the natural light that is vital for these spaces to operate and exist in the same fashion as they have for over 150 years.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Wick	Sandra	I object to the threat of cutting the light to one of the oldest synagogues in Britain by this proposed building. It will be way too crowded. I strongly object.	NO	Public Access website	07-Apr-24
24/00021/FULEIA	Davidson	Laoise	This decelopment would negatively affect the amenity of Bevis Marks Synagogue, a very important part of the Jewish Community in London	NO	Public Access website	08-Apr-24
24/00021/FULEIA	P	Be d	It is an inappropriate proposal and denies the synagogue of ancient right of light. Must not g ah	NO	Public Access	08-Apr-24
24/00021/FULEIA	Gocman	Mike	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	ISAAC	SAMUEL	This will obstruct the light, view and environment surrounding Bevis Marks synagogue, one of the oldest synagogues in London. Developers only care about profit in this instance and not about the local area.	NO	Public Access website	08-Apr-24

24/00021/FULEIA	Yanovich	Leonid	Bevis Marks Synagogue is the oldest continuously used synagogue in Britain, dating from 1701. a Grade 1 Listed building of enormous historic and cultural significance, being in effect the cathedral church of Judaism. it has suffered tall buildings being erected around it. However, the very important southern sky view remains unobstructed, enabling the moon and the stars to be viewed from the courtyard. The area now being designated a Conservation Area. 43 storey tower would completely overwhelm the synagogue. It is inconceivable that such a building would be allowed next to St Paul's cathedral. It would destroy the southern sky view, which is an essential part of the setting of the synagogue and contributes to religious ritual, reducing the useability of the courtyard for rituals and celebrations. It would further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area, damaging the setting of other heritage assets. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is being disingenuous: claiming to recognise the importance of the synagogue, yet simultaneously facilitating this monstrous development. We are entitled to expect much higher standards from Britain's most prestigious local authority. The developers are arguing that they are providing benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many are simply features that would be expected in any modern commercial building. The City Corporation is required to identify locations suitable for tall buildings. Much more work to be done and assessed by an independent inspector. This is unlikely to be complete before late 2025.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Blake	Nena	As a significant building in the history of Jewish life in London, I object strongly to this plan which will effectively put a stop to Jews being able to use it for regular worship. A past proposal has already been rejected and nothing in this current plan appears to change the reasons that it should go ahead. My sister was married in Bevis Marks synagogue; the event was unparalleled and very beautiful. Why should future couples be denied this glorious setting to mark their special day? Please do not pass this request to destroy such a special, unique and significant feature of London's history, which is effectively what will happen if it is not allowed to continue to be used due to lack of light and being overshadowed by modern monstrosities.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Harris	Frank	This application should be not receive permission to proceed as it will impact on an historic City of London 'living' cultural landmark. The Corporation of London should be proud to save its heritage for future generations rather than allow the greed of developers to destroy its greatest assets.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	taylor	Katherine	It will impede the worship and access of the historic London Jewish community to the Bevis Mark synagogue, overlooking and blocking out natural light to existing properties including residential.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Marks MBE	Ella	The proliferation of tall buildings in this conservation area is ruining the whole ethos of the neighbourhood	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Lane	Charlotte	The impact on the synagogue is significant, this is a historic building and a place of worship and contravenes what is rightly a conservation area.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Lanceman	Stuart	It is a travesty being done to a historical building.	NO	Public Access	08-Apr-24
24/00021/FULEIA	Eden	Bryan	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of British Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Tresman	Janet	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of the British Jewish community. Also, I serve as a Deputy on the Board of Deputies of British Jews, as well as being a committee member of another Charity. I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important and precious Jewish heritage site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's oldest synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	08-Apr-24
24/00021/FULEIA	stanton	chaim	It would affect the light in the nearby synagogue, which because it is so old depends on natural light. The nearby synagogue is the oldest in the UK. I don't understand why the developers are trying again. The synagogue will oversize the new building. It would block the view of the moon which could affect things like "kiddish levana" blessing of the new moon. It would create additional wind in the courtyard as well.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Davidson	Anthony	As a proud Londoner for over 60 years I am distraught that a building such as the one proposed would even be considered. Notwithstanding the physical restrictions it would impose on Bevis Marks Synagogue (eliminating the southern sky view, restricting light, making the courtyard - often used for various religious and celebratory events and services, etc.) a 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. One would certainly, and correctly, not allow such a structure to be built next to any house of worship. Furthermore, if I understand correctly, the development site is within the Creechurch Conservation Area and panning policy does not allow tall buildings in Conservation Areas, would the proposal not be in direct conflict with the statutory development plan. As a Jewish Londoner, I have had occasion to attend services in the Synagogue and it is inconceivable that a house of worship of such historical and functional importance should have it's practical and spiritual functionality compromised to the extent that it would make it at best difficult and at worst almost impossible to continue observance of all the prayers, services and celebrations that take place there.	NO	Public Access website	08-Apr-24

I am shocked and appalled to see this new proposal, especially after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application has hardly changed since the last time it was submitted, which is disgraceful . It is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, and would block out the religiously important southern sky-view. It would overshadow the synagogue and its courtyard, which would result in significant loss of its remaining light. This proposal should not be permitted metres from British Jewry's Cathedral synagogue, especially along its sensitive southern exposure. I urge you to refuse this application. ==	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Antian	Raymond	I am an attender at services and not only would the proposed work cause terrible inconvenience to myself and other worshippers, it would also be difficult and dangerous to access and use the synagogue premises for people of my age and older. I cannot imagine the possibility of destruction that may ensue, accidentally or criminally. The synagogue was here long before the planning application for over 300 years. The synagogue building therefore demands your respect and begs you to consider far more suitable alternatives. STOP THE DEVELOPMENT!	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Sasto	Daniel	Hello. I'm writing to express my strong opposition to this new application (24/00021/FULEIA). My family are long-standing members of the Bevis Marks' Spanish & Portuguese Jewish community, and I am disappointed and saddened to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. As a Chartered Surveyor myself, I look at this new application, barely changed since the last time it was submitted, and quite clearly see that it is not in keeping with the safeguarding of a centuries-old Grade-1 listed building, which is in a conservation area, and is the most important Jewish site in the UK. The new tower (as with the previously rejected planning application), would completely and utterly dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This would seriously endanger the safeguarding and ongoing operations of the synagogue, and suffice, to say, this kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue. As such, I strongly urge you to refuse this application without delay.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Hart	Paul	It is of great historical importance as it is the first synagogue in England 17th century Due to religious observance it will not allow sunlight to be seen at the start and end of our services	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Stone	Robert	Two years ago planning permission was denied for a 48 story tower on this site mainly because of its extremely detrimental impact on the Grade-I listed Bevis Marks Synagogue. Now there is an application for a 45 story tower. This is a negligible change and the impact on this historic building - and no less importantly, on the Jewish community that uses it - will be equally devastating. It will still block out the view and significantly reduce the the light available to the building. Please refuse this terrible betrayal of a building central to the history of British Jewry, and still important for the UK Jewish Community, (and celebrated and honoured only last year by a commemoration led by the Archbishop of Canterbury)	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Krantz	Martyn	Synagogue needs natural light	NO	Public Access	08-Apr-24
24/00021/FULEIA	Blain	Barry	I am writing to object strongly to application 24/00021/FULEIA, the demolition of Bury House and partial demolition of Holland House and Renown House, and the erection of a 43-storey building on these sites. A similar application was refused in 2022, one reason given being the overbearing and overshadowing impact of that (smaller) development, which would adversely affect the setting of the Grade 1 listed Bevis Marks Synagogue and its setting. The synagogue was built in 1701, is a Grade 1 Listed Building, is probably the oldest synagogue in Europe to have remained in continuous use, and is the only non-Christian house of worship in the City. It has only limited electric lighting, and the interior relies on candles plus daylight from the windows which look on to the area of the proposed construction. The projected skyscraper would block much of the natural light through the windows, leaving the inside dark and gloomy. The development would be overbearing and oppressive because of its height and its proximity, and severely harm the historic setting. The City of London Local Plan January 2015 requires that development in conservation areas will only be permitted if it preserves and enhances the character or appearance of the conservation area. The loss of heritage assets that make a positive contribution to the character or appearance of a conservation area will be resisted. It further identifies that in the design of new buildings or alteration of existing buildings, developers should have regard to the size and shape of historic building plots, existing street patterns, etc. The proposed development is of course within the Creechurch Conservation Area. The current proposals would simply destroy 300 years of history. As a final consideration, it must be acknowledged that City already hosts many office blocks which are partially or completely empty, and there is absolutely no need for yet another. I hope the application is refused.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Platt KC	Eleanor	i oppose this application on behalf of the local Synagogue which is an historic monument and would be greatly affected by this proposal. This new application has barely changed since the last time it was submitted. The suggested new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Frankel	Rachel	We oppose building a 45-storey tower that will block the air and light from London's oldest synagogue. We're aware that Jewish history and culture count for very little in today's world, and we also realise that isn't much that thoughtful people can do in the face of big money to preserve something of great cultural importance.. We just wonder how you would feel if your church, the one you were married in, the one your ancestors was baptised in - what if rich and powerful people built tower blocks on all sides? Would you go home to your mother, your grandmother, your wife, to say that you had approved the ruin of a place dear to their personal histories? Jews have very little tangible history left. For so long the rich and powerful have denied them this, and here is yet one more example of a kind of thoughtless, evil theft that has affected so many Jewish people over so many centuries. This is just one voice, but we are working hard to ensure that thousands of others speak up and force the end of this terrible, selfish decision.	NO	Public Access website	08-Apr-24

24/00021/FULEIA	Kruger	Doreen	I wish to object to this application. Bevis Marks synagogue is a Grade 1 listed building of significant historic importance and this monstrous development is totally unacceptable. It would dominate the synagogue, and its courtyard, and deprive it of its natural light thereby utterly destroying its unique spiritual atmosphere and rendering the interior almost unusable. Would such a proposal even be considered alongside St Paul's? It would be unthinkable. This unique synagogue must be afforded the same protection.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Zekaria	Ezra	With reference to application ref. 24/00021/FULEIA, I object to this development in the strongest possible terms and I urge the refusal of it.This massive and dominant building would block out vital light from the south for Bevis Marks synagogue and its courtyard; one of the oldest places in worship, a jewel in the crown of the Jewish faith in the UK and also across the world. This is a Grade 1 listed building in the designated Creechurch conservation area. Such a proposal would desecrate a holy and religious place vital for the community, and amount to an architectural and planning travesty.The original decision to refuse this application was the correct one, and no attempt by the developer to come back again should be considered.'	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Rosenberg	Philip	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of British Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. Bevis Marks, as the oldest synagogue in continued use in the UK, has a special status to our community, and to the wider public. Designed by a Quaker architect in an act of inter-religious solidarity, it bears tribute to so much that is good about this country, in terms of diversity and inclusion. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. The whole situation bears a striking resemblance with the story of the Tower of Babel in Genesis Chapter 11, where hubris led vain people to build a tall tower in defiance of the Divine Will. I urge the developers to recall that, in that case, G-d's response caused them to "cease to build", which is what should also happen here. I urge you to refuse this application.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Gerrard	Rachel	This Synagogue is part of my heritage and was my Great grand parents and my Grandparents synagogue. It holds great important to me as a Jew	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Wernick	Richard	Such a new building will have a detrimental effect on the area surrounding Bevis Mark Synagogue with no appreciable gain for worshippers or visitors	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Loewenthal	Adrienne	I object to the proposed development as it will overshadow a building of historic importance (Bevis Marks synagogue) and take away its natural light. The synagogue is not only of great importance to the Jewish community as it was the first synagogue in London and is still a functioning synagogue but it also has huge historic value to the greater community. Any development around the synagogue should be within keeping of retaining the synagogue's integrity and this one will not	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Lorie	Miriam	Bevis Marks is a historic and spiritual gem in the heart of the City. It should not be further overshadowed and crowded in, just for the sake of commercial profit. Our City is better than this.	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Marks-Bluth	Jonathon	I wish to object to the building of the proposed 43 storey tower at 31 Bury Street. The proposed building would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. I regularly attend services at Bevis Marks synagouge, I was married there as were my parents-in-law and wife's sister. The synagouge is of enourmous importance to my community, the broader British Jewish community and British history. As I understand the situation, the development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. Keeping to such plans is vital for local authorities, so as to ensure public confidence in the transparency and fairness of such planning scheme. Further, as work trends change and fewer people commute into the City daily, I doubt the neccesity and wisdom of allowing the construction of further large tower blocks in the City, as they have a good chance of being significantly underutilized. This would further add to the decline of the City's urban environment. Best, Jonathon Marks-Bluth	NO	Public Access website	08-Apr-24

We are seriously opposed to application (24/00021/FULEIA) which is hardly altered from the previous proposal, which was refused 2 years ago. Although we are situated in the London Borough of Lewisham, the beautiful Bevis Marks Synagogue, which is the only synagogue in the City of London, is part of our heritage as Jewish Londoners. The synagogue is an important part of the history of London, having been visited by Samuel Pepys and mentioned in his diaries. Bevis Marks is a Grade 1 listed building in a conservation area. The proposed tower, if permitted, will dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	08-Apr-24
24/00021/FULEIA	Levy	Mark	Protect Jewish historical sites!!	NO	Public Access	08-Apr-24
24/00021/FULEIA	Tenenbaum	Linda	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? My daughter was married in the synagogue 20 years , nowhere else provided such an amazing atmosphere and bevis marks holds a rich heritage for future generations. Don't knock heritage, don't destroy because you can.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Goldenberg	Philip	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of British Jewish community, and spent much of my my working life in the City of London. I am appalled to see this new proposal, particularly after the refusal of its similar predecessor two years ago, and the recent adoption of the Creechurch Conservation Area. This new application is wholly out of keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important historic Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	09-Apr-24

24/00021/FULEIA	Grubin	Helen	Bevis Marks has recently been placed within a conservation area. Despite this, a new skyscraper is proposed in its vicinity. It is not much lower than a proposal that was dismissed a couple of years ago. This new scheme will not only affect Bevis Marks in a negative way, impacting on its light and viability, but also changing the City for the worse. If accepted, the conservation area will see yet another tower and there are already a number which do not have full occupancy. The proliferation of towers with little thought given to their use or impact on the fabric of the city should be resisted. Bevis Marks has been standing for over three hundred years. The same is not true of some of the skyscrapers in the city which have a relatively short life before being deemed too old to refurbish. Bevis Marks is a functioning synagogue and provides a service not only to the Jewish community. It should be well protected, not undermined by this new proposal.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Addlestone	Rafi	The tower along the synagogue's southern horizon would destroy the setting of Bevis Marks synagogue, which is so important to traditional ritual and to what makes the synagogue a community hub, and would reduce the synagogue's natural light levels beyond usability.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Dinkin	Raymond	This development would ruin the environment and light of Bevis Marks Synagogue which is an important and historic building.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Jay-Brown	Chelsey	This proposal of a 45 storey tower a stone's throw from Britain's 300 year old Grade 1 Listed Bevis Marks synagogue would destroy the setting of the synagogue, which is so important to traditional ritual and to what makes the synagogue a community hub and it would reduce the synagogue's natural light levels beyond usability.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Levy	Neville	As a user of the Synagogue with long family connections, the loss of light would be a disaster for the synagogue and the multi cultural heritage of the City of London. Please ensure this application is refused.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Shaw	Barry	Why are you contemplating to allow a building to be erected, which will take away light , privacy and a community buidind that is a hub for a religion for many years. Very disappointed	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Jay	Alison	This is a very old and important synagogue. What is proposed will affect it so much. Please DON'T do this	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Green	A.	London is all about the juxtaposition of old and new buildings. New modern buildings help to highlight old buildings, rather than detract from them. This is the case all over the City of London where historic buildings sit perfectly fine side-by-side with modern buildings. The debate needs to be based on facts, not on scaremongering. It's important that all the stakeholders in the City of London are heard, not just the group that shouts loudest. This new building has important benefits to businesses and employment in the area and should go ahead.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Martin	Howard	As a worshiper at Bevis Marks Synagogue since the age of 3 (now 63), I cannot believe that the City is allowing another application on this site. The function and sustainability of the Cathedral Synagogue of UK Jewry is once again threatened. Would this building be allowed next to St Paul's cathedral? Of course not. The proposal will restrict the light I need to read my prayers at services. Many others have poor eye sight and depend on the natural light. It would also badly affect our use of the historic courtyard, creating a feeling of being totally enclosed and putting the courtyard in darkness. And all of this is proposed in the same year as the educational and cultural Visitor Centre is opening. This proposal is an act of architectural vandalism with its impact on the Synagogue, courtyard and surrounding conservation area. What on earth is the City of London playing at? Bevis Marks is a grade 1 listed site, in a conservation area and at a time of anti semitism a precious jewel for Anglo and world Jewry. It's time for the City counsellors to do your job and reject this kind of development once and for all.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Flaxington	Frances	Serious concerns about the impact on the Bevis Marks synagogue, a building of significant historical, religious and cultural significance. This includes the reduction of light and affecting the southern aspect view.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Wheatley	Mark	I believe that this proposal is insensitive to the cultural, historical and religious significance of Bevis Marks synagogue. The proposal causes consternation to members of the synagogue because of issues with disruption during and after construction. I object to it.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	kwasnik	sefton	Sirs I live in the north of England, I have visited the Bevis Marks Synagogue, both for religious reasons and cultural ones. I strongly object to this application of for a high storey commercial building being constructed so near to Bevis Marks Synagogue, the impact of which would be disastrous for a place of worship, let alone the fact that this synagogue is an incredible heritage site, being the oldest synagogue in the UK. The mere thought of this seems unconscionable especially is this day and age. I have visited a number of ancient synagogues throughout Europe, including those in Budapest, Venice, Berlin ,Prague and also on the Greek Islands. It is wholly apparent that in all of those locations the community has sought to preserve and promote the importance of the original structure and presence of the building to keep alive the enormous history that such places of worship embody. They go to the heart of understanding the growth of the community and its persecution through the centuries, and in my very respectful submission the buildings and immediate surrounds should be left as close to the original presentation as is possible. Any development whether commercial or otherwise will deprive the entire community, and the world the opportunity to fully appreciate the significant history that this building represents. It would appear that over and above these observations the plans for the proposed buildings will no doubt have a significant adverse effect on the very important aspect of natural light within the holy place of worship. I would also expect that commercial developments nearby would dilute the history surrounding the building	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Patchick	Jonathan	I strongly object. As a member of the Jewish Community in Manchester who has had the privilege of praying at Bevis Marks synagogue when I have come to London. This grade 1 listed building is unique to the Jewish Community in the UK. Overshadowing the courtyard as proposed will restrict the light for praying and as a religion based on the lunar calendar and lunar activity will restrict visibility and again interfere with the ability to conduct service/ritual that has been able to be conducted at this site since circa 1700. It is shocking that our Capital City planners are even to be considering such a proposal affecting such an iconic and unique synagogue; this proposal must not go ahead as it is tantamount to destruction of religious practices that current and past generations would want to pass on to future generations to be able to pray at Bevis Marks.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Avisror	Elaine	This will ruin the Synagogue by reducing the natural light beyond usability	NO	Public Access	09-Apr-24

24/00021/FULEIA	Del Monte	Richard	I wish to object to this new application (24/00021/FULEIA). I am a member of the Spanish & Portuguese Jewish community. I have regularly worshipped at Bevis Marks Synagogue and was married there. I strongly object to this new proposal, particularly as a similar proposal two years ago was rejected. 1. The proposed development, like the previous proposal, conflicts with the conservation of the Synagogue, which is a Grade 1 listed building and is now also in the Creechurch Conservation Area established by the City Corporation only a few months ago. The City Corporation rightly rejected the 2022 application and should do the same again now. 2. There is no point in creating a conservation area and then allowing serious harm to one of the few remaining heritage buildings in that area. 3. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, diminishing its remaining light. The prospect of the sky above is an important part of the heritage ambience of the entrance and courtyard area within the immediate precincts of the synagogue 4. The proposed development will have a substantial negative impact on the heritage significance of the Synagogue. It would completely dwarf the synagogue. 5. The foundations of the Synagogue are also highly sensitive and vulnerable. Should development of these office buildings progress there is a potential for significant damage occurring to the building. 6. The Synagogue is the most important Jewish site in the UK. It is an asset for the City of London, and is of national significance. This kind of proposal would not now be accepted within the vicinity of St Paul's Cathedral, and should certainly not be permitted just yards from the oldest synagogue in the UK (which is even older than St Paul's), particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Warden	Angela	Bevis Marks Synagogue is built in the style of the Sephardi Synagogue in Amsterdam and is of great historic importance not only to the life and culture of the Sephardic Jewish community in London and UK but also the entire nation. My great great grandfather David Aaron de Sola was one of its most famous ministers. His son Samuel de Sola, was elected in 1863 to succeed him as minister of the Bevis Marks. Yet another skyscraper in the City of London where there is a surfeit of unused office space because of increased working from home is not desirable. A clear space around such a building of great architectural importance overrides any overdevelopment in the area. https://en.wikipedia.org/wiki/David_de_Aaron_de_Sola	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Hall	Rachel	Bevis Marks is a stunningly beautiful and historic synagogue in an already congested and unsympathetic environment. The proposed building would vastly overwhelm and overshadow this unique patch of London's multicultural history. Roughly the same age as St Paul's Cathedral, Bevis Marks should be given its due respect and share of sunshine.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Weichselbaum	Aaron	As someone who has enjoyed the hospitality of Bevis Marks Synagogue and celebrated my son's marriage to his wife there I would want the Synagogue to be equally available to them with the same splendour and significance as it has been for over 300 years. Any diminution of light will not only detract from the ambience of the Synagogue itself but will also prevent worshippers from observing the customary monthly blessings over a new Moon from within the grounds of the Synagogue itself. In the same way as one would not wish to see any historic place of worship dwarfed and obscured by an unsightly and unnecessarily enormous structure along it, I trust those entrusted with making the final decision will acknowledge and accept that this is a step too far and once and for all decide to abandon any further thought of threatening a part of our history and heritage. One also fears for the structural of Bevis Marks Synagogue itself with the amount of drilling and excavation that will be necessary to build a four storey basement below ground level. I write as someone who has had experience of damage to my previous property occasioned by a neighbour's works two doors away building a basement one level below ground. As with all such works, the on-going impact will be detrimental to the Synagogue and worshippers who will have to put up with significant disruption, noise and pollution - rendering it impossible for meaningful prayer and celebratory events.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Collins	Genene	It is appalling that this beautiful and listed building, Bevis Marks Synagogue, should be threatened by a plan to build yet another vast office block which, in all probability, will be redundant before it's built as demand for office space reduces. Canary Wharf is a good example of oversupply. We should be doing everything we can to protect this beautiful, unique building which is part of the history of the city.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	caplin	esther	The proposed building will overwhelm the grade 1 listed Bevis Marks, which is a significant and important historic building. This was built in the 18th century and represents the freedom of a minority group to worship and become proud residents of London. The proposed building will block worshippers views of the sky as well as dominate the environment. We must preserve heritage, and this means not only buildings but environments too. The City of London could lose all its magic with development of this kind. Why does the City need a tower block this tall? These are not sustainable. We are surely now in an era of human scale not corporate scale - and this sort of building is now out-of-date. Surely the City's planners are sufficiently progressive to see this? We might destroy everything for short-term gain, which cannot be what the City of London wants.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Woolf	Martyn	As the owner of the site of the proposed building is clearly only interested in his profit, would it be possible to find out how much he expects, or hopes to make, from this development. Perhaps the public may be prepared to contribute to a fund to satisfy the owner's expectations. I feel sure that many would support his plans to build a villa on the Riviera, or a new super yacht. That way, the general public may be able to continue to enjoy this area of the City without a further intrusive monument to one man's greed.	NO	Public Access website	09-Apr-24

24/00021/FULEIA	Sackman	Paloma	I strongly object to this application. I have been a member of the Spanish & Portuguese Jewish community. I regularly attend and many of my family have celebrated their weddings there. Bevis Marks Synagogue is the jewel in the crown of this country's Jewish community and one of which the City of London should be proud and anxious to preserve. The current application has barely changed from the developer's original application in 2022, to which I also objected. In the context of the setting of the synagogue, the difference between a 45-storey tower and the previous 48-storey tower is negligible. The proposed development, like the original proposal, is totally at odds with the conservation of a Grade 1 listed building, which is now also in the Creechurch Conservation Area established by the City Corporation only a few months ago. The new tower would overshadow the synagogue and its courtyard and crucially reduce the natural light illuminating the synagogue's interior, materially impairing the environment in which religious services take place and have done so continuously since 1701. Further, the incorporation of 4 basement levels in the new building would risk damaging the very structure of the 323-year old synagogue. The City Corporation rightly rejected the 2022 application and should do the same again now; there are more than enough tall buildings in the area. What is the point of creating a conservation area and then allowing irreparable harm to one of the few remaining heritage buildings in that area? Such a proposal would never be entertained near St. Paul's Cathedral and should not be permitted just yards from the most important Jewish building in Britain.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Martin	William	I have been worshipping at Bevis Marks Synagogue since I was a young boy, and once again the function and sustainability of the synagogue is being put at risk by this application. This proposal proposes severe restrictions to the light I need to read my prayers at services on the Sabbath and holy festival days. In addition, it would have negative impact to our use of the courtyard, shrouding an important area of community and togetherness in darkness. At a time when anti-semitism in London is at record levels, we need our safe spaces. This is a Grade 1 listed site in a conservation area; the space and its worshippers must be respected by rejecting this kind of development once again.	NO	Public Access website	09-Apr-24
24/00021/FULEIA	Kass	Harvey	I totally support the well argued case set out in the Bevin Marks objection.	NO	Public Access	10-Apr-24
24/00021/FULEIA	S	Adam	I object strongly to the proposed development, which is fundamentally unchanged from previously submitted plans.	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Clemence	Sara	We should protect our historic buildings and protect the ability to worship. Ridiculous that this has already been turned down and it is being resubmitted. Pure folly.	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Kamenker	Victor	I vehemently object to the construction of a new, 45-story office tower adjacent to the historic Bevis Marks synagogue. There are 10 new office blocks scheduled to go up in the City of London by 2030. With return to office uncertain and plenty of vacant office space in Canary Wharf and elsewhere in Zone 1, what is the imperative behind the construction at 31 Bury Street, with its outsize impact on the Spanish and Portuguese Jewish community? Bevis Marks is a Grade 1 listed building - the positives of another office construction adjacent, on balance, will not benefit the neighbourhood and will adversely impact the Congregation (whose members are part of the most discriminated against minority group in history). There will be reductions to the Synagogue's naturally occurring light, which will limit worshipper's ability to see prayer books in the building; the courtyard will be fully enveloped by skyscrapers - rendering its use as a communal space moot; and due to security constraints and the already semi-hidden location of the Synagogue, worshippers and congregants risk being pushed further underground. Would we allow such a development to negatively impact any other religious group -- adjacent, say, to St. Paul's or the Central London Mosque? Why is it thus under consideration for the second time in as many years to threaten the conservation area surrounding Bevis Marks Synagogue?	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Davis	Robin	This would have a very significant impact on Bevis Marks Synagogue, a Grade 1 listed building which has a great cultural significance. The application, should it be successful, would overshadow the courtyard and block the sky from the South.	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Isaacs	Edward	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of British Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Grunwald OBE KC	Henry	I am amazed that this matter is even being considered, given the recent refusal of an almost identical plan. I object, as a Londoner who lived his early life just outside the City boundaries and who has, on the whole, been happy with the way the City has been developed. I am a member of the London Jewish community - Bevis Marks is the most important living symbol of our centuries-old links with, and involvement in, City of London life My reasons are:- 1) Such a tall tower would utterly overwhelm the synagogue, a Grade 1 Listed building of enormous historic and cultural significance. 2) It is inconceivable that such a building would be allowed next to St Paul's Cathedral. Why is the synagogue not afforded the same protection? 3) The proposed building may be well-designed but is simply in the wrong place. 4) It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and of the stars and planets would be blocked. 5) It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. 6) It would further reduce the minimal daylight that now penetrates the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. 7) The development site is within the Creechurch Conservation Area. Current planning policy does not allow tall buildings in such an Area; there is a direct conflict with the statutory development plan. 8) The developers argue that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. 9) The proposed building would also damage the setting of other heritage assets in the local area and would compromise the Conservation Area as a whole.	NO	Public Access website	10-Apr-24

24/00021/FULEIA	Braham	Syd	I strongly oppose this new application (24/00021/FULEIA). As a member of the UK Jewish community I dismayed at this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This latest application, is marginally different from the the previous submission; it is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and the synagogue is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, almost blocking its remaining light. This kind of proposal would surely never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted so close to British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. Please refuse this application	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Northcote	Jane	As a City resident and worker I object to this proposal. The proposed new building will overshadow a Grade 1 listed building and relegate it to a chasm. The City of London is rightly proud of its cultural sites. It is wrong, and against the City's own policies, to treat such an important religious and cultural site in this negligent way. The existing building in Bury Street, a mere 40 years old, could be re-fitted, which would be in accordance with the City's own "retrofit first" policy and carbon neutral aims. If this policy is to be disregarded, does the policy have any meaning atall? The proposed building is in a conservation area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. At a time when the City should be respecting diversity and culture within the Square Mile this proposal disregards the needs of a specific faith group, who have used this location for centuries. The proposal consigns the Jewish people who use this synagogue to worship in a chasm. This does not meet their needs. As a citizen of the City, I am appalled that the applicants are treating people in this way, with a lack of respect for their traditions. We want all faiths to flourish and feel welcome here. I value the diversity of cultural and religious institutions in the City, and want them to continue to operate in the future, for the benefit of everybody. This proposal threatens the very existence of an institution which is over 300 years old. It is not simply a building, but the location of a living tradition, dependent on people, light and space in order to fulfil its purpose. The light must not be removed: for that would degrade its usefulness and purpose. The synagogue is an amenity not only for Jewish people, but also an important part of London's living history, valuable for all Londoners. This proposal must be rejected, and the applicants instructed not to try again.	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Szasz	Michael	The historical value and cultural significance of this place of worship, being the oldest continuously used synagogue in the country, cannot be underestimated. It is not only the home of the Sephardi community in this country but a centre of tourism for many around the world. If it were any other equivalent religious centre, it would be held in the highest esteem by the community and protected from the severe damage that this project would undoubtedly cause. The proposed plan to build a structure of this size, at this site, would negatively affect the quality of life for those worshipping at Bevis Marks and interfere with a number of essential practices and traditions. Bevis Marks represents not just bricks and mortar but the very heart of British Sephardi Jewry. It has survived for hundreds of years in spite of all the odds and this proposed project would cause irreparable harm. Therefore, I object to the project.	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Fineberg	Mark	It is preposterous to disingenuously suggest that the urban cliff edge culmulative condition caused by 100 Fenchurch St between the city tower block mass and the Tower of London would benefit from 'mediation' by a so called 'foothill' stepping-down building as a rouse for justifying inappropriate eastward extension of an uncomfortably bloated cluster of skyscrapers. The slight carving away of its uppermost NE corner of the proposal is a minimal concession compared to its overbearing height and impact on the historically sensitive Bevis Marks synagogue. The synagogue is protected by virtue of it being in a conservation area and the obfuscating impact assessment diminishes the significant harm that the development will have on it. This internationally renowned house of prayer and contemplation draws significant emotional awe from its quality of light and glimpses of the sky which will be lost when blocked by the new building. It was established previously that the development benefits do not outweigh the substantial harm to the synagogue's setting and this remains the case.	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Persky	Sarah	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm very disappointed to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	10-Apr-24
24/00021/FULEIA	Motz	Timothy	I am a proud British Jew. I wear my identities with pride. It takes work for me to balance them - to avoid cutting myself off from my Jewishness or from mainstream society - but it's more than worth it. But my existence requires something back from the rest of society. The Jewish community is precarious, by dint of its tiny size it and its history. The City of London contains 46 churches but only one synagogue. When Bevis Marks's very character is endangered for the sake of a planning application, it's hard for not me to question the Corporation's real commitment to being a truly welcoming place for all faiths. The proposed development would seriously erode the character of Bevis Marks synagogue and the quality of ritual that is feasible inside.	NO	Public Access website	11-Apr-24
24/00021/FULEIA	Saady	Stephen	Synagogue Grade 1 listed, Britain's oldest, is in constant use by people from within and outside UK. It stands in a newly approved conservation area taking in Bury Street, to protect the synagogue from hazards posed by new office developments. I urge you to reject this recent application, as was done re an earlier building proposal for the same site. This synagogue is one of worldwide status. To force it to close would be no less than a tragedy.	NO	Public Access website	11-Apr-24
24/00021/FULEIA	Fink	Rachel	It is incomprehensible that there continues to be disregard for the preservation and conservation of this historic synagogue which is of importance both to the Jewish community as the oldest functioning synagogue in Europe and to the City of London. The diminishing natural light has a direct impact on worshippers and on the internal beauty of the synagogue. Bevis Marks plays a vital role in the local community that resides in the city and these continuous threats to such an historic site are a blight on the integrity of the corporation. This Grade I listed building is being overwhelmed despite promises for a proper conservation and protective area around its location. There are more than enough high rise blocks in the city.	NO	Public Access website	11-Apr-24
24/00021/FULEIA	Jackson	Hilary	I strongly oppose the new development which will impact the Synagogue's natural light. Bevis Marks is very important as a historical building and the Jewish community have worshipped there for over 400 years and still do. It should definitely not be overshadowed by a high tower block.	NO	Public Access website	11-Apr-24
24/00021/FULEIA	Shenkin	Lawrence	Bevis Marks synagogue is an important historical and cultural site. Overshadowing its natural light would be a tragedy.	NO	Public Access website	11-Apr-24

24/00021/FULEIA	Singer	Helen	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of the Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	11-Apr-24
24/00021/FULEIA	Grzywacz	Andrew	The proposed skyscraper is being heavily opposed by persons associated with the synagogue at Bevis Marks, with the aim of refusing planning permission. Such a synagogue is located in a secluded courtyard surrounded by offices on all sides, accessible only through a small archway that is easily missed by tourists and other passers-by. Externally, it is quite a plain building of no greater architectural merit than many of the neoclassical structures in the vicinity. The synagogue does not, therefore, provide a significant cultural offering to the City beyond religious services to its attendees. (Note that such services would be unaffected by this new development: the issue of natural light within the synagogue has been addressed by the most recent redesign.) The City Plan 2040 aims to create 1.2 million square metres of office space, and turn the square mile into a seven-day cultural and leisure destination. Comparing what the proposed skyscraper offers to these ends against the limited contributions of the synagogue, it is clear that refusing permission to the former in deference to the latter would hinder the City's stated plan. The suggested compromise of retrofitting the existing building at Bury House would provide insufficient benefit, due to its lack of floor space. I therefore recommend that opposition from the synagogue is rightly overlooked, and that the proposal is approved.	NO	Public Access website	11-Apr-24
24/00021/FULEIA	Aleksander	Nicholas	Although I live outside the City, I come into the City to work Bevis Marks is a listed building and a hugely important heritage asset as the oldest place of Jewish worship in the U.K. Daylight is an essential quality to the continuing use of the building. And the construction of a tall tower so near to the building will harm its continuing usage. It is preposterous to disingenuously suggest that the urban cliff edge culmulative condition caused by 100 Fenchurch St between the city tower block mass and the Tower of London would benefit from 'mediation' by a so called 'foothill' stepping-down building as a rouse for justifying inappropriate eastward extension of an uncomfortably bloated cluster of skyscrapers. The slight carving away of its uppermost NE corner of the proposal is a minimal concession compared to its overbearing height and impact on the historically sensitive Bevis Marks synagogue. The synagogue is protected by virtue of it being in a conservation area and the obfuscating impact assessment diminishes the significant harm that the development will have on it. This internationally renowned house of prayer and contemplation draws significant emotional awe from its quality of light and glimpses of the sky which will be lost when blocked by the new building. It was established previously that the development benefits do not outweigh the substantial harm to the synagogue's setting and this remains the case.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Charles	Michelle	I am very sad to hear that you want to build a multi storey building to tower over Bevis Marks Synagogue. The esseence of this congregation is all about light, how we can bring light into our world. What you propose here nulifies this building, and our community. My grandfather came to London as a refugee from Cairo and this building is the only place we have to congregrate as sephardi people, that is huge. I would be happy and willing to meet with anyone if you would like to hear more about why you must appreciate our London, that is, that architecture here and what buildings are often used for (to bring people together) is essential. Your idea of a post modernist sky scraper is creative and unrelated to this building, it hinders the light and nulifies the ability to pray in community. Imagine thousands of Arab jews who had to flee and were allowed here in the UK not being allowed to pray any more and having to hide in the dark shadows instead. Would you consider buidling sometjing that compliments and brings light to our neighbourhood for prayer? With nest wishes, Michelle Charles	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Chapman	Ariel	Having visited Bevis Marks synagogue on multiple occasions I am outraged and disgusted that the developers believe this proposal to be in any way acceptable. Bevis Marks is an important, historic national landmark still in use today by locals and visitors. This proposed development would destroy the nature of the building, its access to natural light and the spiritual peace it offers to so many. Bevis Marks must be protected at all costs, it is simply unconscionable that such an important part of both British and Jewish history can be threatened in this way.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Ellis	Edward	This scheme can surely only be objected to as a planning application and for listed building consent application on the grounds of the irreparable harm it would cause to the Bevis Marks Synagogue which is a Grade I listed designated historic asset, and the loss of significance of the Creechurch conservation area. Policy DM 12.2 Development in conservation areas identifies that: Development in conservation areas will only be permitted if it preserves and enhances the character or appearance of the conservation area. Contrary to that stated in the applicants DAS Vol 1; page 14, the proposed development is within the Creechurch conservation area. The scheme 24/00011/LBC proposes the partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys. The City of London Local Plan January 2015; Core Strategic Policy CS12: Historic Environment identifies the need: To conserve or enhance the significance of the City's heritage assets and their settings, and provide an attractive environment for the City's communities and visitors, by safeguarding the City's listed buildings and their settings, while allowing appropriate adaptation and new uses. I must object to the planning application and for listed building consent application on the grounds of the forever harm it would cause to the Bevis Marks Synagogue, a Grade I listed designated historic asset, and the loss of significance of the Creechurch conservation area. The proposed development is also within the Creechurch conservation area, and will have a significant detrimental impact on the character and appearance of the conservation area, in contravention of Policy DM 12.2. The proposal for the 43-storey tower immediately adjacent to the grade I listed Bevis Marks Synagogue will harm the exceptional significance of the Synagogue in its setting by further eroding its prominence in its immediate surroundings.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	djanogly	david	i am a member of the S&P Jews' Congregation this important part of history is imperative to be preserved. I was married here and regularly attend services. The City of London is already densely occupied with landmarks, and this is no different. all new development should take absolute care to protect assets of significant community interest as well as those of grade 1 status. the developer is approaching this speculatively, the protection for this asset of value is well documented, and their advisors have clearly been arrogant to suggest they should present something which undoubtedly harms the use and experience bevis marks synagogue.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Latter	Carole	The idea of this monstrous building being built next door to the beautiful synagogue fills me with dread. Who could possibly agree to this plan?	NO	Public Access website	12-Apr-24

24/00021/FULEIA	Hayim	Alex	I strongly object to this proposed planning application. This will undermine the running of Bevis Marks Synagogue, a building that has been at the centre of Jewish life in London and throughout the UK for hundreds of years. This historic and beautiful building should be protected by the planning authorities today and in the future. Any attempts to develop towers that overlook Bevis Marks Synagogue and shows no consideration or understanding of the the history in this part of London should be thwarted.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Abrahams	Bianca	This is an unacceptable building project that will completely block the light of the synagogue and destroy the building as a place of worship. It would be tragic to let the building go ahead.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Morgan	Leslie	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm an attender at Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Ballen	Russell	Wrong development in wrong area.	NO	Public Access	12-Apr-24
24/00021/FULEIA	Brodie	Philip	I would like to echo the other criticisms as I feel that this development ignores the treasure of historic buildings in the area. Bevis Marks represents an important part of the city and its social fabric, and must be protected at all costs as much as possible for its intended use. Please do not ignore these important factors at your peril...	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Black	Aaron	It will over shadow a historic synagogue	NO	Public Access	12-Apr-24
24/00021/FULEIA	Hayim	Caroline	Bevis Marks Synagogue is a jewel in the City and as such I am firmly against any proposed planning application which threatens the existence of Bevis Marks as it stands today. To allow an application for towers which overlook the synagogue and surroundings would forever change this historic site. London has changed so much in the past few years. Please acknowledge the importance of preserving this outstanding unique historic building in the City of London and its present surroundings.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Brett	Richard	I object, in the strongest possible terms to this proposed development, which would have huge ramifications for historic buildings in the area - a Conservation Zone, containing the oldest synagogue in the UK. A 45 storey tower would completely overwhelm Bevis Marks synagogue - a Grade 1 Listed Building of enormous historic and cultural significance that was built in 1701 and has been in continuous use as a house of worship since then. The proposed tower would destroy the southern sky view, which is an essential part of the synagogue's setting, and important for the religious rituals. The view of the moon's passage across the sky, and many other celestial bodies, would be blocked. The tower would overshadow the synagogue and its courtyard for much of the day, limiting the use of the courtyard for rituals and celebrations. It would also further reduce the currently limited daylight that penetrates into the synagogue, making it even more difficult to conduct worship in this historic synagogue. Because of the historic nature of the synagogue, installing additional electric lighting is not practical. It is very unlikely that such a building would be allowed next to St Paul's Cathedral, so why is the synagogue not afforded the same protection? The Bevis Marks Synagogue has the same significance for the Jewish community as St Paul's Cathedral or Westminster Abbey have for the wider community. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. If built, this tower would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the whole Conservation Area. I therefore urge the Planning Committee to reject this proposal and thereby protect the Bevis Marks Synagogue, which would enable it to continue in use for at least the next 300 years.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Zagoria-Moffet	Mikayla	The devastating effect this would have on the Jewish community in the area is unacceptable.	NO	Public Access	12-Apr-24
24/00021/FULEIA	Querfurth	N	I'm writing to express my strong opposition to this new application. I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area.This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light.This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure.I urge you to refuse this application'	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Posnansky	Rachel	Bevis Marks has been around for 300 years built in 1701 and is an iconic synagogue which has served its community. I got married there and would be very sad to see tower blocks built which would destroy the light as well as the surrounding area.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Monk	Gregory	This application would endanger a historical building that is in current use and should be completely refused.	NO	Public Access website	12-Apr-24
24/00021/FULEIA	Leigh	David	The proposed 45 storey tower is an outrageous imposition which would utterly overwhelm the synagogue, a Grade 1 Listed building of enormous historic and cultural significance. Furthermore, the tower would destroy the southern sky view, which is a vital part of the setting of the synagogue and would overshadow the synagogue and its courtyard for much of the day. Other justifications put forward by the developers are a transparently cynical attempt to manipulate the planning system and circumvent the wholly justified objections of the local, national and international community. It is to be hoped that the City of London will not contemplate such a gross violation of one of its most valuable heritage and community assets.	NO	Public Access website	13-Apr-24
24/00021/FULEIA	Lethbridge	Lucy	The squeezing of important historical landmarks under vast, bland, corporate modern skyscrapers is ruining the city that I have lived in all my life. All that is interesting and quirky about London's historical architecture is lost under the shadow of dreary functionalist buildings that could be found in any city in the world. And please ... let's keep the sky. Without it, the city is a place of darkness.	NO	Public Access website	13-Apr-24
24/00021/FULEIA	Strauss	Jimmy	I cannot believe that having refused building consent for a similar plan in 2022, you are contemplating granting consent for this monstrous development that would certainly be refused if it had been overlooking St. Paul's cathedral. Double standards with a hint of anti Jewish racism. For those that are unaware Bevis Marks Synagogue is a Grade 1 listed building that is over 300 years old. It continues to function as a place of worship and is a major tourist attraction. This new development will remove natural daylight and make it more difficult to hold Services in the Synagogue.	NO	Public Access website	13-Apr-24

24/00021/FULEIA	Pinto	Andrew	I am writing to express my strong opposition to this new application(24/00021/FULEIA) I'm a member of Bevis Marks Spanish & Portuguese Jewish Community and I am appalled to see this new proposal particularly after its refusal 2 years ago and the recent adoption of the Creechurch Conservation Area. This new application barely changed since it was last submitted is not in keeping with the conservative of a Grade 1 listed building which is now in the conservation area and is the most Important Jewish Site in the UK. The new tower to the synagogues immediate south would dominate the setting of the synagogue, block out the religiously important southern sky view and overshadow the synagogue and its courtyard. I urge you to refuse this application.	NO	Public Access website	13-Apr-24
24/00021/FULEIA	Musikant	Kris	This development will adversely affect the Bevis Marks Synagogue in the same way as the plans for this site, which were previously refused. It is a disgrace that plans for this site, so similar to the previous application are being reconsidered. Having recently unanimously agreed to the Conservation Plan, which afforded protection for this Grade 1 building, the City Corporation is now undermining its decision and renegading on the apparent protection the the Conservation Plan should have guaranteed. This synagogue is the only non-Christian house of worship in the square mile, standing almost unchanged for over three-hundred years and which my family have been part of for all that time - ten generations married under its auspices. St. Paul's Cathedral has protection, not only for the fabric of its building but also its site lines. The Bevis Marks Synagogue is the cathedral synagogue of the UK and should be afforded similar protection. This new / revised application should be refused.	NO	Public Access website	13-Apr-24
24/00021/FULEIA	Albert	Simon	This is yet another flagrant attempt to effectively destroy the oldest continuously functioning synagogue in the UK. This tower along the synagogue building's southern horizon would destroy the setting of the synagogue - essential in traditional ritual and in making the place a community hub - and reduce natural light levels beyond usability. Please stop this and any other development like it around the synagogue and finally commit to preserving the country's irreplaceable heritage.	NO	Public Access website	14-Apr-24
24/00021/FULEIA	Pervez	Imran	It's a beautiful building plan providing much needed investment for the local area and so many jobs, just what we need in tough economic times. The design will add to the local area and for any complaints - they can invest in better lighting if this is an issue for the minimal amount of people actually using teh space that is objecting.	NO	Public Access website	14-Apr-24
24/00021/FULEIA	Musikant	Barry	I consider that this planning application should never have reared its head again in only a slightly revised format to that which has already been rejected. It is an absolute disgrace that the City of London Planning Committee that passed the Conservation Plan which was approved so recently should be undermined. This proposed development will have serious detrimental effects on the Bevis Marks Synagogue, which is a Grade 1 listed building and should have the same protection as St. Paul's Cathedral and the Tower of London. Would you do this to those buildings?	NO	Public Access website	14-Apr-24
24/00021/FULEIA	Peery	Alan	As the oldest Jewish Synagogue of London, this religion's primary building should be recorded the same respect as St Paul's cathedral.	NO	Public Access website	15-Apr-24
24/00021/FULEIA	Ramos	Rosa	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-Apr-24
24/00021/FULEIA	Yudkin	Michael	I am astonished, and appalled, to see this application. A very similar application was refused some two years ago, and since then the area has been made a Conservation Area. I am a member of the Spanish and Portuguese Sephardi congregation and attend Bevis Marks synagogue, although I live very far away (in Oxford). Bevis Marks has a particular meaning for me (my wife and I were married there), but it is not on personal grounds that I oppose the application. Bevis Marks is central to the life and the history of Jews in England, and it would be intolerably painful to the Jewish community to have it overshadowed by the proposed building. But more than that, the architecture and historic importance of the synagogue are of great significance to the community as a whole, well beyond those of the Jewish faith. It's not for nothing that Bevis Marks is Grade One-Listed. Apart from the many practical problems that have been mentioned (the noise during construction, the permanent loss of light and so on) the proposed building would suffocate the historic building and its beautiful courtyard, and would destroy its context. I hope this wholly inappropriate building will not be allowed to go ahead.	NO	Public Access website	15-Apr-24
24/00021/FULEIA	boujo	edward	I'm strongly against this proposal. It's a very tall building that will negatively impact Bevis Marks synagogue. It will prevent a lot of natural light from coming into the synagogue and its court yard will be compromised. It's beautiful building A great wine listed building and in an A great wine listed building and in a conservation area. How it could be deemed responsible to be building such an How it could be deemed responsible to be building such a tall building in a conservation area as beyond me. Furthermore, from what I understand, there are many empty, office buildings and Availability for office space is strong in London , in the city of London and with Canary Wharf. I questioned the need for extra office capacity in the city of London. I would like to see the city of London makers case for more office capacity. Please strongly reconsider this proposal and factoring the negative impact on Bavis marks synagogue.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Chernoff	Barry	There is no further need for a large tower office block in this area as there have been numerous built over the last 20 years and demand for office space is reducing as employees work both fully and partially from home. The 45 storey tower would completely overwhelm the nearby synagogue that is a grade 1 listed religious and community building. It would damage the natural light that the synagogue currently receives. The supposed planning benefits of this development do not stand up to scrutiny.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Goulding	Niall	The building is of a high quality and provides a much needed visual break from the glass curtain walls of its neighbours, and it's lower height is appropriate for the tapering off of the City cluster. It will enhance views of the city when viewed from the Royal Parks.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Simons	Josephine	I am very concerned about the Bevis Marks Synagogue if this goes ahead. The building would overwhelm the Synagogue, destroy the southern sky view, and overshadow its courtyard. There is no gain to the Community as a whole, and it would belittle even more of our London history and heritage.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	dhaliwal	Mandeep	This project is very well designed and is much needed. The extra office workers will help support other businesses and help the local economy. I feel the look of the project adds to the area rather than takes a way from it	NO	Public Access website	16-Apr-24

24/00021/FULEIA	Pemberton	Nichola	I object to the building of a structure so tall within the vicinity of the important synagogue nearby. The synagogue is of cultural significance and this building would directly affect the light within and the religiously significant view.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Albert	Brian	Destroying the invirament	NO	Public Access	16-Apr-24
24/00021/FULEIA	Morton	Catherine	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Sneader	Charlie	Fails to consider the position of Bevis Marks Synagogue.	NO	Public Access	16-Apr-24
24/00021/FULEIA	Kelvin	Philip	Dear Council. I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and a regular attendee and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. I am also a Liveryman and Ward Member nearby as well as a Freeman of the City of London. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. I urge you to refuse this application. Philip Kelvin	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Peterman	David	Will stop light and overcrowd the are	NO	Public Access	16-Apr-24
24/00021/FULEIA	Lawrence	Beverley	I write as a Freeman of the City of London, and as a regular visitor to Bevis Marks Synagogue, to register my objection to yet another proposed development on the doorstep of this Grade-I listed building. A Conservation Area has already been agreed to protect Bevis Marks Synagogue, so I am dismayed that this new proposal is being considered, particularly after its refusal two years ago. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-I listed building. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. Additionally, there are concerns that construction of this tower could potentially weaken the foundations of the synagogue, and will create noise, mess and disruption for the community. Bevis Marks Synagogue was built in 1701, and my family worshipped there for generations. It is the ONLY non-Christian place of worship in the City, and recent excavations have shown the site to be of great historical importance. Please protect this wonderful building instead of seeking to destroy it. Do not allow it to become the victim of cultural vandalism. I urge you to refuse this application.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Morris	Malka	I cant believe that you are once again trying to undermine the decision made two years ago not to have any more tall buildings that will block natural light from reaching the historic Bevis-Marks synagogue. Shame on you! How many times do objections to your ill-founded decision to infringe upon the special significance of this 300 year old building have to be made. I strongly urge you to reconsider your plans to allow skyscrapers to be built anywhere in the vicinity of this unique preservation area. Let there remain one small section of the City of London to be preserved into the future as a unique reminder of London's extraordinary history. Thank you for considering this matter. Looking forward to a positive response.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Somekh	Ronald	Bevis Marks is the most important synagogue in the UK. To hide it in the shadows of a tower block will be a disaster. It is the oldest synagogue in the country and it's not fair to even consider smothering it with a monster shadow.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Rubinovich	Joel	Beavis Marks represents an integral part of the London Jewish community. It is there, and is used., not only by Londoners but also by people like myself who not only visit when in London on business but also attend at other special times. For example, I visited specifically at the special service honouring the accession of King Charles 111 who, I am informed, has a particular devotion to the synagogue. It is far too easy to demolish a property or to build one. The same cannot be said for a religious community.. Please do not yield to the demands of commerce and development but remember that London is not a creation of modernity but exists in an aura of tradition which is cherished.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Fraser	Lola	This project will affect an historical building: Bevis Marks Synagogue. It will block the light and make access constricted	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Benjamin	Janice	This synagogue is a very important building being the oldest on England.	NO	Public Access	16-Apr-24

24/00021/FULEIA	de Sola Mendes	Eliza	My family have a very long association with Bevis Marks. My 3rd great grandfather David Aaron de Sola was the Rabbi and my 4th great grandfather Haham Raphael Meldola was the Chief Rabbi of England. Bevis Marks has the longest continuous record of daily services unchanged even with WWII and the German bombings of London. No other synagogue sadly in Europe has this record. It is a great treasure not just for the Jewish community but for the legacy of the United Kingdom after Cromwell brought the Jews back to England. His Majesty, King Charles III has visited the Congregation and is Patron. Just as the area of the Tower of London is protected historic property so is Bevis Marks in its legacy for the Old City of London. The recent and ongoing encroachment of towering modern buildings in the area are a danger for many reasons for the light into the synagogue for the structural integrity of the ancient building. The City of London and the Government of the United Kingdom must protect the synagogue and reject this dangerous looming tower. There are so many other places in London they can build large towers this should not be one of them. I know that the following has been stated: A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked.The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability. Thank you	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Warren	Martin	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community. They propose to restore the Listed Holland House[1] and turn it over to various uses which are claimed to be of community benefit. Whilst the restoration of this building is to be welcomed, the claims about the community value of the uses must be viewed with great scepticism. The existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Skellon	Katherine	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm not a member of Bevis Marks' Spanish & Portuguese Jewish community, but a supporter of the synagogue and am interested in protecting its rich and important heritage. I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. 24/00021/FULEIA	Frojmovic	Eva	I'm writing to express my strong opposition to the application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am disappointed to see this new proposal, particularly after its refusal two years ago, and after the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building (Bevis Marks Synagogue), which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. Bevis Marks Synagogue is the Jewish counterpart of St. Paul's Cathedral and should be treated accordingly. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. The urban landscape around the historic synagogue would be ruined. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? That it's all about business to the detriment of heritage? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's 'Cathedral' synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Zeilinger	Tony	Poor placemaking and mitigations need to be made to let southern light access into the historic Bevis Marks Synagogue.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Kandel	Susan	Bevis Marks synagogue, in all its glory, has been a part of my community for hundreds of years. My great great grandparents traveled from Holland in the 1800s to settle close by and it has been part of my family's heritage ever since. It is a jewel in the heart of the City of London and a part of its living history. Our children and our grandchildren need to learn about the lives of their ancestors and what brought them to the City of London. The idea of engulfing it within a commercial development is heartbreaking. It needs its own space and its own light. The community has been praying within the walls of the Synagogue since 1701, using the light from the windows. Those windows must continue to allow the light to enter the building. Do not permit this development to happen.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Jackson	Daniel	It will materially affect Bevis Marks synagogue	NO	Public Access	16-Apr-24
24/00021/FULEIA	Haynes	Michelle	This building is totally out of character with Bevis Marks Synagogue and will totally overwhelm it.	NO	Public Access	16-Apr-24
24/00021/FULEIA	Getto	Melanie	Traffic or Highways Comments: I strongly object to this application of this 45 storey building being constructed so near to Bevis Marks Synagogue, the impact of which would be catastrophic for a place of worship, let alone the fact that this synagogue is an incredible heritage site, being the oldest synagogue in the UK. Bevis Marks is a Grade 1 listed building of enormous historic and cultural significance.The height of the proposed building will have a major impact on any natural light being visible in the synagogue's courtyard and it will be dwarfed by this multi storey building. It would destroy the southern sky view which contributes to religious ritual. The proposed building is to be built in simply the wrong place. The application will hem in the synagogue, blocking and encroaching on it's very soul, taking it's view of the sky, it's light, it's peace and tranquility and essentially negatively impacting the right of peaceful worship in the UK's oldest synagogue which has held regular services continuously for more than 300 years. My brother in law's family has had a seat there since the time of Oliver Cromwell. The development site is within the Creechurch Conservation Area and current planning policy is to not allow tall buildings in Conservation areas so there is a direct conflict with the statutory development plan. The existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and providing good service for many more years. Unnecessary demolition simply squanders the energy embodied in the building. The developers claims that they are providing planning benefits that outweigh the harm to the synagogue simply do not stand up to scrutiny and facilitating this monstrous development is disingenuous and would not be permitted within the vicinity of St Paul's Cathedral and therefore should not be permitted just metres from Britain's Jewry Cathedral synagogue.	NO	Public Access website	16-Apr-24

24/00021/FULEIA	Montagu	Isaac	I am writing to oppose this new development - as I also did the last time around. This new building seems no different and I don't understand why it's allowed to be resubmitted. I am a member of Bevis Marks Synagogue, and grew up in the Spanish & Portuguese Jewish community in its sister synagogue in Maida Vale. I have had a lifelong connection to the synagogue, as have many of its members, if not connections stretching back generations. I am now a musician and academic specialising in music of Sephardic Jewish communities, therefore I have this community, and the traditions I grew up with therein, to thank for my whole livelihood. For many within the community, the festive services each year in this building that people return from all of the country for, in some cases all over the world, are some of the most meaningful moments in our year. The historical significance of the building is also huge - not just the oldest synagogue in the UK, but the longest-running synagogue in Europe. Because of this, we have a visitor centre opening soon. With the closure during the pandemic of London's Jewish museum, this will make Bevis Marks the only public site to visit to learn about the UK's very significant Jewish community. This would be all be hugely impacted by this new skyscraper. It's an old, candlelit building, with big windows - the natural light is essential. If you don't believe me just go and visit - it's so so beautiful, really one of London's gems. Then reimagine it with this monster hanging over it. Our cultural heritage isn't worth selling off for another skyscraper. Thanks for your time and consideration.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Berk	Louis	I strongly object to this new application (24/00021/FULEIA). For the last 5 years I have been engaged by the Bevis Marks Heritage Foundation as the project photographer for the restoration of the synagogue and the creation of the new Dangoor Visitor Centre. During that time I have grown to appreciate the unique architectural, environmental and cultural importance of the Bevis Marks estate. It is similar to other sites of significant religious interest, for example the Methodist Centre in Bunhill Fields, St Pauls and Westminster Cathedrals and St Dunstans in the East. It is worth noting that in the case of these other sites, it is clear that the planning authorities take seriously their responsibilities to preserve the area from the venal self-interest of unnecessary architectural vanity projects. For the City of London to consider this appalling addition to the local area, adjacent to the Creechurch Conservation Area is beyond belief. In recent years City of London planning decisions have completely ignored the impact on all Londoners who are compelled to watch our skyline dominated by cynical vanity projects, without architectural merit and planned for short lifetimes (for example buildings on the Broadgate Estate barely 20 years old are already being replaced, so why were they built in the first place?). What kind of architectural heritage is the Corporation providing for future generations? It appears the decisions are only for the generation of income for the Corporation and not cultural capital of all Londoners. Think of the wider responsibility you have to all Londoners! I cannot even understand why in the age of increasing home-working the City needs more commercial space.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Lovric	Michelle	This is a Conservation and Heritage outrage. A Grade 1 listed site of supreme cultural and spiritual interest cannot be permitted to bullied and overwhelmed by a high-rise tower. If it can, then the City of London should be ashamed of prioritizing developer money over its precious historic stock.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Mizrahi	Paulette	This building will encroach on the functioning synagogue and all aspects surrounding life of its worshippers.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Poll	Michael	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a daily user of Bevis Marks Synagogue and am displeased to see yet another application that seeks to compromise the historic and unique setting of the synagogue. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. It is the oldest continuously functioning synagogue in Europe and potentially the world. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This development would demonstrate that the City of London Corporation does not value its unique historical monuments, which are to be celebrated and not overshadowed. I urge you to refuse this application.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Boyar	Michael	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	16-Apr-24

24/00021/FULEIA	Sherwood MBE	Peggy	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue. It seems unbelievable there is a new application after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, which is hardly changed since last time, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, immediately to the south of the synagogue, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. In times of rising anti-semitism, this is something which is extremely sensitive and should never even has got this far. I urge you to refuse this application.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Zubaida	David	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Porter	Deborah	I strongly object to this proposal for a 45 storey building in a conservation area. It would have a hugely negative impact on a building which has been there since the 18th century, Bevis Marks Synagogue is a Grade I listed building, a tourist attraction and a place of worship of enormous UK historic significance.	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Levene	Wendy	Strong objection to building a monstrosity blocking the oldest and most historical Synagogue in the UK. We are living in dreadful times with the Jewish people in this city and throughout the UK being persecuted. Bevis Marks is a beacon to education, history and tolerance with its magnificent history and priceless objects. Think carefully considering giving permission for an eyesore of a building! A huge ugly concrete structure that looms over a beautiful building it is an atrocity and disgrace!!! Do NOT allow this to happen!!	NO	Public Access website	16-Apr-24
24/00021/FULEIA	Walker	Anne	I am writing to express my opposition to the above-noted building application adjacent to Bevis Marks Synagogue. Bevis Marks Synagogue is a very special place. It is of profound historical and religious significance to London and to the rest of world, including Canada from where I submit these comments. Bevis Marks is the only synagogue to have provided continuous services for over 300 years. It is only one of two such buildings in the UK and Europe. It provides a safe spiritual home to many who have left London for the far reaches of the world. Like other historically significant structures in London, and elsewhere, is vital to preserve Bevis Marks in its undisturbed condition. This includes maintaining access to and use of its structures and surrounding spaces. The provision of security to its members cannot be compromised. The proposed demolition and construction of a non-descript office tower, of which there are plenty in London, may forever alter this historic place and compromise its function for the religious community. Even in Toronto Canada, buildings of historic, religious and cultural significance are given the dignity of space, of light, and of air. Thank you for your consideration of this response.	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Phillips	gary	A 45 storey tower, only 25 metres away, would completely overwhelm the Bevis Marks synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. The synagogue has been in constant and continuous use since 1701. Gary Phillips	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Goldberg	Mira	The construction of a 45-storey tower next to a Grade 1 Listed synagogue raises concerns about overshadowing, loss of historic views, and disruption to religious rituals due to reduced daylight. The proposed building conflicts with conservation area regulations and lacks sufficient community benefits to outweigh its negative impacts.	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Oakley	Melanie	Too impactful on the surrounding area. This should not be built as a high rise building.	NO	Public Access	17-Apr-24
24/00021/FULEIA	Halban	Peter	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? I urge you to refuse this application.	NO	Public Access website	17-Apr-24

24/00021/FULEIA	Berger	Doreen	I object to this application as it will detract from the historic appearance and history of the area in and around Bevis Marks. The synagogue at Bevis Marks, established as long ago as 1701, and the oldest Jewish house of worship in the United Kingdom, is a particular point of interest to tourists, of whatever creed or religion, visiting the City of London. The building itself is the centre of communal affairs for the Sephardic community of London and important as a focal point for this Abrahamic religion., while welcoming visitors and tourists alike. There is a unique atmosphere of peace and tranquillity around its central courtyard. and its historic importance in the history of one of London's most established communities, and London itself, has always, been protected. The synagogue and surrounding area of Bevis Marks is indelibly part of the history of the Anglo-Jewish section of the population of London and, indeed part of the very fabric of London. Yet, although part of its past history, it plays an important part in the celebration of divergence of the present day. Its historic importance in the history of the City of London cannot in any way be overemphasised. The area around the Synagogue and its precincts should be protected to protect the history of the City of London itself. To do otherwise is to betray the City itself.	NO	Public Access website	17-Apr-24
24/00021/FULEIA	ALPERT	MICHAEL	Dear Friends,I am once again sending a call to action for you to help us protect Bevis Marks Synagogue.Despite our successfully achieving a Conservation Area around Bevis Marks Synagogue just a few months ago, the City of London has now undermined our efforts and changed the goalposts which previously barred tall buildings in these protected areas.As a result, developers at 31 Bury St have now submitted a new application for a 45 storey tower, a negligible change from the 48 storey tower that was refused just two years ago. It fails to respect the immense heritage of the synagogue site and would have a disastrous impact on Bevis Marks Synagogue as a living Jewish congregation, as well as the Dangoor Heritage and Education Visitor Centre.We therefore need to you to strongly object, and to do so without delay. We encourage you to use your own words and views, but provide you with a sample template below. You can also read this document for additional points.To submit your objection please follow this link.Thank you, ' Melody SalemChair, Bevis Marks Synagogue Heritage Foundation I'm writing to express my strong opposition to this new application (24/00021/FULEIA).I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area.This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year.The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light.What message would permitting this obscenity	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Shaw	Carole	A 43-storey building will dwarf and overshadow Bevis Marks Synagogue, a heritage site and listed building, with many overseas visitors. A previous application for a 48-storey building was rejected two years ago. So should this be.	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Har-Zion	Shay	Will affect badly the existence and activities taking place in the Synagogue	NO	Public Access	17-Apr-24
24/00021/FULEIA	Urazovskaya	Liana	Jews arrived to London in 1651 and lived in City of London . However, a lot of changed since then and the only reminder of Jews on the area is Bevis Mark Sunagogue , which is building of historic and cultural significance. The request for 45 building nearby is not acceptable. I would not imaging that approval could be granted for this project near Westminster Abbey or St Paul's cathedral, so why is the synagogue not afforded the same protection?It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked.I would appreciate it if you could consider to leave this area untouchable.	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Costa	E	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. 24/00021/FULEIA	Steinberg	Jonathan	Terrible shame to erect this building next to such a historic and important synagogue as Bevis Marks. It will drown out the light and the building in general	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Jarolimkova	Vita	I believe the tall building should not be built next to a Grade I listed synagogue. It will significantly impair the ability of the local Jewish community to practice their faith and detract from a historical, over 300 years old, monument. The developer significantly overestimates the positive benefit of their proposed construction, any residential building in Canary Wharf has the same features and the proposal therefore barely meets the expectations of current residential buildings. The benefit of building the proposed structure is outweighed by its negative impact on the integrity of the synagogue and its surroundings.	NO	Public Access website	17-Apr-24
24/00021/FULEIA	bright	georgina	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance.It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked.	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Brower	Danny	At a time of high antisemitism the City of London should be promoting its history of tolerance and acceptance of Jews instead of blocking its multicultural heritage. The City of London would not permit such an application next to St Paul's cathedral. It should not allow it next to the most culturally significant and historic Jewish site in the City of London either. City of London can decide whether it wishes to alienate its Jewish residents. Ultimately Jews can decide to move our residences and businesses out of the City of London should City of London disregard our firm objections.	NO	Public Access website	17-Apr-24

24/00021/FULEIA	Levi	Ron	I find it alarming that so soon after rejecting a similar application, due to the infringement of light on an incredibly important Jewish heritage site, that the planners are considering another Tower in the same spot. The huge outpouring of negative reaction to the previous applications should have convinced planners that the development of huge monstrous towers in this facility is neither endearing nor desired. There is an important piece of History which seems to be marginalized on the altar of more square footage. At the present time , there is no shortage of office space, the outlook looks even worse, why do you need to build more on one of the few truly historical areas of the city. Please reject this application once and for all time. Regards Ron Levi	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Rubens	Angela	Horrified to see this plan. Bevis Marks synagogue is the cathedral synagogue of the Jewish community.The proposed building will dwarf it and will take light from it. In any case this is a designated conservation area. King Charles is a king of all faiths and your proposal in no way reflects this sentiment. My hope is that you will not go ahead with this plan	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Perdomo	Pedro	You are going to alter the character of the synagogue by placing that huge building.	NO	Public Access	17-Apr-24
24/00021/FULEIA	Crollick	Avril	Bevis Marks Synagogue is a historic building of huge significance not just to the Sephardic Jewish community but to the general public as well. The proposed 45 storey building will block light and be an eyesore to an otherwise unique and beautiful religious site	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Ghnassia	Oliver	Bevis Marks Synagogue is the oldest continuously used synagogue in Britain, dating from 1701. It has enormous cultural significance, being in effect the cathedral church of Judaism. It is located in the City of London, where it has over the years suffered tall buildings being erected around it. However, the very important southern sky view remains unobstructed, enabling the moon and the stars to be viewed from the courtyard. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community.	NO	Public Access website	17-Apr-24
24/00021/FULEIA	Sanford	Clive	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. 24/00021/FULEIA	Abell	Grace	I'm not Jewish, however the global Jewish community has seen a great deal of persecution which has become more aggravated in recent months. Please let Bevis Marks synagogue have the sunlight and sky view it is accustomed to. If London truly is a global capital where people of all faiths and cultures are protected, the building of the tower next door would not be entertained. I doubt this would be considered to adjoin a cathedral, temple or mosque, so please don't do this to the synagogue, which will be loved far more than any glass fronted corporate tower. Many thanks.	NO	Public Access website	18-Apr-24
24/00021/FULEIA	Jackson	Judith	We are saddened to hear the planning application to build a very tall building very near to Bevis Marks synagogue, is being reconsidered. For all the reasons given before, it would be really serious if this happened. It is the oldest synagogue in London, not just a museum, but a living place of worship. The light coming into the building would be seriously restricted. The planning application apparently removed the height by just a few floors. The whole project will be seriously damaging to the Jewish community in London and it would be very sad to see this synagogue diminished. We do hope that you will carefully reconsider and not allow the application.	NO	Public Access website	18-Apr-24

24/00021/FULEIA	Jackson	Michael	If the application is approved the light coming into the Bevis Marks synagogue building and the courtyard will be further reduced from its already limited state. Bevis Marks synagogue is one of the most notable buildings in London and it is wrong to allow it to be treated with such neglect and disrespect. I strongly disapprove of the application and I hope that you will reject it.	NO	Public Access website	18-Apr-24
24/00021/FULEIA	Finkel	Mazaltob Ruth	The proposed building will severely impact Bevis Marks Synagogue, one of the oldest buildings in the city. The amount of light in the synagogue will be drastically reduced and the synagogue will be overlooked by the proposed building. It is outrageous that this is even being considered when a previous application was refused: a reduction of 3 storeys will not make a difference to the amount of light that will be affected. It fails to respect the immense heritage of the synagogue site and would have a disastrous impact on Bevis Marks Synagogue as a living Jewish congregation, as well as the Dangoor Heritage and Education Visitor Centre.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Sneader	Alex	Would affect nearby heritage site, Bevis Markes synagogue. Blocking light in and affecting surrounding ground	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Richards	David	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Skinazi	Karen E.	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm the president of the British and Irish Association for Jewish Studies and an associate professor of literature and culture at University of Bristol and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area. The synagogue is the most important Jewish site in the UK, and remarkably the only synagogue in the world in continuous use dating back to 1701. The new tower, to the synagogue's immediate south, puts this at risk and is not in keeping with the values or policies I would expect from the City of London and the UK. The new tower would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. The end result would be to further stretch an already challenging situation, making it increasingly difficult for the synagogue to continue to serve its primary function, that of a functioning synagogue. This puts at risk the immense intangible heritage remarkably preserved in this Spanish & Portuguese Jewish congregation, a surviving ancient religious tradition from centuries ago. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Green	Abigail	I am a Jewish historian who works extensively with the heritage sector. I previously gave evidence to the Planning and Transport committee when an earlier proposal for this site was made, and have subsequently drafted two reports (see details here https://jch.history.ox.ac.uk/article/our-work-bevis-marks). I am not paid for this work, which is time-consuming. The reason I do this is because I consider the attempt to construct a very tall building on this site to be an existential threat to the heritage value of Bevis Marks synagogue, which is not merely architectural but also communal and historic, intangible as well as tangible. I note that the City has admired the quality of my work on this issue, whilst ignoring it to all intents and purposes. This, to my mind, demonstrates a desire to pay lipservice only to the need to preserve Bevis Marks Synagogue as a living place of worship. It is a shocking state of affairs and, as someone whose family have worshipped here since it was built (and still do) I am very distressed. This is a very difficult time for British Jews and the government is keen to press ahead with a British Jewish heritage month - a course of action at odds with the City's support for the proposed building. In that context, i want to add that I am deeply concerned by the threat this proposal poses to community relations at a very sensitive time: it is in clear breach of the Public Service Equality Duty to preserve inter-community good relations.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Bennett	Michael	I am a regular attendee at Bevis Marks Synagogue & I objected to the planning application to develop a tall building at Bury Street which took away much of the light from the Synagogue. The application was rejected & a new application has been made for the same site which is marginally lower in height than the original application but is largely the same so my grounds for objection are unchanged. The planners granted a conservation area in rejecting the original application & this protected the Synagogue & it would that the benefits derived from this are now being taken away. Bevis Marks Synagogue has a 300 year + history & this should be respected.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Copitch	Cyril	This application has already been rejected and now it has been submitted again the reasons for the injection in the first place has not changed I find it very upsetting that thing of beauty and Importance to the community and the history of Great Britain it being damaged by this application	NO	Public Access website	19-Apr-24

24/00021/FULEIA	Richards	Mark	Dear Sirs I'm writing to express my strong opposition to this new application (24/00021/FULEIA). After the original plans were rejected, quite rightly, this new application represents exactly the same issues as the original and should be strongly refused. This site is of huge historical interest to London's Jewish community and this application represents a clear and obvious threat, especially after the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower is yet another hideous monstrosity that only serves to crowd the skyline and produce more office space that is likely to stay empty with more and more people working from home. The tower to the synagogue's immediate south, would dominate the PROTECTED setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Blume	Dame Hilary	the proposed development adversely affects Bevis Marks Synagogue, and as such it shows little regard to the contribution made by the Jewish community to the City of London.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	LEVY	JOHN	I write to voice my vehement opposition to this "new" application . I am a supporter of Bevis Marks Synagogue and am appalled to see this proposal, especially after it's refusal two years ago and the recent adoption of the Creechurch Conservation Area. This "new" application is a slight "rehash" of the one previously submitted and is not in keeping with the conservation of a Grade 1 listed building which is now also in a conservation area. It is also the most important site of Jewish history in the UK and a Heritage and Education visitor centre is due to open later this year. The new tower, to the synagogue's south would dominate the protected setting and block the religiously important southern view. It would overshadow the synagogue and it's courtyard dramatically reducing it's light. Approval of this scheme would simply reinforce the impression that The City of London is more concerned about another monolithic tower block (and the accompanying income) than preserving the history around this magnificent Jewish synagogue. Using the analysis of David Baddiel - would such an application be made if it was adjoining St Pauls Cathedral? No I don't think so either. I trust you will make the only sensible decision and reject this application.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Eshel	Rosemary	Our family has long been members of the Spanish & Portuguese Congregation connected to Bevis Marks for several generations I feel strongly that the proposal to build a 45-storey tower would very much overwhelm the synagogue which has much historic and cultural significance. . Bevis Marks is a vibrant functioning synagogue with a large congregation who use both the inside & outside courtyard areas. The plan to erect such a tall tower would reduce considerably the function and use of the courtyard for rituals, functions and community cerebrations. It is inconconceivable that such a project would not take into account the historic significance of this important building and plan to dwarf it by the current proposal.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	King	Albert	Awful. It will severely affect the Bevis Marks Synagogue, a building of national importance	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Joory	Joy	I am writing to express my strong opposition to this new application (24/00021/FULEIA). I am a strong supporter of Bevis Marks Synagogue. I am appalled to see this new proposal, especially after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	TREUHERZ i	Francis	I hope that you will not permit the proposed new building to be constructed and so please preserve the life of the beautiful historic synagogue. I suggest that you visit the synagogue for a sabbath or festival service and see for yourself how the service is conducted. Thank you.	NO	Public Access website	19-Apr-24

24/00021/FULEIA	Gold	Jeffrey and Bonita	Planning application reference: 24/00021/FULEIA. I wish to object to the above planning application on the following grounds: - It will have an extremely damaging impact on the Bevis Marks Synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. Grade 1 listing affords protection to such buildings not only as regards their physical integrity but should also preserve their setting. In this case both the synagogue and its courtyard would be overwhelmed and its setting irreparably harmed - The proposed new building will destroy the view of the southern sky view. This is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. - Both the synagogue and its courtyard would be overshadowed for much of the day, reducing the useability of the courtyard including for rituals and celebrations. - The proposed new building would further reduce the little daylight currently penetrating into the synagogue, The proposed new building would make it even worse - it would be more difficult to conduct worship and other activities. It should also be appreciated that, due to the historic nature of the synagogue, installing additional electric lighting is not feasible. - The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, and the current external appearances and settings of the buildings should likewise be protected. - The proposed building will be detrimental to the setting of other heritage assets in the local area, and will therefore offend against the qualities of the Conservation Area as a whole. The above factors are reinforced by the following; - - It seems highly unlikely that a building such as that proposed would be allowed next to St Paul's Cathedral - such an historic synagogue sh	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Brooks Evans	Michelle	If built the tower will cause great damage to Bevis Marks synagogue's protected setting, internal light levels, and the community's ability to worship by blotting out its southern exposure sky-view.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Gomes da Costa	Diana	I strongly object to application 24/00021/FULEIA for the following reasons: 1) It violates the newly adopted Creechurch Conservation Area as it threatens the conservation of a Grade 1 listed building, namely Bevis Marks Synagogue. 2) Two years ago a similar application was rightly rejected on the grounds that it would deny the Synagogue and its courtyard, of necessary light. Application 24/00021/FULEIA would do the same, if it is allowed to succeed. 3) Bevis Marks Synagogue is the oldest Synagogue and the most important Jewish site in the UK. It has held Services consistently since its foundation in 1701 and is still a most popular venue for weddings and other notable events. 4) The Synagogue is also a popular destination for tourists and a new Heritage and Education Visitor Centre will soon be opening its doors, potentially likely to attract more visitors, which is certainly to the benefit of the City of London and in particular to other nearby tourist attractions and businesses, such as restaurants. The possibility of a new structure, over-shadowing the Synagogue and the new Visitor Centre, will undoubtedly mar the experience of sightseers, who visit from the UK as well as from all parts of the world. 5) Bevis Marks Synagogue is the only non-Christian place of worship in the City of London. This raises the question as to whether if a similar planning application to 24/00021/FULEIA, were made adjacent to St. Paul's Cathedral, would be acceptable. In conclusion, the City of London has over many years rightly rejected previous ill-conceived planning applications which threatened the existence of the Jewish Community's most treasured possession, namely Bevis Marks Synagogue. Hopefully, planning application 24/00021/FULEIA will be similarly and decisively vetoed as furthermore, agreement would contravene the City of London's own conservation plans for the Creechurch Area of the City.	NO	Public Access website	19-Apr-24
24/00021/FULEIA	Page	Anne	Too many tall office buildings in the City already. Demolition bad for the environment. Damage to the surrounds of the newly refurbished and mighty ancient synagogue. Don't do it.	NO	Public Access website	20-Apr-24
24/00021/FULEIA	Carver	Shirlee	I strongly object to this new development as it means Bevis Marks Synagogue will be obstructed by the tall buildings and it is the oldest synagogue in the UK (constructed in 1701) as well as being a beautiful place of worship and a safe haven for people practising their religion. The synagogue is also a heritage site and a famous landmark too and many people flock to see it, especially tourists from around the world. Why would any construction firm choose to develop tall tower buildings so close to a famous heritage site?? It would be a tragedy if this development was allowed to go ahead. This is the second time this Synagogue has been in the firing line. Pick a DIFFERENT location!!!	NO	Public Access website	20-Apr-24
24/00021/FULEIA	Smilg	Jeremy	Please reconsider this. 1) It will dominate the area. 2) It is not needed. 3) Building it will cause vast local disruption. 4) Many of the existing office buildings already in the City will be left vacant. 5) Architecturally, it is hideous,	NO	Public Access website	21-Apr-24

I urge you to refuse this application. Jo Franks	NO	Public Access website	22-Apr-24
24/00021/FULEIA	Grubin	Donald	It's hard to believe that yet again an attempt is being made to erect an imposing building that threatens Bevis Marks Syngagogue, especially as since the last proposal was rejected a conservation area was established in the area in whch the Synagogue sits. The effect on this Grade 1 listed building will be to dominate it and its courtyard. Given that a very similar proposal was rejected just a couple of years ago I urge you to reject this one as well.	NO	Public Access website	22-Apr-24
24/00021/FULEIA	Pilo	Jacquelynne	Please do not allow the Bevis Marks Synagogue to be overshadowed by this development. The Bevis Marks is historically significant. It is British Jewry's Cathedral synagogue and is used and visited by people from all over the world. Don't let this beautiful site be diminished. This kind of proposal would never be considered if it was in the vicinity of St Paul's Cathedral. Thank you Jacquelynne Pilo Boynton Beach Florida, USA.	NO	Public Access website	22-Apr-24
24/00021/FULEIA	Black	Pat	This proposed development is totally unacceptable given the impact it will have on Bevis Marks Synagogue. The development proposed in 2020 was rightly refused planning permission. This new application should be refused for the same reasons. It is too tall and will overshadow the synagogue, which is a Grade 1 listed building of great historical, cultural, and religious significance being the most important Jewish site in the UK. In particular, the new building will destroy the southern sky view which is an important part of the setting of the synagogue. The developers state that the new development will have many benefits for the community which, even if true, does not justify the harm which will be done to the synagogue. This development is in the Creechurch Conservation Area, this alone should be sufficient for the application to be refused. A development like this would not be permitted close to St Paul's Cathedral and should not be permitted here.	NO	Public Access website	22-Apr-24
24/00021/FULEIA	GARCIA	Nicola	My objection to this is that once again the building of an extremely high rise block is being proposed that would block out light in the oldest continuously active place of Jewish worship in this country and the only synoagogue in the square mile. It is the cathedral synagogue of Great Britain and as such should be treated with the same respect as St Paul's Cathedral. Nobody would contemplate such a plan in the immediate environs of the Cathedral. I was married at Bevis Marks as were my ancestors and my husband's ancestors and now my son had his wedding ceremony there; his wife's family from Italy have also had connections to Bevis Marks going back to the 18th century. Whilst ours is a personal connection, it is a story of migration and settlement that must not be lost. Given the City of London's clear sensitivity to the heritage of others, why is the Jewish community not being afforded the same treatment? More importantly, a plan that was extremely similar to this was rejected and in the intervening time the Creechurch conservation area has been established so how is this proposal even on the table? Current planning policy is prohibits the construction of new tall buildings in conservation areas, so there is a direct conflict with the statutory development plan; this tower would compromise the qualities not only of Bevis Marks but of the whole Conservation Area.	NO	Public Access website	22-Apr-24
24/00021/FULEIA	Courtney	Yvonne	The whole premise of the proposal is that of greed. From five floors to 43, is an 800% increase in height - in a conservation area. Even the addition to Holland House is appalling - in the name of extracting as much potential floor space as possible, to maximise profit. The current rooftop area is perfect as it is, especially considering that it is a much loved listed building. Any addition destroys that. The scheme overscales everything surrounding it, in a dense, tightly woven urban fabric which is not what one has at the Gherkin or at Creechurch Place. Those two tall buildings are surrounded by space. The area at Creechurch Lane and Bury Street has no space around it. So increasing the existing height by four to twenty floors would seem a more appropriate scale of development than a New York 'pencil tower'. With a historic church and synagogue less than 100m away, it seems arrogant to suggest a skyscraper would be appropriate. I am surprised that this scheme has got to this point and must have had officer support to be submitted for planning. We as residents have been left out of any consultations. We therefore don't trust the cloak and dagger approach of the planning application, and are surprised and disappointed that the City of London Corporation would support such a scheme.	NO	Public Access website	22-Apr-24
24/00021/FULEIA	Sale	Anabel Unity	If the construction of this building went ahead it would significantly and negatively damage the Bevis Marks synagogue, which has stood unfettered for centuries as an important global symbol of British Jewry. The proposed building would significantly reduce the daylight in the synagogue, which relies on daylight and candlelight for its services. Previous proposals suggested the building would be 48 stories high and this proposal says it would be 43. This is still inappropriate because such a building would dominate the landscape, overshadowing Bevin Marks and its historical importance to British Jews and others. The construction of the building would also disrupt the religious lives of those who use the synagogue. Such a proposal would not be made for next to St Paul's Cathedral for the reasons stated above. It should be rejected and the land around Bevis Marks protected against building tower blocks.	NO	Public Access website	23-Apr-24

24/00021/FULEIA	Harris	John	As a now retired City Worker I am very familiar with the Bevis Marks area and the encroachment it has suffered from nearby developments in recent years. The persistent climate of development in the City does not reflect a need for accommodation or retail space it only seeks to enrich the developer at the expense of the historic fabric of the Cty of London. The time has come for a stand by local and national planners to prevent further unnecessary development in sensitive areas. For context in this time of heightened religious tension you should note I am an atheist so not partisan in this matter; my objection is untainted by bias.	NO	Public Access website	23-Apr-24
24/00021/FULEIA	Burstin	Stephen	Thank you for the opportunity of commenting, indeed objecting vociferously, to what will not only be a true blight on the area but a total disregard for the glaring detrimental effects this proposal will have on the oldest, most revered place of Jewish worship in this country, . I conduct walking tours several times a week of the Old Jewish Quarter and include Bevis Marks Synagogue as a stop-off when I relate its enthralling story and links to famous historic figures. I have on each tour mentioned the current planning threat to Bevis Marks and without exception my clients, Jewish and non-Jewish Londoners alike, have been appalled by the proposal and its indisputable negative consequences. On behalf of these hundreds of objectors I have met (and myself) I urge you to turn down once again what would not only be a travesty for the synagogue and the area generally but also what would be seen as a shameful act by society today (especially its authorities) in the eyes of tomorrow's generations.	NO	Public Access website	23-Apr-24

24/00021/FULEIA	Rees	Alison	It would be completely wrong to allow a 45 storey tower, when a 48 storey tower was refused just two years ago. It fails to respect the immense heritage of the synagogue site and would have a disastrous impact on the Grade 1 listed building which is Bevis Marks Synagogue - a living Jewish congregation, as well as the Dangoor Heritage and Education Visitor Centre. This project would destroy the sky view as well as overshadow the synagogue courtyard, impacting significantly on the light within the synagogue. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so neeeds to be rejected as there is a direct conflict with the statutory development plan.	NO	Public Access website	23-Apr-24
24/00021/FULEIA	Coleman	Brian	I am the former London Assembly Member for Barnet and Camden and represented the largest number of Jewish voters in the United Kingdom. Please will the City Corporation see sense and stop this proposed development which will have severe detrimental effects on the Bevis Marks Synagogue which as you know is the oldest Synagogue in the United Kingdom . The proposed development will overshadow the Synagogue which will lose natural light. Further the proposed building has no architectural merit and the developers just must do better in order to justify the damage to Anglo Jewry heritage.	NO	Public Access website	23-Apr-24
24/00021/FULEIA	Carson	Steven	Objection on the same grounds as we're put made with the previous application which was refused. Mayor Saddiq Khans bias should not influence this decision	NO	Public Access website	23-Apr-24
24/00021/FULEIA	Denham	J	I strongly object to this application - It will impact negatively on the new Creechurch Conservation Area designated by the City of London earlier this year. This unnecessary multi-story office block will overshadow & decimate the daylight / sunlight on neighbouring buildings most notably the grade 1 listed Bevis Marks Synagogue where natural light is vital. It will also impact negatively on the nearby Tower of London World Heritage Site.	NO	Public Access website	23-Apr-24
24/00021/FULEIA	Jeffrey	Robin	This is a historical building of the first importance, its position and function should not be compromised in any way. Bevis Marks is centrally important to the history of the Jews in this country, but also more broadly to our tradition of religious tolerance, dating back to the reign of Charles II. This proposal shows a grotesque disregard for the history of London, our country and our diverse society. It should not be considered for a moment.	NO	Public Access website	24-Apr-24
24/00021/FULEIA	jackson	claire	My family are members of Bevis Marks synagogue and it is a beautiful space within, with of course a magnificent history and heritage. It is important to preserve its setting as well as its interior so new buildings erected to obscure what remains of its outlook would be disastrous. Apart from the need to protect Bevis Marks, wouldn't it be much better to keep the height of as many new buildings as possible modest in scale? We are not New York, we all need to breathe and to be in harmony with our surroundings. We have sufficient high rise, ugly buildings. Let's stop thinking profit profit profit. Let's just stop building high rise altogether.	NO	Public Access website	24-Apr-24
24/00021/FULEIA	Mann	Alan	I regularly visit this area of London, and marvel at the wonderful Bevis Marks Synagogue which is an historical landmark not just in London, but for the history of the Jewish community in England, and their place in the growth of the City of London. The construction of such a tall building will destroy the context in which this synagogue sits, and is completely inappropriate for this area. I object strongly that commercial profit is being put before historical heritage, and would ask that this application be rejected by the City of London.	NO	Public Access website	24-Apr-24

24/00021/FULEIA	Topper	Amelia	Nuisance and disruption to our synagogue and failure to recognise and value the cultural significance of Bevis Marks and its importance to the Jewish people. In a time such as this, it is more important than ever to respect and protect the Jewish community, their landmarks and to appreciate their contributions to British society. This development threatens to damage the legacy of this synagogue which poses as a cultural and historical landmark, giving people a place to appreciate Judaism in central London. It is the only building of its kind, and is among many other religious establishments for other organised religions in Central London. Jewish people deserve their religion to be represented safety as much as anyone else.	NO	Public Access website	24-Apr-24

24/00021/FULEIA	Rubens	Fiona	This will adversely affect Bevis marks- a home from home for many Jewish people in this country. It is an affront to their light as well as being an eyesore for the synagogue. Does the city of London need another tower block when people are WFH? This proposal will completely blight the area as well as affect the sacred space that is bevis marks. This synagogue has fought many battles about building applications. When is it time to stop and respect the history of this building? It would never happen if this was a church or mosque. An utter disgrace that this application keeps being tweaked then resumitted. It's time to put this historic building first as opposed to such a soulless proposal. Stop this application.	NO	Public Access website	24-Apr-24

24/00021/FULEIA	Inglesant	Philip	Bevis Marks is a building of enormous cultural significance not only to the Jewish community but to the whole of London. It has a particular importance to the Sephardic Jews, the first community to return to England after their 1290 expulsion, at first covertly and then openly under Oliver Cromwell. I am not Jewish but I recognise this very special place this has in the history of our country. Already surrounded by high buildings, its character would be very detrimentally affected by this proposal, which would block the all-important southern light. It is unconscionable that this proposal is being considered when another similar one was already rejected in 2020.	NO	Public Access website	24-Apr-24
24/00021/FULEIA	PNatali			N/A	Email (attached in DC- received by email file)	24-Apr-24
24/00021/FULEIA	Gulland	Yvette	There was a planning proposal which was heavily objected several years ago because it would block the view of the heavens and would created such a heavy impact on the nature of this very important holy and religious building This new proposal follows a similar line of determined overshadowing and monstrosity and is very cheeky but we have not forgotten the last one which received more objections than the council had ever received and was Her thrown out	NO	Public Access website	24-Apr-24
24/00021/FULEIA	Simmons	David	The space of this ancient synagogue must be protected and not invaded by developments designed purely for financial gain.	NO	Public Access website	24-Apr-24
24/00021/FULEIA	Matthews	Stephen	I am at a loss to understand how this application can be considered. A massive slab which will be visually intrusive and will overlook and block light from this famous synagogue. I sincerely hope that the City Councillors will not take away the prevention of high rise offices in conservation areas. With working from home being so prevalent nowadays would there be sufficient demand for any resulting offices? For the sake of the environment a total refurbishment and extension of the existing building should be the way forward, encompassing the two other buildings mentioned in the application. Please refuse permission for this application!	NO	Public Access website	24-Apr-24
24/00021/FULEIA	Walden	Kiri	The proposed development will damage the setting of the historic and culturally important Bevis Marks Synagogue. The height and style if the building impose yet another threat to the historic integrity of what little remains in the area, looming over the synagogue and many other vulnerable and important historic buildings in the vicinity	NO	Public Access website	24-Apr-24
24/00021/FULEIA	Sawyer	Jenny	The City doesn't need this tower. The changes in real estate since the pandemic means its a white elephant. The fact it will overshadowed a Synagogue that Oliver Cromwell allowed is even more shocking. The City needs to remember its history as well as its future Jenny Sawyer, City of London Guide	NO	Public Access website	24-Apr-24
24/00021/FULEIA	Levine	Stuart	I have been attending Bevis Marks synagogue for over 35 years. After prayers we tend to congregate in the courtyard with sky views. The thought of a huge building being built shadowing the synagogue is extremely distressing to the community especially in the times we are now in this is another nail in the coffin for the Jewish religion! Totally unacceptable and not needed.	NO	Public Access website	25-Apr-24
24/00021/FULEIA	de Pass	Jonathan	I'm a supporter of Bevis Marks Synagogue and write to object to the new planning application (24/00021/FULEIA) which, if passed, would allow for the construction of a modern tower causing immense damage to the setting of such an important and historic building. This new application is a cynical proposal coming so soon after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area and I strongly oppose it. It is clear that this new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. Other culturally important and historic buildings within the City of London, e.g. St Paul's Cathedral, have been protected in their immediate vicinity from insensitive developments. Why should Bevis Marks Synagogue, which is of equal cultural and religious significance to the Jewish Community in the UK and worldwide, not receive the same consideration? Please refuse this application. It is an abomination.	NO	Public Access website	25-Apr-24
24/00021/FULEIA	Sneader	Graham	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. I work in St Mary Axe. The creation of more potentially unlet office space does not justify spoiling historic views across the square mile.	NO	Public Access website	25-Apr-24
24/00021/FULEIA	Lawrence	NIgel	This proposal will have a determental impact on one of London's oldest synagogues . Like other proposals for the area it should be blocked and further planning for areas in this building declined of they will effect a the Bevis Marks Synagogue. This part of London has enough high rise buildings -	NO	Public Access website	25-Apr-24

24/00021/FULEIA	Baskin	Usevalad	I am writing to express my deep concern and opposition regarding the new application (24/00021/FULEIA), which threatens the cultural and historical significance of Bevis Marks Synagogue, a Grade-I listed building in the recently established Creechurch Conservation Area. As a nearby resident and frequent visitor to the synagogue, I am appalled by this proposal, especially given its previous refusal. The planned 45-storey tower, towering over the synagogue to the south, would dominate and cast a shadow over this sacred site, blocking the religiously significant southern sky view. The development would compromise the limited natural light in the synagogue, impacting worship and rituals. It is unthinkable that such a proposal would be considered near St. Paul's Cathedral, and yet, here we are, risking the integrity of a site that is the very heart of British Jewry. The tower's proximity would overwhelm the synagogue, sending a troubling message to the hundreds of thousands of visitors expected at the upcoming Heritage Centre. The City of London must uphold its values and protect this cherished landmark. I urge you to reject this application and prioritize the preservation of our cultural heritage. Yours sincerely, Usevalad Baskin 701 Satin House E1 8PW	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Morganstein	Stuart	We are members of Bevis Marks Synagogue and cannot believe we have to write again to express our strong opposition to this application. It was turned down two years ago and this new application is just three storeys lower and is now adjacent to a conservation area. The new tower would overshadow the setting of the Synagogue and its courtyard, in the same way as the previous rejected building. We feel that this sort of building would never be allowed in the vicinity of St. Paul's Cathedral and should not be allowed adjacent to such an important Grade I listed building, of particular importance to British Jewry and internationally. Carole and Stuart Morganstein	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Gauthier	Charlotte	I strongly oppose the wrongheaded development proposed in this application. As an historian who works with heritage buildings, I am concerned that the proposed development would damage the setting not only of Bevis Marks Synagogue, but of other heritage buildings in the area. Bevis Marks is a Grade I Listed building of enormous historic and cultural significance. The proposed development would overshadow the Synagogue courtyard and destroy the southern sky view from inside, which would negatively affect the worship of the congregation as well as materially diminishing the amenity for everyone who came to see the Synagogue out of historical interest. The proposal also contradicts two of the Corporation's stated policies: 1. The City of London is rightly focused on 'green' and sustainable building. 31 Bury Street is only 40 years old and is capable of being refitted for continued use. Unnecessary demolition is the antithesis of 'green' and sustainable therefore, and would simply squander the energy already embodied in the building. 2. There is presently - and most properly! - a ban on tall buildings in Conservation Areas. The development site is within the Creechurch Conservation Area, so development of a tall building on that site is in direct conflict with the statutory development plan. This proposal and all further proposals for development of tall buildings in the Creechurch Conservation Area should be rejected.	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Ward	James	ct Bevis Marks Menu THE NEW THREAT TO BEVIS MARKS SYNAGOGUE A CALL FOR WIDESPREAD OBJECTION For the second time, the synagogue is under threat. Bevis Marks Synagogue is the oldest continuously used synagogue in Britain, dating from 1701. It has enormous cultural significance, being in effect the cathedral church of Judaism. It is located in the City of London, where it has over the years suffered tall buildings being erected around it. However, the very important southern sky view remains unobstructed, enabling the moon and the stars to be viewed from the courtyard. In 2020, a 48 storey office building was proposed just 25 metres away at 31 Bury Street. After a worldwide campaign which generated more objections that the City Corporation has ever experienced before, the Corporation refused permission in 2022, primarily because of the unacceptable impact on the synagogue. The developers are audaciously trying again. Tireless work by the Synagogue community has led to the area now being designated as a Conservation Area. However, the City Corporation has given with one hand and is taking away with the other - it is proposing to scrap the ban on tall buildings in Conservation Areas and indications are that the leadership is now supportive of the proposed building. We therefore need even more people to join the campaign to defeat this latest attempt. WHAT YOU CAN DO	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Sondack	Julia	The above property is of significant importance to the Jewish community and history of London and the UK. I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm of the UK Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	26-Apr-24

24/00021/FULEIA	Naar	John	My family have been members of Bevis Marks since the 1840s. It is with great pride that the Synagogue, which has Cathedral status in the UK, has remaineds relatively unchanged since it was built. To have a tower block erected to the south of the building will overpower to building. Attempts have been made in the past which have been rejected. St Pauls Cathedral has its aspect controlled in all directions from miles away yet Bevis Marks, built some 25 years later seems to be fair game for developers. This intrusion should be stopped.	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Schonfield	Jeremy	I have attended Bevis Marks Synagogue each week for prayers since the early 1980s, and vigorously object to the proposed plan. Having recently rejected a similar plan, and established a conservation area around the synagogue, the planning office should not have agreed to consider a similar project, unless it is intended slowly to wear down the synagogue and its defenders, and to waste the resources that should be directed to more worthwhile issues. The plan should not, in my view, have been considered by the authorities, and it was wrong to present it to the public for consideration. There are several clear reasons for rejecting it. The construction will generate dust, posing environmental and health issues; it will cause vibration that could damage the delicate fabric; it will make noise that will disrupt worship; the proposed building will throw a deep shadow over the synagogue, blocking the sunlight that sometimes lights the interior. It will also permanently shield the view of the sky, and prevent the recital of the monthly prayers over the new moon, an ancient ritual that it has always been possible to perform at the synagogue. It is more than doubtful whether the City needs additional office space at the moment, making this a particularly speculative development. A conservation area, to be meaningful, should protect this unique building from encroachment by new constructions. Because Britain was not invaded in 1939-45 (Nazi invasion halted Jewish worship everywhere it was established), the synagogue is the only one in Europe of its period to remain in uninterrupted use, so is of international importance, besides being the oldest working synagogue in the UK. If the plan were approved, it would raise serious questions about the attitude of the City of London to its role in Jewish history in the early-modern period, which is to be reflected in the visitors' centre which will be opened there in the coming months.	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Ridler	Katharine	I strongly oppose this new application (24/00021/FULEIA). I support Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its closely similar predecessor was refused two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK, and the Heritage and Education Visitor Centre which is due to open later this year. The proposed new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this grossly overblown proposal send about the City of London and its values to the hundreds of thousands of visitors, including schoolchildren and those from across the UK and overseas, who will come to visit over the next years? A terrible message. Many City offices stand empty already: this vastly over-sized new one is not needed at all. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Dingle	Barbara	As a Christian with a great appreciation of our Jewish community and Jewish culture in the UK and particularly in London, I'm writing to oppose in the strongest possible way application (24/00021/FULEIA). This new application, which seems hardly changed since it was last submitted, is surely not suitable so near to a conservation area including this most beautiful and historic Grade-1 listed synagogue. It is a very important Jewish site which I have been honoured to visit on a number of occasions including last year when the Archbishop of Canterbury was interviewed there. Yes, many in the Christian community appreciate and greatly enjoy visiting this synagogue. The proposed new 43 storey tower would utterly dominate the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its attractive courtyard. I urge you to refuse this application as you did with the previous attempt. Thank you.	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Amado	Jozef Ercevik	I have been attending services at Bevis Marks' for the last 10 years. As a separdic Jew it is a land mark a safe heaven and reminder of Jews coming to uk for the first time. It is very essential for London to preserve the history.	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Waller	Suzanne	It would be most unreasonable for one small building to be completely surrounded by high-rise blocks.	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Lewis	Rebecca	I object to this development for the following reasons: Overbearing Will significantly reduce the natural light into the synagogue	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Bernstein	Antony	I think that this is an appalling proposal. I object to it as the proposal is overbearing and crucially will block out too much light required by Bevis Marks synagogue.	NO	Public Access website	26-Apr-24
24/00021/FULEIA	Kindelan	Adam	Why is there such a furore over sunlight? Bevis Marks synagogue is in such a built-up area that this tower would have less of an effect on it than, say, a few extra overcast days each year. (This is especially true since the proposal's redesign, which is shorter and more slender to minimise its shadow.) Refusing the skyscraper on such grounds would be no more reasonable than somehow outlawing clouds, or legislating for more daylight during winter months. I hope the City planners will approve the proposal on the basis of its design strengths, and ignore the objectors' exaggerations. Why is there such a furore over sunlight? Bevis Marks synagogue is in such a built-up area that this tower would have less of an effect on it than, say, a few extra overcast days each year. (This is especially true since the proposal's redesign, which is shorter and more slender to minimise its shadow.) I hope the City planners will approve the proposal on the basis of its design strengths, and ignore the objectors' exaggerations.	NO	Public Access website	27-Apr-24

24/00021/FULEIA	Richards	Paul	This plan will be extremely detrimental to the character of the historic Bevis Marks Synagogue, located immediately behind these plots. Bevis Marks is the oldest synagogue in London, and as such holds a critical significance in the history of London's Jewish heritage. The synagogue grounds also house the museum of Spanish and Portugese Jewry as well as being considered consecrated ground. I am quite sure that if this were a church or a mosque and not a synagogue, the planning application would not have been made in the first place, or would have been thrown out without any consideration! I trust the same will be true for the synagogue. Last year, a similar plan was rejected by your good selves, and this one is very close to that, with simply 4 floors less. This is making a complete joke of the process! This plot should be limited to a reasonable number of floors to allow the remaining area to continue operations as it has over the last hundreds of years! The synagogue in question has survived many challenges over that period, not least of which the blitz in WW2, and this plan will present new challenges with which it has not had to deal with, like excavation of 6-7 levels underground (including building foundations etc.) which potentially would lead to subsidence, putting the entire structure of the synagogue at risk (not to mention other buildings in the area)!! The other point to mention is that the area is already saturated with office blocks with plenty of empty room to rent, so there is no real commercial justification for creating more empty space!!	NO	Public Access website	28-Apr-24
24/00021/FULEIA	Richards	Guy	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral or any other church, nor indeed any of the multitude of mosques around the capital, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	28-Apr-24
24/00021/FULEIA	Shamash	Sue	I am writing to formally object to the planning permission application for the proposed 45-storey tower adjacent to Bevis Marks, a Grade 1 Listed building of profound historical and cultural significance. My objection is based on the following grounds: Historical and Cultural Significance: The towering presence of the proposed development would overwhelm the delicate ambiance of Bevis Marks, much like St Paul's Cathedral, yet it lacks commensurate protection. The juxtaposition of such a structure would diminish the integrity and significance of the synagogue. Impact on Sky View and Religious Rituals: The proposed tower's height would obstruct the southern sky view crucial to the religious rituals conducted at Bevis Marks, hindering observations of celestial movements integral to these practices. Contravention of Conservation Area Policy: The development site falls within the Creechurch Conservation Area, where current planning policy expressly prohibits the construction of tall buildings. The proposed tower represents a direct conflict with established statutory development plans. Doubtful Community Benefits: Claims of community benefits, such as the restoration of Holland House, fail to outweigh the irreversible harm to the synagogue and the broader Conservation Area. The proposed benefits lack substantive evidence and remain speculative. Squandering of Existing Resources: The proposed demolition of a structurally sound building, only 40 years old, represents a wasteful disregard for embodied energy and undermines sustainable development principles. Compromise of Heritage Assets: The proposed tower would compromise the setting of other heritage assets in the local area, detracting from the historical character and charm of the Conservation Area. Lack of Expected Standards: The endorsement of the development by the City Corporation contradicts its purported recognition of the importance of Bevis Marks.	NO	Public Access website	28-Apr-24
24/00021/FULEIA	Petretti	Richard	I have just heard the news that a plan has been revived to build an oversize office tower adjacent to the Bevis Marks synagogue (See planning application reference: 24/00021/FULEIA). Please stop this terrible idea and reject the application. Bevis Marks is a Grade 1 Listed building of enormous historic and cultural significance to not only for England but for people around the world. A 45 story tower would completely overwhelm the synagogue which will destroy the southern sky view, which is an essential part of the setting of the synagogue and important for the intangible qualities it contributes to religious ritual. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place and at the wrong time. Inexplicably, the development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The developers argue they are providing lots of planning benefits that outweigh the harm to the synagogue. But of these - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community. Furthermore, the existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and providing good service for many more years. The unnecessary demolition itself raises very serious concerns regarding potential impact upon the neighboring structures and the environment generally. The City Corporation is being disingenuous: claiming to recognize the importance of the synagogue and other nearby heritage assets, yet simultaneously facilitating this monstrous development in a Conservation Area. Please put an immediate stop to any application to build such an inappropriate structure adjacent to historic Bevis Marks.	NO	Public Access website	28-Apr-24
24/00021/FULEIA	Stock	Lisanne	I am writing to object to the proposed building as it will impose significantly on Bevis Marks Synagogue which is a historic and current place of prayer. The proposed height of the building will overshadow the synagogue which is a Grade 1 building of historic and architectural value. I do not think a building of this nature is appropriate given the impact it will have on this place of worship and even if certain safeguards have been point in place in the current proposal it continues to impact Bevis Marks and those in its community.	NO	Public Access website	29-Apr-24

24/00021/FULEIA	Langner	Lola	I have just heard the news that a plan has been revived to build an oversize office tower adjacent to the Bevis Marks synagogue (See planning application reference: 24/00021/FULEIA). Please stop this terrible idea and reject the application. My great, great, great grandfather, David de Aaron DeSola, was a distinguished Rabbi at Bevis Marks from 1818 on. Bevis Marks in England was a beacon for Sephardic Jews and afforded us the safety we had been denied for hundreds of years. We still consider Bevis Marks a pivotal location in our family migration from Portugal (where many family members were killed in the Inquisition), to Amsterdam and then to England. Indeed, my husband and I regularly donate to Bevis Marks (though we live 8000 miles away), because Bevis Marks matters so much to us. Bevis Marks is a Grade 1 Listed building of enormous historic and cultural significance to not only for England but for people around the world. A 45 story tower would completely overwhelm the synagogue. It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked forever. The development site is within the Creechurch Conservation Area. The proposed building would also damage the setting of other heritage assets in the local area compromising the qualities of the Conservation Area as a whole. The City Corporation is being disingenuous: claiming to recognize the importance of the synagogue, yet simultaneously facilitating this monstrous development in a Conservation Area. We expect much higher standards from Britain's most prestigious local authority. Please put an immediate stop to this or any other application to build such an enormous and inappropriate structure adjacent to the historic Bevis Marks synagogue.	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Eskenzi	Yvonne	The building of this substantial nature will totally overshadow this building causing loss of light, towering over the building. This is a 46 storey building with the basement which is like having an ancient Ewe tree expecting to survive in the shadows of a jungle being planted of eucalyptus trees sucking the life of everything around drip of water and light around it. It will suffocate its neighbouring buildings.	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Gritzman	Jeffrey	Dear Anna Tastsoglou I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. I've visited a number of European cities such as Prague, Amsterdam and Seville where their best examples of Sefardi synagogues are prized and valued for their importance to Jewish and their city culture. It would be nice to think that London with its claims to be truly multicultural could do the same. This new application, barely changed since the last time it and takes no account of Bevis Marks being the most important Jewish site in the UK. Additionally and Heritage and Education Visitor Centre which is due to open later this year deserves highlighting NOT overshadowing! The Jewish connection and contribution to the City and into the east end of London is worthy of promotion and a physical overwhelming of the building sends out the wrong message. This proposal would not be acceptable next St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's most important religious building. I urge you to refuse this application. Regards Jeffrey Fritzmsn	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Dreyfuss	John	The development will distroy a view of a listed building and also overwhelm the synaguogue.	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Edwards	Matthew	The City of London is a thriving commercial and leisure hub for London and I wholeheartedly support the addition of new floor space. A modern building will have a positive impact on the environment locally and generally.	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Vock	Ido	The plans do not propose to demolish Bevis Marks. They are to build another building some distance away from the synagogue. The objections are therefore on grounds of "light" and "overwhelming" the synagogue - this in the centre of the City and just metres away from the Gherkin! Preserving our heritage is important but nebulous objections to the size of neighbouring buildings in the very heart of our capital city cannot be used to hold back economic development. I support this application and hope it will be approved.	NO	Public Access website	29-Apr-24

24/00021/FULEIA	Kalinowska	Jo	This is a terrible proposal! It would completely overwhelm the neighbouring synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It would block out daylight and have an immediate effect on the usage of the surrounding area.	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Nowill	Rob	The VERY last thing we need is another soulless skyscraper, there are literally dozens of unfilled ones already in the area. It will utterly spoil the surrounding area. It's also in direct contravention of the conservation area, which should not have tall buildings erected within it.	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Darley	Gillian	Some years ago I visited Bevis Marks with Biba Dow, architect to the synagogue, to look at proposals to enhance this remarkable survival. I was reminded of the absolute magnificence of the building - a tribute to the Great Synagogue in Amsterdam. I was representing SPAB on that occasion and we were alerted to the (previous) development proposals while looking at Dow Jones's careful work then under discussion. Then comes this monstrous new tower. I was given my OBE in 2014 marking work as an historian, author and conservation campaigner. This latest assault on one of the most evocative and atmospheric functioning buildings in the City is, not to mince words, barbaric. The City Corporation is prepared to countenance application after application on the site. This time it must forego the inducements of specious 'planning gain' to stand its ground. This is a no, no, and no.	NO	Public Access website	29-Apr-24

24/00021/FULEIA	Symonds	V	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I am a visitor to Bevis Marks Synagogue and am dismayed to see this new proposal, particularly after a similar application was refused two years ago, and also in the light of the recent adoption of the Creechurch Conservation Area. This new application is only very slightly changed from the last submission and therefore should also be refused. It is not in keeping with the conservation of a Grade-1 listed building, now also part of a conservation area. It is the most important Jewish site in the UK and the Heritage and Education Visitor Centre is due to open later this year. Its special history, reminding us of the readmission of the Jewish people to England, must be carefully preserved and not compromised by new developments. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this overwhelmingly inappropriate development send about the City of London and its values and attitude towards the Jewish community's unique heritage to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's flagship synagogue, particularly along its sensitive southern exposure. I strongly urge you to refuse this application.	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Verbick	Jade	Bevis Marks is a landmark that shouldn't be overshadowed	NO	Public Access	29-Apr-24
24/00021/FULEIA	Craig Cohen	Leonora	Please do not permit the building of an enormous tower block near to London's oldest standing synagogue. This is supposed to be a protected area and there are other places to build. The construction will overshadow the synagogue and prevent full religious use of the space.	NO	Public Access website	29-Apr-24
24/00021/FULEIA	Roumani	Judith	Constructing a building of this height right next to the most historic synagogue in Britain would jeopardize many of its features. It would block the light and view of the sky and render religious services difficult. Such a building would never be contructed next to St. Paul's Cathedral, so how could it be contructed next to the 'cathedral' of synagogues? I consider this project misguided and a caving in to financial considerations over cultural, historical and spiritual ones. Thank you.	NO	Public Access website	30-Apr-24
24/00021/FULEIA	Lampert	Dorothy		N/A	Email (attached in DC- received by email file)	30-Apr-24

24/00021/FULEIA	Bloom	Alastair		N/A	Email (attached in DC- received by email file)	30-Apr-24
24/00021/FULEIA	sitch	peter	I've lived and worked in London since 1968. During that time I've seen London grow change and evolve. Much of this is good but every now and then a development is a step too far. This is one such please continue to oppose the scheme	NO	Public Access website	30-Apr-24
24/00021/FULEIA	Tamman	Jessica	Bevis Marks synagogue is an absolute pillar of the Jewish community and a historical site. It is a abhorrent that this planning permission is even being considered to be going ahead and as a member of the Jewish Community and member of the city of London working community absolutely object to the building of a sky rise that will dwarf, block the only natural light the synagogue has and further plunge this beautiful and important place into darkness	NO	Public Access website	30-Apr-24
24/00021/FULEIA	Shaw	David	This building would herald untold permanent damage to the conservation area, casting shadows across the district and blocking the key and already limited view from Bevis Marks Synagogue. The access to light and ability to see the stars are important parts to Jewish ritual that have been practiced on this site continuously for over 300 years. Such an impingement would never happen down the road in St. Paul's - why is this being contemplated here? What's the point of a conservation area if you don't preserve the totality of precious gems we have left? The City has many unused office spaces since the pandemic and I can't see how it is in anyone's interest to knock down a building that is only 40 years old and replace it with this monstrosity. Please do the right thing and reject this erroneous planning application.	NO	Public Access website	30-Apr-24
24/00021/FULEIA	Fyne BA FRSA Solicitor (Non Practising)	Daniel	I object to this application. A 42 storey tower would overwhelm the synagogue which has Grade 1 status. The synagogue has enormous religious, cultural, heritage, historic significance and importance which would be extremely harmed by the proposal. The proposal would overshadow, and harm the synagogue and courtyard. In terms of its physical and amenity aspects the proposal would be wholly inappropriate to the wider setting, The alleged benefits are not justified in the context of the harm caused and do not stand up to scrutiny. The importance of the heritage aspect of the building for the Jewish Community nationally and international must be taken into account so as to protect this valuable religious and heritage asset from the harm caused by the proposal.	NO	Public Access website	30-Apr-24
24/00021/FULEIA	Brett	Edward	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship - installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is required to identify locations suitable for tall buildings and has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue but do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community. laims about the community value of the uses must be viewed with great scepticism. The existing building at 31 Bury Street is capable of being refurbished and providing good service for many more years. Unnecessary demolition simply bad for environment. The proposed building would also damage the setting of other heritage assets.	NO	Public Access website	01-May-24
24/00021/FULEIA	Mainz	Andrew	The proposed new building will intrude on the Bevis Marks synagogue and its small outside space. This should not be permitted, to preserve the historic nature of these premises.	NO	Public Access website	01-May-24

24/00021/FULEIA	Parsons	Kathleen	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a Sephardic descendant and a friend of Bevis Marks' Spanish & Portuguese Jewish community. I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the incorrectly titled Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade I listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. Also, I genuinely believe in the importance of London's current and historical survival to the existence of European Jewry, and Bevis Marks is the most crucial example of this continuing struggle The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern skyview, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of Saint Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	01-May-24
24/00021/FULEIA	Scott	Adam	Great design. Respectful of its neighbours in a consented tall buildings area. I am in favour of the massing and the height - in fact I think it could probably be taller. I full support this proposal.	NO	Public Access website	01-May-24
24/00021/FULEIA	Morley	Phillip	This is question comes up time and time again, which is completely valid, but is never really answered by planners. Why do we need another high skyscraper building? Less people are going to the office and remains empty at weekends, just doesn't make economic sense. We have a lack housing stock, surely the money is better spent focusing on that or improving the current building or brownfield sites. I have no objection to change, but when the designs are not authentic or respects it's surroundings, then it is a different matter. We are loosing or have indeed lost allot of our London skyline and this just adds to the problem.	NO	Public Access website	01-May-24
24/00021/FULEIA	Franco	Mario	Respect history, respect the Jews, respect the synagogue.	NO	Public Access	01-May-24
24/00021/FULEIA	Jackson	Alexandra	I'm horrified that there is again a threat to Bevis Marks Synagogue- an historic building which is still in use. It pre dates St Paul's Cathedral which would never be faced with a development of this type. This synagogue is important on number of levels in this country's history and was where my family worshipped for many years (Saqui). The plans represent inappropriate overdevelopment of this site and would dwarf and disrespect this historic Synagogue. A 43 story building with a 4 storey basement could easily be located in Dockabds where there is plenty of space. Once this is allowed there will be no going back so the planning committee should stand up for what is right and not be pressured by commercial concerns. Don't grant this permission.	NO	Public Access website	01-May-24
24/00021/FULEIA	Jackson	Paul	I object to the development. It will overshadow a landmark listed building that is used daily for religious services, and which itself is a tourist landmark. The interior will be darkened by the proposed overbearing development, which is barely meters away from the synagogue. I am a member of the synagogue.	NO	Public Access website	01-May-24
24/00021/FULEIA	Shaw	David	This proposal is incredibly insensitive to the Jewish community in London. To build a tower so close as to obscure the oldest synagogue in the UK is cultural vandalism of the highest order. Furthermore as the main site of the Spanish Portuguese Jewish community, it hurts an even smaller community. Please consider this and reject this proposal in its entirety. Thank you	NO	Public Access website	01-May-24
24/00021/FULEIA	Rabinowitz	Monica	I object to the construction of a 43-storey tower next to Bevis Marks Synagogue, a Grade I-listed building. As the oldest continuously used synagogue in Britain and one of cultural and historical significance, this would create an unacceptable impact on the continuing Jewish community who still use the premises today. It would destroy the southern sky view, which is an essential part of the setting of the synagogue, overwhelming and overshadowing the synagogue building and courtyard. There is not good enough reason to build such a tall building on these premises, when there are other sites that would suit it, instead, and have less of a damaging impact on its sensitive surroundings.	NO	Public Access website	01-May-24
24/00021/FULEIA	Denham	Alison	It will tower over a beautiful historic site.	NO	Public Access	01-May-24
24/00021/FULEIA	oleary	Lorraine	The Synagogue at Bevis Marks serves as an important cultural and historical landmark for jews throughout the world and should've saved at all costs	NO	Public Access website	02-May-24
24/00021/FULEIA	Chissick	Michael	The Bevis Marks synagogue is of historical importance and the building would reduce its light. I thought this had already been sorted but it looks like the developer is back. Please stop it	NO	Public Access website	02-May-24
24/00021/FULEIA	Midda MBE	Loraine	This development will disrupt the calm and peace of the beautiful Bevis Marks synagogue. The synagogue will be shadowed and the light will be blocked. This is the third time development has been requested even though plans had been rejected previously. And for the reasons previous plans were rejected these should be as well. The synagogue is an important historical living building for the Jewish community and should be treated with the respect it deserves.	NO	Public Access website	02-May-24
24/00021/FULEIA	Hollick	Jeanette	This is disgraceful and should be stopped. Already too many high rises in the area spoiling its special character.	NO	Public Access website	02-May-24

24/00021/FULEIA	Goldstein	Andrew	As an occasional worshipper at Bevis Marks Synagogue I am inspired by the tranquility and spirituality of the place. It really is a unique experience in Britain. Yes, it is hemmed in by other buildings, but just about retains its unique atmosphere. The proposed development would undoubtedly overshadow the building and overtake and dominate this atmosphere. Such a massive development is totally out of place and must be opposed. Even the proposed 4 stories of basement present a danger to the structure of the historic synagogue.	NO	Public Access website	02-May-24
24/00021/FULEIA	Samsworth	Jane	I object to the diminution of real history, Bevis Marks This development would be ruinous.	NO	Public Access website	02-May-24
24/00021/FULEIA	Stock	Caroline	I have written in before for a previous application and this is only a modification of that application. This building is inappropriate in this position particularly as it's a Conservation area. The building would totally dwarf the historic synagogue that would be below it. There are plenty of tall buildings in the square mile, but to build this size of structure in this position which will have a dramatic visual impact is inappropriate. Please listen to the objections.	NO	Public Access website	02-May-24
24/00021/FULEIA	Heitlinger	Philip	The development would block out light complwtely fr this 340 year old synagogue which is on active use today	NO	Public Access website	02-May-24
24/00021/FULEIA	Hammond	Joan	Developers have erased too much of London's beautiful and colourful history in the name of making money! There has to be a halt to this before all of London's history - in particular, the original City of London - is erased and forgotten. We cannot allow that to happen. It's too important to London, Great Britain and the civilised world. If evil hasn't been able to achieve the ruination of London's rich history, then corporate planning has to be stopped from achieving such evil. Stand with Bevis Marks and stand with great history.	NO	Public Access website	02-May-24
24/00021/FULEIA	Crowne	Tilla	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). As a trustee of Bevis Marks' Spanish & Portuguese Jewish community closely involved with the back and forth regarding the proposed development at 31 Bury St I am dismayed to once again be having to write in to object. Having fought hard to have the new Creechurch Conservation area approved, the proposed development at 31 Bury St is virtually unchanged after its initial refusal two years ago. Despite having knocked off two upper floors, it in fact now has a larger footprint and so is an even larger development than the previous one! Despite a slight reduction in height and re-angling of the building, it still lies right in the path of both the sun and the moon in the little remaining skyscape the synagogue has left. The result is that, by day, a significant amount of sunlight is blocked to both the synagogue building proper, and to the courtyard which is crucial for reflected light entering the windows. As a Grade 1 listed building, not an office block, we cannot simply install bright overhead LED tubes, nor should we have to. Holy texts are read from parchment and congregants follow in books, as no electronic displays are permitted on sabbath and festivals. By night, the transit of the moon after dark, a crucial component of Jewish worship is actively blocked. Both of these are important not simply because of the character of the building, but because this is the home of a living congregation, the longest-standing in the UK, for whom worship is being made increasingly difficult. The proposed tower would dominate the setting of the synagogue, and makes a mockery of the conservation area. From ground level, the tower would dominate and block views not just from the courtyard but also from Heneage Lane and create a virtual cliff-face, entirely changing the scale of the entire block. Proposed benefits are negligible and the harms are real. I urge you to refuse this application.	NO	Public Access website	02-May-24
24/00021/FULEIA	Krol	Alan	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of British Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	02-May-24
24/00021/FULEIA	Grossman	Deena	Having reviewed the over development of this site I am horrified to even see the initial plans which will again blight the landscape of the City of London. London has enough skyscrapers we do not need another one and certainly not one in the shadow of a historical building like Bevis Marks Synagogue. This is pure greed on the part of the owners and developers. No thought has been given to the history of the area. I strongly oppose the planning application	NO	Public Access website	02-May-24
24/00021/FULEIA	Graham	David	This building is a poor quality ugly design, of undue scale and massing which detracts from the character of the conservation area. It will cause substantial harm to the significance and ongoing optimal use (for religious worship and study) of Bevis Marks Synagogue, a Grade I Listed building, by overshadowing, loss of daylight to its interior which was designed to mainly be naturally lit, and marring the setting/ views around the building. The site would also be better used for housing above mixed-use development at street level, rather than unsustainable office space in a new building with a short design life. Houses are unaffordable in London whilst there is a massive surplus of office space owing to remote and flexible working.	NO	Public Access website	02-May-24
24/00021/FULEIA	Clarkson	Paul	It is not suitable for this kind of setting. Please deny this application	NO	Public Access	02-May-24
24/00021/FULEIA	Firth	Tanya	This application is unacceptable as it will change the character of the neighbourhood and affect local low rise buildings like the synagogue. Our heritage is more important than profit and insensitive building projects. Tanya	NO	Public Access website	02-May-24
24/00021/FULEIA	Braithwaite	Nick	This would seriously affect the light coming into the very important adding Bevis Marks synagogue	NO	Public Access	02-May-24
24/00021/FULEIA	Wertheim	David	I wish to object on the grounds that the proposed development contravenes the NPP Guidelines relating to Conservation Areas and Listed buildings as it will detract rather than enhance the area and will visually detract from the neighbouring Grade 1 listed Bevis Marks Synagogue. I am personally familiar with the Synagogue and attended the wedding service there of the child of one of my oldest friends. The building has survived miraculously for over three centuries including the bombing of London during WWII. To allow this development to go ahead would be an act of wanton architectural and heritage destruction.	NO	Public Access website	02-May-24
24/00021/FULEIA	Dorey	Helen	These plans for a 43-storey tower would seriously harm the significance of one of Europe, not just the UK's - most important religious buildings, Grade I-listed Bevis Marks Synagogue (1701). This extraordinary building commemorates tolerance in the UK and has survived wars and waves of City development as a centre of worship and Jewish life since 1701. This is extraordinary, remarkable building is the jewish counterpart to a Wren City Church and of equal importance. The synagogue now has official protection with the designation of the new conservation area in Creechurch - so how is it possible that fresh plans for a 178m tall tower right next to it can even be put forward, let alone seriously considered. The City must act to protect this internationally important building - both architecturally and symbolically immensely significant. This development is simply totally unacceptable and it would be the most appalling dereliction of duty were it to be approved.	NO	Public Access website	02-May-24
24/00021/FULEIA	homewood	alison	Why on earth do you want to make London like Hong Kong? This is a disastrous proposal - 43 storeys, ever higher, right next to one of the most historic and beautiful and reasonably-sized buildings in a heritage area. Do you want a target for planes? For bombs? For fires? And even if none of those ever happen this building is entirely disproportionate to its proposed site. It is ugly, banal, of no architectural merit whatsoever, and post-COVID, totally unnecessary as there is so much vacant office space already. It will cast an ever-present shadow, set a precedent for other 40+ storey buildings and before you know it there will be a total wind-tunnel. Please please kill this proposal in its tracks.	NO	Public Access website	02-May-24

24/00021/FULEIA	Webb	Julia	I object to this application on heritage grounds. The incalculable importance of Bevis Marks synagogue in historical, heritage and cultural terms, in addition to its religious importance , will be irretrievably damaged by such an overbearing massive development right next door. The City of London has declared this a conservation area, so permitting this development would breach the City's own policies. The rampant overdevelopment of the City of London means that it is losing its spirit and charm, along with its heritage assets. To inflict this development on Bevis Marks would be an absolute disgrace. I hope that the City will reject it out of hand.	NO	Public Access website	02-May-24
24/00021/FULEIA	Banatvala	Fiona	This proposal is for a 45 storey tower would completely dominate the Grade 1 Listed synagogue skyline. It would also reduce daylight into the synagogue dramatically and because of the historic nature of the building, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is to not allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. It is so important to protect our grade 1 listed buildings from harm and this, undoubtably will harm a grade 1 listed building, which is an important part of the local heritage within this protected Conservation Area. The plans have been previously turned down and have only been amended with superficial changes. This proposal is not supported by the local community.	NO	Public Access website	02-May-24
24/00021/FULEIA	Hepher	Roger	The proposed tall building would be highly damaging to Bevis Marks Synagogue, the Creechurch Conservation Area and the setting of the Tower of London (World Heritage Site). It runs completely counter to national and local heritage policy, and the claimed "public benefits" do not begin to outweigh the heritage harm (some of which would be "substantial").	NO	Public Access website	02-May-24
24/00021/FULEIA	Horowitz	Michael	Please do not overwhelm a precious island of history. This is a symbol of a history of tolerance in London's story.	NO	Public Access website	02-May-24
24/00021/FULEIA	Wakeman	Lindsay	I wish to register my objection to the planning applications. My reasons are as follows: 1. The planned developments will seriously adversely affect the Bevis Marks Synagogue in terms of both its existing setting, and its supply of natural daylight. 2. Possible further adverse effects and damage to the foundations of the Synagogue and the fabric of its structure. 3. The Synagogue is a Grade I listed building of national significance, the oldest in the UK, and has been for over 300 years continuously a working building and centre of Jewish faith and for these reasons should not be subjected to any potential damage or detrimental changes to its surrounding, daylight supply, and outlook. 4. The proposed developments are of an entirely different scale and design, will not be in any way in sympathy with the ancient Synagogue, and will dwarf and forever change its setting. 5. The London Plan contains policies that state that tall and very large buildings must not adversely affect the surroundings of, or overshadow, existing buildings.	NO	Public Access website	02-May-24
24/00021/FULEIA	Dunkley	Sam	This is an outrageous breach of the protection of a grade 1 listied building /conservation area, with enormous historical resonance. thanks to the Nazis there are few such historic synagogues left. This , proposal show complete disrespect for that, as well as the conservation protection..	NO	Public Access website	02-May-24
24/00021/FULEIA	Montlake	Martha-Anne	This historic building needs to be protected and be available to future generations without anything impeding its future character and function.	NO	Public Access website	02-May-24
24/00021/FULEIA	Glaessner	Verina	We object most strongly to this application which will by virtue of its scale and mass at a stroke and quite without any necessity at all, reduce this finely concieved physical testimony to the texture and social lives of those who walked these streets before us. This precious sense of place and time, which such evidence of the depth and importance of lives that gives cities their character, to be overxhelmed by buildings of	NO	Public Access website	02-May-24
24/00021/FULEIA	Julius	Corinne	The proposed development will overshadow the synagogue, changing the light in the interior and the view from the courtyard. This is an important religious building with symbolic significance, not only to Jews but to the wider community. It is a tranquil space that can be used by all. The new building would destroy the calm and peace, so relaxing in such a busy area.	NO	Public Access website	02-May-24
24/00021/FULEIA	Glaessner	Verina	We object most strongly to this application which will by virtue of its scale and mass at a stroke and quite without any necessity at all, reduce this finely concieved physical testimony to the texture and social lives of those who walked these streets before us to the merely vestigial and cute. It is this precious sense of place and time, which such evidence of the depth and importance of former lives lived, that gives cities their character. And that to be overwhelmed by buildings already way out of date, dependent on dwindling resources, water and energy ! Unacceptable.	NO	Public Access website	02-May-24
24/00021/FULEIA	Hunt	R. G.	This is a 43 storey tower next to a Grade 1 listed building in a conservation area. Does the developer think the councillors are fools?	NO	Public Access website	02-May-24
24/00021/FULEIA	Scott	Paul	I object to having a 43 storey building on this location for numerous social, environmental, public health, fire safety and heritage reasons. It will greatly change the character of Bury Street if this structure is built so close to a well established historic synagogue which has a lot of architectural value. There would also be an increased amount of noise pollution during construction which means that many other nearby people are going to be suffering the adverse effects of this proposed scheme too.	NO	Public Access website	02-May-24
24/00021/FULEIA	Penny	Susan	I object to the proposed new building because of the serious negative impact it would have on the historic nearby synagogue.	NO	Public Access website	02-May-24
24/00021/FULEIA	Cannell	Dave	This is eroding a very historic part of the City. Do we really need another skyscraper?	NO	Public Access	02-May-24
24/00021/FULEIA	Morris	Shelagh	We have no need for further office space now so many people work from home. We cannot allow unnecessary structures to bully and dominate such a precious piece of our joint heritage. Do not be deceived into thinking that this is only Jewish heritage, because beauty that has been loved and preserved belongs to all of us and we are responsible for it.	NO	Public Access website	02-May-24
24/00021/FULEIA	Venner	Peter	At a time when our very civilization seems to be tottering into chaos, the wanton destruction of yet another building of architectural, historical, cultural and spititual distinction merely to further greed of monetary gain can only fill us with despair.	NO	Public Access website	02-May-24
24/00021/FULEIA	Ramsay	Steve	This magnificent building needs to be protected from close development.	NO	Public Access	02-May-24
24/00021/FULEIA	Kustow	R Alexandra	I'm a Londoner, born and bred, although temporarily in the US. I object to the demolition of the Bevis Marks synagogue and Bury House. This is part of our London cultural, historical and physical heritage which many of us are proud of. To destroy this in order to erect yet another - from the exterior likely faceless, or worse, unappealing in every way stated - excessively tall building is to trash our heritage. And for what reason? To make the rich even richer. The quality of our streets and our lives are far more uniquely valuable than this. I STRONGLY OBJECT!	NO	Public Access website	02-May-24
24/00021/FULEIA	Lilley	Rebecca	I object to application 24/00021/FULEIA on the basis of its negative impact on the setting of Grade I-listed Bevis Marks Synagogue, and the conservation area in which it is. The application is at a scale which does not respect the heritage building line of the area, nor the character.	NO	Public Access website	02-May-24
24/00021/FULEIA	Plummeridge	Joy	Apart from the significant impact this would have on the environment, the traffic congestion the demolition and construction would cause, there is the matter of the amount of Co2 which will be released not only by the demolition but also by construction of a new building. There is the fact of the historical context of this building, and what it means to the people who use it, its links to their fore fathers.	NO	Public Access website	02-May-24
24/00021/FULEIA	Hibbert	Neil	This is an outstanding historic building.If this is in a conservation area then a high rise block affecting light and dominating the area is totally inappropriate.	NO	Public Access website	02-May-24

24/00021/FULEIA	Miller	Jonathon	As a member of London's Jewish community I object in the strongest terms to plans for a tall building next to Bevis Marks Synagogue. Such a building would have a detrimental impact upon the synagogue's light which would negatively impact upon its use and enjoyment by the community. This is a grade 1 listed building and one of the most important and historically significant Synagogue's in the UK. As with any building of such unique and irreplaceable historic and cultural significance, it must be protected and I urge you to deny the planning application. In this matter you act as protectors and conservators of London's history and heritage have an obligation on whose behalf you hold office to make the right decision when it is in your power to do so. London needs to progress as any city does, but it must not be at the expense of its heritage nor of the rights of its ethnic minorities to continue to use and enjoy their historic places of worship and irreplaceable centres of culture. There will be many new buildings constructed in London in time to come, yet there can never be another Bevis Marks Synagogue and it is your responsibility to ensure it not only survives but does remains in the same condition and with the same quality of context as befits a building that represents so much. Please do the right thing, reject the planning application, protect this important building and in doing so send a message that the interests of all minorities in London will be respected and protected for the generations who have been and the generations to come, for who Bevis Marks is their legacy and inheritance. Thank you	NO	Public Access website	02-May-24

24/00021/FULEIA	Ellis	Peter	Bevis Marks Synagogue is a little haven of tranquillity off a busy thoroughfare. The proposed development would destroy the setting of this iconic building and compromise its unique atmosphere.	NO	Public Access website	02-May-24
24/00021/FULEIA	Salter	Amy	This should be a protected view from the synagogue Many years of history at Bevis Marks	NO	Public Access website	03-May-24
24/00021/FULEIA	Beard	David	To place a 43 story skyscraper next to a unique Grade 1 listed building that relys upon light streaming through its windows is sheer folly and insults the synagogues unique status. In the right place the skyscraper is a welcome addition to the City, but this is not the right place. If Aldgate and Creechurch are to keep their heritage, equally so should Bevis Marks. This is the wrong building for tghis site. (FYG I am a businessman who has spent 45 years working in the City)	NO	Public Access website	03-May-24
24/00021/FULEIA	Corrin	Christopher	I am very surprised and shocked to see that yet another attempt is being made to erect an entirely inappropriate tall tower block in the Creechurch Conservation area. The proposed building would completely alter the aesthetic character of this area and its special buildings, especially the Bevis Marks synangogue but also Holland House, Renown House, St Catherine Cree Church and St Botolphs. There are so few areas of the historic City that have been left relatively unspoiled and this proposal would utterly spoil the character of this particular conservation area with a scale and design that is completely overwhelming. I urge you please to reject it.	NO	Public Access website	03-May-24
24/00021/FULEIA	Hardisty	Michael	This development, and others like it, goes completely against London's and the UK's ambition of achieving Net Zero carbon emissions. The emissions associated with demolition and construction will be massive and contradicts the first step of carbon management in infrastructure (PAS 2080): build nothing. It will also take natural light from surrounding buildings and streets, as well as trampling on local heritage. No.	NO	Public Access website	03-May-24
24/00021/FULEIA	Pike	Graham	I would like to object to this application for the following reasons: 1. The application is in the Creechurch Conservation area and tall building are in appropriate in that area.. 2. The application would be for a building that is overbearing in height for that location to the detriment of the other local properties. 3. The application would be for a building that would, for large parts of the day, create shadows on adjoining buildings to their detriment. 4. The streetscape would be altered dramatically to the detriment of the Conservation Area. Thank you. Graham Pike.	NO	Public Access website	03-May-24
24/00021/FULEIA	Bilbul	Jonathan	Would cause great harm to the Bevis Marks Synagogue of which I am am member. It is a site of great historical significance. A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance.	NO	Public Access website	03-May-24
24/00021/FULEIA	Shintag	Rachelle	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). Having already objected to the previous (refused) proposal two years ago, I'm appalled to see this new proposal, particularly after the recent adoption of the Creechurch Conservation Area which was supposed to protect Bevis Marks synagogue and other heritage buildings in the area. This new application, barely changed since the previous (rejected) submission, is simply not in keeping with the conservation of a Grade-1 listed building (now also in a conservation area) which is the most important Jewish heritage site in the UK. The new tower to the synagogue's immediate south would dominate the synagogue's setting, block out the religiously important southern sky-view, and overshadow the synagogue premises, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral and should certainly not be permitted just metres from British Jewry's oldest active synagogue, particularly along its sensitive southern exposure. Heritage sites such as Bevis Marks Synagogue, by their very nature, cannot be moved and deserve protection as an integral part of their surrounding built environment. By contrast, the proposed new tower is utterly generic in design and use, and there is no compelling reason why this cannot be developed in another location which does not impinge on a listed building and agreed conservation area. I urge you to refuse this application.	NO	Public Access website	03-May-24
24/00021/FULEIA	Gubbay	Judith	Bevis Marks has been a haven and a sanctuary for Jewish people whose forebears (including my own) had borne the brunt of religious persecution and exile during and after the Spanish Inquisition. We are grateful to the city fathers who have supported us in remaining a vital part of the community and allowing us to pray in peace, under a sky unimpeded by valueless buildings that are out of proportion with the human-scale historic city. Please turn down this latest attempt to spoil all this.	NO	Public Access website	03-May-24
24/00021/FULEIA	Schluter	Angela	I object to a high rise block so close to this ancient place of work.	NO	Public Access	03-May-24
24/00021/FULEIA	Owens	M	The new build could affect the structural integrity of the historic building and any potential damage may have irreparable and catastrophic consequences. Such a proposal should not be considered in a Conservation Area.	NO	Public Access website	03-May-24
24/00021/FULEIA	Thompson	Alan	Totally unnecessary to build this.	NO	Public Access	03-May-24
24/00021/FULEIA	Baskerville	Patricia	Our once beautiful City of London has already been desecrated enough, it's doesn't need another short that will stay empty.	NO	Public Access website	03-May-24
24/00021/FULEIA	ISRAEL	ANTHONY	BEVIS MARKS IS A HISTORIC LISTED BUILDING IN THE CITY OF LONDON AND HAS ALREADY CELEBRATED OVER 300 YEARS IN THE CITY OF LONDON. YOUR NEW DEVELOPMENT WILL DESTROY THIS HISTORIC PLACE OF WORSHIP, TO WHICH MANY FAMOUS PEOPLE HAVE VISITED FOR CELEBRATIONS AND MEANINGFULL WORSHIP. THIS INCLUDES KING CHARLES, A SUPPORTER OF " FAITHS " WITHIN THE UNITED KINGDOM. A DEVELOPMENT OF THIS SCALE WILL OVERWELM BEVIS MARKS AND CAUSE A NUISANCE OF TRAFFIC AND OF PARKING. ADDITIONALLY THE BUILDING OF THE NEW DEVELOPMENT WOULD CREATE IN ITSELF MUCH DIRT, DUST AND DISTURBANCE TO THE CITY OF LONDON.	NO	Public Access website	03-May-24

24/00021/FULEIA	Tyson	Diana	I object to the plan to build a 43 story building overshadowing Bevis Marks synagogue, which is in the Creecurch Conservations area and listed Grade 1. The synagogue dates from 1701 and is one of the most ancient heritage monuments in London. It depends for its light provision to there being space around it to let in natural light. The planned tall building would severely impact on this need and on the proper functioning of the synagogue. This is the third time that planning permission is sought to erect a very tall building next to it; the fact that the previous two attempts failed surely should show that such a procedure is unacceptable. Respect for our cultural heritage is an urgent need. Too much of it has vanished, through the ravages of time or weather, through war, through natural disasters. What is left should be cherished, not vandalised through totally avoidable adverse planning decisions.	NO	Public Access website	03-May-24
24/00021/FULEIA	Garnham	Lucy	I believe to take away this historic place of worship from the local jewish community would be incredibly disrespectful and racist. I also believe it would be a tragic loss of a beautiful example of historic architecture. After noisy and invasive construction of the unattractive and cheap looking block which has been proposed, there would have been nothing gained only lost by the local community. I would dub the proposition a nonsensical waste of funds and I consider myself strictly against this proposition, and wholly in favour of preserving this historic place of worship.	NO	Public Access website	03-May-24
24/00021/FULEIA	Stallwood	W	This is a historical place of interest and a place of beauty I think that dwarfing it with a glass monolith will seriously detract from it's beauty We need to keep more places like this	NO	Public Access website	03-May-24
24/00021/FULEIA	Saunders	Joanne	The synagogue is of significant cultural importance and has a protected status. This application will encroach on the purpose and culture of this historical site. I strongly object.	NO	Public Access website	03-May-24
24/00021/FULEIA	Mocatta	Michael	I am writing to condemn the plans for the new skyscraper next to Bevis Marks. Why is it necessary for me to write to you again? I have written several times before to explain my objection. It is thoroughly disingenuous, immoral and underhand of you to have allowed a new skyscraper to be submitted so recently after approving a conservation area around the Bevis Marks synagogue. You and the developers should be deeply ashamed of yourselves. As mentioned before, my family have been members and regular attendees at Bevis Marks since before its foundation (we arrived in London in 1680, and helped pay for the construction of Bevis Marks). My family name is literally written on the walls there. The building is holy - and the lighting within it is part of its holiness. You should know by now that blocking access to natural light through building a skyscraper nearby will change the character of Bevis Marks synagogue deeply, for the negative. Please log my objection - and please desist in this silly game you're playing with the developer.	NO	Public Access website	03-May-24
24/00021/FULEIA	Balkin	Brian	The building (s) would be entirely out of keeping with the surroundings, especially given the historic building right next door. It would diminish the area to have such a building in such a position. There are plenty of other locations for a build if this type. A 43 story building, quite rightly, would not be allowed next to St Paul's.	NO	Public Access website	03-May-24
24/00021/FULEIA	Amar	Janine	This should be a heritage site. It's the oldest synagogue in England and it is still in use. Would you do this the to St. Paul's Cathedral?	NO	Public Access website	04-May-24
24/00021/FULEIA	Liverseidge	Janice	Application to knock down buildings and erect this too large, totally inappropriate building is so wrong. It will have a huge negative impact on Bevis Marks Synagogue which is an important and vital part of London's heritage and contemporary life. The proposal should be rejected outright	NO	Public Access website	04-May-24
24/00021/FULEIA	Lawrence	P	Dear Persons , I am not sure this would fall under your planning legislation , however aside from maybe taking over any sunlight which persons in the U.K. often have an issues its most likely a blight on the sky line , will create over crowding , congestion , ruin heritage ,	NO	Public Access website	04-May-24
24/00021/FULEIA	Childerstone	Meredith	I object to this proposal for two key reasons. Firstly, it heavily affects listed buildings that are an important part of the Heritage both to the City of London and the UK. The overwhelming size and proximity of the development will seriously impact on existing Listed Buildings and in particular an ancient and important place of worship. Secondly the plan does not appear to meet the UK's legal carbon commitment or the rapidly changing pressures from climate change. Climate change requires much greater use of structure and material together with repurposing and retrofit. Infrastructure needs such as water and renewable electricity are also critical. The current proposals do not appear to meet either of these.	NO	Public Access website	04-May-24
24/00021/FULEIA	Moses	Selina	Will you stop trying to take natural light and space from a historical building that is still used today. What disrespect. BM synagogue is irreplaceable	NO	Public Access website	04-May-24
24/00021/FULEIA	Rothschild	Louise	I work in EC3 and it is becoming an increasingly more unpleasant space. Huge monolithic structures gobble daylight and create wind at ground level. The City used to pride itself on architecture however it is now allowing glass boxes. This building is inappropriate for the area - too large, and inflicting irreparable damage on areas of English heritage such as the Bevis Marks synagogue. Those of us using the area have no desire for yet more tower blocks, we want buildings that are human in scale, architecturally congruent with what is already there, and considered with regard to maintaining street scenes and heritage. This is none of the above.	NO	Public Access website	04-May-24
24/00021/FULEIA	Kal-Weiss	Holly	Despite being in a conservation area, there are plans to build a 178m tall tower right next to Bevis Marks. This will seriously harm the significance of this internationally important building. We all benefit from such an historically significant and iconic building. Please protect Bevis Marks for future generations of worshipers, residents and tourists alike.	NO	Public Access website	04-May-24
24/00021/FULEIA	Carp	Debbie	This synagogue is of vital historical interest to the whole Jewish community in the UK if not in the world. It has historic significance and has stood in this location for centuries. A high rise block of offices situated immediately next door to it will block light, encourage crowds and heavy footfall, noise, disturbances, litter and take away the quiet peaceful surround necessary for a place of worship. Please don't go ahead with plans for this high rise office block.	NO	Public Access website	04-May-24
24/00021/FULEIA	Walker	Caroline	Totally unacceptable to develop multiple storey, excessive height buildings which dominate and destroy the character of listed and cherished adjacent buildings.	NO	Public Access website	04-May-24
24/00021/FULEIA	Goldman	Jeffrey	This development will overshadow and overpower one of the most important buildings in the City - Bevis Marks Synagogue, the oldest place of Jewish worship in the country that is still operating. The proposed development would be an act of cultural and religious vandalism showing that the City authorities no longer have any appreciation or respect for its historical buildings that are of importance, not just to Londoners, but to people around the a world. This should not be the type of message or impression that the City should be giving.	NO	Public Access website	04-May-24
24/00021/FULEIA	Beenstock	Sian	Protect Bevis Marks Synagogue it is in a Conservation Area and soon opening a Tourist Attraction in the grounds.	NO	Public Access website	04-May-24
24/00021/FULEIA	Whaley	karen	This new building is a monstrosity that will overshadow a beautiful grade one listed synagogue. It will cut out the light, seriously impacting the appearance of the glorious interior and will have a negative effect on the worship experience of the congregation. Please do not allow profit to come before beauty and history.	NO	Public Access website	05-May-24
24/00021/FULEIA	Caller	Niki	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance.	NO	Public Access website	05-May-24

24/00021/FULEIA	Tolley	Tamara	It is vital that Jewish heritage sites as important as this are fully protected. The protections in place do not stand up to scrutiny. The light the synagogue needs will be overshadowed and its very character destroyed. This would never happen to St Paul's Cathedral. This Bevis Marks Synagogue is as important to London's diverse history as the Cathedral and as such should be protected.	NO	Public Access website	05-May-24
24/00021/FULEIA	Silverstone	Fay	My husband and I were married in this beautiful synagogue in 1994. I have worked in this area for many years. It is a beautiful, historic building that needs to be protected from any unnecessary detrimental works that could in any way infringe its historic importance.	NO	Public Access website	05-May-24
24/00021/FULEIA	Gilbert	Dina	* The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. * The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. * It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is this heritage site not afforded the same protection? * It would further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. * The proposed building would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole. * It is disingenuous to claim to recognise the importance of the synagogue, yet simultaneously facilitate a development that will damage its use.	NO	Public Access website	05-May-24
24/00021/FULEIA	Kuhn	Michael	how many times do we have to object to the negative impact this will have on the treasure that is Bevis Marks synagogue?	NO	Public Access website	05-May-24
24/00021/FULEIA	Symons	Geraldine	I strongly object to this planning application for the building so near the Historically important Bevis Marks Synagogue..To block out so much more light is outrageous.. Developers are getting much to greedy. Bevis Marks is the most important and oldest Synagogue. in the country and must be looked after with great care.	NO	Public Access website	05-May-24
24/00021/FULEIA	Gafsen	Susan	This is a grade 1 listed building and a very important part of Jewish heritage in London. My great great grandparents were married there. This development would severely impact the light and the enjoyment of the synagogue and at the current time it's important that we respect the significance of this building for the diaspora and for London heritage.	NO	Public Access website	05-May-24
24/00021/FULEIA	Goodman	Judi	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible.	NO	Public Access website	05-May-24
24/00021/FULEIA	Stone	Lee	The proposed building would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship.	NO	Public Access website	05-May-24
24/00021/FULEIA	Newman-Crane	Sue	I write as a member of SAVE Britain's Heritage, hoping to do just that to protect the surroundings of the Jewish synagogue nearby which is both Grade 1 listed and in a conservation area. This vast tower would adversely affect the setting of the synagogue, and in addition, add another nail in the coffin of the City of London skyline, which is increasingly ruined and is so important to the capital's unparalleled visual heritage.	NO	Public Access website	05-May-24
24/00021/FULEIA	Sinclair-Horne	Annabel	A 45 storey tower would completely overwhelm this historically significant Grade 1 listed synagogue. It would overshadow the synagogue and its courtyard for most of the day, reducing its useability of the courtyard for religious festivals and celebrations. It would also particularly affect the daylight into the synagogue, making it even more difficult to conduct religious practises. Also, due the protected significance and design of the synagogue, it is not possible to install additional electric lighting. This area is within the Creechurch Conservation Area which does not permit tall buildings, and therefore this development should not be granted. The proposed building would further undermine this historically valuable Conservation Area.	NO	Public Access website	05-May-24
24/00021/FULEIA	Rahamim	Simon	The proposal will severely and adversely affect a Grade I listed building of major historic relevance and of great importance to the Jewish community. It will completely overshadow the synagogue, block its southern sky view and affect the light. It is disappointing to see yet another proposal being put forward that will seriously diminish this important site. As a regular visitor and worshipper at Bevis Marks I believe that the proposed development will be disastrous to this historic site.	NO	Public Access website	05-May-24
24/00021/FULEIA	LEHMANN	Laura	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance.	NO	Public Access website	05-May-24
24/00021/FULEIA	Bekhor	Alan	As a worshipper belong to the historic Spanish and Portuguese Jews' Congregation, which is the oldest Jewish Community in the UK, I am appalled by the proposed scheme. Not only does the scheme severely restrict light into this beautiful building, but it further eclipses a heritage site which is unique in Britain. Our planners will not be doing their job in preserving our historic landmarks, if they allow this scheme to go ahead. Alan Bekhor	NO	Public Access website	05-May-24

I can't understand why such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would change the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. Although, the proposed building may be well designed and an exemplar of sustainability it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community.	NO	Public Access website	05-May-24
24/00021/FULEIA	Daniel	Edward	I think this is an unnecessary and gratuitous project. A 45 storey building would involve horrendous levels of disruption during construction and become an eyesore and obstacle to the local area. The extensive damage to the nearby station would cause chaos and the endangerment to the Bevis Marks synagogue is unforgivable. This project should be cancelled.	NO	Public Access website	05-May-24

I'm a member the Jewish Community at large and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application,is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	05-May-24
24/00021/FULEIA	Rose	Helena	This Synagogue is a prominent landmark in London and a holy synagogue for Jewish people. It has been in continuous use for over 300 years and two world wars. Why should greedy developers be able to desecrate such a holy place and destroy an historical house of worship of this stature?	NO	Public Access website	05-May-24
24/00021/FULEIA	Angus	Bernard and Ruth	Why are our heritage sites always the ones councils want to pull down to build new Britain's heritage is important to us older people	NO	Public Access website	05-May-24
24/00021/FULEIA	Stagni	Silvano	I am a member of Bevis Marks synagogue. I think that a building of that caliber would not be allowed next to StPaul's cathedral. Bevis Marksnis a grade 1 listed building, the first synagogue established in the U.K. after the readmission. It is a symbol for Anglo-Jewry at the same level as StPaul's for every Londoner. A building of over 40 stories next door would completely obliterate it and reduce the already low level of natural daylight. It would not be allowed near StOaul's cathedral, why is it allowed near Bevis Marks?	NO	Public Access website	05-May-24
24/00021/FULEIA	Brice	Katherine	I object to the creation of a 43 storey tower so close to the unique and very significant Bevis Marks synagogue. This is a building of immense historic importance and it will be completely overshadowed by the proposed tower. I urge the planners to think again and protect this important part of our heritage.	NO	Public Access website	05-May-24
24/00021/FULEIA	Son	Michael	I object to the building of yet another office block in the 1 sq mile of the City of London. It would be a a tragedy for another historical building to be destroyed.	NO	Public Access website	05-May-24
24/00021/FULEIA	Hilsenrath	Alex	This is completely unacceptable. This building will have a massive negative impact on the Bevis Marks synagogue, which has stood at this location for over 300 years. It is still in use today! Such an imposition on the skyline currently visible to congregants is incomprehensible.	NO	Public Access website	05-May-24
24/00021/FULEIA	Baharier	Michelle	The historic site of Bevis Marks must be prtected, it is one London's oldest buildings ...thess new builds will damage it and London's Jewysh history.	NO	Public Access website	06-May-24
24/00021/FULEIA	Levy	Raymond	As a Jew and a member of the public I am strongly opposed to this development next to Bevis Marks one of the oldest synagogue in Europe and the oldest in the UK. To proceed would be an act of great vandalism. Incidentally this form does not allow me to insert my title of Emeritus Professor	NO	Public Access website	06-May-24
24/00021/FULEIA	Levy	Raymond	As a Jew and a member of the public I am strongly opposed to this development next to Bevis Marks one of the oldest synagogue in Europe and the oldest in the UK. To proceed would be an act of great vandalism. Incidentally this form does not allow me to insert my title of Emeritus Professor	NO	Public Access website	06-May-24
24/00021/FULEIA	Ereira	Angela	I strongly object to the new proposal to build an extremely tall building close to the Bevis Marks Synagogue. It is a Grade 1 listed building in a conservation area. The new tower will block the sky view and overshadow the synagogue.	NO	Public Access website	06-May-24
24/00021/FULEIA	Leigh-Wood	Oliver	This application, as with the previous two for this site, should be turned down. The synagogue one of England's most important religious buildings, is listed grade 1 and Holland house grade 11* and both are in the newly created conservation area. The setting of both will be severely and permanently compromised by the proposed new tower.	NO	Public Access website	06-May-24

24/00021/FULEIA	Shapiro	Adam	A 45 storey tower will completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community. They propose to restore the Listed Holland House[1] and turn it over to various uses which are claimed to be of community benefit. Whilst the restoration of this building is to be welcomed, the claims about the community value of the uses must be viewed with great scepticism. The existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and	NO	Public Access website	06-May-24
24/00021/FULEIA	Martin	Frank	I comment as a member of Bevis Marks Synagogue, where my family has prayed and been an integral part of the community since it was opened in 1701. Indeed some 14 continuous generations have been married there. This development is in a newly created conservation area and goes completely against its objects. The proposed monstrosity will leave the Synagogue completely in shadow and will impede services which are reliant on seeing the moon. It does not do the City any service to see how planning rules within conservation areas which the Corporation itself has put in place can be flouted at will. Finally the developers are being disingenuous in the "amenities" they are offering which they admit are being offered to try to mitigate the disastrous effect this will have on Bevis Marks and which would in any event form part of any modern development	NO	Public Access website	06-May-24
24/00021/FULEIA	Richardson	Joanna	The proposed development would have a very significant negative impact on Bevis Marks synagogue, a highly important listed building, as well as in the other buildings in the conservation area in which the synagogue stands.	NO	Public Access website	06-May-24
24/00021/FULEIA	Billinghurst	Keith	What is the point of the Creechurch Conservation Area if permission is granted to erect a building of such an overpowering nature as this? The City's planning policy states that tall buildings are inappropriate within conservation areas.	NO	Public Access website	06-May-24
24/00021/FULEIA	Evans	Chris	It's a historic building been standing a very long time. In fact it will still be standing when all these modern monstrosities have long gone. We don't want it destroyed. Go build your plastic tower somewhere that the sun doesn't shine. We are sick of losing our heritage to greedy developers who don't have an ounce of talent between them. Leave the synagogue alone. If it was a mosque you wouldn't touch it.	NO	Public Access website	06-May-24
24/00021/FULEIA	Gower	Judith	This is a historic synagogue and should be left alone. There should not be any building around it. It holds records from many synagogues that no longer exist such as the one my great grandfather worked at plus many of the records for my father's family.	NO	Public Access website	06-May-24
24/00021/FULEIA	Steinberg	Susan	Opposition to Application 24/00021/FULE1A Application almost unchanged since last submission was refused and does not remain in keeping with the conservation of a Grade 1 listed building which is also in a conservation area The proposed tower to the synagogue's immediate south would dominate the protected setting of the synagogue and would severely limit the southern daylight view The proposed tower would affect the ambience of the synagogue and would have a negative impact on the Heritage and Education Visistor Centre due to welcome many visitors from around the world later in the year.	NO	Public Access website	06-May-24
24/00021/FULEIA	Kessler	Charles	The proposed tower is completely out of character with the site and will overwhelm the local historic buildings In particular, the world famous Bevis Marks synagogue will be overshadowed, thus losing a jewel in the crown of the city landscape. The growth of the City of London depends on a sensible and thoughtful balance of new buildings in their setting with existing. This tower is completely out of line with all idea of design and feel of the area and should not be allowed	NO	Public Access website	06-May-24

It will overshadow the grade 1 listed Bevis Marks Synagogue and take the daylight away from the building during most of the day. I thought this was now a conservation area and it would be protected from such radical redevelopments.	NO	Public Access website	06-May-24
24/00021/FULEIA	Edwards	Jennifer	My husbands grandparents were married at Bevis Marks .He visits there often remembering his grandmother's Spanish / Portuguese name of Corre They were persecuted then. Much like today How dare the council even consider pulling down a much loved HISTORICAL BUILDING .Shame on you	NO	Public Access website	06-May-24
24/00021/FULEIA	MacNeil	Chris	Sir, Madam As a Christian and prospective City of London Tour Guide, I object to the application for a building well over 10 times the height of Bevis Marks Synagogue being erected and thus compromising the intrinsic benefits that the building holds to the Jewish community and the wider City as a while. The Christian faith has seen encroachment of modern City buildings on its incredible architectural legacy. As such Tour Guides, amongst the wider faithful, are beginning to struggle to enjoy these buildings from both outside as well as inside. The Bevis Marks Synagogue is already in an enclosed space. It would do the City immense disservice to allow a huge building to provide further distraction from it, and its history which is so intertwined with that of the City itself. Chris	NO	Public Access website	06-May-24

24/00021/FULEIA	Kindelan	Adam	Why is there such a furore over sunlight? Bevis Marks synagogue is in such a built-up area that this tower would have less of an effect on it than, say, a few extra overcast days each year. (This is especially true since the proposal's redesign, which is shorter and more slender to minimise its shadow.) Refusing the skyscraper on such grounds would be no more reasonable than somehow outlawing clouds, or legislating for more daylight during winter months. I hope the City planners will approve the proposal on the basis of its design strengths, and ignore the objectors' exaggerations. Why is there such a furore over sunlight? Bevis Marks synagogue is in such a built-up area that this tower would have less of an effect on it than, say, a few extra overcast days each year. (This is especially true since the proposal's redesign, which is shorter and more slender to minimise its shadow.) 24/00021/FULEIA	Silver	Rachelle	This is a historic building, a synagogue that my great grandparents married in and I use to Allen's when I lived in the city of London . We need to preserve the view and area, this is crucial part of the history of immigrants into London, the Jewish immigrants contributed so much to the city . My great grandfather was an alderman of the City , he was so proud of being one. Let's not block all beautiful historical buildings with skyscrapers, progress is great but we can't move forward without acknowledging our heritage and our past. I'm 73, but I remember houndsditch as a thriving wherehouse area , my family had Jandow, my father and grandfather traded in Cutlet street Jewlery market, all I can do is pass memories to my grandchildren, but generations should have easy access, and unspoiled views of there heritage, so much of the old has gone.,	NO	Public Access website	06-May-24
24/00021/FULEIA	Scott	Marion	This Grade 1 listed building, serves as an important place of worship for the past 400years. There are so many tall modern buildings surrounding Bevis Marks, that the natural daylight is almost obliterated. This will be the one that will completely obliterate the natural daylight, and ruin the last part of the beauty this building holds. This will make it dark, cold and a wind tunnel. I do totally object to this planning application.	NO	Public Access website	07-May-24

24/00021/FULEIA	McGurran	Deborah	The Bevis Marks Synagogue is a hidden gem in an already overcrowded area. It is important that we retain and protect our historical buildings and protect them for future generations. It is also incumbent upon us, in this generation, to preserve the integrity of these buildings. In order for the Bevis Marks Synagogue to function properly it needs to maintain the aspect of the southern sky simply for daylight access to the building. It is also important to have the space to enjoy for celebrations and to have it available for any ritual practices - without being hugely overshadowed by such an enormous tower block. Is it really necessary to out a massive tower block right there? There will be other sites in the area that will not impinge on such an esteemed, historical and religious site. As well as wholly preserving the city's ancient monuments without compromising their use or aspect, I would also question the carbon footprint of the proposed demolition and rebuild of a such a sky scraper. I do hope this proposal is not approved and the Bevis Marks Synagogue is not impacted in any way by this or any future developments. It should be celebrated for generations to come and not compromised by huge developments nearby.	NO	Public Access website	07-May-24
24/00021/FULEIA	Walker	Marcus	These plans are a direct threat to the continued operation of Bevis Marks Synagogue, the oldest synagogue in the country and the only non-Christian place of worship in the City. While this would be an outrage in normal times, at the moment when the Jewish population of the UK feels particularly at risk, this would shame the City. There is also a very direct threat to the physical safety of the Jewish congregation from having so many people overlooking them, which could not be adequately mitigated, nor could the risk of people within the new tower blocks abusing their position to abuse the congregation racially. The City has a good and growing reputation in supporting the diversity of the City's transient and domestic populations. This would set back the City's reputation by decades.	NO	Public Access website	07-May-24
24/00021/FULEIA	Simpson	Karla		N/A	Email (attached in DC- received by email file)	07-May-24
24/00021/FULEIA	Eisner	Philippe	The Synagogue is a historic building the oldest in Uk . Much treasured by the Jewish community and visited by Schools and public. Its destruction would be a terrible blow to our heritage	NO	Public Access website	07-May-24
24/00021/FULEIA	Waterman	Dawn	I am writing to express my strong opposition to this new application (24/00021/FULEIA). I am a member of British Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application has hardly changed since the last time it was submitted and is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	07-May-24
24/00021/FULEIA	Montgomery	Ruth	This scheme would blight Bevis Marks, the oldest synagogue in the UK, which is also an historic building of cultural interest. In addition it would entail a security risk to users and visitors to Bevis Marks by putting it in direct view of the proposed building. This is not acceptable. Surely such office space could be found elsewhere in the City without such impact on historic buildings?	NO	Public Access website	07-May-24

24/00021/FULEIA	Hogan	Margaret	I am a frequent visitor to London and on a recent visit I learned of the planned blighting of the wonderful, historic Bevis Marks Synagogue, by the developers of 31 Bury Street, whose planned 45 storey, tower will overshadow this Grade I listed building. Their plans show no sense of history, of culture, of religion or even of the financial benefits to be gained by the city of London, through the many tourists who visit Bevis Marks. They are taking a wrecking ball, not only to this most ancient of Synagogues, but also to one of the most historic areas of London. I first saw Bevis Marks when it was included in a cultural tour during a Conference I attended in London some years ago. All the conference delegates looked in awe at this stunning building which was enhanced by the sympathetic surrounding environment. Any authority that would grant planning permission for a new skyscraper which would darken this Synagogue internally and externally and totally overshadow it, would be rightly condemned and vilified by future generations. Could you imagine the planning authorities in Paris doing such a thing? Take note of how they are restoring Notre Dame Cathedral. Beautiful historic buildings cannot be replaced, they are a priceless heritage which we are duty bound to preserve for future generations. Unlike modern buildings, some of which barely last 40 years e g 31 Bury Street. I trust that the London planning authorities will not be left behind and put in the shade by the French planning authorities, who are now leading the way in the preservation and restoration of their historic, religious buildings. Being over shadowed is not to anyone's benefit. Margaret Hogan	NO	Public Access website	07-May-24
24/00021/FULEIA	Isaacs	L	There are enough buildings already offering what Bury house are offering. It's important to respect old historic buildings. Suggest one asks King Charles for his comment.	NO	Public Access website	07-May-24
24/00021/FULEIA	Johnson	Donna	You are trying to erase a beautiful synagogue which is a part of the Jewish community and a place of worship. Considering what is occurring at the moment i find the decision to eradicate a part of my religious history and fellow Jews absolutely unnecessary and hurtful.	NO	Public Access website	07-May-24
24/00021/FULEIA	Bankover	Michael	Object	NO	Public Access	07-May-24
24/00021/FULEIA	Roston	Natasha	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance.	NO	Public Access website	07-May-24
24/00021/FULEIA	Sacks	Rachel	Bevis Marks is the oldest synagogue in the UK and has been used as such for over 300 years. Already, because of local development, it is surround and overshadowed by so many buildings. There is only the southern aspect, which is so important for religious rituals that remains open to the sky. The proposal, similar to a 2022 rejected proposal, is for a 45 story building to be erected blocking the last remaining view of the moon's passage, as well as further diminishing the last remaining natural light into the courtyard and the already dimly lit interior of the synagogue. The synagogue holds huge historical, religious and cultural importance to the Jewish community. Please reject this proposal so that the synagogue can remain fit for purpose for another 300 years. Thank you	NO	Public Access website	07-May-24
24/00021/FULEIA	Renton	D	Out of scale with surrounding buildings, showing no sensitivity to the setting or usage of Bevis Marks. Couldn't see this proposal flying if sited next door to St Paul's, Mansion House or The Guildhall.	NO	Public Access website	07-May-24
24/00021/FULEIA	Segall	Edwin	I am a member of the S&P Sephardi Congregation and a regular worshipper at Bevis Marks Synagogue. I was horrified to learn that a new application has been made to erect a new skyscraper office building on the site of 31 Bury Street, despite the fact that a similar application received so much opposition fairly recently and, even more so, the fact that the existing property and the Synagogue itself are now within a Conservation Area. The proposed building would considerably reduce the already limited amount of natural daylight inside the Grade 1 Listed Synagogue building and would also obscure the vision of the Moon, which is required as part of Jewish worship on the appearance of the New Moon each month. Any major building works, particularly underground excavation, in such proximity to the Synagogue could seriously endanger its foundations and fabric, so soon after the major renovations which have only recently been completed. The City of London already has a plethora of skyscraper office buildings, each one more hideous in appearance tan the the next, and to permit another, in what is now a designated Conservation Area, would be a sad reflection on the City's sense of pride and purpose	NO	Public Access website	07-May-24
24/00021/FULEIA	Wright	carin	There is very little of the old city left , this building is already hidden by skyscrapers, many of which are sitting empty. We do not need another in that location. This synagogue is one of the oldest in this country , probably in Europe . It should be allowed to breathe , Our history and heritage is important . These modern skyscrapers have no character. Can you imagine people paying to visit one in 200 years time ? I doubt it would last that long anyway.	NO	Public Access website	07-May-24
24/00021/FULEIA	Hakkak	Meir	The proposed tower will completely overwhelm Bevis Marks synagogue ,a Grade 1 listed building, denying its right to light. Bevis Marks is where I was married over 20 years ago. The Corporation of London would not contemplate a similar development next to St Paul's Cathedral. I cannot see that the proposed tower in its proposed location is a requirement for "progress" in the City.	NO	Public Access website	07-May-24
24/00021/FULEIA	Smith	Lynda	Leave this beautiful building alone. So many of our historical buildings have been destroyed or tampered with. It is a London landmark. There is nothing beautiful about all these high rise buildings they have no soul.	NO	Public Access website	08-May-24
24/00021/FULEIA	Stein	S	As King Charles prevented building high rises close to st.pauls cathedral as it is an important church same till should be used for the Bevis Marks synagogue. This place of religious status should be allowed to keep some "breathing space" around it. It is already very close to many buildings that are bigger but a very high story building will diminish its existence.	NO	Public Access website	08-May-24
24/00021/FULEIA	Davey	Cathy	Don't do this ,don't dig down ,don't Rob the synagogue of light .The noise ,disruption the sameness of architecture spoiling what was once an interesting old city.	NO	Public Access website	08-May-24
24/00021/FULEIA	SMITH	Maurice	the proposal to build a 41 floor tower next to bevis marks synagogue is utterly ludicrous. it would dominate that Grade 1 listed building ....removing light and obstructing the sky views from the synagogue. I strongly object to these totally inappropriate plans thank you	NO	Public Access website	08-May-24

24/00021/FULEIA	Morris	Howard	The balance between the utility of a new building as envisaged and the importance of the Bevis Marks synagogue falls squarely on rejecting the application. Bevis Marks is an extraordinarily important building, precious to the country, Anglo-Jewry and Jewish people worldwide and to the City of London. The City is the guardian and steward of its history and heritage and Bevis Marks is a jewel to be respected and honoured. Much of the City's built heritage has been lost over the years through no fault of the City of London, some has to give way to progress in order for the City to stay vital and vigorous to business and commerce but there would have to be something very special, bringing benefits to the City and its inhabitants and visitors far, far more than is offered by this development to justify the harm that will be done to Bevis Marks.	NO	Public Access website	08-May-24

24/00021/FULEIA	Cusack	Andrew	I strenuously object to this application which would have a clear deleterious negative effect on Bevis Marks Synagogue. The synagogue is a site of immense historic importance but even more precious in that it remains in use as a place of worship today. Its history, its present function, and its architectural context would all be severely and negatively impacted by the proposal, which would also run the risk of setting a dangerous precedent should similar cases arise. The application should be rejected.	NO	Public Access website	08-May-24

24/00021/FULEIA	LL	A	Against it affecting synagogue	NO	Public Access	08-May-24
24/00021/FULEIA	Jones	Roslyn	I strongly object to this renewed and very slightly revised proposed development. Bevis Marks Synagogue, a Grade ! Listed Building, is of huge historic, religious and cultural importance to the Jewish community and the many school groups and tourists who visit it. The synagogue is not a museum but a living and working place of religious worship. Allowing a 45 storey tower to be built which will overwhelm the synagogue is a travesty no matter how well designed it is and its green and sustainability credentials. What is more, having survived many challenges over its long history the deep underground excavation work will more than likely put its entire structure at risk. The reality is that, if allowed to go ahead, this tower block will overshadow both the synagogue and its courtyard and further reduce the daylight which is already minimal. The development site is within the Creechurch Conservation Area. Allowing it to go ahead when current planning policy does not to allow tall buildings in Conservation Areas means there is a direct conflict with the statutory development plan. This application must be refused.	NO	Public Access website	08-May-24
24/00021/FULEIA	Bijl - Meijer	Anna	With this writing I will express my sincere objection for the planning of a monstrous 45 high story building office nearly next to the oldest 'Bevis Marks Synagogue' dating from 1701 and 'Grade 1 Listed ! A 45 high story tower or actually any higher story building than the precious old synagogue, will destroy the southern sky view, which is an essential part of the setting which contributes to the religious ritual in the synagogue. It would also further reduce the already minimal daylight that penetrates the synagogue and making it more difficult to conduct worship. Installing additional electric lighting is not feasible due to the old synagogue's historic nature. The planned development site is within the Creechurch Conservation Area. Current planning policy is NOT TO ALLOW tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The developers are audaciously trying to get a green light for their proposal of a a high sky tower which nobody would ever fancy when walking and admiring the old city's buildings. The proposed '45 high sky building' should be placed in a different location, and certainly NOT in a conservation area next to this beautiful 'Bevis Marks Synagogue'. In the hope you make a wise decision. Yours Sincerely, Mrs. Anna Bijl - Meijer.	NO	Public Access website	08-May-24
24/00021/FULEIA	Austen	Michal	This historic house of prayer depends on the light coming into the building With sky scrapers overshadowing the building, it makes prayer oppressive and difficult.	NO	Public Access website	09-May-24
24/00021/FULEIA	Faulds	Susan	You must not plunge this building into darkness. The building should be celebrated. Many tourists come here. Embrace the heritage and do not denigrate it. It is for these reasons I object to planning permission being granted.	NO	Public Access website	09-May-24
24/00021/FULEIA	palache	ralph	The synagogue is by far the most important jewish site in the UK so the the surrounding area must not overwhelm it.	NO	Public Access website	09-May-24
24/00021/FULEIA	Nicholas	Ronny	The proposed 43-storey tower, being visible from within the synagogue's courtyard, would have a direct and substantially harmful impact on its setting and secluded nature. The sky view from the courtyard has religious importance and allows daylight into the synagogue's beautiful interior. This was a reason for the refusal of a previous tower proposal. I also have major concerns that a building of such a great height would cause harm to the adjoining grade II*-listed Holland House, the 1912 Renown House, for which rooftop extensions are also proposed. A large building of this scale would cast a shadow over multiple highly listed buildings within the Creechurch Conservation Area, including the, 17th-century St Katherine Cree Church and 18th-century St Botolph's, both grade I listed and located at its heart.	NO	Public Access website	09-May-24
24/00021/FULEIA	Lecutier	Louise	The demolition of Bury will mean the loss of both cultural and historical building.	NO	Public Access	09-May-24
24/00021/FULEIA	Sorotzkin	Duche	As a religious Jew, this development will block the natural light that is needed for the oldest synagogue still in use in the UK and as the synagogue relies on natural light, by allowing this development to go ahead, it will cause irreversible damage to a synagogue over 300 years in use and to the whole Jewish community in the UK and to the city of London as whole	NO	Public Access website	09-May-24
24/00021/FULEIA	Gau	Justin	This will plunge the oldest Synagogue in London into the dark. As an Anglican Priest I find that sort of thoughtless brutality of another faith's place of worship repugnant.	NO	Public Access website	09-May-24
24/00021/FULEIA	Hardy	Patrick	Speaking as somebody who worships every week in the City of London, it is disturbing to see that the City is seeking to drive out worshipers of another faith from the only non-Christian place of worship in the City. This would have such harmful effects on the civic life of the city, erasing out a religious minority. On top of this, it turns a rare example of history that is alive into history that is dead. This is wrong on so many levels and shouldn't be considered in our multi-faith city	NO	Public Access website	09-May-24
24/00021/FULEIA	Brooks	Iolo	This development is completely out of character and scale for a conservation zone and dwarfs and impacts the light and amenities of a working 300 yea old historic synagogue, how can you think it is appropriate?	NO	Public Access website	09-May-24
24/00021/FULEIA	Harrison	Sarah	Permission must not be granted for this project in a conservation area. In addition it is important to recognise that the life of the City includes religious worship as well as shops and cafes.	NO	Public Access website	09-May-24

24/00021/FULEIA	Marks	Jackie	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and its historical importance to British Jewry and am upset to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application is hardly any different to the last application and the same objections still stand. It is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK with its forthcoming important Heritage and Education Visitor Centre. The proposed new tower would dominate the protected setting of the synagogue and would overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	09-May-24
24/00021/FULEIA	Bye	Georgina	Detrimental to the historic nature of the area and in particular to Bevis Marks synagogue.	NO	Public Access	09-May-24
24/00021/FULEIA	Stapleton	Mariella	I object to the bevis marks being teared down. It is one of the oldest synagogues and my grandparents got married there. It holds a lot of significance to us at Jews in the uk and at this moment in time we need our religion to stand strong and to feel part of something. The bevis marks is a staple in the community and we must protect it.	NO	Public Access website	09-May-24
24/00021/FULEIA	Stapleton	Laura	The bevis marks is a staple in the Jewish community. I am from Manchester and feel the weight of it being torn down. It is important we protect this synagogue as it is important to us all!	NO	Public Access website	09-May-24
24/00021/FULEIA	Devine	Kathryn	It is unthinkable that this beautiful and historically significant building should be threatened yet again by a monstrous and inappropriate development. You would not allow this near a cathedral, so why here? At this time more than ever we must protect our Jewish community and its places of worship.	NO	Public Access website	09-May-24
24/00021/FULEIA	Purcell	Mark	An absolutely deplorable proposal - that this wonderful building, a key place for Anglo-Jewry, the centre for a living community, an incredibly beautiful and important building, and the sole non-Christian place of worship in the City should be overshadowed in this. As a Freeman of the City I object in the strongest terms.	NO	Public Access website	09-May-24
24/00021/FULEIA	LAX	JACOB	I have been a regular visitor to Bevis Marks Synagogue, for some 40 years. It is a beautiful building, about 350 years old,. I understand that the proposed development will take a few years to complete. During this tome, there will be a continuous noise that goes with building works, especially on the scale of the proposed project. Bevis Marks Synagogue still holds daily services, these would be disrupted by the noise. It is not well insulated against sound. I am also concerned about the effect of the proposed project on the natural light that the Synagogue benefits from. It was built in the days when candles were used to light up the main parts, assisted by sunlight. there are now a limited number of electric lights, to provide some extra light, but this is a minor source as the Trustees wish to retain the ambience of the Synagogue as much as possible. Finally, the new development will not blend in with the buildings around it. Whilst I am not against modern architecture, I would expect building permission to be limited to 12 floors maximum.	NO	Public Access website	09-May-24
24/00021/FULEIA	Binke	Adrian	save Bevis Marks should not be desacrated by tall buildings which will hide its beauty it's the oldest synagogue in England should be there for its congregation to pray in solitude	NO	Public Access website	09-May-24
24/00021/FULEIA	Artoon	Sydney	This proposal for a 43 storey building will cause extreme traffic congestion and possibly accidents in a already crammed area where there is only limited space 4 storey basement space can architects guarantee that is safe !! Light will be affected, the area will be in near perpetual darkness !!	NO	Public Access website	09-May-24
24/00021/FULEIA	Jacobs	Tony	This proposal will cause enormous issues to Bevis Mark synagogue. It is not only a grade 1 protected property but it is in constant use and needs daylight to be able to run religious services and the admin surrounding it	NO	Public Access website	09-May-24
24/00021/FULEIA	Joseph	Natalie	One of britains oldest historical sites does not need to be overshadowed by what will probably be an eyesore of an apartment block. Completely unnecessary.	NO	Public Access website	09-May-24
24/00021/FULEIA	Franz	Benjamin	Bevis Marks is an ancestral congregation for my family. It's a glorious well preserved building that requires natural lighting to truly frame its glory. To build 43 stories next to it would be to create a dark, depressing environment. It would rob Bevis Marks of its wonder. Do not build this building. When next I come to London, I wish to experience the holy congregation in all its natural splendor.	NO	Public Access website	09-May-24
24/00021/FULEIA	Morales	Eva	Bevis Marks is a treasure, a beautiful and historic synagogue that is the oldest synagogue in all of Europe in continuous operation. To plunge it into darkness is almost a perfect metaphor for the decline of Jewish life in Europe, and should not be considered. I was in City of London to pray at this holy place for Passover and it was an amazing experience that I will happily recommend to any fellow Jews I come across. Please allow this community to flourish.	NO	Public Access website	09-May-24
24/00021/FULEIA	Collins	Lauren	This is an atrocious plan which would have a hugely detrimental impact on the Bevis Marks Synagogue, as both a place of worship and as a building of vast cultural and historical significance. Jewish Londoners and visitors must be allowed to use the synagogue with sufficient light and not be plunged into darkness by this pointless building. The intended development is ugly and totally unnecessary - London simply doesn't need another dominating building like this, totally out of proportion with its neighbours and the skyline. If it goes ahead it will be a huge insult to the Jewish community, and to anyone who values London's priceless heritage, history and culture.	NO	Public Access website	09-May-24
24/00021/FULEIA	Kaiser-Chen	Aaron	To whom it may concern, I am writing to register my objection to the proposed structure. As a member of the Bevis Marks Synagogue community, a member of the synagogue choir, and lay-cantor, I find it incredibly tiresome and antisemitic that structures such as the proposed one continue to disregard me and my fellow congregants, and treat us as undeserving of human dignity, seeking rather to deprive us of the very little natural light we do enjoy during regular worship. Bevis Marks Synagogue is both a living community and an integral part of British history - both Jewishly and nationally. It is unfathomable how developers can continue to bring forward proposals that actively seek to plunge both bonafide, thriving communities and history itself into darkness. Given that the community has received recognition from the Heritage Lottery and patronage from the King himself, it baffles the mind how this can be allowed to continue. To even insinuate that the proposal would not adversely affect the community is not only an insult to us as regular worshippers, but to the work of those who carried out any such survey. Such proposals have been brought and rejected before. In light of the proposed conservation area, and the international rise in antisemitism, it is astonishing that this proposal can even be considered. I urge its withdrawal posthaste. Kind regards, Aaron Kaiser-Chen 48 Queens Avenue, London N3 2NP	NO	Public Access website	09-May-24
24/00021/FULEIA	Summers	Dominic	The construction of a 43-storey tower block next to a building that is so important culturally, historically and for religious reasons is almost unimaginable in its insensitivity. It would have a very damaging effect on the cultural heritage of the area. But, what is worse, would be an insult to the Jewish community. This is culturally and historically the most important synagogue in the UK and one of the most important in Europe. Would such a tower be permitted only metres from St Paul's?	NO	Public Access website	09-May-24
24/00021/FULEIA	Ani	Alex	This is a very bad idea - will be massively detrimental to Bevis Marks Synagogue.	NO	Public Access	09-May-24

24/00021/FULEIA	Shenton	Caroline	The impact on worship at the historic Bevis Marks synagogue would be devastating by blocking significan portions of the sky, in addition to the damage its historic setting. Has no equality impact assessment been done at all ?	NO	Public Access website	09-May-24
24/00021/FULEIA	Doherty	Helen	Why does London need another monster skyscraper and so close to a beautiful old building like Bevis Marks it will spoils the beauty tranquility of this old historic building shame on you for even thinking about it	NO	Public Access website	09-May-24
24/00021/FULEIA	de Solla	Wendy	I'm reaching out from across the Atlantic (Canada) to object to the Planning Application reference 24/00021/FULEIA. The proposed structure would alter forever the natural light which streams into the Bevis Marks Synagogue. The Synagogue should be preserved and protected from unnecessary high rise developments around it (as any other historical building would or should be). Why am I, a Canadian (and a non Jewish person), interested in this? I am speaking out on behalf of my Jewish ancestors who attended this Synagogue and delivered sermons there. My ancestors are gone but their descendants have a responsibility to speak out against threats to this historical building. Please listen to our plea and don't let money destroy the beauty of this old building! Thank-you.	NO	Public Access website	09-May-24
24/00021/FULEIA	Ansell	Charlotte	It would be an absolute travesty to allow this 45 storey tower to overwhelm Bevis Marks Synagogue, a grade 1 listed building in a Conservation Area, which is incredibly important to both the history of the Jewish community in London as well as those that continue to pray there. Such a building would never be allowed beside other important buildings for other faiths and the same should be the case for Jewish people. It would absolutely destroy the southern sky view of the synagogue, which is a very significant part of the setting and would affect important religious rituals, shadowing the synagogue and its courtyard and reducing the already limited daylight into the synagogue. It is also currently not clear that the proposed new building has benefits that in any way outweigh the harm that building it would cause both physically and culturally. Has the Jewish community not been harmed enough? Conservation areas and Grade 1 listings are there for a reason! I urge you to reconsider.	NO	Public Access website	09-May-24
24/00021/FULEIA	Mocatta	David	The Synagogue is unique and should be cherished and respected not plunged into darkness. Please protect Britain's heritage.	NO	Public Access website	09-May-24
24/00021/FULEIA	Terpilowski	Sue	Damage to light for Beavis Marks Synagogue	NO	Public Access	09-May-24
24/00021/FULEIA	Ruff	Chris	The disruption to the synagogue here seems to be catastrophic, the loss of light and the effect this will have appears to be obvious. The City has a great heritage and places of importance such as this should be protected. We have lost plenty in our City of London in recent years and we can well do without another casualty.	NO	Public Access website	09-May-24
24/00021/FULEIA	black	keith	This development will have an awful impact on the the grade 1 listed bevis marks synagogue, an impact that would not be acceptable for any other building of this significance. the unnecessary demolition of 31 bury street is unacceptable from an environmental perspective.	NO	Public Access website	09-May-24

I have visited the beautiful Bevis Marks' Synagogue for weddings and events and I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	09-May-24
24/00021/FULEIA	Hassan	Alexandra	Bevis Marks is a listed building, part of London's rich Jewish history and must be protected. Building such a high-storey building next to it will overshadow it, removing natural light and affecting the communal space that Bevis Marks is soon opening to the public. Please rethink your plans.	NO	Public Access website	09-May-24
24/00021/FULEIA	Greenberg	Susan	This project makes a significant impact on the light, space and overall environment of the historic Bevis Marks synagogue.	NO	Public Access website	09-May-24
24/00021/FULEIA	Max	Jonathan	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community. They propose to restore	NO	Public Access website	09-May-24
24/00021/FULEIA	Fawcett	Robin	The impact on the synagogue nearby would be appalling and unconscionable. Faith communities must be protected, especially given their heritage in our ancient city.	NO	Public Access website	09-May-24
24/00021/FULEIA	Marsh	Alan	A building of this scale and height is entirely inappropriate in close proximity to Bevis Marks Synagogue, London's oldest place of Jewish worship, which would be completely overshadowed by such a development. It would be extremely unfortunate, to say the least, if London's increasingly beleaguered Jewish community were to be forced to leave their spiritual home. Planners need to look very closely at the context of proposed developments, as here, and ensure that any new building is sensitive and applicable to the local environment, especially in crowded spaces such as this. This proposal is not.	NO	Public Access website	09-May-24
24/00021/FULEIA	Lawrence	Harvey	It completely obliterates the oldest UK Synagogue Bevis Marks and as it's not a Mosque I consider this planning application to be Racist and against the Public Interest of not destroying the look of sacred buildings	NO	Public Access website	09-May-24

24/00021/FULEIA	Scott	Lisa	The proposed building would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. My understanding is that because of the historic nature of the synagogue, installing additional electric lighting is not feasible. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection?	NO	Public Access website	09-May-24
24/00021/FULEIA	Davila	Patricia	The impact this would have on the natural light of Bevis Marks Synagogue is totally unacceptable. It is a major part of the cultural heritage of the Sephardi and wider Jewish community of this country and allowing it to be forced into darkness would be an unacceptable failure by the City. In the era of inclusivity and equality we find ourselves in, to exclude our community's need to protect our history would be ignorant at best and in any event a breach of the Equality Act given the protected nature of religious minorities in this country. How much more so, particularly given the relatively small numbers of Sephardi Jews in the UK today, does this apply to the still-active community at Bevis which granting this permission would hurt in the immediate term.	NO	Public Access website	09-May-24
24/00021/FULEIA	Rose	Adam	Bevis Marks Synagogue, Europe's oldest synagogue in continuous use, is an important part of Jewish heritage in the UK. This proposal will destroy the light available to the synagogue, making its use deeply depressing, and damaging the spiritual aspect of the site.	NO	Public Access website	09-May-24
24/00021/FULEIA	Simon	Rashi	This application menaces the historic Bevis Marks synagogue and threatens to completely overwhelm it. Should a place of worship which survived the Blitz and so much more succumb to the callousness or greed of City developers and a pliant or disinterested council? This would be a historic tragedy. Do not allow it to happen on your watch.	NO	Public Access website	09-May-24
24/00021/FULEIA	Lent	Paula	As an art historian and a women who has spent all her school life and working life in the City of London I object to the beautiful historic building and synagogue Bevis Marks will be totally overshadowed by this building.	NO	Public Access website	09-May-24
24/00021/FULEIA	Vos	Benjamin	Having worshipped at Bevis Marks, I know how beautiful and unique it is in the Jewish world and in the United Kingdom. It bears restating that Bevis Marks is the only place of Jewish worship in the City, and the oldest functioning non-Christian sanctuary, by centuries, of any non-Christian denomination in Greater London. As someone who has in my professional capacity developed a walking tour of Jewish London, I feel that the synagogue is of immense historical, aesthetic, cultural and even symbolic importance. Plans to wear down objectors to developers damaging the ancient synagogue's right to light, cannot be allowed to succeed. The synagogue's large clear windows need natural light. Developments must not block the sunlight and must not. Please do not allow the skyscrapers to damage the beauty and grandeur of this special place.	NO	Public Access website	09-May-24
24/00021/FULEIA	Fraser	Lola	This construction will completely block the light and dwarf Bevis Marks Synagogue. The oldest synagogue still in constant use in Britain. If hiven the go ahead it will have an horrendous effect on the synagogue	NO	Public Access website	09-May-24
24/00021/FULEIA	Leffman	ADELE	Bevis Marks synagogue is part of the fabric of the City of London as it has functioned since 1701. Your proposed scheme will destroy our ambience and ruin the Rabbi's house and the light in the courtyard where his son plays. This currently bright space is used by us in spring and summer for religious functions and fetes. Your proposal does you no credit. We have an elegant building with just enough privacy to make it viable. If we are dwarfed and thrust into darkness you will be eroding the heart of London Jewry. There is no excuse for your attitude, of breaking rules to suit yourself. We have contributed considerably to this city and deserve to be treated with respect . Not walked over as if our existence was of no importance. If you have a shred of decency you will not proceed with this scheme which does you no credit on any front. Your flouting of the rules of a conservation area beggars belief.	NO	Public Access website	09-May-24
24/00021/FULEIA	Samuel	Jonathan	It would be a travesty were this proposed massive Tower be allowed to overshadow and hem in Bevis Marks Synagogue, the ildest Synagogue in Britain. The synagogue needs light and a view of the heavens.	NO	Public Access website	09-May-24
24/00021/FULEIA	SOLOWAY	stuart	a 45 storey development adjacent to the oldest and continually used synagogue in London would completely overshadow this grade 1 listed building and destroy the historic character of the neighbourhood and synagogue. It would impair the impact that the building has on the historical background of the City of London and the development of the Jewish population in London and England .	NO	Public Access website	09-May-24
24/00021/FULEIA	Pell Scholes	Daisy	This will ruin a unique and historic atmosphere and a beautiful, important architectural experience.	NO	Public Access	09-May-24
24/00021/FULEIA	Duke	Marc	There are very few original pieces of Jewish history left in London don't sacrifice this one for the cause of commerce there has to be another way.	NO	Public Access website	09-May-24
24/00021/FULEIA	Bendahan	Yael	A 45 storey tower would overwhelm the stunning synagogue, a Grade 1 Listed building of enormous historic and cultural significance, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting, and overshadow the synagogue and courtyard for much of the day, It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. .	NO	Public Access website	09-May-24
24/00021/FULEIA	Pell Scholes	Barney	I strongly object to this proposal to build a 43 storey building that would have a significant detrimental effect on the historic Bevis Marks synagogue. It is wildly inappropriate to be considering a development that would block off light and important sightlines to a building as culturally and historically significant as Bevis Marks. This is perhaps the UK Jewish community's most significant synagogue, please treat it with the respect it deserves. A previous proposed development that would have had a similarly detrimental impact on Bevis Marks met with public outrage and was stopped as a result. Why would you make the same mistake again? You would not consider allowing a similar development next to other culturally and religiously significant buildings, such as St Paul's Cathedral, so please treat Bevis Marks with the same degree of respect. I object to this development and urge you not to progress it further.	NO	Public Access website	09-May-24
24/00021/FULEIA	Abboudi	Maurice	Bevis Marks is a historical landmark in the City. It has the most fabulous courtyard with stunning views of the moon and the stars. This will be overshadowed by another high rise. On a personal note we were supposed to rent the ground floor and first floor of this building. We spent over #25,000 on plans and architects and the landlord pulled out at the last minute. We found out that we had been strung anling all the way and the landlord was planning to apply for redevelopment of the site. Needless to say I do not support redevelopment of this building.	NO	Public Access website	09-May-24
24/00021/FULEIA	Wiesenberg	Mindy	This development will completely overwhelm Bevis Marks which is one of the most important and oldest synagogues in Europe. It is totally out of character with the immediate area and should be denied planning permission.	NO	Public Access website	09-May-24
24/00021/FULEIA	Lee	Marilyn	This building is of great significance not only to the Jewish community but to people who have an i terest in historic buildings. Bevis Marks hss been on this spot for 323 years. It needs the natural light for religious reasons. By erecting a skyscraper so near to it which will blot out the natural light is astonishing! In 2020 and 2021 there was considerable opposition to planning applications for two nearby skyscrapers which would cut off natural light to the synagogue, threatening its ongoing use for daily services. The community had said the historic synagogue faces a closure threat as the loss of light would render services "almost impossible." Plans to build both tower blocks were ultimately denied by City of London councilmembers.In 2023, the Creechurch Conservation Area was approved, which should protect Bevis Marks and Grade II* St Botolph's-without-Aldgate from development. So what has happened since then. I oppose the erecting of any skyscrapers anywhere near this beautiful building.	NO	Public Access website	10-May-24

24/00021/FULEIA	Winston	Anthony	This historic place of worship is the only synagogue in the City. It must be protected and preserved in its current form and not suffocated by surrounding development.	NO	Public Access website	10-May-24
24/00021/FULEIA	Hasenson	Phillippa	You'll block the natural light into europes oldest synagogue which is lit by candlelight and destroy the ability to use the building!!!	NO	Public Access website	10-May-24
24/00021/FULEIA	Williamson	Donald	If this development is given approval by the Corporation of London, it will be a sad day for this most beautiful synagogue, the City's very own Cathedral Synagogue. Young professionals from the area have given Bevis Marks renewed purpose. It is still a synagogue, the longest continuously serving synagogue in Europe and one of the longest continuously serving synagogues in the whole world. I lived for many years in the Stepney/Whitechapel area and knew of Bevis Marks. The bomb blast at Baltic Exchange I remember very well where I was living, just a mile to the east of there. Bevis Marks survived that blast, survived another, survived the Blitz and has survived the ever-encroaching developments nearby. This proposed development is a real risk to Bevis Marks as a house of prayer. "Kahal Kadosh Shaar Asamaim", the "Holy Congregation The Gates of Heaven", is a place of quiet contemplation on weekdays, not just a tourist attraction, and serves an observant community on Shabbos. It is rightly thought of as the City's Cathedral Synagogue by the S&P and by the wider Jewish community. There is no other like it and it deserves to be safeguarded in the present and for future generations. May the Corporation's committee be guided by HaShem to reach a just decision in this matter.	NO	Public Access website	10-May-24
24/00021/FULEIA	Weiss	Annie	The proposed building is disastrously large and would destroy the current atmosphere of the synagogue and affect the experience for current and future congregants.	NO	Public Access website	10-May-24
24/00021/FULEIA	Brown	Jeremy	The building of a tall building over shadowing Bevis Marks is outrageous. The elimination of natural light will turn the synagogue and adjacent area into darkness. The first attempt was rejected,and the same must happen to this second attempt.	NO	Public Access website	10-May-24
24/00021/FULEIA	Lerner	David	The centuries-old Bevis Marks Synagogue is one of the most significant religious landmarks in the UK, and arguably in Europe. Not only does a local congregation worship there, but people travel from around the world to visit. The synagogue's historic interior is lit by candles and natural light, which contribute to its feeling of sacred space. The proposal will literally overshadow the synagogue, destroy the spiritual atmosphere, and very adversely impact the experience of visiting and worshipping there. I hope you will not approve the construction of such a large adjacent tower.	NO	Public Access website	10-May-24
24/00021/FULEIA	Dwek	David	As a member of the S&P the 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community	NO	Public Access website	10-May-24
24/00021/FULEIA	Marks	Michael	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). As a member of the U.K. Jewish community I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	10-May-24
24/00021/FULEIA	Wilson	Mark	The Bevis Marks synagogue is a monument to history and Jewish heritage in England. Three hundred and fifty years of it. It is a wonderful building and is simply stunning. I've also been inside a few times and had moments of reflection in there. On one visit, I was lucky enough to have been shown around by the Rabbi, and noted the worshippers and the community it is. This is a special building. Bevis Marks should not be cut off by the awful darkness of a development, which is not needed and will make no contribution to the life of the City of London or improve it. Do not let developers ride roughshod over culture, religion, history or our heritage.	NO	Public Access website	10-May-24
24/00021/FULEIA	Loftus	Richard	The proposed development will irrevocably change the setting of this listed building which is a unique Grade 1 listed synagogue whose setting and daily use is a fundamental asset of the Jewish community in London and Great Britain at a time when anti semitism is rife .	NO	Public Access website	10-May-24
24/00021/FULEIA	Ta	David	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	10-May-24

24/00021/FULEIA	Holt	Jason	I'm writing to express my strong opposition to this new application I'm a worshiper of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	10-May-24
24/00021/FULEIA	Lester	Jonathan	We attended a service at the Synagogue earlier this week and it is not only a beautiful period building but an oasis in the city of ugly skyscrapers. It attracts audiences from people interested in the areas history and what the Synagogue represents being the religious haven available to Jews escaping persecution 300 years ago. Any adjacent building works and imposing tower would completely undermine the Synagogue and could potentially damage it.	NO	Public Access website	10-May-24
24/00021/FULEIA	Stubbs	Ian	I objected to the previous application too. The planned 45 storey tower would completely overwhelm the synagogue, which as you are aware is a Grade 1 Listed building of enormous historic and cultural significance not only to the city but to the whole country. Such a building would be allowed next to St Paul's cathedral, so why is the synagogue not given the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the qualities it contributes to religious ritual, the view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is here a conflict with the statutory development plan. The City Corporation is required to identify locations suitable for tall buildings and has I understand done some work on this, but there is much more work to be done, and that work has to be assessed by an independent inspector which is unlikely to be complete before late next year. The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny many of these such as being car free, demonstrating holistic environmental design, having consolidated deliveries, already happen as standard practice with lots of applications nationwide.	NO	Public Access website	10-May-24
24/00021/FULEIA	Loftus	Nicola	This building would overwhelm and dwarf the historical synagogue next to it, this is an important heritage building for British Jews and should be afforded the same consideration as a cathedral.	NO	Public Access website	10-May-24
24/00021/FULEIA	stephenson	judy	Modern tall buildings in the distance can enhance old ones, but when they overshadow they make the old buildings invisible from the outside, and dark on the inside. The streets here are narrow (even Bevis Marks itself), you don't want to feel threatened by a building as you walk in its shadow. js	NO	Public Access website	10-May-24
24/00021/FULEIA	Mellman	Susan	You must not plunge this building into darkness. The building should be celebrated. Many tourists come here. Embrace the heritage and do not denigrate it. It is for these reasons I object to planning permission being granted.	NO	Public Access website	10-May-24
24/00021/FULEIA	Lerner	Ashley	Bevis Marks is a British and Jewish community asset and a 45 storey building next to it is absurd. I cannot believe other grade 1 listed buildings would be subjected to such a neighbouring property.	NO	Public Access website	10-May-24
24/00021/FULEIA	Ognall	Geoffrey	This proposal is unacceptable and inappropriate to the historic Bevis Marks Synagogue blocking light and in my view desecrating the surround	NO	Public Access website	10-May-24
24/00021/FULEIA	Nono	Paola	- a previous application for a 48-storey building was rejected. The current application is not significantly different, and therefore all the reasons for rejecting the previous application still apply; - the proposed development is in a Conservation Area, where tall buildings are not permitted, and is therefore in direct conflict with the statutory development plan. It's outrageous that the City Corporation is proposing to scrap the ban on tall buildings in Conservation Areas and thereby damage the setting of all heritage assets in the area and compromise the qualities of Conservation Areas; - the development would completely overshadow and have a huge impact on the Bevis Marks Sinagogue, a building of great cultural significance and Grade I Listed; - the existing building at 31 Bury Street, which is only 40 years old, is capable of being refurbished and its unnecessary demolition would result in CO2 emissions.	NO	Public Access website	10-May-24
24/00021/FULEIA	Graff	Michelle	Why would you all to plunge this building into darkness. The building should be celebrated. As a Jewish listed site in full use Many tourists come here. Please Embrace the heritage and do not denigrate it. Would you wish a listed Christian place of worship to be put into this position It is for these reasons I object to planning permission being granted.	NO	Public Access website	10-May-24
24/00021/FULEIA	Shaanan-Eisen	Naomi	- A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. - It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? - It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. - The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. - It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible.	NO	Public Access website	10-May-24
24/00021/FULEIA	Freedman	James	This proposal is not materially different from the tower which was rejected a few years ago. A 45 storey tower will completely overwhelm Bevis Marks synagogue, a Grade 1 Listed building of enormous historic and cultural significance. The view of the sky is an essential part of the setting of the synagogue, and would be completed destroyed. The Hebrew calendar is lunar and losing the view of the moon's passage across the sky, which would be blocked by the proposed tower, would irreversibly detract from the amenity of the synagogue for payer and contemplation. If permitted, the tower would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. The developers argue that they are providing lots of planning benefits that outweigh the harm to the synagogue. They acknowledge that harm to the synagogue will result from an approval. Further, the alleged benefits cited do not stand up to scrutiny and this flawed argument demonstrates a lack of understanding as to the synagogue's value, role and function. As someone who has attended the synagogue over a period of more than fifty years, I oppose this application for such a massive, overwhelming development in the strongest possible terms.	NO	Public Access website	10-May-24

24/00021/FULEIA	LEVY	DANIEL	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan.	NO	Public Access website	10-May-24
24/00021/FULEIA	Wober	Jonathan	This proposed development of a 43 storey building just to the south of Bevis Marks synagogue would further reduce the daylight reaching the UK's oldest Jewish place of worship. The synagogue, an active place of worship and the only one in the City that is not Christian, is also hugely important heritage asset. In regular use, it relies heavily on natural light and candles and has already suffered a significant reduction in daylight over the years due to a number of other tall buildings in the area. As a City of London Guide, I feel very strongly that the unique and diverse history and heritage of the City must be respected and protected, especially concerning a building which has an unbroken three centuries of importance to Britain's Jewish community. Bevis Marks synagogue should be able to look forward to retaining its significance in the City for 300 more years and beyond. The same could not be said of the proposed new development on Bury Street (nor of any other office building in the area). I recognise the importance of new office and commercial space in the City, but not at the expense of the continued well-being of a unique and culturally vital community asset. The previous proposal for a similar, even taller, building on Bury Street was rejected and this proposal must also be rejected for the same reasons.	NO	Public Access website	10-May-24
24/00021/FULEIA	Lerner	Marc	I was shocked and saddened to see that again there is a proposal to erect a new high rise building so close to the oldest continuously used synagogue in Britain dating from 1701. It is a listed building and is the cathedral church of Judaism and of great significance to the community. It has many services throughout the year and the view of the moon's passage across the sky and many celestial bodies would be blocked by this new development. It would overshadow the synagogue and its courtyard. The construction of such a large new build may also affect the foundations of the Synagogue building, however much care is taken. The development site is within the Creechurch Conservation Area and current planning policy is not to allow tall buildings in the Conservation area. This policy should not be changed. The current building at 31 Bury Street is only 40 years old and could be refurbished to provide further service for many more years rather than demolished. I very much object to this new development which will affected a much loved building I regularly visit and is visited by dignitaries from all over the world as well as other visitors both from the UK and overseas.	NO	Public Access website	10-May-24
24/00021/FULEIA	Davis	Angela	I find it appalling that you would even consider another monstrosity of a building being built to overshadow an historic part of the City. It is shameful that the area around this historic building isn't being allowed to enhance the area rather than corporate greed taking over to line the pockets of capitalists who care more for greed than the beauty and intrinsic value of the history of the area. So much of the area has been destroyed in the last 50 years, that I feel this application should be turned down to preserve at least a small amount of the area can be saved by the building of yet another monstrous carbuncle	NO	Public Access website	10-May-24
24/00021/FULEIA	Pereira-Mendoza	Marc	In a world where we pay less and less attention to an active preservation of the past and in particular the uniqueness and exceptional history of a building such as Bevis Marks, the Corporation must pause and take stock of the objections surrounding this proposed project. There is no doubt that a 45 floor tower would overwhelm the synagogue optically, physically and crucially from a lighting perspective. There is limited scope to improve the lighting within the synagogue itself given its Grade 1 status and the proposed building would also overshadow the courtyard area which has been used for many years for rituals and celebrations such as weddings (including my own). Furthermore, I understand that the proposed development is within the Creechurch Conservation Area which should not allow for tall buildings and many of the arguments offered by the developer in supporting their application seem somewhat contrived - especially from an environmental and sustainability perspective. Bevis Marks will soon have a museum and visitors centre which has taken years of hard work to accomplish and will sit within the site and the success of that initiative to attract visitors will also be reliant on both the aspect and light falling across the area. More importantly this building serves as a historical gem of unparalleled significance, not just for the Jewish people, but for this country as a whole in the way that it has served as a beacon of light for those fleeing oppression and looking to contribute to broader society - please do not allow the light surrounding it to be extinguished.	NO	Public Access website	10-May-24
24/00021/FULEIA	Swart	Ben	This is one of very few local synagogues close to the city and where I live in London. I have and do come here on high holy days. It has a unique and powerful atmosphere. Dating back 300 years. One of the main reasons it creates such an atmosphere, and powerful spirit, is the light able to flood through the building. To have the surrounding area changed in this way, seems a stark metaphor for how you value the people who visit it.	NO	Public Access website	10-May-24
24/00021/FULEIA	Cotte	Severine	Bevis Marks synagogue is the only non-Christian place of worship in the City. They worship by candlelight and have monthly ritual prayers on the sighting of the new moon, the view of which would be blocked by the new tower. The tower would mean that their courtyard would be in permanent shadow. Standing with our neighbouring faith community and highlighting to the City the importance not just of office workers, but of living communities which have been the heartbeat of the city for centuries.	NO	Public Access website	10-May-24
24/00021/FULEIA	Stamler	Darcy	Proposal is outrageous! I am a heritage preservation professional. A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan.	NO	Public Access website	10-May-24

24/00021/FULEIA	Steinman	Sharon	"This site holds immense historical significance and must be safeguarded for future generations. Its uninterrupted vista has been cherished for centuries, integral to its identity. If an iconic landmark like the Tower of London had been compromised by obstructive development, it would undoubtedly face vehement opposition. Neglecting the heritage value of this site would be a disservice to its legacy and the community it serves.	NO	Public Access website	10-May-24
24/00021/FULEIA	Morrison	John	This wonderful historic building would be totally overshadowed,Its right to natural light destroyed,(please note the sanctuary is still light by candlelight). The proposed Development would not be permitted adjacent to St Pauls Cathedral so why adjacent to such an equally historic building.	NO	Public Access website	10-May-24
24/00021/FULEIA	Prever	Danny	Would this action be taken if this was a mosque?? This historic synagogue relies on natural light - reducing this will make it impossible for Jewish people to pray, thus discriminating against them. There is also a high risk of damage to this listed building during construction.	NO	Public Access website	10-May-24
24/00021/FULEIA	Owen	Matthew	The proposed development is completely inappropriate for the area, given it would overshadow Bevis Marks synagogue which is a site of national religious significance which should be respected as such.	NO	Public Access website	10-May-24
24/00021/FULEIA	Bridge	Mark	The proposal will overshadow Bevis Marks synagogue - a building of global significance and one of the most important historic places of worship in London and the UK. It will negatively change the experience of both worshippers and of visitors - at a time when the synagogue hopes to welcome more visitors with improved amenities. The synagogue isn't only of religious and architectural significance but an extremely evocative legacy of London and Britain's history of immigration and integration. Schemes such as that proposed may be appropriate in certain locations but not where they damage a site of such historic, cultural and religious merit. It seems inconceivable that such a proposal would be permitted to blight a cathedral and the response in this case should be the same.	NO	Public Access website	10-May-24
24/00021/FULEIA	Steven	Elizabeth	Once again the congregation of the Bevis Marks Synagogue have to go through this ordeal of asking to save this beautiful building for the sake of greed by developers. Isn't there enough modern monstrosities in the City; which in my opinion are already a bolt on the landscape, let alone I'm sure there are many others empty with office space to let if that is the purpose of this eyesore. STOP this development planning application NOW and for once listen to the public and how they feel. I signed the previous partition to stop such a development near the synagogue and I again sign this for the same reasons. I also repeat my comment, how about creating some green spaces in the City instead on these sites. Give some lungs to the area so that people can rest and breath. Plant some trees! that would be far nicer than a building that blots out all daylight, not only from Bevis Marks but the City and its surrounds in general. Stop making the City of London look like a permanent building site.	NO	Public Access website	10-May-24
24/00021/FULEIA	Hassan	Isaac Samuel	I object in the strongest terms to this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This application has barely changed since it was submitted last time. It is most certainly NOT in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important and oldest Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, removing most of the natural light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's "Cathedral" synagogue, particularly along its sensitive southern exposure. Kings, Queens, Lords, Sirs and many other distinguished Londoners from Oliver Cromwell to our current King and other humble individuls like me have visited this fabulous building, bathed in its natural light whilst praying, and this will no longer be possible. I urge you to refuse this application in the strongest terms.	NO	Public Access website	10-May-24
24/00021/FULEIA	Shakhani	Ronit	Every peice of heritage in this country seems to be under threat. This is a british cointry with British historic buildings. This Synagogue is no different. It it graded for that exact reason. Stop wasting money on buildings we only need for illegal immigration, stop thr immigration, teach children in school the importance of relationships thereby reducing divorces and then the "housing" problem goes away. The building should be celebrated. Many tourists come here. Embrace the heritage and do not denigrate it. It is for these reasons I object to planning permission being granted.	NO	Public Access website	10-May-24
24/00021/FULEIA	Elias	Aviva	This is an important historical building which should NEVER be demolished. On the contrary, it should be protected. Would you demolish Westminster Abbey to building apartments?	NO	Public Access website	10-May-24
24/00021/FULEIA	Rich	Miriam	I am absolutely opposed to this monstrous tower being erected so close to the synagogue. Irrespective of the benefits of the use and design of the tower itself, it would PERMANENTLY overshadow this absolute gem which is Bevis Marks synagogue. This would have a devastating impact on the synagogue itself, harming the setting and atmosphere that is integral to the ongoing operation of the synagogue, not to mention the blocking of light which would create an insurmountable obstacle to conducting services in the synagogue. No-one with a conscious should allow this tower to be built.	NO	Public Access website	10-May-24
24/00021/FULEIA	Curry	Nicholas	It is hypocritical to allow this project to even be considered within the bounds of the newly created Conservation Area around the Bevis Marks Synagogue. We don't need any more ugly, grey and glass out-of-proportion skyscrapers and should cherish the heritage buildings be they medieval, classical or Victorian that we already have.	NO	Public Access website	10-May-24
24/00021/FULEIA	Stern	Adrian	It is perhaps inelegant to talk about this as a philistine proposal but the damage to the synagogue will be enormous and devastating. After 300 years it needs to be cherished and viewed by all passers by as a noble building serving a community. the monstrous erection you are proposing would put it in shadow spoiling the public's appreciation of this gem for ever. And you know full well it will never stand for over 300 years - who would want it to? Let mammon be celebrated elsewhere - or not at all	NO	Public Access website	10-May-24
24/00021/FULEIA	Green	Edwin	The proposed new building will block the natural light that is available to the Bevis Marks Synagogue. It will be out of place towering over the cherished Synagogue which has a long history. It will NOT add to the environment.	NO	Public Access website	10-May-24
24/00021/FULEIA	Kay	Michelle	I would like to object to the proposed planning application of a 45-storey tower (the current building is 5 storeys) at 31 Bury Street, adjacent to Bevis Marks Synagogue. Bevis Marks Synagogue is Europe's oldest continuously used Synagogue. The proposed building will devastate the Synagogue, and change the landscape forever. Please reconsider this decision and turn it down in consideration of tradition and British culture.	NO	Public Access website	10-May-24
24/00021/FULEIA	Cummins	Mark	We must protect the city's heritage. The proposed tower is far too dominating. Beavis Marks synagogue has rights that must be protected	NO	Public Access website	10-May-24

Two previous applications for very tall buildings in close proximity to Bevis Marks have been refused. It is a pity that this is even proposed, as it would have effects similar to those projects already denied. This development would also permit demolition of a notable 20th Century building.	NO	Public Access website	10-May-24
24/00021/FULEIA	Welsh	Stephen	As a City of London Guide this development will swamp the synagogue and it is in a conservation zone	NO	Public Access website	10-May-24
24/00021/FULEIA	Bridge	Jenepher	I object to this huge, totally inappropriate scheme that will harm the character of the neighbourhood and especially the historic synagogue and its courtyard - where people can still currently come together and mingle under open sky. Permission to go ahead should be unthinkable after the recent decision to create a conservation area around the synagogue.	NO	Public Access website	10-May-24
24/00021/FULEIA	Braham	Samuel	Please do not allow this! Bevis Marks, the beautiful historic synagogue, has managed to remain unchanged since the 17th century due to its ability to have natural light enter through the windows, which would be obstructed with a large structure surrounding it. This would never be permitted next to St Paul's Cathedral so why should a synagogue not receive the same protection? It's not as if the City is short of available office space.	NO	Public Access website	10-May-24
24/00021/FULEIA	Cummins	Mark	We must protect the city's heritage. The proposed tower is far too dominating. Bevis Marks synagogue has rights that must be protected	NO	Public Access website	10-May-24

24/00021/FULEIA	Smith	Fiona	This development will cause irreparable harm to Bevis Marks Synagogue, and disproportionately affect the Jewish community in London and across the country. In what is becoming a contested and overdeveloped part of London, with such rich history, there must be a pause and appreciation of treasures such as the Synagogue, that will suffer from relentless building works, especially given the shul will loose its natural light should this go ahead. I'm disappointed this shul finds itself under threat once again, indeed, the very community is under threat. Objecting most strongly.	NO	Public Access website	10-May-24
24/00021/FULEIA	Martins Dos Santos	Jonatan Ismael	The synagogue was built in 1701. Twelve years later The Bill of Rights was made official in the country, marking a new departure for our Western values of freedom and democracy. Eighty-eight years later the American Constitution was established, which is still known for advocating for religious freedom. More recently, the International Human Rights and European Human Rights were mainly based on these laws. When this synagogue was built, Jews were openly executed in Spain and Portugal. Even if they were Catholic converts, but they kept any single of the practices of their ancestors, it meant they would be eligible for execution. It wasn't until 1976, approximately, that many of the descendants of those Jews, in Portugal, decided to embrace the faith of their ancestors publicly. While in London, more than three hundred years ago, they could build synagogues and enjoy a free life. Even today, our mayor, Sadiq Khan, has installed over thirty thousand lights for Ramadan in Central London, while in so many countries, religious freedom is far from being a reality. The most interesting thing is that we are in an era of inclusivity, fluidity, and diversity of any kind. Yet, a synagogue that was built one hundred and eighty years before Tower Bridge, and one hundred and fifty years approximately before Big Ben, seems to be less important than those two emblematic buildings. I wonder if our Western values of freedom and democracy matter, as so many people coming from authoritarian countries, where they can be executed for anything that deviates from the official values, find this to be a sanctuary. But it is nothing new, as it was already happening in 1701 when this synagogue was built. So, if the mayor spends money on lavishly celebrating Islam, why aren't we allowed to keep a historical building? Older than Tower Bridge and Big Ben? If a symbol of the city and the values of the West receives such poor treatment, I wonder what is coming next.	NO	Public Access website	10-May-24
24/00021/FULEIA	Bollins	Patricia	This is an ancient synagogue. Part of London's history. Do NOT build near it. Aren't there enough high rise office buildings in the City? Most of them are half empty as post pandemic, people and companies find it easier, cheaper, better for the environment, for people to work from home. Do NOT ruin this wonderful building, or the light it needs. Please. Thank you.	NO	Public Access website	10-May-24
24/00021/FULEIA	Gurevitz	Shirley	I agree with all other objectors. 3 floors less does not make any difference. Bevis Marks needs to be seen in all its glory at all times. Please reject this as happened last time.	NO	Public Access website	10-May-24
24/00021/FULEIA	Gregor	Neil	To whom it may concern, I should like to voice my concern at the indifference shown to the cultural and religious heritage of a key minority group in London embodied in this proposal, the impact of which on the adjacent synagogue - the historical and contemporary significance of which is, or should be, well-understood - is unacceptable. As the saying goes: is nothing sacred? To disregard the meaning of such buildings for the community concerned - in this case the Jewish community, but we might equally be dealing with the heritage of other faith traditions - is to show a contempt for the community itself that brings shames on the idea of 'development'. I urge you to put an end to this act of historical, cultural and communal vandalism, and to encourage the developers to exhibit a mininum degree of historical, religious and cultural sensitivity.	NO	Public Access website	10-May-24
24/00021/FULEIA	Zenios	Jonathan	I was married over 25 years ago at Bevis Marks - the oldest active synagogue in the UK and of critical importance to the Jewish community being built soon after the readmission of Jews after centuries. The proposed development is totally insensitive to the effect on Bevis Marks and denigrates its importance as a historical and cultural landmark that is still going strong.	NO	Public Access website	10-May-24
24/00021/FULEIA	musgrove	theresa	This proposal will have a demonstrably damaging impact on the character of the area, but specifically in regard to the Bevis Marks Synagogue, which is not only of immense national historic and cultural significance but of global significance too. There is absolutely no need to build yet another tower block in this area, but every reason to preserve the unique environment surrounding the oldest surviving synagogue in the UK, especially when so many other later examples have been lost. Sensitivity and consideration of the impact of this development on Bevis Marks must be given the highest priority and this thoughtless plan rejected. Listed buildings do not exist in a vacuum: in this unique case the context of surrounding buildings is vitally important and requires protection from the profit driven development plans currently under consideration.	NO	Public Access website	10-May-24
24/00021/FULEIA	Pitcher	John	The City Corporation should not consent to the destruction, at least aesthetically one of the remaining parts of historic London. St Pauls is protected and I cannot see why this protection should not equally be applied to Bevis Marks.	NO	Public Access website	10-May-24
24/00021/FULEIA	Blackman	Bob	I object to this overdevelopment of the site which will dwarf Bevis Marks Synagogue. This will devastate Europe's oldest continuously used Synagogue.	NO	Public Access website	10-May-24
24/00021/FULEIA	Edwards	Kerry	It has been there for so.long why now do you want to knock it down. Not only does it service the community it is a tourist attraction. Both Jewish people and nonJew	NO	Public Access website	10-May-24
24/00021/FULEIA	Todd	Edward	Bevis Marks Synagogue is a haven amidst the busyness of the City of London & a key part of London's spiritual & historical fabric. To steal its sunlight & hem it in with yet more tall buildings would be a loss to all Londoners	NO	Public Access website	10-May-24
24/00021/FULEIA	Cohen	JK	It is a sad indictment that the Council are even considering allowing yet another high rise development to be built in this small footprint area near this historic and extremely valued amenity, precious as the oldest remaining and working Sephardic Synagogue in London. So many other historic sites in this area have been crowded out by ugly industrial type tall buildings, causing wind tunnels, lack of light and eyesores for no significant benefit or added value. St Paul's Cathedral has been crowded out and can be barely appreciated nor can the Bank of England.it is just wrong and reminiscent of the decimation of history in the Docklands and loss of of our heritage and continued erection of ugly tall buildings blighting our cities.	NO	Public Access website	10-May-24
24/00021/FULEIA	Charig	Nigel	I do not think Nevis Marks should be cast into shadow	NO	Public Access	10-May-24
24/00021/FULEIA	Parker	Marsha	Since the pandemic a great many businesses use home workers, people buy online. The city of London therefore does not require and new developments of office and retail space . In this particular case the proposed plans compromise a special heritage site. Bad planning decisions that destroy our heritage and history can not be recovered. I know this synagogue well, it has been compromised since my visits started 50 years ago, I would like planners to respect our British Heritage. The new plans are hardly an improvement	NO	Public Access website	10-May-24

24/00021/FULEIA	Dalton	Karen	I object to the building because: The proposed development site is within the Creechurch Conservation Area. Planning policy is not to allow tall buildings to be built in Conservation Areas, so this is a direct conflict with the regulations. It will also change the reason conservation areas are designated, and destroy the area uniqueness. The development will also greatly effect the synagogue which is the oldest continously used in England. It has a great history and is visited by people from across the world in addition to the community. Its heritage is on par with St Paul's and other religious buildings and I cannot believe you would allow this type development next to them. The development will overshadow the synagogue building greatly effecting it, and the ability to use the outside space. It will reduce further the natural sunlight in the prayer hall, where people pray.	NO	Public Access website	10-May-24
24/00021/FULEIA	Chambers	Mark	It will disrupt the synagogue services	NO	Public Access	10-May-24
24/00021/FULEIA	Field	Frances	The synagogue is a world renowned building and thriving community and a popular tourist attraction. Any building that has a detrimental effect upon it should be banned. In 2020 a similar planning application was quite rightly refused. This application does not address the fears of those who objected then. A slight reduction in height is a laughable gesture.	NO	Public Access website	10-May-24
24/00021/FULEIA	Rackovsky	Ariel	Please do not shroud this building in darkness, which has been such a source of light for four centuries. Britain shuold be celebrating and preserving the Bevis Marks Synagogue, not trying to hide it and destroy it. Sincerely, Rabbi Ariel Rackovsky Dallas, Texas	NO	Public Access website	10-May-24
24/00021/FULEIA	Flory	Oliver	This disgraceful proposal, undermining the only non-Christian place of worship in the City, must be re-thought and abandoned.	NO	Public Access website	10-May-24
24/00021/FULEIA	Berno	G	It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked.	NO	Public Access website	11-May-24
24/00021/FULEIA	Daniels	Jon	You must not plunge this building into darkness. The building should be celebrated. Many tourists come here. Embrace the heritage and do not denigrate it. It is for these reasons I object to planning permission being granted.	NO	Public Access website	11-May-24
24/00021/FULEIA	de Jong	Benjamin	I'd like to highlight the impact that the proposed construction will have on the Bevis Marks synagogue. A 45-story tower would completely dominate the synagogue, which holds Grade 1 Listed status due to its immense historical and cultural significance. It seems illogical that such a structure would be permitted adjacent to St Paul's Cathedral, so why isn't the synagogue granted the same protection? The tower would obstruct the southern sky view, a crucial element of the synagogue's ambiance and essential for its religious rituals, including observing the moon's passage and celestial bodies. Although the proposed tower may boast excellent design and sustainability features, its location is simply inappropriate. It would cast a shadow over the synagogue and its courtyard for a significant portion of the day, diminishing the courtyard's usefulness for rituals and festivities. Additionally, it would further reduce the already limited natural daylight entering the synagogue, complicating worship activities. Due to the synagogue's historical nature, adding more electric lighting is not feasible. The development site falls within the Creechurch Conservation Area, where tall buildings are typically not permitted according to current planning policy, creating a direct conflict with the statutory development plan. While the City Corporation is obligated to identify suitable locations for tall buildings, their efforts remain incomplete, with an independent assessment not expected until late 2025. The developers argue that the proposed tower provides numerous planning benefits outweighing harm to the synagogue, but these claims lack substance. Proposed restoration of Listed Holland House is commendable, but assertions about the community value of its uses should be viewed skeptically. The existing building at 31 Bury Street, only 40 years old, can be refurbished to continue serving effectively, avoiding unnecessary demolition and energy waste. Furthermore, the proposed tower	NO	Public Access website	11-May-24
24/00021/FULEIA	Bailey	Jane	I strongly object to the proposal to build a skyscraper which would dominate and overshadow the wonderful Bevis Marks Synagogue and many other buildings of historic importance.	NO	Public Access website	11-May-24
24/00021/FULEIA	Short	Geoff	Bevis Marks is a truly historic synagogue, not least because of its association with the Disraeli family. The City of London should be doing everything possible to highlight its significance. Building a skyscraper right next to it does the complete opposite.	NO	Public Access website	11-May-24
24/00021/FULEIA	Graham	Jody	I'm strongly oppose this application I have been to Bevis Marks synagogue many times. It is shocking another very tall building is being considered. This was refused two years ago, Bevis Marks a grade 1 listed building is now in Creechurch Conservation and is the one of the most important Jewish sites. The new building would dominate the skyline blocking out light and completely overshadowing the synagogue. Please rethink this application. Take into consideration the amount of tourism and visitors to an iconic place of worship. Thank you	NO	Public Access website	11-May-24

24/00021/FULEIA	Webster	Martin	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). As a Londoner and a visitor to Bevis Marks Synagogue and am dismayed to see this new proposal, particularly after a similar application was refused two years ago, and also in the light of the recent adoption of the Creechurch Conservation Area. This new application is only very slightly changed from the last submission and therefore should also be refused. It is not in keeping with the conservation of a Grade-1 listed building, now also part of a conservation area. It is the most important Jewish site in the UK and the Heritage and Education Visitor Centre is due to open later this year. Its special history, reminding us of the readmission of the Jewish people to England, should be carefully preserved and not compromised by new developments. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this overwhelmingly inappropriate development send about the City of London and its values and attitude towards the Jewish community's unique heritage to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's flagship synagogue, particularly along its sensitive southern exposure. Additionally the proposed re-construction of Holland House would eliminate much of the special character of a unique London building which is the only London example of the work of eminent Dutch architect H P Berlage and would destroy its special interior features. The City of London's desire to have more and more towers seems a strange way	NO	Public Access website	11-May-24
24/00021/FULEIA	Jessop	Manuella	another suggestion of a building that will totally overshadow the only Synagogue in Europe to have been in continuous use for over 300 years. Such a building would completely overwhelm this historic building - such a thing would never be allowed to Westminster Abbey or St Pauls Cathedral - why is this being allowed for a Jewish building? There is already very limited natural light into this beautiful building - adding a 45 storey monstrosity (against all the rules of a conservation area such as Creechurch) would only block out what is remaining. I am utterly appalled that you continue to consider applications that encroach on the Grade 1 listed Bevis Marks synagogue, particularly as there is no perceptible difference between this new application and the previous (rightly) rejected applications. Bevis Marks is the most historically significant place of worship for the Jewish Community in England, and allowing such overbearing, intrusive development around the Synagogue is patently ridiculous. This would be immediately refused around St Pauls Cathedral or Westminster Abbey, and begs the question of why the needs of the Jewish community who regularly worship at Bevis Marks are being ignored.	NO	Public Access website	11-May-24
24/00021/FULEIA	Roberts	Daniel	To Anna Tastsoglou and the City of London Corporation, I write in concern at the effect this potential tower development could have on the oldest continuously used synagogue in Britain, namely the Bevis Marks Synagogue, dating from 1701. This is akin to what Westminster Cathedral represents for British Roman Catholics for example. As I am aware, the development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. For the Jewish faith, marking the position of celestial bodies is paramount, with a setting sun marking the beginning and ending of the seventh day for example. The synagogue has been designed to make use of the southern sky view, and the aforementioned development would obstruct this. The cultural significance of the continued safe existence of such an important synagogue in Britain cannot be avoided. Judaism, while being at the root of many ancient religions, has endured persecutions over centuries for the transnationality of its beliefs and its adherents, and its tolerance of other beliefs, with this synagogue being one of few to have endured. To sacrifice such cultural institutions to the short term interests of Mammon would represent a moral collapse on behalf of a public body, and would not be in the interests of a City of London corporation that understands the stabilising effect and long term vision coming from such cultural institutions. I therefore urge you to reconsider such a development seeking maximisation of land value in close proximity to a long standing and important cultural institution. Yours Sincerely, Daniel Roberts	NO	Public Access website	11-May-24
24/00021/FULEIA	Kirk	Helen	Bevis Marks is a most wonderful place. We have visited and been shown round and can understand the dire consequences were this enormous plan of works to be put in place. Bevis Marks is in such a serene courtyard with sunshine glowing into it, and it deserves to be retained with those benefits to its proper use and as a synagogue. Tall buildings cause real problems and these proposals should not be granted permission. Bevis Marks being in the new Conservation Area gives much greater reason to protect the setting of this famous calm and tranquil place and space. Do not let this monstrous proposed development overtake such beauty and quietude. Respect this ancient building and let it keep its current respectful neighbours and its sunlight. Keep out this monstrous development. It has no place alongside Bevis Marks. Why? Because the setting of this very important religious building is so significant and the setting and its attributes deserve protection from loss through such gross cramming of new high-rise and despoilation of the current status within the Conservation Area. Please count this as a vey strong objection to really unsuitable development proposals. Please inform the officer and the Council meeting of this strong objection to these proposals.	NO	Public Access website	11-May-24
24/00021/FULEIA	Olesker	David	When I lived in East End I was privileged to worship at Bevis Marks. This unique and historic building would be overwhelmed by the erection of a 45 storey building virtually on it's doorstep. This is only one step away from "preserving" the UK's oldest synagogue by burying it underground! The plan would not only diminish the benefit of the synagogue to the public but also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole.	NO	Public Access website	11-May-24

24/00021/FULEIA	Weiner	Julia	I am truly shocked by the proposal to build a 45 storey tower would completely overwhelm the oldest and most precious Jewish synagogue in the country. This is not only a Grade 1 Listed building of enormous historic and cultural significance but also a building that is used for services. I may not be Sephardi but still have had the privilege of attending services there which are quite an experience. I seem to remember that when there was talk of developing Paternoster Square near St Paul's Cathedral, the King as he is now stepped in and plans were changed. I hope this will be the case. Having been to Bevis Marks, I know the courtyard is an important meeting place and we need to see the sky for religious reasons. The tower would also reduce the amount of daylight entering a building lit frequently by candles so making it very difficult to see. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. Furthermore, as the building it will replace still has plenty of life in it, demolishing it and starting afresh is a waste of resources.	NO	Public Access website	11-May-24
24/00021/FULEIA	Stone	Marion	Please reconsider your objectionable plans to build a multi storey building on the site of Bury House. The potential detrimental damage to the historic, PRESERVED building of the Bevis Marks Synagogue must be considered. It is a valuable asset to the city of London and its natural surroundings must be remain unspoiled. Thank you	NO	Public Access website	12-May-24
24/00021/FULEIA	Firestone	Noreen	Bevis Mark synagogue is a national treasure. It must not be obscured by a building which will block the natural light. Visitor from all over the world put Bevis Marks top of their list to visit. Please block the plan.	NO	Public Access website	12-May-24
24/00021/FULEIA	Hawk	White	This synagogue is a historic building and relays in natural light. I should remain without any light obstructions to preserve its history and the Jewish heritage in this country.	NO	Public Access website	12-May-24
24/00021/FULEIA	Newman	Jeremy	I find it astonishing that this application is eveb being considered. It would completely overwhelm the adjacent synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance - and not only to the Jewish community, who are under so much pressure at this time. The existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and providing good service for many more years. Unnecessary demolition simply squanders the energy embodied in the building.	NO	Public Access website	12-May-24
24/00021/FULEIA	Cramer BEM	Dalia	Hi I can't believe that this application is even being considered as it will definitely overwhelm this most beautiful synagogue and massively reduce the amount of light that the synagogue and its courtyard need to allow it to be used for important ceremonies and rituals intrinsic to the Jewish faith Please reconsider Ty Dalia Cramer BEM	NO	Public Access website	12-May-24
24/00021/FULEIA	Silver	Justin	I strongly object to this application because the proposed building would impact Bevis Marks Synagogue which relies on natural light for it's spiritual ambiance. Bevis Marks is one of the oldest Synagogues in Europe and is more important communally, spiritually and historically than another new building blotting out the sky from those under it	NO	Public Access website	12-May-24
24/00021/FULEIA	Lewinsohn	Ronald	Historic buildings needs natural light and space and not been hemmed in between skyscrapers. The building is a tourist attraction and important due to age and historical importance With all the work would result in damage to this historic building	NO	Public Access website	12-May-24
24/00021/FULEIA	Phillips	Adrienne	I think an office block of 40 or more storeys in this position is inappropriate so close to a grade 1 listed and historic building. Does London really need another sky scraper and if so maybe it should be situated elsewhere.	NO	Public Access website	12-May-24
24/00021/FULEIA	Musson	Jeremy	I'm writing to express the strongest opposition to this new application (24/00021/FULEIA). I was the co-author of the recent Bevis Marks Synagogue Conservation Plan which helped highlight the extraordinary international signficance of this place, and its importance in London heritage terms. I am shocked and saddened to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. The importance of this building was highlighted in Simon Schama's The Story of the Jews, and justly celebrated by many architectural experts for the quality of its survival. A neighbouring synagogue formerly on Duke's Place was destroyed by bombing. This new application, hardly different since the last time it was submitted and refused, does considerable harm to the heritage value of a Grade-1 listed building, which is now also in a conservation area. Bevis Marks is arguably the most important Jewish site in the UK, as the oldest working synagogue in the country, and its particualt atmosphere and light is a key part of that signficance. The proposed new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the southern sky-view, and overshadow the synagogue and its courtyard, drastically reducing its remaining light. This just should not be permitted just metres from British Jewry's Cathedral synagogue. I urge you to refuse this application.	NO	Public Access website	12-May-24
24/00021/FULEIA	Joseph	Michael	This is a unique and historic place of worship. It reflects positively on the Cityand on tolerance and understanding between faiths,beliefs and different cultures. It is a haven of spiritual values..above money,. It should be respected and allowed to breathe!	NO	Public Access website	12-May-24
24/00021/FULEIA	Tilley	Joe	I am not opposed to redevelopment of the site per se, but I don't think the current plan is very sympathetic to the new conservation area around Aldgate. This is a very tall building, and its presence has the potential to disrupt the views of the Gherkin, which I think is a really excellent example of modern architecture and should be celebrated and protected. At the other end of the spectrum is the historic Bevis Marks synagogue. I understand that, as a building which does not use electric lighting, the proposed tower will severely impact on the amount of light which flows into the building. Whilst I am sure that all faith communities value their building, this one has particular significance as the oldest in the UK and one of the longest used in Europe. It would be a shame if the new building caused the synagogue to become unused. I worry that, coupled with the proposal to demolish part of Liverpool St station and replace that with a modern tower, this part of the City is going to lose its character. Given that we do not have the wide streets and blocks of somewhere like New York, surely it's also pleasanter for people in the existing skyscrapers not to have another building immediately opposite?	NO	Public Access website	12-May-24
24/00021/FULEIA	Sogbodjor	Harriet	This historic synagogue is an important part of London's history and must NOT be demolished. There are other places where new homes can be built without such careless destruction.	NO	Public Access website	12-May-24
24/00021/FULEIA	Treatman	Aharona	This is a historically important building not just for London, but for people all over the world. It is an important tourist destination and part of the heritage of Sephardic Jewry.	NO	Public Access website	12-May-24
24/00021/FULEIA	Ambrose	Jonathan	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	12-May-24

24/00021/FULEIA	Maynard	Esther	The impact the development will have on the Bevis Marks synagogue will be disruptive to the faith community. With it being one of the oldest faith institutions in the ward it would be a travesty if this development would result in it losing its central character.	NO	Public Access website	12-May-24
24/00021/FULEIA	Ambrose	Jonathan	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	12-May-24
24/00021/FULEIA	Roberts	Maralyn	I object to this proposal. Bevis Marks is an extraordinary building with a glorious heritage. This proposal will rob Bevis Marks of natural light as well as towering over this precious piece of the City of London's important heritage. Do not allow this scheme to stand.	NO	Public Access website	12-May-24
24/00021/FULEIA	Lovat	Laurence	Bevis Marks is an iconic landmark in the City of London. It is known throughout the whole Jewish world as it and exceptional historic place of worship. It should not be completely overshadowed by a massive building which will take away from this unique piece of Jewish London heritage.	NO	Public Access website	12-May-24
24/00021/FULEIA	Boonin	Dov	Beis Marks Synagogue is foundational to British Jewish history and British history. This planning application would further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible	NO	Public Access website	12-May-24
24/00021/FULEIA	Wimborne	Zoe	This planning proposal is substantially to the detriment of Bevis Marks synagogue and would remove majority of natural light within its building and overwhelm part of London's cultural heritage. My grandmother grew up in the east end of london and would talk about how important Bevis Marks was when she was growing up, how old it was and how important it was to the local cultural heritage. Allowing this planning permission to go ahead of such a tall building would have such a negative impact when London should be preserving what little is left of such buildings. City of London does not need yet another tall skyscraper and why does it need to be there, impacting an historic religious building and place of worship. The benefits do not come close to outweighing the disadvantages and negative impact it would bring.	NO	Public Access website	12-May-24
24/00021/FULEIA	Altman	Colin	This is essentially a very similar proposal to the one that was submitted in 2020 and should be rejected for the same reason. This huge tower would totally overshadow and obstruct the view of the Grade 1 listed Bevis Marks synagogue, continually in use since its construction in 1700. hemming it in on the only side where it still has access to the light and where the courtyard can still be used for important religious ceremonies requiring access to a view of the sky. Preserving listed buildings such as this also means protecting their context, not simply preventing the demolition of their fabric and making them impossible to be seen and used as they should. Furthermore, the Corporation is required to identify location suitable for tall buildings - not only has this work not yet been completed to allow such a development in the context of an integrated plan for the area, but the site is within the Creechurch conservation area, which specifically excludes such tall constructions. The existing building at 31 Bury Street is only about 40 years old and perfectly capable of renovation and use for many years to come. Complete demolition and replacement is not only unnecessary but produces huge amounts of carbon emissions which completely outweigh the "benefits" disingenuously listed by the applicant, such as being car-free (which the existing building could also be) and exhibiting "holistic environmental design". This application is a well-known developer technique of re-submitting a previously-rejected application with superficial changes in order to pressure the responsible authority into granting totally unmerited approval. It should be rejected.	NO	Public Access website	12-May-24
24/00021/FULEIA	Wurtzel	David	A building of this height and dimension would block the light from Bevis Marks Synagogue and seriously impact on their ability to continue to hold services. Quite apart from its listed status and the fact that this is a conservation area, Bevis Marks is the oldest working synagogue in England the last surviving synagogue in the part of London where Jews first settled in the 17th century. Its significance to the City is obvious. The proposal would also adversely impact on Holland House, another fine listed building. Altogether the proposed building would simply shove something into what someone thinks is an available space regardless of its actual location and its impact on its neighbours. The cynicism of this stands out and says 'any new building can go anywhere regardless'	NO	Public Access website	12-May-24
24/00021/FULEIA	Howe	Anthony	The proposed development, which had already been turned down, is totally unsympathetic to this incredibly important and historic building. Bevis Marks synagogue is significant not only to the City of London but of international importance, and this fact should be respected by any future development that might be proposed. What is planned would cause enormous harm - which can not be justified - and moreover compromise security at a time when many in the Jewish community are feeling the effects of the rise of anti-Semitic activities. The Corporation of London has a responsibility to protect one of the City's hidden jewels and to the community that cherishes it.	NO	Public Access website	12-May-24
24/00021/FULEIA	Stone	Jeremy	I write to object in the strongest possible terms to this brutal and unnecessary development. As many have said, a building on this site and of such dominating height would blot out most natural daylight from the historic synagogue at Bevis Marks, which has the distinction of being the oldest synagogue in Europe still in regular use. I would urge the Corporation to remember that when it previously rejected this development application, the reason was conservation. The location subsequently gained the protection of being included in a conservation area. The Corporation then decided that the relevant protections would no longer include restrictions on height. This is not a good look. It is also not a good moment, historically, for the Corporation to withdraw its protection from the only specifically Jewish religious building in the Square Mile. These are times when the heritage of toleration in this country, and the City most particularly, needs to be reaffirmed, not buried under 48 stories of concrete.	NO	Public Access website	12-May-24
24/00021/FULEIA	Mcclements	Neil	The proposed development is totally out of scale to the district and will greatly diminish and overshadow the Bevis Marks synagogue. The synagogue is unique in the City and worshippers are entitled to unimpeded skylight which the proposed development will greatly and negatively diminish. The congregation are deeply concerned at this,proposal as am I.	NO	Public Access website	12-May-24

24/00021/FULEIA	Gold	Jonathan	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I am a visitor to Bevis Marks Synagogue and am dismayed to see this new proposal, particularly after a similar application was refused two years ago, and also in the light of the recent adoption of the Creechurch Conservation Area. This new application is only very slightly changed from the last submission and therefore should also be refused. It is not in keeping with the conservation of a Grade-1 listed building, now also part of a conservation area. It is the most important Jewish site in the UK and the Heritage and Education Visitor Centre is due to open later this year. Its special history, reminding us of the readmission of the Jewish people to England, must be carefully preserved and not compromised by new developments. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this overwhelmingly inappropriate development send about the City of London and its values and attitude towards the Jewish community's unique heritage to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's flagship synagogue, particularly along its sensitive southern exposure. I strongly urge you to refuse this application.	NO	Public Access website	12-May-24
24/00021/FULEIA	Gottschalk	Sylvia	The proposed building will completely block the light in the synagogue. It will force us to worship in semi-darkness, and even the patio will be overshadowed by this building. As a worshiper of Bevis Marks it would affect me deeply to be forced to pray without any natural light. The proposed building is visually horrendous and no amount of amenities can make up for the harm it would cause synagogue and its congregation.	NO	Public Access website	12-May-24
24/00021/FULEIA	Rodrigues Balbuena	Monique	This is the only synagogue in Europe that has held regular services continuously for over 300 years. It is incredibly valuable as a historical building and as place that holds spiritual and emotional significance for its living religious community in London and its friends all over the world. The building should be protected, not thrown into darkness.	NO	Public Access website	13-May-24
24/00021/FULEIA	Jebreel	Elliot	I am disappointed that this planning application is even being considered when it will overshadow and endanger the most historically significant Synagogue in the UK - which is rightly reflected in its Grade 1 listed status. This application would not have been considered if it was on the doorstep of St Paul's Cathedral. I am a regular at said Synagogue and am a JP sitting on the central bench, bringing me into the city on a regular basis. The proposed building would literally overshadow the synagogue and reduce the already limited sunlight it receives. I am also shocked that it is being considered when it is clearly in conflict with the Creechurch Conservation Area and the statutory duty to not build tall buildings in such an area. All in all whilst the building itself may be designed in an impressive fashion this is clearly the wrong location for it and quite frankly must be rejected.	NO	Public Access website	13-May-24
24/00021/FULEIA	Roberts	Guy	I'm writing to express my strong opposition to this new application (24/00021. I'm appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	13-May-24

24/00021/FULEIA	Isaacs	Tina	I am writing to object to the approved 45 storey tower that will overshadow historic Bevis Marks Synagoge. It would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. Many of us use the Bevis Marks archives to study family history and this development would taint that experience. I cannot understand why planners would allow this development -- if it were St Paul's you wouldn't. It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The proposed building would overshadow the synagogue and its courtyard for much of the day. It would also further reduce the already minimal daylight that penetrates into the synagogue, Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. The proposed building would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole. Tina Isaacs, London resident	NO	Public Access website	13-May-24
24/00021/FULEIA	Eskenzi	Eileen		N/A	Email (attached in DC- received by email file)	13-May-24
24/00021/FULEIA	Haagman	Francine	HI, I object to this proposal. It will have a a very negative impact on Bevis Marks site.	NO	Public Access	13-May-24
24/00021/FULEIA	Blake	Michael	Bevis Marks Synagogue is the oldest synagogue in use in Britain and dates back to 1701. A 48 storey office building was proposed in 2020 following a campaign and the Corporation refused permission in 2022. I understand that the area is designated as a Conservation Area and whilst I appreciate that the Corporation is proposing to scrap the ban on tall buildings surely they must make an exception in this particular case. The synagogue's southern sky view should remain unobstructed and the proposed development would overshadow the synagogue and its courtyard. It would also reduce the already minimul daylight that would severly impact on the Synagogue and increasing artifical light is not really an option. I beg you to decline permission for the project.	NO	Public Access website	13-May-24

24/00021/FULEIA	Milne-Day	Mary	Bevis Marks Synagogue is one of the most important buildings in London and I was delighted when it was included in a Conservation area earlier this year. If this application were to be granted it would make a mockery of the Conservation area and would adversely impact on the setting and secluded nature of the synagogue. The scale of the proposed building would also impact adversely on the other listed buildings within the conservation area. For these reasons I vociferously object to this application.	NO	Public Access website	13-May-24
24/00021/FULEIA	Preston	Jane	Dear Sir/ Madam I am dismayed at this example of overdevelopment.Bevis Marks Synagogue is part of the East End's cultural & religious history and should be protected. Yours faithfully Jane Preston	NO	Public Access website	13-May-24
24/00021/FULEIA	Newman	Martin		N/A	Email (attached in DC- received by email file)	13-May-24
24/00021/FULEIA	Simon	Michael	I object to the re-submitted application. As has been stated by other objectors the proposed 42 storey tower would dominate and overshadow the synagogue depriving it of light and ability to conduct its established religious practices, since its foundation in 1701. Not only does the building have Grade 1 listed status, but it is of enormous significance to the wider British Jewish Community. The founders of this synagogue and the families who still worship at Bevis Marks go back to the Resettlement of 1656. Without question, this synagogue has the most important religious, cultural, heritage, and historical significance above all other places of Jewish worship for Jews in London. The Spanish and Portuguese [S&P] Jewish community would be irretrievably harmed by this proposal. The proposal would overshadow the synagogue and its courtyard to its permanent detriment. In terms of the alleged amenity aspects cited in the proposed application these are quite simply put disingenuous. The so-called benefits are not justified in the context of the harm caused and quite frankly ludicrous. The incredible importance of the heritage aspect of the building for both the S&P Community locally and the wider Jewish community nationally is unrivalled. Regardless of the recent change in City planning by-laws this building must be treated as an exception and protected from the damage caused by the proposal.	NO	Public Access website	13-May-24
24/00021/FULEIA	Amado	Can	The proposed new building will intrude on the Bevis Marks synagogue and its small outside space. This should not be permitted, to preserve the historic nature of these premises. Would such a proposal be even considered next to St Pauls Cathedral? Are more office towers really needed in the City when people are working 2-3 days from the office and the rest from home? City corporation should be more thoughtful in the new reality and allow smart developments instead of another monstrous office block.	NO	Public Access website	13-May-24
24/00021/FULEIA	Mann	John		N/A	Email (attached in DC- received by email file)	13-May-24
24/00021/FULEIA	Filer	Paul	I wish to object to this highly inappropriate development. It is too high and has too great an in impact on important neighbouring buildings, particularly the historic Bevis Marks Synagogue, to be allowed to proceed.	NO	Public Access website	13-May-24
24/00021/FULEIA	BenTzvi	B	This will damage the legacy of Bevis Marks Synagogue nearby and it will irreparable destroy the ambiance and light for this Synagogue Councils should be protecting historical buildings like this not consigning them to historical oblivion Please refuse this planning application	NO	Public Access website	13-May-24
24/00021/FULEIA	Rafaeli	Barbara	The overwhelming numbers of well presented, factual objections against this insensitive, inappropriate building proposal must prevail. As anyone with knowledge of London is aware, Bevis Marks is a Grade 1 Listed Building of great historical value to London and the UK generally and continues as a vibrant heritage to the Jewish Community. It will be an absolute desecration to allow a 42 storey tower, as proposed, to overshadow the synagogue, which has a profound religious and cultural heritage, with important, historic significance. Protecting London's heritage buildings is even more incumbent on Decision Makers in the frenzied onslaught of skyscrapers battering London's historic legacy. Your mission and decision-making is to protect Bevis Marks, like any other valuable religious and heritage building, from this crude, destructive proposal. Your responsibility, as protectors of London's historic legacy, is to REJECT this damaging, insensitive and unacceptable proposal. Thank you, Barbara Rafaeli	NO	Public Access website	13-May-24
24/00021/FULEIA	Dunbar	William	This proposal will overshadow the synagogue, one of the most important in western Europe. This will have a significant negative affect on the historic character of the nighbourhood, as well as cutting out light and ruining views and streetscapes	NO	Public Access website	13-May-24
24/00021/FULEIA	Teeger	Edward		N/A	Email (attached in DC- received by email file)	13-May-24
24/00021/FULEIA	Agustin	Laura	Too much density in this area, less and less light, difficult to stand back and get views of anything.	NO	Public Access	13-May-24
24/00021/FULEIA	Lazarus	John		N/A	Email (attached in DC- received by email file)	13-May-24
24/00021/FULEIA	Drain	John	Yes another attempt to destroy the visual amenity of a listed building.	NO	Public Access	13-May-24
24/00021/FULEIA	Crowne	Ben	As a local resident and member of Bevis Marks Synagogue, I am strongly opposed to this new application (24/00021/FULEIA) and the massively negative impact it would have on the UK's oldest synagogue. The new proposed building would overshadow both the synagogue and the courtyard, permanently impacting its setting and light. It is very disappointing that after plans were rejected in 2022, this application has returned with minimal changes to this aspect of the building. It is even more disappointing that this application has been made with such disregard for the new Conservation Area which was approved only last year, one of whose main purposes was to protect the synagogue from exactly this issue.	NO	Public Access website	13-May-24
24/00021/FULEIA	Lipton	Zachary	I am a devoted member of the Bevis Marks Synagogue community. This project will leave this incredibly important historic building and community in the dark. This building proposal is encroaching on a heritage site and a conservation area and is entirely inappropriate for this space.	NO	Public Access website	13-May-24
24/00021/FULEIA	Castle	Lauren		N/A	Email (attached in DC- received by email file)	13-May-24
24/00021/FULEIA	hajioff	michele	The plan to have a huge tower is wrong and the current building should be left alone. The very high tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of important historic and cultural significance for the Jewish community but also for London in general. We all want our city to progress with its time but not at the detriment of existing historical buildings (and their immediate surroundings) which should be preserved for future generations. Extensive building around this historical place of worship should not be allowed in this case Thank you	NO	Public Access website	13-May-24
24/00021/FULEIA	Wiazel	Michal	The development will distroy a view of a listed building and also overwhelm the synaguogue and its members and guests.	NO	Public Access website	13-May-24

24/00021/FULEIA	Benjamin	Jon	Re application (24/00021/FULEIA): I'd like to express my profound opposition to this application, especially given that an almost identical proposal was rejected just a couple of years ago. The Bevis Marks Synagogue is in the Creechurch Conservation Area, and if this means anything at all, it should be that an overbearing development like this is not allowed. The Synagogue is an immensely important place of worship for the Jewish Community, marking its return to England after being expelled in 1290, having previously lived in the City of London. The Spanish and Portuguese Community came from Amsterdam, where I visited recently, and where the Jewish quarter is protected and valued. It would be to the City of London's shame if the oldest synagogue in continuous use in this country was desecrated in this way. Blotting out the last remaining square of sky visible from the precincts of Bevis Marks, the building itself would be rendered immeasurably more gloomy, given the lack of electric light, as well as making the courtyard overcast, preventing the viewing of the moon and stars which indicated the onset of the Sabbath and Festivals. Bevis Marks is also an important landmark for the wider community in this country, hence its listed status, but it would be hard to imagine such an impactful development being allowed next to St Paul's Cathedral where the surrounding buildings have been purposely limited in height. I hope and trust that, as previously, this application will be refused.	NO	Public Access website	13-May-24
24/00021/FULEIA	Pereira-Mendoza	L	Ambience is so important in all buildings but especially in historic religious buildings. A vault with bright sunshine is wrong. A building without sunshine is wrong. Please do not ruin the ambience of Bevis Marks, a synagogue built numerous years ago and used continuously. Consider neighbours always.	NO	Public Access website	13-May-24
24/00021/FULEIA	Knight	Marie-Anne	I object to this proposal 24/00021/FULEIA going ahead and destroying yet more of the history of this wonderful area. I understand that this proposal was rejected before, and should be rejected again. This is a very important building of historical note (built in 1701) and of incredible importance to the Jewish population. Our historical buildings should be protected at all costs and I am angered at how many of them in the City of London and adjacent East End that are being destroyed when dollar signs are in the eyes. Is Bevis Marks not a Grade 1 listed building? Please see sense and stop this nonsense before it is too late and we lose everything of importance for our future generations.	NO	Public Access website	13-May-24
24/00021/FULEIA	Englender	Daniel	The City of London has a unique history and it's at a cross-roads in terms of how it balances its history alongside 21st Century development (and beyond). The erection of this tower alongside the very special Bevis Marks Synagogue is the wrong move, the wrong location for this tower and only serves to reduce the qualities that City of London shines onto the world. Similar schemes have been rejected previously and this new scheme does not take each of the previously-upheld objections in a positive way.	NO	Public Access website	13-May-24
24/00021/FULEIA	Bogod	Howard	I am dismayed to see that yet a again the owners of the Bury House are seeking permission for an inappropriate development despite having had two substantially applications turned down before. The proposed development would seriously damage the environment and light an the Grade 1 listed Bevis Marks synagogue which was opened in 1701 and used for religious services continuously ever since. This was 9 years before the rebuilt St Pauls cathedral was opened. How would a a similar application in the shadow of St Pauls be viewed by the Corporation and public at large? I for one would object.	NO	Public Access website	13-May-24
24/00021/FULEIA	Robinson	Brian	We am appalled at the repeated applications to diminish the importance of the Bevis Marks Synagogue. Having successfully and sensibly rejected previous plans to build high rise buildings to dwarf and diminish the most important and oldest synagogue in the United synagogue the City of London must oppose the new application. and indeed any further attempts to do so. . I hope this can be accomplished speedily and permanantly. Dr and Mrs Brian and Judith Robinson	NO	Public Access website	13-May-24
24/00021/FULEIA	Hale	Alastair	These proposals would negatively impact the Bevis Marks Synagogue, overshadowing the building and restricting the community as they seek to practice their faith. The city of London must support its faith communities, recognizing the role they have played and will play in making the city what it is. Granting this planning permission in its current form would put the interests of investors ahead of the community.	NO	Public Access website	13-May-24
24/00021/FULEIA	Barker	Neil	I write to express my strong opposition to this application I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure.. Please refuse this application.	NO	Public Access website	13-May-24
24/00021/FULEIA	Nacamuli	Alec	This development will totally surround the Bevis Marks Synagogue, the oldest continuously used synagogue in the UK, with high-rise buildings. It will obstruct the last remaining opening towards the sky and cast the synagogue in permanent shadow.	NO	Public Access website	13-May-24
24/00021/FULEIA	Goldschmidt	Robert	Although I now live outside the City I was educated and work within it. I have always valued the presence of the Bevis Marks synagogue. There is no other place in the UK which so reflects Anglo Jewry's connection to this country. The planning proposal will hugely blight this and overwhelm it, changing the nature of how the synagogue is used and forever impacting on our relationship with it. Please refuse this application.	NO	Public Access website	13-May-24
24/00021/FULEIA	Black	Michael	I am a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after the refusal of a very similar one just two years ago, and the recent adoption of the Creechurch Conservation Area. The new application, barely changed since the last time it was submitted, is not in keeping with the conservation of Bevis Marks Synagogue, a Grade-1 listed building, which is now within the Conservation Area. This seventeenth-century synagogue and its soon to open education center in the precinct, is the most important Jewish site in the United Kingdom and a jewel in the crown of world Jewish heritage and the Sephardi tradition of which I am part. The proposed tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, diminishing its remaining light. By allowing this disproportionate and damaging structure, what message about the City of London and its values would be given to hundreds of thousands of visitors, including school children, from across the World? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern side. I am also concerned by the statements of some of the supporters of this project which seem to dismiss the importance of minority religious practice in this country in favour of iconic architecture. The planning application is completely unacceptable, and I urge you to refuse it.	NO	Public Access website	13-May-24

24/00021/FULEIA	Hughes	Stephen	As a former head of religious buildings survey in Wales and vice-president of ICOMOS-UK I recognise the importance of maintaining a low rise context to one of the most important religious buildings in the UK, the Bevis Marks Synagogue.	NO	Public Access website	13-May-24
24/00021/FULEIA	Jacobson	David	I wish to register my objection to this planning application on the following grounds: 1. The proposed tower of gross dimensions will completely overwhelm a grade one listed building in a conservation area. The said listed building, the Bevis Marks Synagogue, is a historic monument of unique national and international importance that I am objecting. to this monstrous development. 2. It would obliterate the southern sky view, which is an essential part of setting part of the synagogue, a congregational building, which relies on natural light and will impair regular religious services and other gatherings which take place there, especially in winter when natural light is of a premium. 3. The deep excavations for the 4 basement storeys will inevitably threaten the stability of the 325 year old synagogue, which was built with relatively shallow and much less secure foundations. 4. The execution of this huge project and associated excavation and drilling operations will cause untold noise, dust, vibrations over an extended timescale that will inevitably cause untold disturbance to and pollution of the rites, solemnities and ceremonies taking place in the neighbouring historic building. It is as a qualified chartered engineer, architectural and social historian, British citizen, resident of London, and member of the Jewish community that I lodge this objection.	NO	Public Access website	13-May-24
24/00021/FULEIA	Furnell	Alison	This beautiful historic building is a testament to the traditions and long history of Ango Jewry. I am deeply saddened to hear that Bevis Marks Synagogue is once again under threat of being overshadowed by City of London unsympathetic high rise architecture. Yet another symbol of the erasure of Jewish life in England.	NO	Public Access website	13-May-24
24/00021/FULEIA	Herskovits	Georgie	I object	NO	Public Access	13-May-24
24/00021/FULEIA	Davila y Verdin	Juan	I object the construction of new buildings of that size in this historical area of the city of London, due to the fact that compromises the integrity of other buildings in the area, in particular of the synagogue next door.	NO	Public Access website	13-May-24
24/00021/FULEIA	Maleh	Maurice	Bevis Marks is a unique synagogue of major significance to the Jewish Community. It is in regular use and I myself has worshiped there. To chose to build a 43 storey skyscraper for offices next to it leaves me quite shocked and dismayed at what is a serious lack of judgement and understanding by those involved. The application as a whole has no merit and must be rejected at all costs. Thank you.	NO	Public Access website	13-May-24
24/00021/FULEIA	Davis	Rina	Lack of light to the synagogue	NO	Public Access	13-May-24
24/00021/FULEIA	silverbeck-setti	sima	I object to this scheme as will compromise the oldest listed synagogue in London by making it dark.	NO	Public Access	13-May-24
24/00021/FULEIA	Livingstone	Elly	The proposed structure would overwhelm and block out of site the Bevis Marks Synagogue, a Grade 1 Listed building of enormous historic significance. It would destroy the southern sky view and overshadow the synagogue and its courtyard. The proposed development is a monstrosity, the proposed benefits do not stand up to scrutiny.	NO	Public Access website	13-May-24
24/00021/FULEIA	Glickman	Lucy	but its place in our Jewish narrative matters. Synagogues around the world tell the Diaspora story and keep it alive. The proposed planning would block light. The proposal is wholly inappropriate" and an obscenity which would result in "significant reduction in sunlight.	NO	Public Access website	13-May-24
24/00021/FULEIA	helfgott	maurice	Bevis Marks Synagogue is a unique , historic and vital important, British - Global - London cultural, historical and religious landmark. the "St Paul's " of London Jewry it simply should NOT be overshadowed by this enormous building. I have visited Bevis Marks to pray , to grieve , to celebrate , to learn and to mix with people of all faiths and none. please please please do NOT overshadow this extraordinary and special place...	NO	Public Access website	13-May-24
24/00021/FULEIA	Glantz	Nikki	This is an historic religious site and in any other country it would not be a consideration to demolish it and build flats or other on it! I oppose this. My cousin got married here and is one of the oldest synagogues in the UK. PLEASE OPPOSE THIS	NO	Public Access website	13-May-24
24/00021/FULEIA	Preter	Daniel	I object to this project, which will have an enormous negative impact on its surroundings	NO	Public Access	13-May-24
24/00021/FULEIA	El Baz	Freya	We must preserve this stunning building of importance to both our local communities and the City of London. I OBJECT	NO	Public Access website	13-May-24
24/00021/FULEIA	Simmons	Dame Melinda	This proposed development should not be approved. It presents a direct threat to Bevis Marks synagogue, a building in use for community prayer which also represents Jewish history in the UK over centuries. This development is going to block out light in the building rendering it musty and unusable. It is an assault on community and on Jewish as well as British history in the City of London.	NO	Public Access website	13-May-24
24/00021/FULEIA	Bloom	Hannah	Bevis Marks Synagogue has been used for over 300 years and this plan would make it unusable. Please do not do away with this heritage site which is iconic to the British Jewish community. It is an integral part of the City life.	NO	Public Access website	13-May-24
24/00021/FULEIA	Glantz	Jacob	I object	NO	Public Access	13-May-24
24/00021/FULEIA	Shock	Katherine	London, where I was born, and which I dearly love, has already lost so much of its grace and character as huge and disporportionate blocks have arisen to dwarf the precious historical buildings. If it is possible to save one more special place from being spoiled forever by an inappropriate building rising to darken the area and spoil what little is left of our heritage you have my voice objecting to this new application. My illustrations for the book 'That Mighty Heart -Visions of London' were produced as a homage to this special city. Please keep it special.	NO	Public Access website	13-May-24
24/00021/FULEIA	Proner	Barry	This proposal will grossly detract from the magnificent and historic Bevis Marks Synagogue. It is an example of greed over public interest.	NO	Public Access website	13-May-24
24/00021/FULEIA	BERNSTEIN	Shira	The tower proposed on the synagogue's southern horizon would destroy the setting of the synagogue, which is so important to this 300 year old cathedral. The setting is what makes the synagogue a community hub, and the would reduce the synagogue's natural light levels beyond usability.	NO	Public Access website	13-May-24
24/00021/FULEIA	Molvidsson	Kay	This is a historic building and part of the Jewish heritage of the Jewish community in London. It would be so sad to lose this. Please re-consider and take into account the whole Jewish community in london that will be affected and deeply saddened to see this rich part of our culture be no longer available.	NO	Public Access website	13-May-24
24/00021/FULEIA	El baz	Shu	This building has so much importance. I object	NO	Public Access	13-May-24
24/00021/FULEIA	Sixou	Linda	I live outside England but am a regular visitor to London and Bevis Marks Synagogue and I am very sad to see this new proposal. I understand this follows the refusal of a very similar application a couple of years ago which is even more surprising, especially with the recent Creechurch Conservation Area coming into being. The new application is still not in keeping with the protection of a Grade-1 listed building such as Bevis Marks and even more perplexing for me as the synagogue is now in a conservation area. The seventeenth century synagogue and its new education center within, is the most important Jewish historical site in the United Kingdom and emblematic of the Sephardi tradition and my heritage. The proposed tower, to the synagogue's immediate south, would dominate the protected setting of the Synagogue, block out the southern sky-view of religious importance for centuries and overshadow the Synagogue and its courtyard, all but stopping the remaining light. As a teacher of Spanish and Sephardic Culture in France, it amazes me that the City of London could even consider permitting this ugly building. This proposal would never be considered within the vicinity of any European cathedral and should certainly not be permitted just meters from British Jewry's 'Cathedral synagogue' - it is quite unbelievable. Therefore, I say this planning application is quite unacceptable and must be refused.	NO	Public Access website	13-May-24

24/00021/FULEIA	Benhamou	Tristan	I am writing today to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	13-May-24
24/00021/FULEIA	Weiner	Howie	I have visited Bevis Marks on several occasions due to its cultural and religious importance. It is a beautiful building flooded with natural light as it was designed to do. The construction of a 45 storey tower block next door would no doubt starve the building of natural light. Plus, the building has no electricity and is a Grade I listed building. The fact that the synagogue is still used by its community is even more concerning as it is the only synagogue in the City of London. Bevis Marks should be afforded the same protections as other religious buildings of a similar period, such as St Pauls. Please reconsider plans to build next door to this important place of worship.	NO	Public Access website	13-May-24
24/00021/FULEIA	Robinson	Jessica	I object based on the huge cultural and historical importance of this building to the Jewish and wider community	NO	Public Access website	13-May-24
24/00021/FULEIA	Wrightman	L	This would be terrible	NO	Public Access	13-May-24
24/00021/FULEIA	Roberts	James	The proposal would negatively impact the life of the community at the Bevis Marks Synagogue. It would harm the setting of an extremely important, historic building. It would also negatively impact the worshipping life of this community - the only synagogue in the city of London.	NO	Public Access website	13-May-24
24/00021/FULEIA	Lopez-Salzedo	Shelley	I object	NO	Public Access	13-May-24
24/00021/FULEIA	Yardley	Tracey	I object to this new development damaging as the height and bulk of this 43 storey tower block will dwarf, over-shadow and seriously impair forevermore the present narrow sphere of natural sky entering the courtyard of Bevis Marks synagogue. Lighting is conducive and central to those wishing to pray in a house of worship. In the case of Bevis Marks Synagogue - it basically relies on that existing shadow of daylight and candle light within this house of prayer.	NO	Public Access website	13-May-24
24/00021/FULEIA	Kuttner	Stuart	In years ahead approval of this proposal will be seen as a dreadful, irreversible mistake. Sometimes there must be room for the historic, beautiful and spiritual. This is one of those occasions. In recent years the City I cherish has changed much. Please do not overwhelm the unique Bevis Marks Synagogue which has enriched the City of London for centuries. Stuart Kuttner	NO	Public Access website	13-May-24
24/00021/FULEIA	Mortiaux	Vanessa	Please keep this historical worship place with all the light it deserves.	NO	Public Access	13-May-24
24/00021/FULEIA	Korczyn	Iris	This is a heritage place with historical, current and cultural importance	NO	Public Access	13-May-24
24/00021/FULEIA	Mana-Stein	Galit	I object to this planning.	NO	Public Access	13-May-24
24/00021/FULEIA	Fishman	Rebecca	It is important to show respect to this Jewish place of worship and to the community well as show the deference to this historical site.	NO	Public Access website	13-May-24
24/00021/FULEIA	Howard	Laura	Historic building that should not be knocked down	NO	Public Access	13-May-24
24/00021/FULEIA	Fishman	Oliver	It is completely disrespectful and inappropriate to have this tower block built next to such an important synagogue. The huge nature of the building will affect the light in the synagogue and the important connection to the sky that a synagogue should have. It is a hugely important historical and religious building and the proposed block is out of keeping and completely inappropriate to have in that location	NO	Public Access website	13-May-24
24/00021/FULEIA	Ledermann	Dan	This development will be hugely detrimental to Bevis Marks synagogue which has a profound cultural and historical significance for London (both its residents and visiting tourists).	NO	Public Access website	13-May-24
24/00021/FULEIA	Krigman	Eliza	I object! I can't believe London would consider harming this historic Jewish synagogue. I'm appalled! You must preserve the synagogue	NO	Public Access website	13-May-24
24/00021/FULEIA	Szotten	Ruth	I object to this building as it will negatively impact surrounding buildings particularly the beautiful Bevis Marks synagogue	NO	Public Access website	13-May-24
24/00021/FULEIA	Hall	Sasha	I object to the destruction of this building	NO	Public Access	13-May-24
24/00021/FULEIA	Andreacchi	Gracy	This development would seriously degrade the character of the adjacent Bevis Marks Synagogue, actually the oldest and most historic synagogue in the country. Bevis Marks is of unique importance, not only as an architectural gem, but also as a repository of the collective history and identity of British Jewry. The proposed development will significantly impact the synagogue, cutting off light and air, and overwhelming the ancient building which is already hemmed in by so many large modern buildings. It will also hinder the actual practice of religious rites by blotting out the sky, which shows a shameful disrespect for the free practice of religion. It's of the utmost importance, both to the Jewish community and to the history of Britain, that Bevis Marks retain its original character and not be further impinged by this development. I urge you to reject this development. Thank you for your attention.	NO	Public Access website	13-May-24
24/00021/FULEIA	Sgnaolin	Yoav	The existing building at 31 Bury Street is only 40 years old and is capable of being refurbished and providing good service for many more years. Unnecessary demolition simply squanders the energy embodied in the building. It would also damage the setting of other heritage assets in the local area, and would compromise the qualities of the Conservation Area as a whole. The City Corporation is being disingenuous: claiming to recognise the importance of the synagogue, yet simultaneously facilitating this monstrous development. We are entitled to expect much higher standards from Britain's most prestigious local authority. As it's been only 2 years or so since a previous development was blocked, so what has changed since?	NO	Public Access website	13-May-24
24/00021/FULEIA	Abramowitz	David	The synagogue should not be over shadowed and be void of natural light	NO	Public Access	13-May-24
24/00021/FULEIA	Cohen	Eran	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. This is a singular building in the entire country, the developers failed before and they're only trying again now because they think they can get away with it while the Jewish community is focused on the war on Gaza.	NO	Public Access website	13-May-24
24/00021/FULEIA	Tanaman	Ruth	The planned tower block would destroy the light in thi old preserved building which would dstroy the character of the worship, being unable to view the sky through the windows, an important part of the services.	NO	Public Access website	13-May-24
24/00021/FULEIA	Preter	Elizabeth	This is irresponsible planning so close to a grade 1 listed historic synagogue, the oldest one in Britain. The height of the building will overshadow the synagogue blocking all light and creating 4 storeys underground threatens the structures of all buildings around it including this listed building. It shouldn't be allowed.	NO	Public Access website	13-May-24
24/00021/FULEIA	Zweig	Michal	Bevis Marks is a listed building which is lit by candles, such a building would block the light from entering the building and make using the synagogue difficult, because Bevis Marks is a listed building and due to the building's historic nature, it is not possible to install electric lighting. It would be inconceivable that such a building were to be built by St. Paul's cathedral, it's unfair that this old synagogue of very great cultural significance, both to Britain and Jews world wide, isn't given the same protection. The building will overshadow the courtyard of the synagogue, reducing its usability for ritual. None of the so-called benefits the developers say they will be providing to offset the negative impact of the building provide anything to the community, nor offset the benefit. The development is within Creechurch Conservation Area; current planning policy doesn't allow such tall buildings in this area. The building blocking celestial bodies, such as the moon, would also make it difficult to engage in Jewish rituals such as the blessing of the new moon and knowing prayer times by the positioning of the sun.	NO	Public Access website	13-May-24
24/00021/FULEIA	Lanceman	Stuart	This would be a travesty against our heritage and multi culturalism of the City of London. People come from all over the world to visit this place and we don't need it plunged into darkness.	NO	Public Access website	13-May-24

24/00021/FULEIA	Lanceman	Stuart	This would be a travesty against our heritage and multi culturalism of the City of London. People come from all over the world to visit this place and we don't need it plunged into darkness.	NO	Public Access website	13-May-24
24/00021/FULEIA	Katz	Sara	This is a fantastic building of British heritage and it would be simply horrible to knock it down!!	NO	Public Access	13-May-24
24/00021/FULEIA	Smouha	Lucy	I strongly object to this application which threatens the oldest synagogue in the Uk	NO	Public Access	13-May-24

I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. My family have been associated with the community for many generations. My late Great Uncle Joshua Cansino is on the memorial board for those killed in the First World War. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this appalling building send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. Bevis Marks is a special and historical building in London and should not be obliterated by new buildings. I urge you to refuse this application.	NO	Public Access website	13-May-24
24/00021/FULEIA	Howard	Angela	I object as this building is of significant cultural interest	NO	Public Access	13-May-24
24/00021/FULEIA	May	Kathryn	A 45 storey tower would completely overwhelm Bevis Marks synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. City planners....where are you?	NO	Public Access website	13-May-24
24/00021/FULEIA	Schonfield	Tamar	The building proposed will overshadow the synagogue. The process of building will create noise and dust for a long period, damaging the spiritual experience of synagogue users. If the current building is no longer useful, a small open space or playground can replace it for the benefit of the local community as well as families attending the synagogue.	NO	Public Access website	13-May-24
24/00021/FULEIA	Cohen	Sarah	This is unbelievable to remove the light of the historical synagogue. This light is needed for the workships. This is part of the life of the city and would be so detrimental to the history of the city.	NO	Public Access website	13-May-24
24/00021/FULEIA	May	Spencer	As a grandson of a member of Bevis Marks, Britain's Oldest Jewish Place of Worship, it is very saddening to learn of a proposal for a 45 Story Tower in such close proximity. As Bevis Marks has kept true to the old ways, they still observe candle lighting and blocking all the natural light would be a devastating tragedy.	NO	Public Access website	13-May-24
24/00021/FULEIA	Barnett	Celia	I strongly object to this proposal. Having restored the etched glass in the windows behind the Ark following the IRA bombing in 1992 I have experience and a connection to the history of the building and a commitment to maintaining its special character and ambiance much emanating from the natural light it receives. The loss of this would be detrimental and unacceptable. My family having been members of the community since it's foundation	NO	Public Access website	13-May-24
24/00021/FULEIA	Joffe	Debbie	OBJECT! this should be a listed building and protected	NO	Public Access	13-May-24
24/00021/FULEIA	Rose	Kalina	The synagogue is of enormous cultural and religious importance, already considerably overshadowed by surrounding buildings, and cannot install additional lighting, even if desired, due to its historic nature. Further darkness would severely degrade the site, both as a cultural icon and as an active house of worship. It's a jewel, it's the only Sephardic synagogue anywhere near the City (the next nearest is in Marble Arch, there is nothing to the East, unless you count the ones in France), and to repeatedly chip away at it in this manner is cultural vandalism, frankly. This proposal is within the Creechurch Conservation Area. Tall buildings are meant to be forbidden, and it's disappointing to have to keep objecting every few years, when another developer wants to have a go - this process needs to be improved.	NO	Public Access website	13-May-24
24/00021/FULEIA	Speyer	Lawrence	The building proposed blocks out daylight and substantially overshadows Bevis Marks synagogue. This is a building of great and religious importance that is in constant daily use still for its original purpose as a place of worship. And it serves a community which my family have been part of for generations - my grandparents and their parents were members, my parents were married there. The plan for the building proposed was already rejected two years ago , there is no reason now to go back on that decision.	NO	Public Access website	13-May-24
24/00021/FULEIA	Wacks	Jude	A development of on this scale would dwarf a historic landmark that has Ment so much to me and my family. As worshippers for all of my life at Bevis Mark's, the disruption on this scale, not to mention, increase of noise, lack of light and other impacts would be devistating for this historic sight that charts my personal heritage and that of the wider Jewish Community in London	NO	Public Access website	13-May-24
24/00021/FULEIA	Green	Miriam	Please preserve this historic and culturally significant building.	NO	Public Access	14-May-24
24/00021/FULEIA	Ruback	Greg	This is a gross over development of the site and will have a significant negative impact on local communities in this area, including, importantly the 300 year old Bevis Marks synagogue which will be left in near perpetual shade.	NO	Public Access website	14-May-24
24/00021/FULEIA	Reynolds	Marie	This development will result in the blocking out of virtually all natural light to the historic Bevis Marks synagogue. It will also completely obscure the view of the sky, stars and moon, the viewing of which is critical to Jewish religious and worship practices. The building of a skyscraper at 34 Bury St also seems in contravention of the area's Conservation status.	NO	Public Access website	14-May-24
24/00021/FULEIA	Appel	Cheryl	To the Planning Commision: I am writing to let you know how valuable the Bevis Marks Synagogue is to me and my heritage, and to express my sadness and frustration that there is once again an application (24/00021/FULEIA) to build around this historical landmark. The proposed application is for a building so high that the sun and the stars would no longer be a part of the experience for the synagogue's members and guests, not to mention those tourists from the local and worldwide community who view the synagogue as a vital link to a vast and rich culture. Sephardic Jews are a minority of the Jewish people, and have endured the Holocaust and the Inquisition, as well as persecution at the hands of their neighbors. Yet there is a dynamic community here, and they deserve to grow and prosper in their sacred space, without being surrounded and diminished by a mega-structure that could be built elsewhere. I hope that I can count on you to reject this application. Sincerely, Cheryl Appel	NO	Public Access website	14-May-24
24/00021/FULEIA	Strum	Daniel	As a historian specialized on early modern history, I object the damage to the historic building of the Bevis Mark synagogue .	NO	Public Access website	14-May-24
24/00021/FULEIA	Bloomfield	Louise	I object, Bevis Marks synagogue must be protected	NO	Public Access	14-May-24
24/00021/FULEIA	Seplowitz	Harry	Strongly object due to adverse impact on nearby synagogue	NO	Public Access	14-May-24
24/00021/FULEIA	Katz	Joanna	I wish to object because the proposed new building should not be allowed to proceed as it clearly impinges on the exciting cultural, historical and religious site.	NO	Public Access website	14-May-24
24/00021/FULEIA	Appleson	Karen	This is the most beautiful building with significant meaning for the Jewish people of London. To demolish it would be horrendous. The historic building needs to be preserved	NO	Public Access website	14-May-24

24/00021/FULEIA	Pearson	Taryn	This is part of UK history. Jewish history. It holds stories of past generations and is still in use today.	NO	Public Access	14-May-24
24/00021/FULEIA	Carr	Kim	I object. This should not be allowed to happen	NO	Public Access	14-May-24
24/00021/FULEIA	Lobel	Vered	I object	NO	Public Access	14-May-24
24/00021/FULEIA	Msika	Emmanuelle	I object	NO	Public Access	14-May-24
24/00021/FULEIA	Ellis	Linda	This Synagogue is a national treasure. Part of the history of Britain.	NO	Public Access	14-May-24
24/00021/FULEIA	Kaye	Lesley	Historical and cultural importance and value	NO	Public Access	14-May-24
24/00021/FULEIA	Levene	Sara	This proposal is incredibly insensitive to the Jewish community. Build a tower so close to the oldest synagogue. Please reconsider, there sre already enough tall buildings in the area.	NO	Public Access website	14-May-24
24/00021/FULEIA	Cohen	Ellen	Too much history to lose. Wonderful building	NO	Public Access	14-May-24
24/00021/FULEIA	Sacks	Deborah	Bevis Marks is extremely important to the British Jewish community. It is far and away the most beautiful synagogue we have and an important part of our heritage. Although I am Ashkenazi, I have a personal connection: my sister was married there and my niece had a baby blessing there. The synagogue should not be compromised by a new development.	NO	Public Access website	14-May-24
24/00021/FULEIA	Tanaman	Baruch	Damage to environment of a protected area including right of light to a special synagogue, only one of its kind, which has been in operation for over 300 years continuosly.	NO	Public Access website	14-May-24
24/00021/FULEIA	Brown	Joshua	Bevis Marks Synagogue is a critical part of the history of Anglo Jewery. The building, which is Grade 1 listed, has been in continuous service for 300 years and hosted my wedding earlier this year. The ceremony was truly magical and the history of the building was tangible. Due to its age and grading, however, there is limited electricity and therefore light in the building. A number of tall buildings already around the site have degraded the light quality. I fear that this application would further degrade the light quality and therefore atmosphere of the building.	NO	Public Access website	14-May-24
24/00021/FULEIA	Hougie	Jacob	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am genuinely shocked to see the developers repeat this rouse. This is one of the most important buildings for both our community and for the heritage of the country. This new skyscraper would represent the manner in which this country has come to worship capitalism as a false idol, symbolically blocking out the sun from a synagogue. It is for exactly this reason that the sight lines of St Paul's are legally protected, yet for Bevis Marks developers bring such Chutzpah as to block out all the sun that remains.	NO	Public Access website	14-May-24
24/00021/FULEIA	Kliman	Sonia	This historic synagogue has stood on this site since the 1700's, one of the oldest in the UK. It is still in regular use today. The proposed development will affect the light and intrinsic aesthetic of this beautiful building. Surely with a bit of forethought the proposed development could be ammended to preserve the enjoyment and aesthetic of Bevis Marks Synagogue for future generations. Those who built this synagogue those who came before them and their descendants contributed in major ways to the prosperity of The City of London and beyond. Is this how their historic place of worship should be treated? I hope and pray that you can see your way to accommodating the needs if the synagogue and its members and visitors for future generations to enjoy. Would you allow other historic places of worship, eg Westminster Abbey or St Paul's cathedral to be so desecrated in the way prposed by the external developers? I should also point out that the Ashkenazi synagogue, Dukes Place, was destroyed by enemy fire in WW2. It was very near Bevis Marks, as can be seen by the blue plaque on the wall. It was a similar age. So Bevis Marks is the only one remaining! Please do not allow it's precious character to be destroyed.	NO	Public Access website	14-May-24
24/00021/FULEIA	Wolfe	Laura	I object.	NO	Public Access	14-May-24
24/00021/FULEIA	Stone	Judith	This development will overshadow Bevis Marks Synagogue to its detriment. This is an historic building and the community should not be deprived light within it.	NO	Public Access website	14-May-24
24/00021/FULEIA	Barnett	Robert	I am a member of family that has been part of the the Bevis Marks congregation for many decades. The synagogue is the core part of our heritage as a community, the abiding centre of our activities and memories. It is of immense importance to the cultural history and diversity of Britain, as well as of London and the City, and a foundational element of the Anglo-Jewish community. I object to this planning proposal on the following grounds: 1. It will further obstruct the already severely limited light available to the synagogue. 2. It will significantly increase shadow and obscure the space and view from the courtyard of the synagogue. 3. It will signfiicantly increase the existing crowding and physical marginalisation of the synagogue, contributing to the perception that it is of marginal or little value or significance to the City and its community. 4. It will create major disturbance during demolition and construction for an extended period of time, in total contradiction to the aims and purposes of the synagogue. 5. It will encourage the wastage on a massive scale of energy source and materials in the process of demolition and reconstruction. 6. It will add nothing of architectural or aesthetic significance to the City of London or its skyline except repetition of what is already there, and is extremely unlikely to last for even one quarter of the time the synagogue has lasted and been of value. 7. It will not be considered of aesthetic or historic value to the City in 50 or so years, unlike the synagogue. 8. It brings no additional value to the city apart from enabling developers to make further profits. 9. Renovation of existing buildings with aesthetic and historic value would prove to be of much greater longterm benefit to the community and the City. 9. The need for further office and retail space in this area is not apparent to me; even if it does attract users, they would likely be drawn from an existing building in the City. I object to the proposal.	NO	Public Access website	14-May-24
24/00021/FULEIA	Hilton	Michael		N/A	Email (attached in DC- received by email file)	14-May-24
24/00021/FULEIA	Aslet	William	Towering over Britain's most historic -- and arguably its most important -- site of Jewish worship, this proposed scheme is an act of cultural vandalism that would bring shame to the City Corporation. It would block out light to the Synagogue, make the courtyard outside it feel cramped and oppressive, and would doubtless soon be followed by further skyscrapers that would do further damage to the setting of this Grade I-listed building. As an architectural historian of eighteenth-century British architecture, I am keenly aware of the importance of this building not only in Britain's Jewish story, but also in the history of its architecture. With few changes made to it in the more than three centuries since it was built, it is arguably the best-preserved eighteenth-century religious building in the whole country. And the setting of the Synagogue -- in an open courtyard set back from the street that allows for the provision of light in the building -- is absolutely integral to understanding its architecture. To allow the construction of this new building would do irreparable harm to this setting by blocking out its provision of light, as well as making it feel cramped, and in so doing would cause lasting damage to our understanding of this hugely important building.	NO	Public Access website	14-May-24
24/00021/FULEIA	Swaythling	Alistair	This poses a serious risk to the viability of the historic Bevis Marks synagogue. Please ensure this does not go ahead under any circumstances as it threatens one of Britain's most historic buildings.	NO	Public Access website	14-May-24
24/00021/FULEIA	Hyman	Neil	The proposed Bury Street development can only be justified in terms of short-term financial gain, set against a permanent intrusion into more than 300 years of worship at the Bevis Marks Synagogue, damage to the unique architectural scheme of Holland House and an insult to the intentions of the Creechurch Conservation Area. Elsewhere in the City, superficially at least, the mix of historic and large-scale modern buildings works well. But these are times when vast commercial developments have a relevance and purpose. My concerns are that the long-standing cultural importance of Bevis Marks and Holland House will be compromised in the here and now and that the whole City environment is being altered in ways that will be redundant and practically irremediable in just a few generations' time. Please reject the current proposal.	NO	Public Access website	14-May-24

24/00021/FULEIA	Gold	Jessica	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of the Spanish and Portuguese congregation and our family has celebrated weddings etc at Bevis Marks Synagogue and i am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. This is especially concerning at a time when the Jewish community is feeling so vulnerable . I urge you to refuse this application. Kind regards Jessica Gold	NO	Public Access website	14-May-24
24/00021/FULEIA	Obadia	Anne	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of the Spanish and Portuguese congregation and our family has celebrated weddings etc at Bevis Marks Synagogue and i am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? In all my 85 years I would not have expected that such a thing could even be considered. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. This is especially concerning at a time when the Jewish community is feeling so vulnerable . Please refuse this application. Kind regards Anne Obadia	NO	Public Access website	14-May-24
24/00021/FULEIA	Levi	Albert	This will destroy the historic character of the synagogue putting it in total darkness and the authentic nature of its being lit by candles.	NO	Public Access website	14-May-24
24/00021/FULEIA	Scott- Norman	Anthony	This is a conservation area and to overshadow this building of cultural religious and historic value would be barbaric and an insult to the current Jewish congregation and to all people with a family connection to it including myself . It was built in 1701 and should outlast all modern office building skyscrapers of no value whatsoever .The synagogue is a Grade 1 building and its southern view of ritual importance would be destroyed . Have some respect please! The synagogue would be largely overshadowed with its courtyard for much of the day making it useless for weddings, funerals and other major events. Why demolish 31 Bury Street rather than improve it .?Why take our precious daylight away ? Please rethink	NO	Public Access website	14-May-24
24/00021/FULEIA	Miller	Abigail	This will completely overwhelm Bevis Marks which is the oldest continued-use synagogue in Europe and a site of national historical importance. I highly object to the application of building the proposed structures.	NO	Public Access website	14-May-24
24/00021/FULEIA	Walden	Sam	This development impinges upon and damages the historic setting and fabric of the building of Bevis Marks Synagogue, which is hugely important in the story of British Jewry.	NO	Public Access website	14-May-24
24/00021/FULEIA	Bowers	Liz	Bevis Marks is way more than just a synagogue, it's a living monument to the remarkable success story that is Anglo-Jewry. It sits in the heart of the city of London, thriving in the face of adversity. It's been holding services continuously for over 300 years - even through the Blitz. It is the embodiment of a community that arrived as refugees, fleeing persecution and nevertheless established itself in the heart of British life. Its stability is our stability and we need it now more than ever.	NO	Public Access website	14-May-24
24/00021/FULEIA	Evans	Judy	My objection to this planning application is in relation to the effect on the historical buildings in the vicinity with particular reference to the Bevis Marks synagogue. This is a very important building in the history of British Jewry and the new development will overshadow this place of worship.	NO	Public Access website	14-May-24
24/00021/FULEIA	Green	Renee	I object	NO	Public Access	14-May-24
24/00021/FULEIA	Zender	Mrs	I object	NO	Public Access	14-May-24
24/00021/FULEIA	Sisso Raz	Alicia	Objection to the following: Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR	NO	Public Access website	14-May-24
24/00021/FULEIA	Tragen	Dawn	I object to the demolition to the first synagogue in Britain. This is British heritage. At a time of worsening anti semitism, the destruction of an important British Jewish heritage building sends out a very bad message.	NO	Public Access website	14-May-24
24/00021/FULEIA	Lopes Dias	Alexander	Bevis Marks synagogue boasts continuous uninterrupted worship for over three centuries. I implore you to take the opportunity to experience prayer in this historic building yourself, and experience its historical context. The symbol of this community is that of Abraham's tent, open on all sides. So too, is this beautiful house of worship open to members of all faiths and nations offering an opportunity to experience centuries old customs and emotive prayer services. Tell me, how is it possible to turn your eyes to the heavens (the synagogue itself is called "gates of heaven" in Hebrew) in prayer when the lights have been diminished by the City of London. The Community have spent centuries shining light outwards with charity, academic achievements and contributions to British society. I implore the City of London to repay this wonderful community by allowing the light to shine inwards for many more years to come.	NO	Public Access website	14-May-24
24/00021/FULEIA	ADAMS	CHARLES	Dear Sirs I object to the application on grounds of light loss and noise. There will be more than unreasonable light loss affecting the synagogue's ability to hold services and practise certain customs, and use the synagogue's own area in certain ways at ritual timer. There will be inevitable added noise, the added surrounding area parking issues. Yours respectfully	NO	Public Access website	14-May-24
24/00021/FULEIA	Bowles	Lauren	I object due to the impact on Bevis Marks.	NO	Public Access	14-May-24
24/00021/FULEIA	Selwyn	Rebecca	This obstructs historic Bevis Marks Synagogue, a building of immense public value, both historically and currently as it is in use for services to this very day as it has been for hundreds of years. It is an appalling choice to attempt to build this skyscraper in such proximity to a much beloved synagogue, one so valuable to the narrative and life stories of Britain's Jewish population.	NO	Public Access website	14-May-24

24/00021/FULEIA	Israel	Marcel	The quite traditional and famous Synagogue needs as a Temple a free area around it and this is not compatible at all with the erection of high buildings in the immediate vicinity	NO	Public Access website	14-May-24
24/00021/FULEIA	Bronzite	Ruth	Bevis Marks is the oldest synagogue in the UK, and the oldest in the whole of Europe to have 300 years of continuous services. Moreover it is now in a conservation area. The new planned building would tower over it and, even in its reduced height, would cast a gloomy pall over the synagogue's interior during services and other events such as weddings. It would be a desecration of a beloved and holy building to despoil it with a totally insensitive and inappropriate tower building so close to it. We are all now aware that many people who work in offices no longer work in the City, but work from home several days a week. This will reduce the need for mammoth-size offices and will hopefully enable the Council to turn down an insensitive and inappropriate development in its present form.	NO	Public Access website	14-May-24
24/00021/FULEIA	Korn	Daniela	This is a historic building of great significance and should not be demolished	NO	Public Access	14-May-24
24/00021/FULEIA	Rabson	Jonathan	Detrimental impact on historic synagogue Bevis Marks	NO	Public Access	14-May-24
24/00021/FULEIA	Ferera	Leon	I object because the proposal will hugely obstruct the light and visibility of Bevis Marks, a beautiful and unique historic landmark. It will also adversely and irreparably affect its setting.	NO	Public Access website	14-May-24
24/00021/FULEIA	Westman	Jula	I cannot imagine this type of plan being permitted by somewhere such as Westminster abbey or Coventry cathedral It could be thought that such a disregard for the Bevis Marks smacks of antisemitism	NO	Public Access website	14-May-24
24/00021/FULEIA	Press	Dan	Bevis Marks in the City of London is Europe's oldest continuously functioning synagogue and the single most important historic site for British Jews. That unique history nearly ended in 2021, when the planning department recommended approving a tall building at 31 Bury Street, overshadowing the secluded courtyard where the synagogue is situated, obstructing the view of the sky that is integral to its character, and blocking so much sunlight that the congregation would struggle to hold services. A massive public campaign prompted a change of heart. Now the developer has submitted a new application for this highly contentious site. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection. It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The City's failure to consider the religious and cultural dimensions of the synagogue will cause outrage. We urge the City's planning committee to protect the view of the sky from Bevis Marks's historic courtyard. This is essential to preserve the synagogue as a living community for generations to come. 24/00021/FULEIA	Bekhor	Joseph	I am writing to express my opposition to this application (24/00021/FULEIA). I am perplexed as to why this proposal should be considered given its similarity to the previously refused proposal, and in particular given the adoption of the Creechurch Conservation Area. As a member of the community to which Bevis Marks Synagogue is part, I am particularly concerned about the impact this proposal would have on the Synagogue, most notably the impact on light. I hope that you refuse this application.	NO	Public Access website	14-May-24
24/00021/FULEIA	Goldstein	Michael	I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	14-May-24

24/00021/FULEIA	Sacerdoti	Daniel	I write as the Chair of Trustees of the Spanish and Portugese Jews Congregation, the custodians of the Grade 1 listed Bevis Marks Synagogue. I wish to register my strong objections to this application (24/00021/FULEIA). I am shocked that after the refusal of an almost identical application two years ago and the recent adoption of the Creechurch Conservation Area, that this application has even been made. The scheme has barely changed since the previous (rejected) scheme. Nor is it in keeping with the conservation of a Grade-1 listed building, which is situated within a conservation area. Bevis Marks is the most important site in anglo Jewry and one I am proud to be partially responsible for. The proposed tower would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, robbing it of much of its remaining light. Such a proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I respectfully urge the planning officers and the Members of the Corporation to reject this scheme and to undertake to protect the unique living treasure that is Bevis Marks.	NO	Public Access website	14-May-24
24/00021/FULEIA	Braude	Sheila	I object	NO	Public Access	14-May-24
24/00021/FULEIA	Marx	Jeanette	Important and historical building and heritage of the Jews in London and the UK. It's also an important tourist attraction. The very oldest, and still in use, Synagouge in the UK	NO	Public Access website	14-May-24
24/00021/FULEIA	levinson	sharon	I strongly object to this. one of our oldest buildings and a piece of our heritage and history	NO	Public Access	14-May-24
24/00021/FULEIA	Hood	Sharon	Absolutely object	NO	Public Access	14-May-24
24/00021/FULEIA	Peters	Kathy	This building is of such great historical and religious significance. It is about time everyone recognised this. The proposed development should be turned down.	NO	Public Access website	14-May-24
24/00021/FULEIA	Brenner	Don	Just what have the planners got against The Bevis Marks Synagogue...this is the second time they have tried to blight this wonderful and important London landmark and it should simply not be allowed. No doubt the architects will say everything will be done sympathetically and that the Synagogue will not be affected but how can that be guaranteed? This application to build should be turned down in no uncertain manner....leave Bevis Marks alone!!	NO	Public Access website	14-May-24
24/00021/FULEIA	Goodenough	Sharon	As someone who worked in the City for nearly 30 years, most recently very close to the location of this proposed development, it saddens me that a number of perfectly acceptable buildings are being demolished to make way for, in many cases, monstrous skyscrapers. One of the joys of working in, and visiting, the City of London is the range of architectural styles on view - 18th, 19th, 20th and 21st centuries; the planners appear to have taken the view that anything other than 21st century is obsolete. The plans for 31 Bury Street illustrate this point. The proposed 43-storey tower would completely overwhelm the surrounding buildings, in particular the Grade 1 listed Bevis Marks Synagogue, a building of international importance. In addition, proposing to build such a tower in a conservation area (Creechurch) is surely completely at odds with the purpose of creating a conservation area. I hope that these plans do not receive approval.	NO	Public Access website	14-May-24
24/00021/FULEIA	Peever	Silvana	I am a supporter of Bevis Marks Synagogue from Canada and am concerned to see this new proposal, particularly after the refusal of a very similar one just two years ago and the recent adoption of the Creechurch Conservation Area. The application is not in keeping with a Grade-1 listed place of worship. The seventeenth-century Bevis Marks Synagogue and its soon to open education center is the most important Jewish site in England and a jewel in the crown of world Jewish heritage and the Sephardi tradition of which I am part. The proposed tower, to the immediate south, would block out the religiously important southern sky-view and completely overshadow the Synagogue and its courtyard, blocking all remaining light. I consider the planning application to be totally unacceptable and urge you to refuse it.	NO	Public Access website	14-May-24
24/00021/FULEIA	Borr	Barry	This is threatening our Jewish heritage at a time when Jews worldwide are under threat.	NO	Public Access	14-May-24
24/00021/FULEIA	Young	Diana	Bevis Marks is the only synagogue in the square mile. It is also the oldest synagogue not only in the UK but in Europe. It relies on natural light and candlelight and would be badly affected by this tall tower block. Bevis Marks is a Grade 1 listed building and its heritage should be respected.	NO	Public Access website	14-May-24
24/00021/FULEIA	Israel	Ruth	This is a heritage site and need to be respected	NO	Public Access	14-May-24
24/00021/FULEIA	Orgel	Esti	I object, this is an important part of our history. This synagogue means a whole lot.	NO	Public Access	14-May-24
24/00021/FULEIA	Raingold	Jo	This is a building of great historical importance to the Jewish community of Great Britain. It should not be forced to be demolished it would be removing a building of huge cultural importance and is culturally very insensitive	NO	Public Access website	14-May-24
24/00021/FULEIA	Marks	Joshua	The current proposal risks significant damage to the character and heritage of Bevis Marks synagogue, the oldest active synagogue in the UK and a Grade 1 listed building. The historian Tom Holland described a previous similar proposal as a 'disgrace', explaining 'Bevis Marks is Britain's single most historically significant monument to the role played by Jews in national life.' I agree with Holland that it should be afforded some protections in line with its special status.	NO	Public Access website	14-May-24
24/00021/FULEIA	Collovini	Chiara	I strongly object to the building of a 43 storey skyscraper.	NO	Public Access	14-May-24
24/00021/FULEIA	Brand	Vadim	Bevis Marks, the oldest synagogue in the UK and oldest continued-use synagogue in Europe is located in the heart of this capital. The proposed application of such a tall construction project which will endanger its rights to light/ongoing structure, and indelibly change its historic setting within the strata of history and culture that make up London city. It is a representation of diverse Sephardic heritage and a cultural archive of the continuous record of Jewish life in Britain. To build allow construction of such large building to shadow this synagogue represents a further cast of Jewish life and culture into the shadows. Please deny this such building application to keep the diversity of the neighborhood front and present.	NO	Public Access website	14-May-24
24/00021/FULEIA	Goldstein	Ralph	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	14-May-24
24/00021/FULEIA	Rothband	Nicole	This development so close to a historic synagogue is inappropriate. The proposed height of the development will overshadow the synagogue structure to such an extent that it will block out almost all light.	NO	Public Access website	14-May-24
24/00021/FULEIA	Levenson	Yoel	This synagogue is a priceless bit of British Jewry's history.	NO	Public Access	14-May-24

24/00021/FULEIA	Keats	Michael	The proposed development: -Will cause substantial harm to the setting of Bevis Marks Synagogue. -Stands within a Conservation Area and thus violates the City of London policy of Tall Buildings which states that the City will refuse planning permission for tall buildings in conservation areas -Will have a serious, negative impact on the synagogues ability to carry out religious rituals such as the monthly viewing of the moon For this and many other reasons it should be refused	NO	Public Access website	14-May-24
24/00021/FULEIA	Austen	Amanda	I object as it is not respectful Of the shul	NO	Public Access	14-May-24
24/00021/FULEIA	Videtzky	Joanne	I strongly object	NO	Public Access	14-May-24
24/00021/FULEIA	Krom	Jodie	Impact on Bevis Marks synagogue	NO	Public Access	14-May-24
24/00021/FULEIA	Landau	Rachel	I object!!!	NO	Public Access	14-May-24
24/00021/FULEIA	Gouldman	Judith	Would infringe on Bevis Marks synagogue natural light, destroying the ability to worship with the synagogue and the character of the grade 1 listed building.	NO	Public Access website	14-May-24
24/00021/FULEIA	larchy	Marc	Building such a skyscraper would overshadow a historic synagogue and greatly diminish it's charm. These arguments were all made 2 years ago when a 48-floor tower was proposed, and reducing it to 45 floors don't change the negative impact on the light, environment and charm of Bevis Mark's synagogue.	NO	Public Access website	14-May-24
24/00021/FULEIA	Leventhal	Michael	I am a Jewish publisher and historian living in north London and am writing to object to the above-numbered planning application. I have written about the importance and historic significance of Bevis Marks synagogue in a book published some years ago and I feel strongly that the application will have a very negative impact on the building. The new tower block would block out the crucial southern view of the sky and shut out the light that comes into the courtyard. I urge you to reject this application. Yours sincerely, Michael Leventhal	NO	Public Access website	14-May-24
24/00021/FULEIA	Okrent	Sara	Bevis Marks Synagogue is of historic value to the whole of Anglo-Jewry and this development is a threat to this important Grade 1 listed building	NO	Public Access website	14-May-24
24/00021/FULEIA	Gold	Paul	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I've been a member of the Spanish and Portuguese congregation 25 years and our family has celebrated weddings etc at Bevis Marks Synagogue and i am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. This is especially concerning at a time when the Jewish community is feeling so vulnerable . Please refuse this application. Kind regards Paul gold	NO	Public Access website	14-May-24
24/00021/FULEIA	Gold	Isabel	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of the Spanish and Portuguese congregation my family has celebrated weddings etc at Bevis Marks Synagogue and i am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. 24/00021/FULEIA	Cousin	Yocheved	I object	NO	Public Access	14-May-24
24/00021/FULEIA	Segal	Richard	I strongly object to this planning application. Bevis Marks Synagogue is a Grade 1 Listed building of enormous historic and cultural significance. A 45 storey tower would completely overwhelm the synagogue and destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the contribution to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked by a 45 storey tower. The development would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. I understand that because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. This should make it straight forward to reject this application. In addition, from a sustaiability perspective, how can it be right to allow the existing building at 31 Bury Street, which is only 40 years old, to be demolished. Surely from a carbon emissions perspective, the existing building should be refurbished rather than demolished. Unnecessary demolition simply squanders the energy embodied in the building. There must be many better sites in London for a new building of this size and height. This application should be rejected. I strongly oppose this application.	NO	Public Access website	14-May-24
24/00021/FULEIA	Shenker	Stephen	The proposed development will overshadow Bevis Marks synagogue	NO	Public Access	14-May-24
24/00021/FULEIA	Pearl	Jennifer	The building will change the environment and stop light getting into the building and will probably disrupt wheelchair access for me when I want to attend the synagogue.	NO	Public Access website	14-May-24
24/00021/FULEIA	Barkan	Limor	I object	NO	Public Access	14-May-24
24/00021/FULEIA	Stevens	Rich	Don't Respect Jewish History	NO	Public Access website	14-May-24
24/00021/FULEIA	Weiss	Maxime	This proposed building threatens England's oldest synagogue (and indeed, the oldest continued-use synagogue in Europe). I am pro industry and a thriving economy, but not at the expense of ongoing culture and spiritual worship, or of a vital piece of UK and anglo-jewish history. 31 Bury as designed will endanger Bevis Mark's rights to light/ongoing structure, and indelibly change its historic setting within the strata of history and culture that make up London city. This is not only a historical conservation issue but also an issue of compromising the cultural practices of the community who uses the space. Allowing this building would be a planning hypocrisy and certainly a breach of the Equalities Act.	NO	Public Access website	14-May-24
24/00021/FULEIA	Lavi	Roslyn	I object building near and over this important historical sight blocking its light.	NO	Public Access	14-May-24
24/00021/FULEIA	Ross	Reva	By allowing the planning permission to be granted the new building will be blocking the light to a 300 year old Synagogue that is of historical importance to the Jewish Community of England and to the local community in the City.	NO	Public Access website	14-May-24
24/00021/FULEIA	Wilks	Anne	The plan is prejudicial to the unique historic landmark of the beautiful, prized Bevis Marks Synagogue, still much enjoyed today, a jewel in the crown of Anglo-Jewry and a badge of honour for Anglo-Jewish relations.	NO	Public Access website	14-May-24
24/00021/FULEIA	GLATMAN	Zara Ruth	The planning application if it is successful will be harmful to the Bevis Marks synagogue and site This is a very old wonderful building of great historic architecture and I believe one of the earliest synagogues in London. People come from all over the world to visit and also to take part in many religious services and events. It would be z crime to put yet another shiny modern building next to it and cause damage.	NO	Public Access website	14-May-24
24/00021/FULEIA	Israel	Adrien	Protect our heritage	NO	Public Access	14-May-24
24/00021/FULEIA	Sher	Nicky	It is a building of heritage and can't ge destroyed	NO	Public Access	14-May-24
24/00021/FULEIA	Kaufman	Martin	I am writing to object to this planning application which will overshadow one of the most important historic buildings in the City of London, the Bevis Marks Synagogue, the oldest Jewish religious building in the country. The City welcomed the Jews in the 17th century, and ever since Jewish men and women have played an important part in the life of the City. In a time of growing antisemitism, now is the time to celebrate the story of diversity that is represented by Bevis Marks, and to celebrate, not denigrate, its heritage for all, whether or not Jewish. For the sake of the future heritage of the City, I sincerely hope this application will be rejected.	NO	Public Access website	15-May-24
24/00021/FULEIA	Marcus	Lucy	I object	NO	Public Access	15-May-24
24/00021/FULEIA	Mendleson	Elizabeth	The building proposals will affect the historic and unique building that is Bevis Marks Synagogue. The re-development must not and cannot go ahead.	NO	Public Access website	15-May-24
24/00021/FULEIA	Bedarida	Gabriella	The historical and diversity value of the Bevis mark synagogue would be destroyed . The new project would bring darkness, noise and traffic in a quiet corner of the city where everybody should be able to value the success story of how Jews integrated and contributed once they were allowed back in england	NO	Public Access website	15-May-24
24/00021/FULEIA	Chalibamba	Michelle	Bevis Marks is the oldest Synagogue in the UK. It is a place steeped in Jewish history. But also a place that represents And celebrates the history of the city of the Migrant population to this area Anything that threatens integrity of the building Should not be allowed I strongly object to this proposal	NO	Public Access website	15-May-24

24/00021/FULEIA	Madeira Filipe	Andre	The potential obstruction of natural light to Bevis Marks synagogue due to the proposed development raises legitimate concerns. While it may seem like a minor detail to some, the uninterrupted flow of light into the synagogue is integral to its regular functioning and the overall atmosphere within. Bevis Marks is not just a historical relic; it's a living testament to the enduring spirit of world Jewry and a symbol of religious tolerance in this country. In so many ways it's a beautiful symbol of redemption with significance that goes beyond the borders of the City and even the UK. Preserving its functionality is essential to maintaining its significance as more than just a museum piece but as a centre of worship and community for centuries to come. Its elegant discreetness motivated by historical constraints, should not serve as a green light for authorities to shun its significance. On the contrary, efforts to increase its visibility should be undertaken.	NO	Public Access website	15-May-24
24/00021/FULEIA	Klein	Mark	The bevis Marks synagogue is a cultural and historic site, you would not do this to St Paul's where there has been much development in the past decade. To appreciate Bevis marks we need as much natural light and nothing which could compromise the structure of the building. The proposed development is a blemish to both	NO	Public Access website	15-May-24
24/00021/FULEIA	Piper	Esther	How can this development be allowed next to a significant grade 1 building! Is this because Bevis Marks is a synagogue and Jews don't matter? Would this be allowed next to any other grade 1 building ?	NO	Public Access website	15-May-24
24/00021/FULEIA	Cohen	Amalya	Bevis Marks synagogue is a hugely important building and Jewish community that has been in operation for over 300 years. It forms part of the story of religious faith in the UK and is of great historical significance. The planned works around the building threaten its unique architectural character and the means by which the community prays. Unlike other religious buildings in the UK, Bevis Marks is unique for its candle-lit services that continue a tradition of prayer that has existed for hundreds of years. By blocking out sunlight around the building, this will make this special service impossible and risks losing an important aspect of cultural patrimony in the UK.	NO	Public Access website	15-May-24
24/00021/FULEIA	Cohen	Judith	The proposed development will overshadow Bevis Marks synagogue, an important part of East End history and a minority heritage site. It is also a listed building. Previous planning applications have been refused on this basis so it's extraordinary that yet another one is being considered. The City of London is responsible for protecting its heritage - this historic Jewel of Anglo Jewry deserves better than to be left in a dingy, lightless, overshadowed corner.	NO	Public Access website	15-May-24
24/00021/FULEIA	Baer	Michael	Bevis Marks isn't just a synagogue, it's a living monument to the remarkable success story that is Anglo-Jewry. It sits in the heart of our nation, thriving in the face of adversity. It's been holding services continuously for over 300 years - even through the Blitz. It is the embodiment of a community that arrived as refugees, fleeing persecution and nevertheless established itself in the heart of British life.	NO	Public Access website	15-May-24
24/00021/FULEIA	Valencia	Esther	My family named Cohen Lobatto/Palache has been at Bevis Marks since its founding in the 1600s. It is very special in that it is considered a heritage listed building and the continuation of special buildings in The City of London. No high rise buildings should be allowed to damage this wonderful ancient congregation	NO	Public Access website	15-May-24
24/00021/FULEIA	Vogel	Michele	The Bevis Marks Synagogue is of great cultural and historic importance. A tower block next to it would overshadow the synagogue, being too high for the area and also blocking out light for this old building which has no electricity and requires daylight and views of the sky I do hope you will reconsider this planning application Thank you	NO	Public Access website	15-May-24
24/00021/FULEIA	Wilton-Morgan	Taylor	As a clergyman in the City of London, I wish to register my objection to the proposed development, on the basis of the existential threat this poses to the Jewish community at the Bevis Marks Synagogue. The development would dramatically reduce light levels, making many ceremonies inside the Synagogue extremely difficult, and dramatically impoverishing its atmosphere. More significantly, it would totally obscure view of the moon and some stars, meaning the central rituals of prayers at the new moon, and the observance of Shabbat, would be impossible. This would render the Synagogue functionally useless as a living and worshiping community. A looming tower block would also, in present circumstances, pose a significant security concern for the safe use of the site. Bevis Marks is the only non-Christian place of worship in the City of London, and the oldest continuous site of Jewish worship in the world. Since its building in 1701, many families can trace continuous involvement through marriages and other rites of passage there. It is a priceless place of heritage, of international importance, but it is *much* more than a museum: it is the site of a living tradition, whose ethical heritage underwrites so much that the City of London values. What would the City be without such communities of human flourishing, placing us in touch with fundamental moral questions? And what kind of people would we be, if we ignored just how imperiled the Jewish community feels at this moment? The proposed development is an existential threat to them: thus it should be an existential concern for us all. Clearly the City must make difficult decisions about planning. It is not clear, however, that development should come at the expense of an imperiled minority group's right practise their vision of human good - a good which they firmly believe is for 'tikkun olam' (the 'repairing of the world'). Thus, with other clergy and Christians in the City, I firmly object to this proposal.	NO	Public Access website	15-May-24
24/00021/FULEIA	Levy KC	Robert	The notion that such an enormous building should be built in such close proximity to Bevis Marks Synagogue is quite monstrous. A similar, offensive, application, has, I believe, been recently rejected and the current one seems to me no better, in terms of proximity, the impact on London's oldest and most historic functioning synagogue. The proposed development would impact such views as are left from this important heritage, Grade 1 listed, building as well as diminish its light, which is of particular importance in view of the already poor light at the synagogue and its use of candles for illumination. I understand the synagogue is in a Conservation Area, and the proposed new building would dominate its setting. Further, a four storey basement being excavated in such close proximity to a pretty ancient synagogue could well impact its structural stability; in view of the date of its construction it is unlikely that Bevis Marks enjoys the structural integrity of more modern buildings. This application is, to all intents and purposes, a cynical rehash of a recently dismissed application and should be rejected.	NO	Public Access website	15-May-24
24/00021/FULEIA	Flower	Isabelle	The proposed development is completely out of keeping with the conservation area and inappropriate given the nearby setting of various listed buildings and heritage assets. The proposed development would rob Bevis Marks of even more daylight, and the proposed 'benefits' of the development ring hollow and are merely the bare minimum expected from any development.	NO	Public Access website	15-May-24
24/00021/FULEIA	Palmer	Joel	Negative impact on Bevis Marks Synagogue	NO	Public Access	15-May-24
24/00021/FULEIA	Mourtzilas	Georgios Michail	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24

24/00021/FULEIA	Jackson	Michael	Allowing this planning application would be a huge mistake - encouraging other tower blocks to tower over protected buildings. The case has been made many times, but it is important that you know how vital it is to prevent this from happening.	NO	Public Access website	15-May-24
24/00021/FULEIA	Erginsoy	Ali	I am deeply concerned about the impact of this development on the historic Synagogue of Bevis Marks, the oldest synagogue in continuous use in England. The development will affect the quality of worship by blocking out natural light and adversely impact the architectural fabric of the historical building. It is also inappropriate in scale because of the proximity to the synagogue. I feel it would be unthinkable to attempt to site such a building adjacent to St Paul's, so why the cathedral synagogue of the Spanish & Portuguese Jews' Congregation, a community that was established in 1656? Previous attempts of a similar nature were rightly rejected by the planning authority and this should too.	NO	Public Access website	15-May-24
24/00021/FULEIA	Jackson	Judith	Allowing this planning application would be a huge mistake - encouraging other tower blocks to tower over protected buildings. The case has been made many times, but it is important that you know how vital it is to prevent this from happening.	NO	Public Access website	15-May-24
24/00021/FULEIA	Julius	Lyn	As a former editor of the Sephardi Bulletin I have visited the synagogue on many occasions. I would object to any development that would further block out the light from this wonderful historic building.	NO	Public Access website	15-May-24
24/00021/FULEIA	Sneader	Philippa	31 BURY STREET I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm extremely disappointed to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. As a young child we would visit the synagogue regularly and my family has been involved there for many generations. I was married there, as were my siblings, parents and grandparents. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Swade	Shelley	Together with many many others, I strongly oppose this new proposal, introduced after a similar proposal was rejected previously. This is a conservation area containing the most important Jewish site in the UK. Not only is it historically of enormous importance but it is also a site of contemporary Jewish life. The proposal would irrevocably alter the setting and shut out the remaining light, overshadowing and dominating the synagogue and its courtyard. It is essential that this development, and any comparable one, never goes ahead and I urge you to reject it.	NO	Public Access website	15-May-24
24/00021/FULEIA	Hakim	Robert	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). My family are longstanding members of the Spanish & Portuguese Jewish community and we are very disappointed to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application is barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and impacts the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Pinch	Sarah	Ruining the local synagogue next door	NO	Public Access	15-May-24
24/00021/FULEIA	Pereira-Mendoza	Marc	In a world where we pay less and less attention to an active preservation of the past and in particular the uniqueness and exceptional history of a building such as Bevis Marks, the Corporation must pause and take stock of the objections surrounding this proposed project. There is no doubt that a 45 storey old tower would overwhelm the synagogue optically, physically and crucially from a lighting perspective. There is limited scope to improve the lighting within the synagogue itself given its Grade 1 status and would also overshadow the courtyard area which has been used for many years for rituals and celebrations such as weddings (including my own). Furthermore, I understand that the proposed development is within the Creechurch Conservation Area which should not allow for tall buildings and many of the arguments offered by the developer in supporting their application seem somewhat tenuous - especially from an environmental and sustainability perspective. Bevis Marks will soon have a museum and visitors centre which has taken years of hard work to accomplish and will sit within the site and the success of that initiative to attract visitors will also be reliant on both the aspect and light falling across the area. More importantly this building serves as a historical gem of unparalleled significance, not just for the Jewish people, but for this country as a whole in the way that it has served as a beacon of light for those fleeing oppression and looking to contribute to broader society - please do not allow the light surrounding it to be extinguished.	NO	Public Access website	15-May-24
24/00021/FULEIA	Dias	Daniel	I would like to register my objection on the grounds of damage to the spiritual experience of worshiping at Bevis Marks Synagogue. My family have worshiped at this synagogue for 200 years, my family, and my grown up children are also members. Bevis Marks is a unique place, with an unmatched ambiance, the building resonates with the melodies and prayers of multiple generations. I defy anyone not to feel the spiritual significance of Bevis Marks, if one cares to visit. To damage this would be a travesty for the City of London, I am all for progress but surely some things should be sacred. I hope common sense prevails and this historic home of a community so deeply linked to what it means to be the City of London, a greater community built on tradition and integrity, will be protected for many more generations.	NO	Public Access website	15-May-24
24/00021/FULEIA	Saleh	Ruth	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24

24/00021/FULEIA	Kay	Gideon	A 45 storey tower would completely overwhelm the Bevis Marks synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible.	NO	Public Access website	15-May-24
24/00021/FULEIA	Rowland-Hill	Michael	The Bevis Marks synagogue is one of the CIty's most beautiful and historically important buildings. I am not Jewish, but I love and appreciate this building as a living reminder of our past - how this country can be proud to have welcomed refugees. Bevis Marks is a magical place to visit for Jews and non-Jews alike. This new development will literally overshadow and therefore demean this historic and religious building. It is a Grade I listed building and it is at moments like these that it really needs your protection. Please let the synagogue and all it represents be your number one thought above profit and business and short-term thinking. Thank you for your consideration.	NO	Public Access website	15-May-24
24/00021/FULEIA	Margetson	Zanine	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). As a a member of Bevis Marks' Spanish & Portuguese Jewish community and frequent visitor to the synagogue I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, has barely changed since the last time it was submitted, and is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to please refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Macmull	Ira	The Bevis Marks Synagogue is an historic building which should be respected as such and should not be overshadowed by yet another high rise building which would diminish the stature of this remarkable landmark.	NO	Public Access website	15-May-24
24/00021/FULEIA	Dias	Lorraine	Light	NO	Public Access	15-May-24
24/00021/FULEIA	Martins Dos Santos	Jonatan Ismael	The synagogue was built in 1701. Twelve years later The Bill of Rights was made official in the country, marking a new departure for our Western values of freedom and democracy. Eighty-eight years later the American Constitution was established, which is still known for advocating for religious freedom. More recently, the International Human Rights and European Human Rights were mainly based on these laws. When this synagogue was built, Jews were openly executed in Spain and Portugal. Even if they were Catholic converts, but they kept any single of the practices of their ancestors, it meant they would be eligible for execution. It wasn't until 1976, approximately, that many of the descendants of those Jews, in Portugal, decided to embrace the faith of their ancestors publicly. While in London, more than three hundred years ago, they could build synagogues and enjoy a free life. Even today, our mayor, Sadiq Khan, has installed over thirty thousand lights for Ramadan in Central London, while in so many countries, religious freedom is far from being a reality. The most interesting thing is that we are in an era of inclusivity, fluidity, and diversity of any kind. Yet, a synagogue that was built one hundred and eighty years before Tower Bridge, and one hundred and fifty years approximately before Big Ben, seems to be less important than those two emblematic buildings. I wonder if our Western values of freedom and democracy matter, as so many people coming from authoritarian countries, where they can be executed for anything that deviates from the official values, find this to be a sanctuary. But it is nothing new, as it was already happening in 1701 when this synagogue was built. So, if the mayor spends money on lavishly celebrating Islam, why aren't we allowed to keep a historical building? Older than Tower Bridge and Big Ben? If a symbol of the city and the values of the West receives such poor treatment, I wonder what is coming next.	NO	Public Access website	15-May-24
24/00021/FULEIA	Kotlowski kinsley	sharna	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm very keen to preserve a historical jewish synagogue that is of enormous meaning to me. Im appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	SICSIC	Laurent	I'm strongly opposing to this new application (24/00021/FULEIA). I'm a long standing member of Bevis Marks' Spanish & Portuguese Jewish community and I just am appalled and concerned to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application is almost identical to the previous one and doesn't comply with the conservation of a Grade-1 listed building, which is now also in a conservation area. Bevis Marks' Synagogue is the most important Jewish site in the UK and the building and its community should be considered with all due respect. The new tower, immediate south to the synagogue, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal is almost disrespectful and would never be considered within the vicinity of St Paul's Cathedral. It should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24

24/00021/FULEIA	Silver	Jason	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. 24/00021/FULEIA	Nunes	David	Damage to daylight lighting at Bevis Marks synagogue	NO	Public Access	15-May-24
24/00021/FULEIA	Webber	Jonathan	My wife and I were married in this historic synagogue 30 years ago, and we are proud to be members of this congregation. My grandfather was the Executive Secretary of the Spanish & Portuguese Jews community for literally fifty years, and he had his office in the building alongside. So I grew up with a very strong awareness of the family tradition regarding the truly magical character of Bevis Marks Synagogue, and even though we do not live now in the UK we remain with that memory to this day--especially the memory of the quality of the light during our wedding ceremony. For its part, the congregation has assiduously preserved and continues to preserve the architectural beauty of the building, both inside and outside, down to its smallest details. It is hard to believe that the City of London could even consider an application for development which would very substantially damage the authenticity of the site by allowing a new structure to literally overwhelm it, not to mention the disastrous effects of blocking natural light permeating the interior, something which otherwise lends true grandeur to the ancient ceremonies and music which take place there. The Bevis Marks Synagogue is unquestionably unique, a most valuable jewel of the City of London. Please, please, continue to protect it and do not allow this scheme to go ahead.	NO	Public Access website	15-May-24
24/00021/FULEIA	Ozer	Ketty	I am a member of the Spanish & Portuguese Congregation and I wish to strongly object to the application of development of the Creechurch Conservation Area which seems to have been resubmitted with a minor change of reducing the height of the building by a couple of floors only. This is not in keeping with conservation of a Grade-1 listed building, which is now also in a conservation area; the most important Jewish site in the UK. If this project goes ahead, the new tower to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky view and overshadow the synagogue and its courtyard, reducing the remaining light. Equally important, in this time of virulent antisemitism, it is a huge security risk with any potential terrorists having a full view of the synagogue courtyard with easy access to commit horrendous acts of terrorism against the Jewish congregation. How can this be allowed? It will be inconceivable to allow such a proposal within the vicinity of St Paul's Cathedral and rightfully so, but equally should not be permitted meters from British Jewry's oldest and most revered synagogue either, especially the sensitive southern exposure. This is madness and a callous betrayal of the members of our congregation. I ask that you please refuse this application. Thank you Ketty Ozer	NO	Public Access website	15-May-24
24/00021/FULEIA	Abulafia CBE FBA	Prof David	To take away the light from a much loved building which is the oldest and most beautiful synagogue in the UK is an act of barbarism and desecration. The synagogue makes virtually no use of electric light in order to preserve the origins I unchanged interior as perfectly as possible. An earlier application with a similar impact has already been rejected and it is beyond impossible to understand why this application has reached this stage.	NO	Public Access website	15-May-24
24/00021/FULEIA	Jonas	Daniel	It is clear from the approach of the developers and their repeated applications that they mean to have their way regardless of the rights and wrongs, and expect to be able to beat all opposition down with the weight of money. The benefits they suggest are marginal at best, and no more than what would be considered normal elsewhere. Many of the claims about action they plan to take can be quietly discarded later with no downside to them. In short, they can speak in bad faith, with no fear of consequence. This undermines the fairness of the planning process. It is extremely clear that the synagogue would have its light obscured, and that this incredibly important building would suffer a further blow against its utility for those who live in the area and attend daytime services, as I do. I cannot imagine this being permitted next to a major church.	NO	Public Access website	15-May-24
24/00021/FULEIA	Garcia	Robyn	I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	birnbaum	Laura	I am concerned this will impact adversely on the listed buildings	NO	Public Access	15-May-24
24/00021/FULEIA	da Mota	Leandro	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	15-May-24

24/00021/FULEIA	Ozer	David	Dear Sirs, You have resubmitted an earlier application which was rejected by making small changes and reducing two floors, in the hope that you will not be met with strong objections. This is not the case this time round either. I am a member of the Spanish & Portuguese Jewish Congregation and I strongly oppose your new application for a new tower. Your new development is not in keeping with the conservation area, and will totally diminish our Grade-1 listed building, the Bevis Marks Synagogue which is the most important Jewish site in the UK. The new tower, to the south of the synagogue will alter the setting of the synagogue, block out the southern sky view which is of utmost importance to my religion, over shadow the synagogue and its courtyard and pose a huge security risk exposing our members to any would be terrorist organisation who would be able to attack members at random from this building. In this awful time of heightened antisemitism, allowing such a building to overshadow the oldest synagogue in the country is a total travesty and must be stopped immediately. Such an application would not be allowed to go ahead within the vicinity of St Paul's Cathedral, Westminster Cathedral or any building of equal religious significance in the the UK and should certainly not be permitted to proceed just meters from the most important synagogue in the land, particularly with its sensitive exposure. I respectfully ask that you reject this application in the interest of decency and understanding of the sensitive nature and the fear that has gripped the Jewish people in this country now. I would be terrified to encourage my children and grandchildren to mull around the courtyard as I genuinely believe this building could be used as a back drop for a terrorist act in London. Thank you for reading my comments	NO	Public Access website	15-May-24
24/00021/FULEIA	Chazan	Marcos	The building will have an adverse impact on our synagogue which is a protected, grade 1 listed building. It will block the sunlight out synagogue benefits from. Thanks	NO	Public Access website	15-May-24
24/00021/FULEIA	Marks	Simon	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of the Spanish & Portuguese Jewish community and am disappointed to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, which has barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building. Especially since this is now also in a conservation area, and is the most important Jewish site in the UK. My wife's family were founder members of the synagogue and have been living in the UK for hundreds of years. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Dawood	Cindy	This new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Salem	Mark	I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Sinyor	Pamela	I am very concerned about the total overshadowing of Bevis Marks Synagogue. It is a wonderful site of interest to tourists and a beautiful synagogue for worshippers. It will be dwarfed by the proposed building and its light would be very adversely affected. It is now in a conservation area and surely should be preserved including its right to light? It the building goes ahead it feels like something the planning department would regret for centuries to come.	NO	Public Access website	15-May-24
24/00021/FULEIA	Lebrecht	Elbie	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Benaim	David	The area is already too condensed and the amenities will suffer as a result of the development	NO	Public Access	15-May-24
24/00021/FULEIA	Shapiro	Caroline	I want to object due to the impact this will have on Bevis Marks synagogue	NO	Public Access	15-May-24

24/00021/FULEIA	Sieff	Alison	Having attended a wedding at the Bevis Marks' Spanish & Portuguese Synagogue quite recently (end of March 2024) - I can firstly say what a beautiful building it is and therefore I felt compelled to write with my objections to the new application submitted (Ref: 24/00021/FULEIA). The synagogue is surrounded by modern structures and is therefore already very much overlooked and, as far as I can determine, the new proposal (which I understand was initially refused some 2 years ago) does not comply with the recently adopted Creechurch Conservation Area and is not at all in keeping with the conservation area. The Creechurch Conservation Area includes the Grade 1 Listed synagogue which happens to be a building of high significance to British Jewry, it being the oldest synagogue, dating back to 1701, and has been in continuous use on the site ever since then. The proposed new tower immediately to the south of the synagogue would dominate and overshadow the synagogue's location and, more importantly, will block out important southerly views of the sky and reduce remaining light within the courtyard and synagogue itself. A proposal of this kind would never be considered within the vicinity of another important place of worship in London, such as St Paul's Cathedral or Westminster Abbey, and should certainly not be allowed in such close proximity to this historic building. I would strongly urge that you refuse this new application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Masri	Danny	It is a shame that this will destroy a part of London's history which is slowly disappearing yet there is a vast amount of sky scrapers / high rise buildings so concentrated in a such small area as yhr City of London.	NO	Public Access website	15-May-24
24/00021/FULEIA	Rahamim	Marina	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	L	Matthew	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. 24/00021/FULEIA	Stolerman	Suad		NO	Public Access	15-May-24
24/00021/FULEIA	Ashton	Martin	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). Why has the City considered this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area? This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. What is more, we don;t need another tall building in the vicinity - you can replace Bury House with a smaller, modern eco design that benefits everyone rather than build another environmentally monstrosity that makes a mockery of a conservation area from a religious building that is still in use and has an important role in British, if not World Jewry. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Perez	Lorna	This would totally overshadow a national treasure	NO	Public Access	15-May-24
24/00021/FULEIA	Ibgui	Simon	There is a special and historical synagogue located near the proposed building which will be heavily impacted by the proposed plans. The synagogue is a listed building with immense meaning, to my family and many other Jewish people in London. I find it very difficult to believe you would ever allow such a building to be built near any other religious site Bevis Marks synagogue should be granted the same protection. The building will block huge amounts of light from the synagogue. The natural light gives the synagogue its character and allows areas of the premises to be used for various celebrations. The moon plays an integral part of the Jewish calendar and sometimes even forms part of our services. The construction of the building will block the view of the moon from the synagogue and so will directly impact the ability for the community to perform these religious services from the synagogue building. (Additional information available here: https://www.chabad.org/library/article_cdo/aid/1904288/jewish/Kiddush-Levana-Sanctification-of-the-Moon.htm)	NO	Public Access website	15-May-24
24/00021/FULEIA	Kopaloff	Stephen	This building is part of the Jewish heritage of the UK, any change will be an enormous loss to the overall Jewish community	NO	Public Access website	15-May-24

24/00021/FULEIA	Rahamim	Joseph	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Eliasov	Dean	I am writing to formally object to the proposed development of a 45-storey tower adjacent to the synagogue located. The synagogue is a Grade 1 Listed building of immense historic and cultural significance, and I believe that the proposed development would have severe detrimental effects on its integrity and the surrounding area. I kindly request that you carefully consider the following points in your assessment of this planning application. 1. Overwhelming Impact: The proposed tower would completely overwhelm the synagogue, which holds significant historical and cultural value. It is perplexing that such a building would not be subject to the same level of protection as St. Paul's Cathedral. 2. Destruction of Southern Sky View: The development would obstruct the essential southern sky view, which plays a crucial role in the setting of the synagogue and contributes to religious rituals. The view of celestial bodies, including the moon's passage across the sky, would be obstructed, diminishing the intangible qualities associated with religious practices. 3. Inappropriate Location: While the proposed building may be well-designed and sustainable, it is simply in the wrong place. Its towering presence would cast shadows over the synagogue and its courtyard, significantly impacting the usability of the courtyard for rituals and celebrations. 4. Diminished Daylight: The development would further reduce the already minimal daylight that penetrates into the synagogue, making it even more challenging to conduct worship. Given the historic nature of the synagogue, installing additional electric lighting is not a feasible solution. 5. Conflict with Conservation Area Policy: The development site falls within the Creechurch Conservation Area, where current planning policy prohibits tall buildings. The proposed tower directly conflicts with the statutory development plan in place. There are many other points to raise but I have run out of characters.	NO	Public Access website	15-May-24
24/00021/FULEIA	Mesrie	Elizabeth	A building of the magnitude planned will completely overshadow & take all the natural light away from the Synagogue building which is a Heritage building. Being a member of the community, I totally object to the plans suggested.	NO	Public Access website	15-May-24
24/00021/FULEIA	Cohen	Samantha	I am very concerned about this proposal to build a 45 storey tower right next to the most significant Synagogue in the UK. Such a huge building would completely overwhelm the grade 1 listed building. It would cause irreparable harm to the Jewish community in London - a spectacularly upsetting thing to do at any time but especially so given the current outpouring of anti-semitism in London. Can you imagine what the response would be if someone were to propose such a tower be built next to St Paul's! It would almost completely block out the sky and contribute to the already beleaguered and oppressive nature of the courtyard there. The many celebrations which currently take place both in the courtyard and inside the building would become dour and dimly lit affairs - celebrants will go elsewhere, the synagogue will be used far less and eventually only the doughtiest souls will remain. I can hardly believe the City is even considering this proposal so patiently appalling is it.	NO	Public Access website	15-May-24
24/00021/FULEIA	Twena	Diane	Unsightly near grade 1 bevis marks . I am member. Take away light , similar to previous rejection proposal	NO	Public Access website	15-May-24
24/00021/FULEIA	Goodkind	Karen	Bevis Marks Synagogue is a Grade 1 Listed building of enormous historic and cultural significance. Erecting a 43 story building next to it would be devastating to Europe's oldest fully functioning and continuously used Synagogue. A building of this height will destroy the southern sky view which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The proposed building would overshadow the synagogue and its courtyard for much of the day, reducing the usability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. I therefore strongly object to the proposed re building of Bury House	NO	Public Access website	15-May-24
24/00021/FULEIA	gilbey	georgia	n/a	NO	Public Access	15-May-24
24/00021/FULEIA	sueke	john	My place of worship is BEVIS MARKS a Grade 1 listed building built in 1656 one of the world's most important and oldest places of worship of the Jewish faith . This disgraceful and thoughtless planning request would never even be considered in the immediate vicinity of St Paul's Cathedral, and should certainly not be permitted just a few metres from our synagogue , particularly along its sensitive southern exposure. I implore you to refuse this this new application as an affront to such an important place of worship and to our community many of who have been members and supporters for many generations	NO	Public Access website	15-May-24
24/00021/FULEIA	Kenley	Holly	A 45 storey tower would completely overwhelm the nearby synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection?	NO	Public Access website	15-May-24
24/00021/FULEIA	Sabbah Bensimon	Raymond	It's an outrage, a monstrosity to build a tower in this area so close to a historic building older the St Paul cathedral. Please stop this nonsense.	NO	Public Access website	15-May-24
24/00021/FULEIA	ANI	MICHAEL	I strongly oppose this application. Being a member of the Spanish & Portuguese Jewish community I am horrified to see this new proposal, following the refusal of a very similar proposal two years ago. This new application is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. It also falls within the new Creechurch Conservation Area. The new tower, to the synagogue's immediate south, would overwhelm the setting of the synagogue, blocking out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, diminishing any remaining natural light . This proposal should certainly not be permitted in the interests of preserving our most important historic sites within London. I urge you to refuse this application	NO	Public Access website	15-May-24
24/00021/FULEIA	Sabbah Bensimon	Raymond	It's an outrage, a monstrosity to build a tower in this area so close to a historic building older the St Paul cathedral. Please stop this nonsense.	NO	Public Access website	15-May-24

24/00021/FULEIA	Nunes Vaz	Joyce	Objecting to this proposal as a member of this synagogue. My husband's family have been members since the late 1880's and every generation since then have been married there. His father was minister of the congregation for over 20 years. This is a very special place and anything that interferes with it's ambience and quality of worship would be intolerable.	NO	Public Access website	15-May-24
24/00021/FULEIA	Dawood	Richard	Nothing about this application addresses the serious impact the proposals have on the local environment, in particular the terrible impact it would have on Bevis Marks synagogue we occupies important place the heritage of the Jewish community in London and more widely in the UK. The strategy seems to be to wear everybody down with repeated applications of a similar nature. This is highly objectionable strategy and I would urge planners to robustly against this latest application all future variants of it. Previous applications have been rejected, and this one should fail also.	NO	Public Access website	15-May-24
24/00021/FULEIA	Schimmel	Noam	It is of great importance for the respect of Britain's cultural, historical, and religious heritage to ensure that values of preservation are upheld in protecting the Bevis Marks synagogue which is an integral and valued part of London and Britain's architectural and inter-communal patrimony. The new development application undermines respect for this unique heritage, disrespects the local Jewish community and violates fundamental principles of respect for diversity and shared heritage that contributes to the uniqueness of London and its vitality as a city that honors pluralism through policies and practices that protect the heritage of its residents and their distinctive histories. The new tower would block the synagogue and confine it, cutting it off from its natural setting and marring the experience of its members and visitors for whom it is a place of celebration, prayer, meditation, solace, sharing, and communal reflection and congregation. The quality of all those experiences would decline with the blocking of the southern sky view and the resulting dramatic reduction in natural light. I urge you to refuse this application and in so doing to affirm the value and significance of the Bevis Marks synagogue, its civic, cultural, spiritual, and communal significance, and respect for the history and heritage of what is one of Britain's most enduring structures and synagogues with a living historical presence that continues to make a dynamic contribution to contemporary British life and the religious, ethnic, and communal diversity that animates it.	NO	Public Access website	15-May-24
24/00021/FULEIA	Turner	Joanne	It would be a great shame to ruin this historic building	NO	Public Access	15-May-24
24/00021/FULEIA	Fhima	Simon	It is disgusting that the City of London are even considering allowing this plan to go ahead. Bevis Marks synagogue is the cultural heritage of the entire Jewish community of the UK and to threaten its status as a functioning synagogue by blocking off its natural light with this building shows a total disregard for the Jewish population and its history.	NO	Public Access website	15-May-24
24/00021/FULEIA	Sopher	Edward	Bevis Marks synagogue is one of the true unsung jewels of the City of London in terms of serving as a living link to the 18th Century and its unique customs. It is a real draw for tourists and serves as a proud symbol of the historic ethos of the City as a mercantile center. The proposed plan would drastically change the approach to and the surrounds of the synagogue in a way that would make it seem small and irrelevant- effectively destroying the fabric of this beautiful part of London history.	NO	Public Access website	15-May-24
24/00021/FULEIA	Dacosta	Bernice	The building will affect the light in the Synagogue as well as over shadowing it.. I have been a worshipper at Bevis Marks for many years and feel that the city's Jewish heritage should be protected.	NO	Public Access website	15-May-24
24/00021/FULEIA	Cowen	Anne	The proposed building deprives Bevis Marks of natural light and does not respect the historic significance of that building to the community and Anglo Jewry in general.	NO	Public Access website	15-May-24

24/00021/FULEIA	adler	sarah	Both the elected Mayor of the City of London as well as the Mayor for London and the prime Minister keep informing the Jewish community that the comunity adds to the vibrant diversity of London and is respected at all times. However,it would appear that commerce is far more appealing to the City rather than history and diversity. In 1492 my ancestors were forced to leave Spain and wandered through many countries and locations before finding a safe haven in the UK where we have worked hard to ensure that we make a worthwhile contribution to the entire area. Is it too much to ask that the first synagogue the community was permitted to erect in Bevis Marks should be treated with the respect both the building and the community deserve? The building itself is far more than a place of worship,it continues to tell the history of those early settlers and is a place of education for todays school children and students as well as tourists. An office block can be built at another location, it will not be intended to last the years that Bevis Marks has and will continue so please just take a step back and think what you are trying to destroy.	NO	Public Access website	15-May-24
24/00021/FULEIA	Hornstein	Rodney	The proposal fails to respect the immense heritage of the Bevis Marks Synagogue site and would have a disastrous impact on Bevis Marks Synagogue as a living Jewish congregation, as well as the Dangoor Heritage and Education Visitor Centre. This project should not be permitted as it will ruin one of the most revered and historic areas in the City	NO	Public Access website	15-May-24
24/00021/FULEIA	Newman	Amanda	It is disappointing to see that this planning application for Bury House has only very minor changes from the one that was rejected previously. It is directly contravenes the Creechurch Conservation Area Plan specifically policy DM12.2. The new building proposal will cause significant damage to the Grade 1 listed Bevis Marks Synagogue and the Grade II* listed Holland House. The new proposed building will be overbearing to the Synagogue and completely dominate the skyline. The loss of significance in conservation and religious terms should be taken into consideration. The Synagogue is the only non Christian place of worship in the City of London. This proposed development is not only detrimental to the building but to the worship within the Synagogue as it will block out the religiously important southern sky. The light that comes in from this direction is an important part of the religious ceremony. The Synagogue is the Cathedral of Anglo Jewry and as such should be seen as significant as St Paul's Cathedral. I strongly object to this planning application	NO	Public Access website	15-May-24
24/00021/FULEIA	Golanski	Karen	I objected to the first proposal for a high rise development here and am hugely disappointed that another proposal has been submitted. My reasons for objecting to this one are effectively the same. it will be a blight on the area, in particular on Bevis Marks Synagogue which is of immense historical importance. The effect of a high building so close to it will cut out much of the light which will make religious services difficult. The City of London Corporation has surely made this a conservation area for a reason, so it is hard to see how such a development could be given the green light.	NO	Public Access website	15-May-24
24/00021/FULEIA	Hurst	Ann Stephanie	We need to preserve the historical buildings and the area should not be over developed with high rise buildings encouraging pollution, noise and crowded areas.	NO	Public Access website	15-May-24
24/00021/FULEIA	Rejwan	Salman	Hello, This proposed planning application is overbearing in that it doesn't take into consideration the significance of Bevis Marks as the ancestral home of the Sephardi congregation in the UK. It undeniably blocks the views and light over the southern end of the synagogue and I would like to strongly object to this application. I mean having a small building in a conservation area being dwarfed by a skyscraper is overbearing in the extreme.	NO	Public Access website	15-May-24
24/00021/FULEIA	JNatali	JNatali	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I strongly urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Turner	Jacob	There are innumerable places for the development of modern buildings in or around the City of London. There is just one Bevis Marks synagogue - a building of great historic importance, architectural merit, and religious significance - not just for the Jewish community but for the UK more widely. The light and aspect of Bevis Marks synagogue would be significantly damaged by the proposed development. Once that has been lost, it will never be recovered. Who breaks a butterfly on a wheel?	NO	Public Access website	15-May-24
24/00021/FULEIA	Speigel	Maureen	I just cannot believe in this day & age how London can put this building next to the Synagogue I was married in. Just considering the light alone it's will be overwhelming in its restriction. Bearing in mind the age of Bevis Marks you'll be ruining the present height to something completely out of keeping with the area. I sincerely hope this decision will be reconsidered.	NO	Public Access website	15-May-24
24/00021/FULEIA	Attan	Mark	I'm writing to express my strong opposition to this new application . I'm extremely disappointed to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower,to the synagogue's immediate south, would dominate the setting of the synagogue,block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposalwould never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's most historic synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Dias	Max	I have been associated with Bevis Marks and I was chorister since childhood. My life in Judaism has derived from the lessons I learned and my subsequent attachment with the synagogue and the order of service which I followed as a lay minister. I was married there and my family has followed the customs of the religious service. It has been a bulwark of Spanish and Portuguese Minhag since its inception in 1701 and a blessing to the Community..	NO	Public Access website	15-May-24

24/00021/FULEIA	Maya	Gaston	I am objecting on behalf of Latin American Sephardic Federation (310,000 members) We are concerned to see this new proposal, especially after the refusal of a very similar one just two years ago and the recent adoption of the Creechurch Conservation Area. The application is not in keeping with a Grade-1 listed place of worship. The seventeenth-century Bevis Marks Synagogue and its soon to open education center is the most important Jewish site in England and a jewel in the crown of world Jewish heritage and the Sephardi tradition. The proposed tower, to the immediate south, would block out the religiously important southern sky-view and completely overshadow the Synagogue and its courtyard, blocking all remaining light. We consider the planning application to be unacceptable and urge you to refuse it. Gaston Maya, President Mexico City, Mexico	NO	Public Access website	15-May-24
24/00021/FULEIA	Ward	Joanna	Bevis Marks synagogue is a "national treasure" - smaller than St. Paul's Cathedral but just as important in its own way. It's the oldest continuously occupied and used in the country. Allowing high rise buildings be built right next to it is totally unacceptable - they would overshadow it visually and more importantly would block the light from this delightful old building.	NO	Public Access website	15-May-24
24/00021/FULEIA	Gilmont	Jason	Not in keeping with the surrounding area. Adversly affecting the amenities of Bevis Marks	NO	Public Access website	15-May-24
24/00021/FULEIA	Garcia	Philip	I strongly object to this new application. I do not see how it could be possible to accept this new application given that something almost identical was refused two years ago. Also, a new Creechurch Conservation Area has been adopted in the meantime, which was supposed to rule out any such proposal being considered again.	NO	Public Access website	15-May-24
24/00021/FULEIA	Sabbah	Nethali	Danger to Bevis Marks Histpric synagogue	NO	Public Access	15-May-24
24/00021/FULEIA	Gleen	Carmen	Light blocking. Blockage of Heritage site of significant historical and religious importance.	NO	Public Access	15-May-24
24/00021/FULEIA	Dale	Priscilla	To place a building of such height next to an historic building of such importance is insensitive of the character of the City of London and lacks architectural merit of any kind. Please refuse this application and restore faith in the long term architectural integrity of the City and it's planners.	NO	Public Access website	15-May-24
24/00021/FULEIA	Wood	Abigail	As a religious Jew who has prayed at Bevis Marks Synagogue and has attended events there, I am concerned about the planned 43-storey building which will overlook the synagogue and very substantially change the ability to use the building and its courtyard. Natural light is vital to the space, and the ability to see the sky and moon has meaning in Judaism for observing the religious calendar.	NO	Public Access website	15-May-24
24/00021/FULEIA	Smouha	Derrick	I would be grateful if you would kindly take into account, when arriving at your decision granting planning permission to the developers of the Bury Street site, that a positive decision would be the equivalent of a death sentence to the Bevis Marks synagogue, the oldest synagogue in constant use in England dating back hundreds of years. This building is of immense value to the Jewish Community, to the City of London and to the country as a whole as it provides a place of worship used without a break for centuries by the Jewish Community, it is a building of great historical and architectural value, and many people travel across the world to London to visit it. That said, if the requested permission were to be granted, contrary to the previous decision, the harm which would be caused to the Synagogue and to the age-old use of the building would be immense and irreparable. We therefore request you to look very favourably on our request and save this beautiful and historical building for future generations thus enabling its constant use to continue for many years to come. We thank you in advance.	NO	Public Access website	15-May-24
24/00021/FULEIA	Silver	Rachael	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application	NO	Public Access website	15-May-24
24/00021/FULEIA	Bard	Julia	The proposal fails to respect the important and highly sensitive history and heritage, as well as the beauty of the synagogue site and would have a disastrous impact on Bevis Marks Synagogue as a living Jewish congregation, as well as on the Dangoor Heritage and Education Visitor Centre. How this proposal even reached this stage is difficult to understand.	NO	Public Access website	15-May-24
24/00021/FULEIA	Rubie	Michael	I am very disappointed that the future well-being of Bevis Marks synagogue, its congregation is once more under threat from an inappropriate development in its immediate vicinity. It is the oldest Sephardi synagogue in the UK, built in 1701. Quite apart from possible damage from building a 43 storey tower with 4 basement levels immediately adjacent (to say nothing of the other proposed structures in the development), such a large building will, I understand, substantially reduce available natural light to the building and will adversely aff	NO	Public Access website	15-May-24
24/00021/FULEIA	Wake-Walker	Richard	The proposal will negatively affect the fine, historic Synagogue to the detriment of the local community, visually, environmentally and physically. I object most strongly. R. Wake-Walker	NO	Public Access website	15-May-24
24/00021/FULEIA	Rubie	Michael	PLEASE ADD THIS TO MY EARLIER SUBMISSION AS I ACCIDENTALLY SUBMITTED IT BEFORE COMPLETING MY COMMENTS. The synagogue was built with candle light only and even now has very limited electric light. This development will affect its use as an active synagogue and as a much visited historic building. My own ancestors, Raphael and Esther Da Costa, escaped the Inquisition, as secret Jews in Portugal, and were married in Bevis Marks in 1746. My grandfather and his brothes were all congregants there. One must also wonder whether the intended development is really necessary in the City at this time.	NO	Public Access website	15-May-24
24/00021/FULEIA	Goldstein	Adele	I'm a supporter of Bevis Marks Synagogue and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK and the Heritage and Education Visitor Centre which is due to open later this year. The new tower, to the synagogue's immediate south, would dominate the protected setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. What message would permitting this obscenity send about the City of London and its values to the hundreds of thousands of visitors, including school children and those from across the UK and overseas, who will come to visit over the new few years? This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Bowman	Andrew	Loss of light and swamping of heritage. As someone who has worshipped there and also recognises its historical significance which transcends our Jewish community by forming a rare snapshot of how the City of London has evolved. Please don't let it be trampled upon. It's not as if there is a dearth of high-rise buildings in the City, very few of which will be fondly associated with cultural history the way Bevis Marks is. Please remember why you correctly rejected another application a few years ago exercising your role as a guardian of the heritage of the City.	NO	Public Access website	15-May-24

24/00021/FULEIA	Phillips	Keith	The proposal will block out natural daylight and impact the foundations of our beloved synagogue (place of worship). Our descendants were members of the synagogue and my daughter was married there in 2016 - it holds such a special place in our hearts and must be preserved at all costs. Please reject these development plans	NO	Public Access website	15-May-24
24/00021/FULEIA	Grossman	Seth	This proposal fails to respect the immense heritage of the synagogue site and would have a disastrous impact on Bevis Marks Synagogue as a living Jewish congregation, as well as the Dangoor Heritage and Education Visitor Centre. As a historically significant element of the Jewish community, I urge you to reject this application	NO	Public Access website	15-May-24
24/00021/FULEIA	Moss	Martin	This building is approved will interfere with the synagogue next to it. You would not allow such an eye saw next to at Paul's cathedral. Please do not approve this development.	NO	Public Access website	15-May-24
24/00021/FULEIA	Castiel	Gilah	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm a member of Bevis Marks' Spanish & Portuguese Jewish community and am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Ettinghausen	Daniel	As a member of the Community, I opposed this project as it will overlook and take light from the oldest Synagogue in the UK - itself a listed building. I thought the Common Council had agreed to an exclusion zone but this suggested building will breach that agreement.	NO	Public Access website	15-May-24
24/00021/FULEIA	shaoul	doreen	The placing of an enormous building of 43 stories up and four stories underground on the doorstep of this grade one listed religious building is most inappropriate. it will block the light and over power it so that it will fade into insignificance. This building is unique. It is our flag ship jewish building. It has hosted King Charles the third when Prince of Wales and Tony Blair when Prime Minister. The same families I've prayed here 4/300 years. During the day office workers in in the City Of London use it. It houses, unique, religious artifacts and it's Museum is a prominent part of Tours of London. It will be almost impossible to find it, lost like a needle in a haystack under the shadow of this huge building. please think again and you will realize that this is the wrong building in the wrong place, opher or perhaps the right building in the wrong place	NO	Public Access website	15-May-24
24/00021/FULEIA	Wassermann	Charlotte	I am objecting to this application on two main grounds which both relate to the impact of this proposed development on the Bevis Marks Synagogue and the general impact of this development on a conservation area in conflict with the development plan. Firstly, the development plan advocates for refusing tall buildings within the conservation area. The conservation area is historically important and unique. The building of inappropriately tall structures will cause irreparable harm and damage the character of the area. Secondly, the Bevis Marks Synagogue is a Grade I listed building of international importance and national importance. This development would lead to substantial harm to the setting of the building and the conservation area. For example, there would be significant overshadowing of the synagogue with most of its natural light removed. I live near to the synagogue and value the city of London for its ability to balance the needs of a modern global city with the preservation of its historic fabric which is an integral part of what makes this part of London so unique and special. Allowing this developing would be an unacceptable tipping of the balance in favour of short term commercial gain at the expense of the greater value to be found in the enduring heritage of our area.	NO	Public Access website	15-May-24
24/00021/FULEIA	Keiner	Judy (Celia Judith)	I strongly object to this proposal for a 40+ storey development which will greatly affect the light, particularly the south facing light, available to the Bevis Marks Synagogue, as well as the amenity of the synagogue's views and surroundings. The synagogue is the oldest still functioning non Christian place of worship in the UK, and is also a priceless architectural and cultural treasure for both the UK Jewish community and for the patrimony of the UK as a whole. Although an amenity space area has been designated near the synagogue, it is clearly grossly inadequate to the task of protecting the amenity of the synagogue, its visitors and members from being being overshadowed to the detriment of worship and other activities of this unique and beautiful treasure of British Jewry.	NO	Public Access website	15-May-24
24/00021/FULEIA	Wan	Elizabeth	In order for London to embrace it's exciting future, it must remain firmly grounded in it's proud historic roots. This includes cherishing historical buildings such as Bevis Marks synagogue. I was lucky enough to visit the synagogue as part of an Open House weekend; as the light shone in through the windows the building filled me with awe, and I learnt about an aspect of London I'd previously known nothing about. This is at risk with the building plans submitted	NO	Public Access website	15-May-24
24/00021/FULEIA	Guivarch	Johanna	I'm a member of Bevis Marks' Spanish & Portuguese Jewish community. This new proposal is offensively damaging the purpose and serene use and of Bevis Mark synagogue and such a project should not be tolerated in the Creechurch conservation area. Furthermore it is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure.	NO	Public Access website	15-May-24
24/00021/FULEIA	ZEHAVI	Leora	I object to the demolition of Bevis Marks Synagogue....it should be preserved as a Jewish heritage building particularly in the light of anti semetism in London and wider society.	NO	Public Access website	15-May-24
24/00021/FULEIA	Ashton	Paul	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24

24/00021/FULEIA	Abery	Nic	A 45 storey tower would completely overwhelm a synagogue of personal and communal significance , which is a Grade 1 Listed . It is inconceivable that such a building would be allowed next to St Paul's cathedral ot other religious site, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. The synagogue has spent considerable money and time redesigning and developing the courtyard for educational and community events which would be impossible to utilise.	NO	Public Access website	15-May-24
24/00021/FULEIA	Bloch	Anna	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	15-May-24
24/00021/FULEIA	Eddy	Nathan	Bevis Marks is an historic synagogue of huge importance to the Jewish community. It will be adversely affected by this proposal. I care about the place of synagogues and all places of worship in the uk, we need to look after them as living places of worship.	NO	Public Access website	15-May-24
24/00021/FULEIA	Sidley	Deanna	The previous development was turned down in 2022. It would be an outrage to destroy the conservation area, especially with a place of worship, the Bevis Marks Synagogue, that was built in 1701 and is at least a decade older than St. Paul's Cathedral. The history and conservation of Bevis Marks is extremely important to the Jewish Community in the U.K., especially the Sephardi Community who built this synagogue when Jews were permitted once more to live in Great Britain and invited by Oliver Cromwell. These first returning Jews came here to seek refuge from the Spanish Inquisition. The Jewish people have contributed so much culture, intellectual ability, art etc. The erection of this building would destroy the uniqueness of the whole conservation area. This multi-storied monstrosity is not necessary and would be in the words of H.M. King Charles III, when he was the Prince of Wales, a carbuncle, and in my opinion will destroy the tranquility and special surrounding historic atmosphere . No to this development	NO	Public Access website	15-May-24
24/00021/FULEIA	Jammer	Leon	I believe this kind of development will cause interference in light availability in the neighbouring Bevis Marks synagogue, as well as cause unnecessary interference in a cultural London landmark. This kind of development changes the nature of the conservation zone and I worry that this scale of development is unfitting for this area. I strongly object to this development.	NO	Public Access website	15-May-24
24/00021/FULEIA	Blackshaw	Myer	Should such a plan be approved it will overshadow Bevis Marks that is one of the most important places of worship in not just the UK but the world. Although small in stature it is huge in its appeal to worshipers. The hemming in and overshadowing will completely destroy the ambience and beauty that currently create a perfect space in which to feel the spirituality of this space. Please do no destroy what generations of worshipers have created and protected for over 300 years.	NO	Public Access website	15-May-24
24/00021/FULEIA	BEN-NATHAN	Geoffrey	Fully support the erection of this barbarian monstrosity only provided planning permission be given for a similar outrage in equal proximity to St. Paul's Cathedral as this would be to Bevis Marks. You wouldn't dare!(Well, you probably would if you thought you could get away with it)	NO	Public Access website	15-May-24
24/00021/FULEIA	Cuby	Dahlia	Please take into consideration my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and I'm devastated to see this application has once again been proposed and so soon after its refusal a couple of years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this.	NO	Public Access website	15-May-24
24/00021/FULEIA	Schmetterling	Dori	This is an extraordinary application for a massive tower next to a historic, Grade 1 listed building known as Bevis Marks Synagogue , in the middle of the Creechurch Conservation Area. This is one of only 2 such listed synagogues in London and has been operating continuously since 1701, making it the oldest still-in-use synagogues in the UK and, indeed in Europe. Although I do not live near the synagogue, I have visited it a number of times. It is obvious that the proposed tower will destroy views of the building and have a ruinous effect on the conservation area. Daylight and a view of the sky will be severely reduced. Having read a number of submissions by the public and consultees, I can see that many objections on planning grounds have already been submitted; I agree with them, This application - not so different to a previous one - must be refused!	NO	Public Access website	15-May-24
24/00021/FULEIA	Arkush	Jonathan	A 43 storey building looming over the historic Bevis Marks synagogue dating from 1701 is highly inappropriate and objectionable. Bevis Marks is a gem with deep historical and aesthetic significance to the City of London, as well as to Britain's Jewish community. Its immediate surroundings call to be treated with sensitivity and restraint. The proposed development runs counter to this and I urge the local planning authority to refuse this and any similar application, as they have before.	NO	Public Access website	15-May-24
24/00021/FULEIA	Glaser	Robert	This a cultural site with historical meaning. It must remain.	NO	Public Access	16-May-24
24/00021/FULEIA	McKinstry	David	The proposal is utterly contrary to all local and national guidance on the protection of the setting of heritage assets, and I have no doubt your own conservation team has advised thus. By approving this your members would essentially be inviting a process of Judicial Review.	NO	Public Access website	16-May-24
24/00021/FULEIA	Hakim	Jonathan	I am writing to object due to the negative impact the proposed development will have on the Bevis Marks synagogue, where I got married and with which my family has been associated since arriving in the UK in the late nineteenth century. The proposed building will shroud the synagogue in darkness and destroy its historic character. Bevis marks is of critical importance not simply to the Jewish community but also to the history of London. The synagogue is the heart of a living community and its unique architecture will be overshadowed and its interior light destroyed if this development were to proceed.	NO	Public Access website	16-May-24

24/00021/FULEIA	Jackson	Adam	I began singing in the choir at Bevis Marks synagogue almost thirty five years ago, and am at least the fifth generation of my family to have cherished, nurtured, and now be passing on, the traditions of London's Spanish and Portuguese Jewish community. I am firmly opposed to the new application (24/00021/FULEIA) for this proposed building. Its location and scale just to the south of the 1701 synagogue would overwhelm a religiously important historic place of worship and its courtyard, overshadowing a quiet place of contemplation. Nobody would consider constructing such a building if it were to infringe on St Paul's Cathedral. Nobody should consider it here either, next to the UK's oldest synagogue, a Grade I listed building and a symbol of London's openness and the way this country has welcomed and valued its Jewish community as an essential and respected part of the national fabric of the United Kingdom. I urge you to reject the application.	NO	Public Access website	16-May-24
24/00021/FULEIA	richards	ivor	the development will adversly affect the whole ambience of a historic building at Bevis Marks. Why is this proposal any better than the onerefused in 2022?	NO	Public Access website	16-May-24
24/00021/FULEIA	Harris	Josh	As a local church leader, I object to this proposal because it involves direct and specific harms to the local Jewish community specifically, including restricting their freedom of worship by obscuring a key portion of the sky and reducing natural light levels to unsustainably low levels. I am proud to minister in the City of London, which we regard as an open, tolerant, civil place which hosts a diverse and international community. I am concerned that this development, if approved, will seriously undermine that reputation, at a moment when we should be particularly working to ensure the safety of the Jewish community. As Priest-in-Charge of St Katharine Cree, I am closely engaged with the local community in and around Bury Street including workers, residents, and those who access community services in our church. We have undertaken more than 1,000 face to face conversations with City workers in the last three years. In my view, the proposed community benefit of this development and the investment in Holland House is intangible and, on the basis of what has happened in similar developments, unlikely to be sustainable to operate - and seems to have required importing organisations with the offer of free space to give the impression of deep community engagement. There are few successful examples of this kind of space I know without an 'anchor institution' running them such as a church, major established charity like Toynbee Hall, or local authority. As someone with expertise in the local community's needs, I cannot see significant likely benefit from the plans to the workers and residents who we engage with in the existing local community. Our community was proud that the City has recently created a conservation area here, and we were looking forward to working with the City to celebrate this and to see how we can together enhance it. 24/00021/FULEIA	Walker	Susan	Objection to the building of tower block being built next to this historic synagogue which will overshadow and block natural light from the building. I am in support of all the synagogues objections	NO	Public Access website	16-May-24
24/00021/FULEIA	Catignani	Sergio	I have attended and visited this synagogue several times when visiting and doing business in London. The project is cultural vandalism and should be stopped!	NO	Public Access website	16-May-24
24/00021/FULEIA	Sochall	Ingrid	This should not be allowed	NO	Public Access	16-May-24
24/00021/FULEIA	Joshua	Michael	I wish to object to the proposed application as it adversely affects the neighbouring properties and particularly Bevis Marks synagogue and should be refused on similar grounds to the previous planning applications which were refused.	NO	Public Access website	16-May-24
24/00021/FULEIA	Jolly	Andrew	Bevis Marks is unique not just in the UK, but in the whole Ashkenazi world!! Large buildings can be built anywhere but Bevis Marks built in 1701, cannot be overshadowed or damaged by surrounding developments now or ever, it is a Grade 1 building and should be respected as such!!	NO	Public Access website	16-May-24
24/00021/FULEIA	HOPKINS	PAUL	Bevis Marks Synagogue is a special part of the City of London and a key component in the story of the Jewish community in the capital. A large office building will shroud the building in darkness and destroy its historic character. It should not go ahead. Apologies I'm a day late - computer problems!	NO	Public Access website	16-May-24
24/00021/FULEIA	Freudenthal	Bernard	I wish to register my strong opposition to this new application (24/00021/FULEIA). I and my family are long connected with the London Spanish & Portuguese Jewish community, attending services in its synagogues and married under its authority. I am disappointed to see this new proposal, particularly after its refusal two years ago. This is particularly baffling given the recent adoption of the Creechurch Conservation Area. It should be clear that this new application (a resubmission?) is not in keeping with the conservation of a Grade-1 listed building - Bevis Marks Synagogue, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, and overshadow the synagogue and its courtyard, dwindling its remaining light. It would be an unfathomable act of neglect of London's and Britain's heritage to permit this construction at the foot of British Jewry's most significant heritage synagogue, particularly along its sensitive southern exposure. The importance of the City of London for commerce and modern life stems from its historical context and long heritage and tradition. I urge you to refuse this application which would imperil our society's future by destroying the living traditions of the past.	NO	Public Access website	16-May-24
24/00021/FULEIA	Natali	David	I write as a member of the Spanish & Portuguese Synagogue community which I support, where I visit and worship from time to time and which my family has supported for many generations since 1778 when my GGGG Grandfather was married there. Bevis Marks Synagogue is a very special place. It is the 'cathedral' synagogue of the Sephardi jewish population of the UK and it is the most important synagogue in London. Its place in the City of London has been well recognised for generations. If an enormous building were allowed to be built so close to the synagogue at 31-34 Bury St. it would cast a shadow over Bevis Marks such that it would forever be in relative darkness. This cannot be right. It would also negate the meaning and purpose of the Conservation Zone recently established to preserve the character of buildings in that area. Bevis Marks has been honoured in recent times with the presence of the Prime Minister, the Lord Mayor, the Chief Rabbi and many other dignitaries. HM The King has just been pleased to confirm that he will be retaining the Patronage of The Bevis Marks Synagogue Heritage Foundation. It simply cannot be right for a new commercial development to be allowed to overshadow this immensely important, historic and religious building. It would be like permitting tower blocks to be built around St Pauls (which, rightly, is in fact protected from near and even distant development). I object most strongly to this planning applicattion.	NO	Public Access website	16-May-24

24/00021/FULEIA	Pereira-Mendoza	David	31 BURY STREET Fallback template letter to City Corporation Please note it is much better if you object in your own words, but we realise you may not have time to do this. Hence you might wish to use the text below, preferably with some adjustment so it isn't just a "standard product". === I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm [a member of Bevis Marks' Spanish & Portuguese Jewish community and am] appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application. === HOW TO SUBMIT YOUR VIEWS: Please go on the City Corporation's website: LINK Click on "Make a Comment" and say what you wish to say. Alternatively you could write to the case officer, Anna Tastsoglou, either at anna.tastsoglou@cityoflondon.gov.uk or at P.O. Box 270, Guildhall, London, EC2P 2EJ	NO	Public Access website	16-May-24
24/00021/FULEIA	Priddle	Stephen	Absurd to build in a recently created conservation area that was the product of careful thought. The same consideration should be given to this synagogue and its worshippers as to the City's churches.	NO	Public Access website	16-May-24
24/00021/FULEIA	Dreyfuss	Vera	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	16-May-24
24/00021/FULEIA	Roberts	Elaine	Bury House should NOT be demolished and the Jewish Community lose their heritage!	NO	Public Access	16-May-24
24/00021/FULEIA	Adler	Elias	Proposed development will Impact surrounding grade one listed building Bevis Marks synagogue of which I am an occasional worshipper attending on days when working in city of London.	NO	Public Access website	16-May-24
24/00021/FULEIA	Hart	Barbara	Don't destroy the Holly place by covering it up.	NO	Public Access	16-May-24
24/00021/FULEIA	Brown	Louise	Such an important religious building should not be literally overshadowed in this way.	NO	Public Access	16-May-24
24/00021/FULEIA	Goldsmith	Jonathan	This synagogue should not be any more overshadowed than it is already. We are fully aware of the current pressure on London's few remaining Jews from Islamic institutions and members of the current local and central governments and population! But being the ONLY Jewish house of worship within the Square Mile, this needs to be as protected as St Pauls and the other churches!	NO	Public Access website	16-May-24
24/00021/FULEIA	ISAAC	LORRAINE	This new proposal is shocking. Two years ago it was refused. The new application has not changed very much since the previous application. It is not compatible for a Grade-1 listed building. The Tower Block would dominate the synagogue, and limit the light entering through the windows. Judaism requires a sky-view for religious reasons, and that is important. I believe had such proposal been planned near to the iconic St Paul's Cathedral and Westminster Cathedral, it would be turned down. Therefore, I am shocked and surprised that such an application has been made without due consideration for the iconic Bevis Marks Synagogue. In conclusion, I would greatly appreciate that the application is refused. It is imperative that this refusal is final.	NO	Public Access website	16-May-24
24/00021/FULEIA	Chandler	Julie	Having lived in London for 22 years and knowing this building I object to yet another office building being built next to it. It seems like history is being erased in this country with no respect for most things. Please no building next to this wonderful historic synagogue	NO	Public Access website	17-May-24
24/00021/FULEIA	Kerbel	Sorrel	I object to the planning application of this bury street block On the grounds that it will be noisy Overwhelmthe site as it will be not be eco friendly to the oldest synagogue in the UK , honoured by Jamaica as being one day older than their heritage synagogue that is a showpiece for tourists . Bevis marks needs protection from this plan .	NO	Public Access website	17-May-24
24/00021/FULEIA	Kerbel	Sorrel	Please reject this over large planning application that will destroy the peace and tranquillity of the Nevis marks synagogue - fine heritage building .	NO	Public Access website	17-May-24
24/00021/FULEIA	Juggler Crook	Lauren	Disgrace this is considering going ahead & I completely object. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. It is a listed building & treated as such.	NO	Public Access website	17-May-24
24/00021/FULEIA	Ben hur	Sharon	This historical building stands for hundreds of years. Now you are choosing to take away this historical site Despite having empty properties closeby	NO	Public Access website	17-May-24
24/00021/FULEIA	Yuchetel	Richard	This is an historically important building. One of the oldest communities in the UK.	NO	Public Access	17-May-24
24/00021/FULEIA	Oyawale	Agnita	Revised Marks synagogue must be protected for future generations. The access to light must be maintained. At this time Jewish people and the oldest Jewish place of worship must be maintained and supported. The government should not be so short sighted	NO	Public Access website	17-May-24

24/00021/FULEIA	Wiseman	David	My objection relates to the impact of this proposed development on the nearby Bevis Marks synagogue. I've had the privilege of attending Bevis Marks - a precious and unique synagogue. It is a special building, of importance not only to the Jewish community but also to London, and it must be prioritised over the short-term objectives of The City Corporation and developers. This does not only mean preserving the bricks and mortar of the synagogue, but also the space around it and the passage of light that flows through its courtyard and windows. The space and light are essential parts of the sanctity of this important landmark that will continue to be in active use for many generations to come. Developments that overlook the synagogue, especially the southern side, should not be considered.	NO	Public Access website	17-May-24
24/00021/FULEIA	Wilkinson	Guy	Nevis Marks synagogue is an outstanding Jewish place of worship and a most important historic building. In this time of rising anti semitism nothing should be done to diminish Jewish places of worship. This proposed building will dominate and overshadow Bevis Marks to its major detriment	NO	Public Access website	17-May-24
24/00021/FULEIA	Bear	Michael		N/A	Email (attached in DC- received by email file)	17-May-24
24/00021/FULEIA	Davies	Beryl	My husband and I,both Christian, visited the Bevis Mark's Synagogue several years ago. We were very interested in the history of unique place of worship,and we appreciated the guided tour of the building, together with a brief outline of the history of it's congregation. Surely, the city of London should be thankful for it's rich history, embodied in beautiful and sacred buildings such as this.Building more and more very high-rise blocks which threaten the character of historic treasures ,is not only destructive but positively foolish.I urge the City of London to reject permission for this unwise plan.	NO	Public Access website	17-May-24
24/00021/FULEIA	Beradida	Micol		N/A	Email (attached in DC- received by email file)	17-May-24
24/00021/FULEIA	L sner	Susan	It is a very significant place of worship in the city of London and has stood for centuries. There are several places of worship of other denominations that too are in the "wrong"place "	NO	Public Access website	17-May-24
24/00021/FULEIA	Straus	Martin	I am Deputy Mayor of Taunton Town Council & familiar with planning applications. I am Jewish & visited Bevis Marls Synagogue for a service in my teens, some 60 years ago and the unique atmosphere in this iconic building is still clear in my memory. It would be a major tragedy if the light within the building were to be adversely affected by the proposed tower. We are proud in South West England of surviving Synagogues in Plymouth (the second oldest in the UK) and Exeter (the third oldest) dating back some 270 years but Bevis Marks holds the distinction of being over 300 years old. It is absolutely vital that this planning application is rejected.	NO	Public Access website	18-May-24
24/00021/FULEIA	Cave	John Nigel	non-preservation of old buildings	NO	Public Access	18-May-24
24/00021/FULEIA	Rozas	Simon	I work near the building. Most City workers do not realise the historical and current importance of the adjacent synagogue to European history of the Jews, particularly the refugees from Spain and Portugal. It is similar in importance to the Portuguese synagogue in Amsterdam or the Altneu in Prague. No planning authority would even consider putting a high rise near those buildings, or near St Paul's cathedral, St Peter's or Agia Sophia. No social remedies, cafes or restoring other buildings could fix the damage done to the synagogue surroundings. The house relies on already scarce natural light and blocking it off completely with high rises makes it look like a relic rather than the living historical building in its surroundings. Allowing this to proceed would be an awful signal to the community and do irreparable damage to the site.	NO	Public Access website	18-May-24
24/00021/FULEIA	Whitear	Nick	Firstly the overshadowing of the Bevis Marks synagogue by this building would be an unacceptable degradation of that building and its historically and socially significant role in the City and wider locality. But also the impact on Becis Marks itself which is too narrow to permit a reasonable amount of light and air to the street when flanked by buildings of this size. Finally Holland House is another architecturally valuable asset from the City of previous centuries which should be left as undisturbed as possible.	NO	Public Access website	18-May-24
24/00021/FULEIA	Roberts	David	I wish to adopt the following: 'The current proposal comes just months after the Creechurch Conservation Area was designated in January 2024, covering the application site. The new proposals would demolish Bury House, at 31 Bury Street, and erect a building nine times its size. This would be a vast and overwhelming step up in scale and would run counter to the City of London's own planning policy which states that tall buildings are inappropriate within conservation areas. SAVE has submitted a detailed letter of objection setting out the damage the proposals would cause to the synagogue, its setting and the wider conservation area. We consider that the proposed 43-storey tower, which would be visible from within the synagogue's courtyard, would have a direct and substantially harmful impact on its setting and secluded nature. The sky view from the courtyard has religious importance and allows daylight into the synagogue's beautiful interior. This was a reason for the refusal of a previous tower proposal. SAVE also expressed strong concerns about the harm a building of this height would cause to the adjoining grade II*-listed Holland House, with its spectacular glazed bricks and mosaics, and unlisted 1912 Renown House, for which rooftop extensions are also proposed. A building of this scale would cast a shadow over multiple highly listed buildings within the Creechurch Conservation Area, including the, 17th-century St Katherine Cree Church and 18th-century St Botolph's, both grade I listed and located at its heart.'	NO	Public Access website	18-May-24
24/00021/FULEIA	Segall	Marilyn	I am a member of the S&P Sephardi Congregation and worship at Bevis Marks Synagogue. I wish to object most strongly to the proposed Bury Street development, which would completely overshadow Britain's oldest synagogue still standing, which dates back to 1701 and is a Grade 1 Listed Building, situated in a Conservation Area. To allow such a tower block to be built would be an act of total sacrilege.	NO	Public Access website	18-May-24
24/00021/FULEIA	Hasson	Steven	Apart from all the numerous planning violations already listed by others. I strongly object on the grounds of the negative impact this will have on a historic place of worship. As a Sephardic Jew in the U.K. this synagogue is the bedrock of the community. I will often commute from Cheshire to attend services in this historic building. Please don't impact its ambience. Would you consider a 43 story building immediately next to St Paul's? I would hope not!	NO	Public Access website	19-May-24
24/00021/FULEIA	Morgan	Susan	Bevis Marks has been a part of London Heritage since the 1700's and interfering in the worship by blocking the views, detracting from the exterior aesthetics of a conservative building and just generally having no concerns for the heritage of London is not acceptable. Far too often do developers push unwanted change on communities, not this time leave this site in view,stop blocking the light.	NO	Public Access website	19-May-24
24/00021/FULEIA	Myers	Sidney	I believe that allowing the construction of such a large tower block would completely overwhelm this beautiful and historic synagogue. It is utterly inconceivable that such a building would be allowed, for example, next to St Paul's Cathedral or Westminster Abbey. In my submission, this Grade I listed building should be afforded the same degree of protection. I strongly object to the proposed building and urge the planning committee to reject the application.	NO	Public Access website	19-May-24

24/00021/FULEIA	Beral	Mike	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I am a trustee of a Greater London synagogue and chair of a Jewish charity. I am disgusted to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral and oldest synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	19-May-24
24/00021/FULEIA	Somekh	Natalie	Bevis Marks synagogue is a unique site that holds huge historical significance for the Jewish community in the UK. This building proposal very clearly compromises the site, and it is completely inappropriate for it to be allowed to do so.	NO	Public Access website	19-May-24
24/00021/FULEIA	Mann	Deborah	Totally out of character with this culturally and faith significant building. Plans disproportionate in scale and fails to take into account Gem of history	NO	Public Access website	19-May-24
24/00021/FULEIA	Cowan	David	Location of sky scraper so close to historic synagogue	NO	Public Access	20-May-24
24/00021/FULEIA	Schiller	Michael		N/A	Email (attached in DC- received by email file)	20-May-24

24/00021/FULEIA	Brent	Janice		N/A	Email (attached in DC- received by email file)	20-May-24
24/00021/FULEIA	Osen	Elana	The proposal fails to respect the immense heritage of Bevis Marks Synagogue and would have a disastrous impact on Bevis Marks Synagogue as a living Jewish congregation, as well as the Dangoor Heritage and Education Visitor Centre. The synagogue is the oldest in Britain and the flagship synagogue of the Spanish & Portuguese Sephardi population of the UK.	NO	Public Access website	20-May-24
24/00021/FULEIA	Fox	Julie		N/A	Email (attached in DC- received by email file)	20-May-24
24/00021/FULEIA	Jacobs	Tony	This is nonsense there are enough empty offices in the city already. This is a historic building and one that belongs to the oldest minority group of this city. What will the city gain from development save greater taxation. The city is already destroying the atmosphere of the area having pedestrianized much of it. This will be another nail in the coffin. It is London not manhattan	NO	Public Access website	20-May-24
24/00021/FULEIA	Van Straten	Craig	Right to light issues for Bevis Marks Synagogue.	NO	Public Access	21-May-24
24/00021/FULEIA	Pinto	Ruby	The proposed development is not in keeping with the current buildings. The new tower block will obstruct natural light to the surrounding area. Natural light is essential for humans especially during the autumn and winter months	NO	Public Access website	21-May-24
24/00021/FULEIA	Arden	David	The destruction of historic sites across London has been allowed to continue over decades under the banner of 'progress' but this area represents the last bastion of 350 years of Jewish history. The surrounding area must be protected to protect the integrity of the building and to ensure it continues as a place of worship unhindered.	NO	Public Access website	21-May-24
24/00021/FULEIA	Adam	Ralph		N/A	Email (attached in DC- received by email file)	21-May-24
24/00021/FULEIA	Hojsteen	Architect Aharon	In first the demolition and high rise construction is clearly an unsustainable environmental nuisance for the surrounding buildings, including them a historical synagogue a genuine landmark in British Jewry heritage. After the long and disturbing construction process, the tower will block out all daylight and and obtrude any sky view from the ancient synagogue, which is essential to its function. I pray you sincerely take these consideration close in order to preserve a heritage site. Thank you in advance.	NO	Public Access website	21-May-24
24/00021/FULEIA	Amal	Ruti	I am attending Bevis Marks synagogue. I don't want such a tall building to destroy the views around and the light that comes to light the interior of this historical religious building. Regards, Ruti Amal	NO	Public Access website	21-May-24
24/00021/FULEIA	Storey	Nicholas	The nearby Gradev1 listec synagogue needs light to maintain its atmosphere and spiritual character. Do not overshsdow it with yet another grotesque skyscraper.	NO	Public Access website	21-May-24
24/00021/FULEIA	Amar	Janine	It is THE oldest synagogue in England and still in everyday use. It is older than St. Paul's cathedral. As an attending and practising Jew, I find the idea that you would destroy it abhorent. Would you do this to St. Paul's?. Stop trying to erase our history in this country.	NO	Public Access website	21-May-24
24/00021/FULEIA	Main	Kathryn	Not in keeping with surrounding environment. Failure to consider neighbourhood historic environment	NO	Public Access website	21-May-24
24/00021/FULEIA	Blasebalk	Tony	Heritage and history... 300 years continuous worship is valuable and an example to other.	NO	Public Access	21-May-24
24/00021/FULEIA	Litwin	Holly	This proposed high rise building would dwarf and damage the Bevis Marks Synagogue and block all light from entering the synagogue. As the oldest continually used synagogue in the world Bevis Marks needs to be preserved and not damaged. As a Jewish tourist visiting Bevis Marks was the highlight of my trip to London.	NO	Public Access website	21-May-24
24/00021/FULEIA	Seaford	William	I object to the proposed new building adjacent to the synagogue. Please consider the affects of light and noise on the historical synagogue. Please consider the potential to use nearby empty office spaces. Enable the listed building to remain a hub for a community. Consider its unique history within European synagogues. Allowing continuity of worship over many years in the past and potentially in the future. When in the past such buildings have been destroyed in Europe. This building and its surroundings should be cherished. Consider such buildings as a hub in our country. In some ways representing the diversity in Great Britain and standing against the concrete uniformity of other cities. My support to the community and the synagogue. And my hope that decision makers open their minds to this .And other perspectives which support the building and its surrounding area. William Seaford	NO	Public Access website	21-May-24

24/00021/FULEIA	Berman	Gerald		N/A	Email (attached in DC- received by email file)	22-May-24
24/00021/FULEIA	Weiner	Estelle	It is totally inappropriate in relation to the historic area and long standing antiquity inherent in this site. The daylight would be affected. The view from the courtyard will be severely compromised. There is no real need for a building on the scale of that in planning; the existing building could be adequately updated without the overall size being so extensive.	NO	Public Access website	22-May-24
24/00021/FULEIA	Frost	Adele	It will change the environment surrounding the need for light in a building first established in the 17th century. It has personal connections for my family and anything that is detrimental to its religious character is not good. There is limited space already and any more overshadowing of this historic building is abhorrent.	NO	Public Access website	23-May-24
24/00021/FULEIA	Szlesinger	Brenda	Considering the recent designation of the Creechurch Conservation Area, it is perplexing that this application is once again before the Committee. The current scheme remains virtually unchanged from the previously rejected proposal. It fails to respect the conservation needs of a Grade I listed building located within a conservation area. Bevis Marks Synagogue is a cornerstone of Anglo-Jewish heritage. The scheme being proposed would have a material adverse impact on the setting of this important heritage asset. It will obstruct the religiously significant southern sky-view and cast a shadow over the synagogue and its courtyard, thereby depriving it of much-needed natural light. Such a proposal would never be entertained in proximity to St. Paul's Cathedral and should certainly not be permitted just meters from British Jewry's "Cathedral synagogue," particularly given its sensitive southern exposure. I urge the planning officers and the Members of the Corporation to REJECT this scheme.	NO	Public Access website	23-May-24
24/00021/FULEIA	Rodrigues Pereira	Nachshon	I object to this project because it takes away a significant part of daylight from the Bevis Marks Synagogue. The sunlight is an essential part of the character of this oldest synagogue in the UK and it would be a monumental blow and monumental mistake to take this away. Please protect this incredible and unique piece of British heritage and do not let any tower block any more sunlight of this synagogue. This is not only important for the congregants and for the UK, but Jews all over the world feel connected to this cause. Please!	NO	Public Access website	23-May-24
24/00021/FULEIA	Filer	Wendy	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). I'm an academic specialising in the legal history of Bevis Marks's Spanish & Portuguese Jewish community, the UK's oldest Jewish community. The Grade I listed Bevis Marks synagogue site is of incalculable value to the UK's rich historical story of religious and cultural minorities. The new planning application barely changes the original rejected proposal. The proposed building height irreversibly impacts the religious use of the synagogue, where electric lighting cannot be installed; shadows the courtyard preventing religious use and blocks the southern sky view necessary for religious ritual. Such irreversible, detrimental impacts on this historic site within the Creechurch Conservation Area cannot be mitigated by the Developers' weak arguments to support supposed benefits of their proposed scheme. Their arguments apply to all commercial buildings and are not unique mitigations addressing the irreparable harm to this historic site. They would be quickly dismissed if made in relation to St Paul's Cathedral, in relation to which Bevis Marks is the Jewish community's historical equivalent. Moreover it is environmentally indefensible to replace an existing building, which can be refurbished, with a new building. Bevis Marks's history is inextricably interwoven with that of the City Corporation and it is the duty of the Corporation robustly to defend its statutory development plan, to protect Bevis Marks as a working, vibrant building and community within the Creechurch Conservation Area. I urge the Corporation to reject this new application.	NO	Public Access website	23-May-24
24/00021/FULEIA	Reeve	Yvonne	This proposal is riding roughshod over God's chosen people. It denies their religious freedom.	NO	Public Access	24-May-24
24/00021/FULEIA	Evans	Nicholas	This proposal would be detrimental to one of the oldest synagogues in the UK and Anglophone world. The City of London has a proud tradition of preserving spaces of world class cultural importance- Bevis Marks now needs thus support.	NO	Public Access website	24-May-24
24/00021/FULEIA	King	Norman	This building needs to be protected from all aspects of intrusion and spoiling. It is one of the most important houses of worship in London. It is at this time of war in the middle east that London must show respect to the Jewish community.	NO	Public Access website	24-May-24
24/00021/FULEIA	Grossman	Jenni	It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place.	NO	Public Access website	24-May-24
24/00021/FULEIA	O?Shea	Elaine	This is a historic building and in London we have lost so much of our past that we should've saved or kept. I object very strongly to losing another building because developers want to make money. I say no to losing this building too redevelopment.	NO	Public Access website	25-May-24
24/00021/FULEIA	Papouchado	Elliot	Inappropriate structure alongside a historic place of worship.	NO	Public Access	25-May-24
24/00021/FULEIA	Goldberg	Ivor	The new building would overshadow a historic building, blocking light necessary for the continual function of the oldest functioning synagogue in the country. The building needs to be preserved.	NO	Public Access website	25-May-24
24/00021/FULEIA	Hanks	John	This development is detrimental to the setting of Bevis Marks Synagogue (Grade I listed) and will adversely affect the community that has worshipped there since 1701.	NO	Public Access website	25-May-24
24/00021/FULEIA	Cohen	Jonathan	A 43-storey building looming over the historic Bevis Marks synagogue dating from 1701 is highly inappropriate and objectionable. Bevis Marks is an architectural and historical gem, important both as Britain's oldest synagogue in continuous use and also a symbol of Britain's Jewish community. Its immediate surroundings must be treated with sensitivity and restraint. The proposed development runs counter to this and I urge the local planning authority to refuse this and any similar application, as they have before.	NO	Public Access website	25-May-24
24/00021/FULEIA	Burg	Jonathan	Very concerned this development will obstruct the proper operation of Bevis Marks Synagogue which requires access to sky for light for worship, including the weekly end of Sabbath (to see the stars) and monthly new moon, and the morning shadows caused by the new building making the sanctuary nearly unusable. Its not appropriate to build such a collosal structure in close proximity, potentially also damaging Bevis Marks ability to provide residential space for its porter or rabbi. The blockage of the Bevis Marks sanctuary would then result in a diminution of the City's history and diversity with over 300 years as an uninterrupted place of worship. The plans should be amended to ensure neither darkening nor damage to the Bevis Marks sanctuary by reflection/sunlight from glass in the new building. If necessary it should be designed around or the building set back to permit continuous light for Bevis Marks. Additionally the noise of visitors, retail and commercial ventilation exhausts and other HVAC will destroy the tranquility of the area especially at weekends, where quiet spots are rare to come by indeed, and those the City has, like Bevis Marks Synagogue, must be preserved.	NO	Public Access website	26-May-24
24/00021/FULEIA	Gilbert	Richard	To allow this proposed development would amount to environmental vandalism of what should be a world heritage site. Bevis Marks is a unique landmark that has been in consistent and daily for over 300 years. The proposed development could harm the fabric of the synagogue and jeopardise its amenities and ambience. Some developments do more harm than good and this would be one of them.	NO	Public Access website	26-May-24
24/00021/FULEIA	Marks	June	Don't spoil this beautiful and very special building which should be preserved for posterity	NO	Public Access	26-May-24
24/00021/FULEIA	Marnham	Andrew	Disrespectful	NO	Public Access	26-May-24
24/00021/FULEIA	Sepulveda	Elishevah	To disturb the spiritual ambiance with environmental factors such as overshadowing, increased traffic noise, foot traffic, building clamor and debris would be so very wrong.	NO	Public Access website	27-May-24
24/00021/FULEIA	Gocman	Michael	It would be detrimental	NO	Public Access	27-May-24
24/00021/FULEIA	Needham	William	The nearby Synagoge has been there for more than 300 years and is not only an historic cultural treasure, but also a living one. The blockage of natural like would severely compromise the integrity and functioning of this living legacy and give the wrong message about how we value our cultural heritage.	NO	Public Access website	27-May-24
24/00021/FULEIA	Fairbairn	Barrie	It seems to me that the benefits of the development to the developer are disproportionately small to the significant losses incurred by the Synagogue should the application be approved.	NO	Public Access website	28-May-24

24/00021/FULEIA	Judah	Jonny	I object to this and previously objected to a similar application	NO	Public Access	28-May-24
24/00021/FULEIA	Johnson	Colin	For a tower block to be built and allowed to overshadow next to such a Beautiful Religious Building is a Desecration of the Building and an insult to all who worship there. The fact that it has held religious services and stood there for over 300 years and is grade 1 listed says something about the Building. You would not build a tower block next to Saint Paul's Cathedral so why allow this ?	NO	Public Access website	28-May-24
24/00021/FULEIA	Hales	Allan	This is the greatest symbol of my heritage in the UK as a Sefardi. It's means more widely the post-Cromwellian readmission of Jews into England. It's cultural, architectural and historic significance cannot be overlooked. Sefardi Jews such as Montefiore, Sassoon, Henriques, Toledano, Navarro, Caro, Sebag and Serota. We've given much and asked for nothing. Please don't return us to the shadows like we don't matter	NO	Public Access website	28-May-24

24/00021/FULEIA	Cherry	Brigid	The proposed building will ruin the setting of the Bevis Marks synagogue - an historically and culturally significant listed building, depriving it of light and ambiance of a important religious building which means much to the community of Jews throughout the UK.	NO	Public Access website	29-May-24
24/00021/FULEIA	Parkes	Henrietta	Respect for an historical important building and place of worship, older than St Paul's Cathedral and a place that the Jewish community has as a symbol of their fleeing from the Inquisition to safety in London. This wouldn't be allowed to happen next to St Paul's or Westminster Abbey, why is it even being considered to allowed to be here?	NO	Public Access website	29-May-24
24/00021/FULEIA	Ruben	Caroline	The proposed Tower would be totally out of character in the area and will completely overshadow the Synagogue. It will shut out the light necessary to part of the Synagogue's services. The Synagogue is an historical building and any building particularly such a tall one would totally detract from the history of London.	NO	Public Access website	29-May-24
24/00021/FULEIA	Barkway	Janet	Why destroy this heritage for generations to come . Why can we not be proud to be the custodians of such heritage that has Been left to us to care for . We have in London and elsewhere plenty of modernism This is history for years to come to cherish and teach to our future families Don't let lour future children think badly of us for destroying an icon what on earth will they think of us .... A generation who did not care	NO	Public Access website	30-May-24
24/00021/FULEIA	Stern	Sharon	I am writing to object to the proposal which will result in a building that will overshadow Bevis Marks Synagogue, which is a Grade 1 listed building. There are too many high rises and empty buildings in the area as it is. Please do not destroy yet another area which has religious significance to a lot of people.	NO	Public Access website	30-May-24

24/00021/FULEIA	Birrell	Stephen	It is about time this site gets developed to it's fullest potential. This has been delayed for so long and for no reason. The design has been well thought out and is of a high quality design. The architects should be very pleased with this. I understand that the (Bevis Marks) Conservation Area is now a material planning consideration but the supporting documents have clearly considered this alongside any potential impacts on surrounding properties, including that of the synagogue. That organisation uses their seven chandeliers (representing days of the week) all the time to light the interior space. The synagogue even uses the chandelier as its logo, hence they are nearly always turned on to light the space. Having one extra tower nearby will not make a noticeable difference, which I'm sure the Daylighting Assessment has taken account of. That site is already surrounded by buildings and purposefully hidden from public view anyway, except when viewed down the narrow passage of Heneage Lane but that elevation is not affected by the proposed development. I hope that the politics surrounding this site do not prevent further development which this City desperately needs to stay in competition with the other cities of the world. It would be a shame if it were refused simply because one organisation has contacted a worldwide network that have not even been to the site. London is a great city and the juxtaposition of the old and new fascinates one and all, keep up the good work town planners in the Corporation and approve this application.	NO	Public Access website	30-May-24
24/00021/FULEIA	Kaufmann	Aviva	This will block the light to one of the most important religious and historic buildings in London. Bevis Marks is part of the fabric of London and this would be an absolute travesty. I am in disbelief that this is actually being considered seriously. Where are the adults in the room? Just shocking.	NO	Public Access website	30-May-24
24/00021/FULEIA	Eirew	Gabrielle	I write this my letter to you, London. You are a magnificent city full of gems of one kind or other. But the care please because in Bevis Marks you have a jewel especially of the British and Sephardi Jewish people and a jewel of what it looks like and stands for. Bevis Marks signalled the return of the Jewish people to London after their Medieval expulsion. Not only is it communally and architecturally significant but it is emotionally important as a symbol of integrity and perseverance . It has beautiful light figuratively and actually and the proposed buildings risks destroying and reducing that light. The proposed buildings will make it much lesser than it is - like the Crown Jewels , the jewel of Bevis Marks needs protecting properly please Shine on Bevis Marks, London!. Thank you.	NO	Public Access website	30-May-24
24/00021/FULEIA	Baum	Colin		N/A	Email (attached in DC- received by email file)	30-May-24
24/00021/FULEIA	Samuels	Adrian	This 300 year old example of Jewish heritage deserves to be respected. Building very tall skyscrapers adjacent to it makes no sense.	NO	Public Access website	30-May-24
24/00021/FULEIA	Kielty	Pauline	Every one has the right to light no matter who they are. To demolish this building is insane, it is a historical building. We are loosing to many of our historical buildings in this country to these logo type buildings which will not last as long as these precious buildings Pauline Kielty	NO	Public Access website	31-May-24
24/00021/FULEIA	Royo Moreno	Luis J	A listed building is more than the building itself: it is the landscape around it, because otherwise we miss the context and part of its history with it. That new building will not only spoil the historical context of Bevis Marks Synagogue, it can even become at one point a target for terrorism aiming to hit the beating heart of the Jewish community in London.	NO	Public Access website	31-May-24
24/00021/FULEIA	Applegate	Sharon	How dare you demolish this building ! What you want it for anther mosque anti semitism	NO	Public Access	31-May-24
24/00021/FULEIA	Booth	Judith	This building was built in 1701 and is important for Jewish heritage and deserves to be respected. Building a very tall skyscrapers adjacent to it makes no sense. It will block the natural light from the building and leave it in perpetual darkness.	NO	Public Access website	01-Jun-24
24/00021/FULEIA	Richardson	Will	The idea of allowing such a tall structure to overshadow the Bevis Marks synagogue is grotesque. We already have several old buildings (often places of worship) overshadowed in the City by modern tall buildings. I don't object to high-rise buildings per se, but we must look after our architectural heritage, and site them where they don't change the character of an important building.	NO	Public Access website	01-Jun-24
24/00021/FULEIA	Cable	Rory	This sounds like part of the coordinated attack on the Jewish community, we must look after all communities and preserve their rights and dignity and history.	NO	Public Access website	02-Jun-24
24/00021/FULEIA	Shahrabani	Ihsan or Eliyahu	I always prayed at Bevis Marks when I was living in the east end of London. Sometimes I participated in the prayers on Saturdays and weekdays. Local people and members remember me cycling from N16 to EC3A Sometimes 6 days a week.	NO	Public Access website	02-Jun-24
24/00021/FULEIA	Viana de Oliveira	Sezefredo	- A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. - It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? - It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. - The proposed building may be well designed and an exemplar of sustainability, but it is simply in the wrong place. It would overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations. - It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. - The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan. - The City Corporation is required to identify locations suitable for tall buildings. It has done some work on this, but there is much more work to be done, and their work eventually has to be assessed by an independent inspector. This process is unlikely to be complete before late 2025. - The developers are arguing that they are providing lots of planning benefits that outweigh the harm to the synagogue. These benefits do not stand up to scrutiny. Many - for example, being car free, demonstrating holistic environmental design, having consolidated deliveries - are simply features that would be expected in any modern commercial building, and they do not represent a gain to the community.	NO	Public Access website	02-Jun-24

24/00021/FULEIA	Goodman	Namy	This beautiful building is Historic that has been Built in 1701, before ST Paul's Cathedral. Would you build a 45 Storey near it, to shadow it ? and take away, the light, might disturb the fondations and make the synagogue looking like a draft. It will look too odd next to a very modern, too tall building. We certainly British people WON'T LiKE it.	NO	Public Access website	04-Jun-24
24/00021/FULEIA	Jackson	Matthew	Will block all the light to the historical synagogue I use regularly	NO	Public Access	04-Jun-24
24/00021/FULEIA	Spencer	Michael	nothing should inhibit the integrity and beauty of this longstanding beautiful synagogue	NO	Public Access	04-Jun-24
24/00021/FULEIA	Johnson	Rachel	I'm writing to express my strong opposition to this new application (24/00021/FULEIA). As a British Jew I am beyond disappointed at the lack of respect for a Jewish place of worship. There have been enough assaults in the UK on Jews. This new application shows lack of consideration or respect for the essence of a place of worship. This would not be considered if it were Westminster Abbey. I am appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.	NO	Public Access website	04-Jun-24
24/00021/FULEIA	Gubbay	Candice	Blocking light in a religious institution BEAVIS Marks that has been on this location for decades.	NO	Public Access	04-Jun-24
24/00021/FULEIA	Glyn	Simon	This proposed development is totally unacceptable - it will block the light to the building which is integral to the synagogue experience.	NO	Public Access website	04-Jun-24
24/00021/FULEIA	Glyn	Tamar	This proposed development is completely unacceptable. It will block the light to the building putting it almost entirely in the shade. Access to light is fundamental element of the religious and cultural ethos of this historic building. It is a vital part of London's Jewish history and multicultural society. I can not imagine a similar development with similar aspect being permitted for example next to Westminster Abbey or St.Paul's Cathedral. I most strongly object to this build being permitted it would be a travesty.	NO	Public Access website	04-Jun-24
24/00021/FULEIA	Singer	Amanda	Will block light	NO	Public Access	04-Jun-24
24/00021/FULEIA	Barrie	Francine	This building will completely overshadow Bevis Marks Synagogue. The synagogue will, lose light, and a view of anything other than the new skyscraper .	NO	Public Access website	04-Jun-24
24/00021/FULEIA	Cohen	Sasha	Would block the light at Bevis Marks which would affect our ability to worship there. A new tower block of should not be allowed to be built on a conservation area	NO	Public Access website	04-Jun-24
24/00021/FULEIA	Cohen	Warren	This is a place of worship and I strongly object to a tower block being built close by	NO	Public Access	04-Jun-24
24/00021/FULEIA	Barrie	Michael	Much less light, only view will be a skyscraper. This is particularly disrespectful to a place of worship	NO	Public Access	04-Jun-24
24/00021/FULEIA	Shaw	Julian	This will block out natural light from adjacent buildings.	NO	Public Access	04-Jun-24
24/00021/FULEIA	Shaw	Karen	I object to the proposed tower and need to protect Bevis Marks synagogue. The proposed tower would block the sky view which is fundamental to Jewish worship. It would keep the synagogue in mostly shade. This is an iconic place of worship since 1701 . This historic building needs to be protected. This area is a conservation area which makes this tower even more unacceptable.	NO	Public Access website	04-Jun-24
24/00021/FULEIA	Einhorn	Hilary	This synagogue building is of great historical interest and important to the city of London and a special religious community. It should not be shut out by yet another city bully building which will probably not last the several hundred years as the synagogue has. It is part of London heritage and should be cherished and respected. There are surely enough business premises in that part of the city already	NO	Public Access website	04-Jun-24
24/00021/FULEIA	Tenzer	Karen	Save this beautiful building	NO	Public Access	05-Jun-24
24/00021/FULEIA	Parton	Adam	An attractive proposal with a slim profile to help minimise any impact on nearby sites	NO	Public Access	05-Jun-24
24/00021/FULEIA	Smith	Amanda	Concerns around Loss of Light from the rear of our building, not to mention Bevis Marks Synagogue.	NO	Public Access	07-Jun-24

24/00021/FULEIA	Beloff	Jonathan	Bevis Marks Synagogue must be protected from this unnecessarily large construction protect that will directly and negatively impact the synagogue and religious prayer. With the recent wave of anti-semitism, one would expect the City of London to do all it could to protect this historic synagogue. However, they seem to fail in their duty to protect it. The building will overshadow the synagogue's primary light source, making it impossible to conduct certain religious practices require seeing both daylight and the moon at night. The City of London must reject this call to construct an unneeded new skyscraper that will damage Bevis Marks Synagogue. Do the right thing that will preserve the City's legacy of caring of its religious institutions and history.	NO	Public Access website	07-Jun-24
24/00021/FULEIA	Henley	R	I wish to express my strong objection to this application. This excessive tower scheme will completely obliterate the setting and amenities of the Bevis Marks synagogue (Grade I listed building). Having designated the area within which the synagogue and proposed development as a conservation area this should afford an additional layer of protection to the building. There is no reasoned justification to justify accepting the proposed development which will cause significant and material harm to the heritage and setting of the heritage asset and the character and appearance of the conservation area. There are no public benefits presented for the proposed tower which substantively outweigh the harm that would be caused to Bevis Marks synagogue and the deleterious effect of the loss of light that should the scheme be approved and built. I object to this application in the strongest terms to avoid the destruction of the setting of such an important historic and religious building in the City of London and to the Anglo and World Jewry.	NO	Public Access website	08-Jun-24
24/00021/FULEIA	Jacobs	RIchard	The synagogue is a jewel, and it should not be overshadowed by the proposed new building.	NO	Public Access	12-Jun-24
24/00021/FULEIA	Clapinson	Hannah		N/A	Email (attached in DC- received by email file)	18-Jun-24
24/00021/FULEIA	Forshaw	Kirsty	The proposed 45 storey tower would completely overwhelm the nearby Bevis Marks Synagogue, a Grade 1 Listed building of enormous historic and cultural significance; the only synagogue in Europe that has held regular services continuously for over 300 years. The impact would be catastrophic for the synagogue and its community as not only would the proposed tower overshadow the synagogue and its courtyard for much of the day, reducing the useability of the courtyard for rituals and celebrations, but it would also destroy the southern sky view, which is an essential part of the setting and important for the intangible qualities it contributes to religious ritual. As well as blocking the view of the moon's passage across the sky, and many of the celestial bodies, the proposed tower would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. The proposed building would damage the setting of heritage assets like this in the local area, and would compromise the qualities of the Conservation Area as a whole. I feel that the City Corporation is being disingenuous in claiming to recognise the importance of the synagogue, yet simultaneously facilitating this monstrous development. There is a direct conflict with the statutory development plan to propose this within the Creechurch Conservation Area too, as current planning policy is not to allow tall buildings in Conservation Areas. I believe we should be protecting London's heritage and buildings of such historical and cultural importance as Bevis Marks Synagogue, and expect the same protective standards to be upheld by you, Britain's most prestigious local authority. Would you allow such a tower to be built next to St Paul's Cathedral? If not, we must question why Bevis Marks Synagogue is not being afforded the same protection.	NO	Public Access website	18-Jun-24

24/00021/FULEIA	Lebon	Scott	This impressive proposal has been designed as a slim building to thoughtfully reduce any impact on the neighbourhood. There have been many exaggerated and false claims in the protests. It is wrong to claim that such a slim building will eliminate the view of the sky. The difference in light will be minimal. It is also wrong to claim that the existing light structures in a listed building cannot be updated. The developer has gone to significant lengths to provide important public benefits, which outweigh any perceived disadvantages. This quality proposal is important to the City's success and should be supported.	NO	Public Access website	20-Jun-24

24/00021/FULEIA	Greenhalf	Mike	I oppose this proposed development on the basis of the adverse impact on an important part of Britains diverse cultural heritage. Bevis Marks Synagogue is a remakable institution with over 3 centuries of continuous history whose longevity itself speaks to Britain's tolerance and continuity through periods of cataclysmic upheaval that affected Europe throughout the long period of the Synagogue's existence. This development irrevocably impairs its geographic context and diminishes it's unique setting.	NO	Public Access website	16-Sep-24
24/00021/FULEIA	Hood	Ralph		N/A	Email (attached in DC- received by email file)	18-Sep-24
24/00021/FULEIA	Lemanski	Mark	I object to the proposal on the basis that the proposal will cause a substantial loss of sunlight and daylight to the adjacent public realm, and the nearby Middlesex Street estate. I believe that the cumulative effect of ever higher buildings is not being sufficiently considered and contradicts the City's aspirations for quality of public spaces and residents' quality of life. I am also concerned about the embedded carbon and don't see how that could possibly tally with the City's sustainability targets.	NO	Public Access website	18-Sep-24

24/00021/FULEIA	Dell	Becky		N/A	Email (attached in DC- received by email file)	24-Sep-24
24/00021/FULEIA	Blain	Barry	I strongly oppose this new application. The proposal is for a tower block adjacent to one of the oldest synagogues in Europe, which is still in regular use, a listed building, famous around the world, and a part of the heritage of not only UK Jews but of the whole population. The proposed skyscraper, in a conservation area and immediately next to the synagogue, would dominate and overshadow its setting and the courtyard, reducing the light, and block out the southern sky-view. A similar proposal was rejected a year or two ago, and I hope this appalling proposal is also refused.	NO	Public Access website	09-Oct-24
24/00021/FULEIA	Gauthier	Charlotte	The proposed structure will negatively affect the Creechurch Conservation Area by bringing additional crowds, noise, and traffic, by causing the part-demolition of one historic building, and most of all by blocking the light to the historic Bevis Marks Synagogue, a Grade I-listed place of worship. In a City with hundreds of thousands of square metres of unoccupied office space, this building is simply not needed, nor can the high environmental and amenity costs of its construction be justified.	NO	Public Access website	09-Oct-24
24/00021/FULEIA	Jacobson	David	Having examined the additional information and revised drawings submitted more recently to your office, I cannot see that they affect in any way the numerous objections already lodged against planning application 24/00021/FULEIA.	NO	Public Access website	10-Oct-24

24/00021/FULEIA	Bennett	sarah	I'm writing to express my strong opposition to this new application which is largely similar to the previous application just a couple of years ago. I'm a regular attender at Bevis Marks' Spanish & Portuguese Jewish community and I am shocked and appalled to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This latest application has barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to please refuse this application in the strongest sense.	NO	Public Access website	14-Oct-24

24/00021/FULEIA	Stone	Jeremy	I would like to comment on the Lunar Transit Study performed by the consultants gia and submitted on behalf of Bentall Green Oak. The underlying thesis of this study is that the claims made for the sanctity of the Kiddush Levana ("KL")at Bevis Marks Synagogue are based on the supposedly false premise that there is a meaningful amount of visibility of the lunar disc at night in the relevant parts of the month. The implied argument (the more insidious for being tacit) is that there is in fact so little such visibility that diminishing what there is cannot be regarded as an infringement of the right of worship. However, this implied argument is without merit, and it is important that it should not be allowed to carry the day. I do not wish to dispute the methodology of the study, or its conclusions. The chart of the sky as seen from Point P in January 2024 (Fig 01) makes it clear that the amount of the lunar arc that can be seen is halved, as detailed in Table 01. Thus, the opportunity to observe KL still exists, but is constrained. It is clearly the case that KL can be performed on at least some occasions. But the existing gap in the built skyline is broken into by the profile of the two buildings (one assented, one proposed) and hence the time available for KL is reduced. It could be argued that since some amount of such time remains, infringement on the right of worship would not take place, hence objections grounded on such alleged infringement should be disregarded. This would, in my view, be mistaken. The fact that the existing built environment is already very restrictive does not mean that no damage is done by halving size of the aperture. At times, as can be seen even from Fig 01, the Moon is clearly visible in the night sky for an appreciable period of time, and this would no longer be the case. The complaints remain soundly based, and should be taken properly into account.	NO	Public Access website	31-Oct-24

24/00021/FULEIA	Jessop	Manuella	another suggestion of a building that will totally overshadow the only Synagogue in Europe to have been in continuous use for over 300 years. Such a building would completely overwhelm this historic building - such a thing would never be allowed to Westminster Abbey or St Pauls Cathedral - why is this being allowed for a Jewish building? There is already very limited natural light into this beautiful building - adding a 45 storey monstrosity (against all the rules of a conservation area such as Creechurch) would only block out what is remaining. I am utterly appalled that you continue to consider applications that encroach on the Grade 1 listed Bevis Marks synagogue, particularly as there is no perceptible difference between this new application and the previous (rightly) rejected applications. Bevis Marks is the most historically significant place of worship for the Jewish Community in England, and allowing such overbearing, intrusive development around the Synagogue is patently ridiculous. This would be immediately refused around St Pauls Cathedral or Westminster Abbey, and begs the question of why the needs of the Jewish community who regularly worship at Bevis Marks are being ignored.	NO	Public Access website	07-Nov-24
24/00021/FULEIA	Jessop	David	Once again this plan is submitted which will ruin the important and historic Bevis Marks Synagogue. This, the oldest in the UK, already has lost a great deal of light and this frankly unneeded building will make the situation even worse. It will also interfere with the new Creechurch conservation area.	NO	Public Access website	07-Nov-24
24/00021/FULEIA	Moses	Selina	Once again, Bevis Marks needs to be left alone as an important heritage site	NO	Public Access	11-Nov-24

24/00021/FULEIA	vogel	mira	Please respect this grade 1 listed building and its conservation area which will likely outlast the short term buildings erected around it. Please respect the place of the synagogue in the history of British Jewry.	NO	Public Access website	20-Nov-24
24/00021/FULEIA	Halpern-Matthews	Dalia	Ms A Tastsoglou, Planning Department, City of London PO Box 270 Guildhall, London EC2P 2EJ 21st November 2024 Dear Ms Tastsoglou, Re: Planning application 24/00021/FULEIA Bury House London EC3A 5AR I am writing on behalf of Chatham Memorial Synagogue and the Jewish community of Kent. We strongly object to the above planning application on the grounds of the negative impact it will have on the Grade I listed Bevis Marks Synagogue (BMS) and the communities who use it. BMS is the oldest surviving synagogue in the UK, and is the only one which has been continually in use in Europe for over 320 years, since soon after Jews were allowed back into England. It is deeply significant to Jews across the UK, and is deeply resonant of our freedom here. Any works which impede the use in any way of this significant site are deeply offensive; in particular, the impact of the above development which, through its reduction in natural daylight to the synagogue and courtyard, will disrupt the ability of the synagogue to worship in accordance with our faith. We believe that this proposal breaches the rights of the Jewish community under the Equalities Act 2010, and sincerely hope that permission is, again refused. Yours sincerely	NO	Public Access website	21-Nov-24
24/00021/FULEIA	Fox	Vicki		N/A	Email (attached in DC- received by email file)	22-Nov-24
24/00021/FULEIA	Jackson	Elizabeth	This building, of immense cultural & historic importance, would be overwhelmed by the sheer scale & inappropriate placement of the proposed tower. It is inconceivable that such a structure would be allowed at St. Paul's Cathedral, yet the synagogue is not afforded the same protections. The development would obliterate the southern sky view, integral to its religious rituals, including the observation of celestial events. The resulting overshadowing would render the synagogue courtyard unusable for many rituals & celebrations, while the already limited natural light within the building would be further diminished. Due to the synagogue's historic nature, additional electric lighting is not an option. This site falls within the Creechurch Conservation Area, where tall buildings are NOT permitted under current planning policy. The development directly conflicts with the statutory development plan; the City Corporation's work on identifying suitable sites for tall buildings is incomplete & not independently assessed. Approving this development ahead of this process would undermine proper planning protocols. The developers claims do not withstand scrutiny and do not justify the harm to the synagogue. The restoration of Holland House, should not be used to justify such an inappropriate scheme, particularly when its purported community benefits are questionable. Furthermore, the existing building at 31 Bury Street is only 40 years old & capable of refurbishment, avoiding the environmental cost of unnecessary demolition. The proposed tower would also damage the setting of other heritage assets and compromise the character of the Conservation Area as a whole. It is deeply disappointing that the City Corporation is facilitating this monstrous development. We are to expect much higher standards from Britain's prestigious local authority. I urge you to reject this proposal & protect the integrity of our heritage and planning policies.	NO	Public Access website	22-Nov-24

24/00021/FULEIA	Kirby	Jack	I am a museums and heritage professional and have personally visited Bevis Marks Synagogue and appreciated its heritage significance. This is an extremely important building in the history of England's Jewish population, and as the list entry notes is of exceptional historical interest. I note that this application follows a refused application (20/00848/FULEIA). I have read a number of reports and letters prepared by consultants acting on behalf of the applicant, and while I acknowledge that the current application differs in details, I do not consider that these have demonstrated significant variations that would impact the reasons that the previous application was refused. The scheme is fundamentally unsuitable for this sensitive site. I concur with Historic England's opinion that the proposed development would cause substantial harm to both Tower of London World Heritage Site and the Grade I listed Bevis Marks Synagogue due to its overbearing and overshadowing impact on the synagogue and its courtyard. It would also cause substantial harm to the character and appearance of the Creechurch Conservation Area. Daylight is of the highest significance to the largely unaltered listed interior of the Synagogue, and the proposed development would have an unacceptable impact on internal daylight levels. It would also unacceptably overshadow the courtyard of the Synagogue, and the ritually important view of the passage of the moon across the night sky. The Planning Statement and other reports and correspondence make a series of technical responses but these merely serve to identify that the scheme is little different in impact to that previously refused. The proposed development would also harm the Grade II* Holland House. I disagree with the assessment contained in Heritage Statement, and support the comments of Historic Buildings and Places and the Twentieth Century Society. I call upon the City of London to refuse this unsuitable application.	NO	Public Access website	22-Nov-24
24/00021/FULEIA	Shindler	Jeremy	I would ask the committee to consider if this development would be permitted if it were overshadowing St Pauls cathedral in the same proportions: one suspects not. Bevis Marks Synagogue is a major part of the heritage of the City of London and it's history as a trading city. A construction of the size and location proposed will fundamentally change the atmosphere, light and ambience of this Grade 1 listed building. Aside from the tragedy of this in it's own right, what precendence does this set about the future protection of other Grade 1 listed buildings both in the City and more widely.	NO	Public Access website	23-Nov-24
24/00021/FULEIA	Gomes da Costa	Marcus	The proposed development would cause substantial harm in heritage terms to the significance of Bevis Marks Synagogue and its setting, substantial harm to the character and appearance of the Creechurch Conservation Area, and less than substantial harm to a number of other heritage assets. The Synagogue is one of the most natural light-sensitive places in London, where extensive reading of printed scripts is fundamental to worship, and the proposal would have an unacceptable impact on internal daylight levels. The proposal would result in an unacceptable level of overshadowing to the courtyard of the Synagogue, which is used for a variety of community and religious uses. The view of the passage of the moon across the night sky is highly symbolic and intimately related to the traditions and rituals of the Synagogue. The proposal would block this critical view which is important to the functioning of the Synagogue.	NO	Public Access website	25-Nov-24

24/00021/FULEIA	Kirby	Keith	I object to this proposal which will have a very bad effect on the Grade 1 listed Bevis Marks Synagogue in the Creechurch Conservation area. The tower block if constructed would block natural light to Bevis Marks, which would be detrimental to the religious experience of users. It would also prevent the view of the passage of the moon, which is very significant for the congregation. If approved this development would compromise the experience of worship for the users of the synagogue. Despite claims to the contrary, the proposal is not any improvement on the previous proposal which the City rightly rejected. I urge that the proposal should be rejected.	NO	Public Access website	25-Nov-24
24/00021/FULEIA	Gordon	Henrietta	St Paul's is protected why is the same protection not afforded to the place of worship of another religion? It would appear to amount to discrimination.	NO	Public Access website	26-Nov-24

24/00021/FULEIA	hoffman	jonathan	A 45 storey tower would completely overwhelm the synagogue, which is a Grade 1 Listed building of enormous historic and cultural significance. It is inconceivable that such a building would be allowed next to St Paul's cathedral, so why is the synagogue not afforded the same protection? It would destroy the southern sky view, which is an essential part of the setting of the synagogue, and important for the intangible qualities it contributes to religious ritual. The view of the moon's passage across the sky, and many of the celestial bodies, would be blocked. It would also further reduce the already minimal daylight that penetrates into the synagogue, making it even more difficult to conduct worship. Because of the historic nature of the synagogue, installing additional electric lighting is not feasible. The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict with the statutory development plan.	NO	Public Access website	26-Nov-24
24/00021/FULEIA	Ten Dam	Melissa	This is A devastation on a beautiful skyline of important architectural and religious buildings. These are pieces of our heritage and should not be dominated by a new building which is not reflective of the style of the area around it is far too tall. Therefore I think the new building should be much shorter about half the height. Not damage the skyline of London.	NO	Public Access website	26-Nov-24
24/00021/FULEIA	Barton	Isn	Given location in city of London, development of an under utilised and poorly maintained existing urban environment should be supported, the plans present a high quality development fitting the location and predominant use of land in the local proximity.	NO	Public Access website	26-Nov-24
24/00021/FULEIA	Reginald	S	If approved, this proposal will become a wonderful addition to our skyline, I believe the design of the proposal to be unique and attractive, and would stand out well amongst what is otherwise a sea of mostly glass and steel. I like the artdeco style of the cladding and the window arrangement, and the inclusion of the refurbishment of Holland House significantly improves the design. I think it's a little too late for some to be addressing the shadowing issues as the Synagogue has already been overshadowed by several taller towers including the Gherkin tower, and the tower at One Creechurch Place nextdoor. On the opposite end of the Synagogue are the soon to be build Bevis Marks House tower and 115 Houndsditch proposals. More than that, we cannot ignore the proposal for 100 Leadenhall which will add a 250m+ skyscraper, all in close proximity to the Synagogue. I don't see why this particular proposal should be isolated for critique if multiple skyscrapers have not just been planned and approved but also already built around the site. Furthermore, we cannot ignore the status of the City cluster as the global financial hub and has always consisted of a mix of old and new for over 2,000 years. There are other sites around the cluster, churches that are overshadowed by towers double in height to this one, and one could also note St Helen's church next to the now planned 310m 1 Undershaft.	NO	Public Access website	26-Nov-24
24/00021/FULEIA	Risenbaum	Danny	In the words of Simon Sebag Montefiori: "Bevis Mark is a British historic treasure as well as a Jewish one. It is a place of great beauty and history. And it is vital that it is protected into the future from looming brutal tower-blocks that will ruin and overshadow this exquisite jewel of British and Jewish history and culture." I concur and this sentiment forms the main grounds for my objection.	NO	Public Access website	26-Nov-24

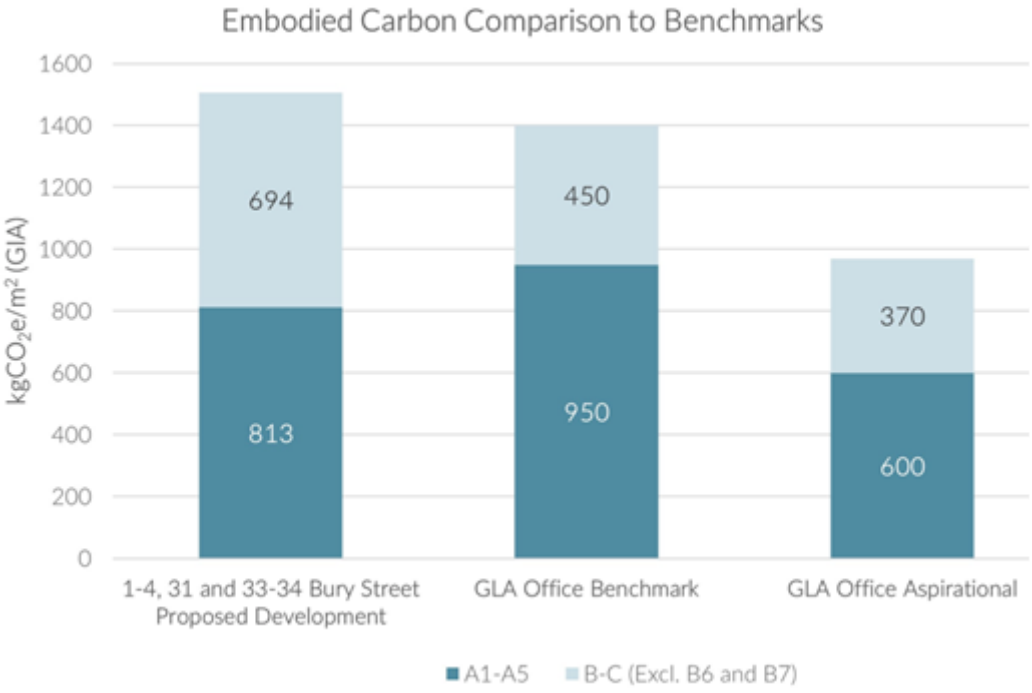
24/00021/FULEIA	Johns	Leslie	Bevis Mark is a historical treasure known throughout the world as a building of unique cultural and religious significance. This building project will have a detrimental effect on the building, the local Jewish community, tourism, and London's reputation as a protector of the Jewish people. Please do not diminish this treasure.	NO	Public Access website	27-Nov-24
24/00021/FULEIA	Rabbs	Margaret	Desecration ..,.. Like destroying Westminster Cathedral in terms of religious importance to the Jewish faith.	NO	Public Access website	28-Nov-24



24/00021/FULEIA	Winch	Dinah	I am writing to object to this proposed development which will cause significant harm to Grade I-listed Bevis Marks synagogue, and the very recently designated Creechurch conservation area, which includes the Grade II*- listed Holland House. A previous application was refused because of the harm that it would cause to the synagogue due to the overbearing and overshadowing impact on the building and courtyard. The current proposal does not overcome the previous reasons for refusal, and now includes unacceptable impact on Holland House as well. Bevis Marks synagogue was designed with large clear windows to maximise light in the building and light continues to be essential to worship there, not least because additional electric light can't easily be installed without damaging the fabric of the interior, largely unchanged since 1701, and because electricity is not permitted on the sabbath and festivals. Additionally the development would block moonlight, a crucial component of Jewish worship. Bevis Marks synagogue is not only the oldest purpose-built synagogue in Britain but the home of a living congregation. Its significance as the only synagogue in Europe to maintain uninterrupted worship since its founding over 320 years ago, and its historic, architectural and cultural importance to Britain cannot be overstated. I urge you to refuse this application.	NO	Public Access website	28-Nov-24
24/00021/FULEIA	Lawson	Susannah	This is a hugely insensitive proposal which will impact worshippers at the synagogue, blocking light from the courtyard for events and also reducing light levels inside, in a building that cannot be altered because it's listed. Bevis Marks is the oldest synagogue in the country and a unique architectural gem. This kind of development would never be allowed right next to St Paul's. The Jewish community also deserves the same consideration for their place of worship.	NO	Public Access website	28-Nov-24
24/00021/FULEIA	Ozer	Ketty		N/A	Email (attached in DC- received by email file)	28-Nov-24
24/00021/FULEIA	Sackman	Simon	I strongly object to this application.I have been a member of the Spanish & Portuguese Jewish community for over 40 years. I regularly attend services at Bevis Marks Synagogue and I and two of my daughters were married there. I am very familiar with this part of the City, as my office for over 30 years was in Camomile Street. Bevis Marks Synagogue is the jewel in the crown of this country's Jewish community and one of which the City of London should be proud and anxious to preserve. The current application has barely changed from the developer's original application in 2022, to which I also objected. In the context of the setting of the synagogue, the difference between a 45-storey tower and the previous 48-storey tower is negligible. The proposed development, like the original proposal, is totally at odds with the conservation of a Grade 1 listed building, which is now also in the Creechurch Conservation Area established by the City Corporation only a few months ago. The new tower would overshadow the synagogue and its courtyard and crucially reduce the natural light illuminating the synagogue's interior, materially impairing the environment in which religious services take place and have done so continuously since 1701. Further, the incorporation of 4 basement levels in the new building would risk damaging the very structure of the 323-year old synagogue.The City Corporation rightly rejected the 2022 application and should do the same again now; there are more than enough tall buildings in the area. What is the point of creating a conservation area and then allowing irreparable harm to one of the few remaining heritage buildings in that area? Such a proposal would never be entertained near St. Paul's Cathedral and should not be permitted just yards from the most important Jewish building in Britain.I urge the City Corporation to refuse this application and make clear that no application on anything like the proposed scale will ever be entertained. I obje	NO	Public Access website	28-Nov-24
24/00021/FULEIA	Chait	Stan	A 45 story complex would have a detrimental affect on the synagogue. This would not be allowed close to St Paul cathedral.	NO	Public Access website	28-Nov-24
24/00021/FULEIA	Collins	Peta	Totally inappropriate height of building for the area Detrimental to the world renowned grade 1 listed synagogue	NO	Public Access website	28-Nov-24
24/00021/FULEIA	Berman	Gerald	It is an overpowering presence...blocking views of an historic building..blocking light from a religious building that relies on it for services...and it is yet another penile structure without any visual architectural merit...neither modernist, post modern or brutalist. It is purely a tower of rampant greed. DO NOT ALLOW THIS TO BE BUILT.	NO	Public Access website	28-Nov-24

Committee	**Date:**
Planning Application Sub-Committee	13 December 2024
Subject: Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR 24/00021/FULEIA: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works. 24/00011/LBC: Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works.	**Public**
Ward: Aldgate	**For Decision**
Registered No: 24/00021/FULEIA and 24/00011/LBC	**Registered on: 11 March 2024**
Conservation Area: Creechurch Conservation Area	**Listed Building: Holland House – grade II***

1. **Application cover sheet amendments**

13. OPERATIONAL CARBON EMISSIONS	**33,941** tonnes CO_2 over 60 years **0.822** tonnes CO_2 per square meter over 60 years (includes life-cycle modules B6+B7)
14. EMBODIED CARBON EMISSIONS	**PROJECT LIFE CYCLE EMISSIONS COMPARED TO GLA BENCHMARKS**  Upfront embodied carbon: 33,565 tonnes CO_2e / 813 $kgCO_2e$ per sqm In use embodied carbon: 28,643 tonnes CO_2e / 694 $kgCO_2e$ per sqm
15. WHOLE LIFE - CYCLE CARBON EMISSIONS	Whole life-cycle carbon emissions: **95,199 tonnes CO_2** Whole life-cycle carbon emissions per square meter: **2,305 tonnes CO_2/sqm**

2. Letters of Representation

2.1. Since the publication of the PASC Committee Agenda further representations have been received.

2.2. One letter objecting to the proposed development and two in support have been received.

2.3. The points raised in the letter objecting to the proposed development and officer responses are included in the table below.

Example representation from (non-statutory) organisations, groups and individuals (objections)	Comments and Officers Response to Comments
Roger Hepher, on behalf of the S&P Sephardi Community (an additional letter was received, dated 10 December 2024)	**The letter stated that all previously raised objections are maintained. The following observations are made regarding the published report.** • In the summary on page 3, the report refers to 'several objections' having been made by third parties, and on page 8 'a number of objections' is referred to. This wording is misleading and does not accurately convey the extent of public (over 1,400) and statutory objections that have been received in response to the application. We appreciate that the full extent of objections is set out elsewhere in the report and accompanying appendices, however due to the length of this document the accuracy of the summary is very important. • Page 10 summarises the findings of BRE's Independent Review of the applicant's Lunar Transit Study prepared by GIA (this is repeated later in the report). The way that this is presented omits to mention BRE's conclusion that (our emphasis) '*the relative reduction in the hourly visibility of the lunar bracelet from the Synagogue*

	courtyard would be significant with the proposed development in place'. Rather, the report attempts to portray the impact as insignificant, through a selective presentation of figures. We also strongly disagree with the statement that '*in theory there would always be enough visibility to recite the prayer'* (in the summary and paragraph 458). The Lunar Review prepared by Rabbi Shalom Morris and submitted alongside our objection dated 15th November 2024 found that, based on analysis of the GIA data, the proposed tower would result in the loss in the ability to recite the prayer in 3-5 months per year, causing a reduction in the occasions that the community are able to recite Kiddush Levana by between 33% and 55%. **Officer comment: The impact of the development on the visibility of the moon and night sky is assessed in detail in pages 1001-1007 of the Agenda. The point raised in the third party review are clearly and transparently assessed in the report. The independent review is also available on the Corporation's website. The impacts of the development are acknowledged and are given significant weight.** **With regard to the data presented in the report, it is noted that these are based on the data included in the Lunar Transit Study submitted by the Applicant, the additional information provided following discussions with the Synagogue's Rabbi and the review report received by the CoL's appointed consultant.** • Paragraph 11 of the Committee Report states that the site is not located within the immediate setting of Bevis Marks Synagogue, as defined in the emerging Local Plan. There are extensive objections specifically regarding the immediate setting policy in the emerging Local Plan, therefore this should be given very little, if any, weight by Members when considering the applications (in

	accordance with paragraph 48 of the NPPF). 'Immediate setting' is not an established concept in heritage terms. **Officer Comment: Comment noted. As explained at various points within the report, the emerging City Plan 2040 is not to be given as much weight as the adopted Local Plan 2015 at this stage.** • Paragraph 182 states that Policy CS14(2) of the adopted Local Plan '*does not require that every application for a tall building in a conservation area must be refused; other factors should also be considered'*. In fact, Policy CS14 could not be clearer in its wording that all applications for tall buildings within conservation areas should be refused: '*To allow tall buildings of world class architecture and sustainable and accessible design in suitable locations and to ensure that they take full account of the character of their surroundings, enhance the skyline and provide a high quality public realm at ground level, by: (1) Permitting tall buildings on suitable sites within the City's Eastern Cluster. (2) Refusing planning permission for tall buildings within inappropriate areas, comprising: conservation areas […]'.* The policy does not in fact indicate that other factors should be considered. Paragraph 182 also states that Policy CS14(1) is supportive of the proposal. CS14(1) refers to suitable sites within the City's Eastern Cluster, it is abundantly clear from CS14(2) that conservation areas are not considered suitable for tall buildings. Therefore we strongly disagree with the interpretation of policy CS14 which is set out in paragraph 182; in fact the proposal represents a head-on and unambiguous conflict with Policy CS14, which in our view is downplayed within the report. **Officer response: Officers clarify that the point being made in the report is that despite the**

	strong language of CS14 (2) which provides for the refusal of tall buildings within conservation areas, conflict with this part of the policy would appear to create a presumption against the grant of planning permission, it does not impose an absolute presumption against granting planning permission or mean that it is mandatory to refuse all tall buildings in a conservation area; the decision maker must consider all the policies in the development plan and reach a conclusion as to whether or not the proposal complies with the development plan as a whole, and this requires the decision maker to assess the proposal against competing policies. There is nothing in the language of policy CS14(2) that suggests it would create a tilted balance or that more weight has to be placed on it be weighted more than other policies in the development plan, however it is for the decision maker to make a judgment as to whether the conflict with a particular policy or part thereof means that the proposal does or does not comply with the development plan as a whole, taking into account *inter alia* the extent of the conflict with policy, the relative importance of the policy and the language of the policy. Instead, it serves as a material consideration that must be balanced against other factors, such as economic benefits and job creation, including an assessment of the proposal's actual impact on the conservation area in question is pursuant. Officers consider such an approach to be supported by case law including *Asda Stores Ltd, R (On the Application Of) v. Leeds City Council & Anor* ([2021] EWCA Civ 32). For completeness and as is set out in paragraph 91 of the officer report, regard must also be had to other material considerations and the application must be determined in accordance with the development plan unless material considerations indicate otherwise.

	As set out in the report, particularly para 219, officers conclude that, having considered all the relevant policy requirements and detailed assessments of impact, the site is suitable for a tall building in the overarching sense, and as such complies with policy CS1 and draws support from CS14(1). • Paragraph 429 states '*it has been argued by S&PSC and other objectors that there is a 'sky view' of the Synagogue from the entrance to the courtyard, where the building is seen with clear sky above'*. This is a strange choice of wording – it is factual that there is a view of the sky from within the courtyard and this is not a subjective argument. Paragraph 429 and the following paragraphs seek to downplay the importance of the sky view, despite abundant evidence having been presented of both the practical and spiritual significance of this view, which we do not repeat here. We strongly disagree with the assertion in paragraph 449 that '*the proposal would, in most areas of the courtyard, be seen only as a glimpsed and partial presence'.* **Officer response: Comment noted. The wording of 'the sky view' is specifically used in some of the objections, notably the Synagogue's objection of 15 May 2024, and officers have followed this wording.** • Paragraph 453 implies that the 'theme of objection' of the moon view was not raised as part of the S&P Sephardi Community's objections to the previous application at this site. This is inaccurate, page 16 of the Bevis Marks Synagogue Significance & Community Impact Study dated 7 April 2021 and submitted as an objection to the previous application clearly states that *'In fact, a special prayer (kiddush lebana) is recited each month upon only seeing the moon in the night sky, something we won't be able to do if buildings block out our views of the eastern and southern sky)'.* It

	is true that the objection relating to the moon view is more clearly articulated in relation to the present application; this is not a reason to downplay its importance, but instead a reason to pay closer attention. **Officer response: Comment noted. Paragraph 453 of the report does not claim that this theme of objection was not raised previously, only that it did not form part of the previous Reasons for Refusal. This proposal's impact on the moon view has been assessed in exhaustive detail.** • Paragraph 461 refers to a third-party review of the applicant's daylight/sunlight assessments. We have not been provided with a copy of this third-party review and it does not appear to be available on the planning register. We again request a copy of this document. **Officer comment: Comment noted. The independent review is now available on the public access.** • Paragraph 1104 refers to a third-party review of the S&P Sephardi Community's independent daylight report. We note that this has now been uploaded to the planning register and is dated 9th December 2024, yet is summarised in the Officer's Report which was made public on Thursday 5th December. We note that we have not previously been provided with a copy of this report or had the opportunity to respond. **Officer comment: It is noted that the LPA for inclusivity reasons and to encourage public engagement accepts representations made after the publication of the Agenda and until the date before the determination of the application, as it has been done with the current representation.**

	• As set out in the report we have submitted three letters of objection to date. However our second letter of objection dated 15th November 2024 does not appear to be included within the appendices/supporting documents presented to Members. **Officer comment: Comment noted. The representation is available on the CoL website. Although it was missed from the original background papers pack, it is now included as part of this addendum, for completeness.**

2.4. The following points are raised in the support letters received:
- The development is in the heart of the City of London and should be allowed.
- The Synagogue is surrounded by tall buildings.
- The proposed community hub within Holland House would establish an inclusive community.

2.5. It is noted that some representations, both in support and objecting to the proposed development, although always available on the CoL's website, have been missed from the background papers. These are included in the background papers of this addendum.

3. Sustainability

An updated GLA whole life-cycle carbon spreadsheet has been submitted, following alignment with the previous RICS (Royal Institute of Chartered Surveyors) calculation methodology version 1 as per the GLA's requirement, and some other minor adjustments.

3.1. Paragraph 1240:

The table - figures (kg/CO2/m2) are revised as follows:

A1-A5: 813

A-C (excl. B6-B7): 1,483

B6+B7: 822

A-C (incl. B6-B7): 2,305

3.2. Paragraph 1241 to be replaced with the following.

The proposed whole site development would result in overall whole life-cycle carbon emissions of **95,198,683 kgCO2** being emitted over a 60-year period. Of this figure, the operational carbon emissions would account for **33,941,165 kgCO2** (35.7% of the building's whole life-cycle carbon), and the embodied carbon emissions for **61,257,518 kgCO2**, (64.3% of the building's whole life-cycle carbon).

4. Corrections

4.1. Please note the following errata corrections:

4.2. Paragraph 219:

Overall, Officers considered the site to be acceptable for a tall building and a strategic delivery site supporting the consolidation of the City Cluster. As a matter of planning judgement, it is considered the proposal would accord with London Plan Policy D9 A, C and D, Local Plan policies CS7 (1,2 and 4-7) and CS 14 (1 and 4), draft City Plan 2040 S12 and most relevant parts of S21.

4.3. Paragraph 220:

It is recognised that, due to the proposal's location within the Creechurch Conservation Area, there would be a conflict with CS7 (3), CS 14 (2) and therefore London Plan D9 (B). There would also be a degree of conflict with emerging policy S21 (5) due to the impact on Holland House. This conflict with Development Plan policy is addressed at the end of the report when considering whether the proposal accords with the Development Plan as a whole, as part of the Planning Balance.

4.4. Second paragraph on page 563 and paragraph 1374 on page 1018:

It is the view of officers that as a matter of planning judgement, in particular as the effect of the proposal will be to advance Local Plan Strategic Objective 1, and as policy CS1 is complied with, as policies relating to office floor space delivery, Eastern/City Cluster and public realm would be complied with that, notwithstanding the conflict with CS12 (Historic Environment) , DM12.1 (Managing Change affecting all heritage assets and spaces), CS7 (3) (Eastern Cluster), CS14 (2) (Tall Buildings); Draft City Plan Policies 2040 S11 (Historic Environment), S21(5) (City Cluster Key Area Of Change) and London Plan D9 B (3) (Tall Buildings) and HC1 (Heritage Conservation and Growth), the proposals would comply with the Development Plan when considered as a whole.

4.5. Please note that an error in the paragraphs' numbering has been identified in the agenda report, repeating the numbering of paragraphs 1330 to 1379 twice on different pages.

Reasons for comment:	
Comments:	The development is in the heart of the city of london, of course it should be allowed. All the objections because of the synagogue being shaded miss that the synagogue is already surrounded by very tall buildings, and almost always in the shade already. This one will hardly make it much worse. Many people saying they are objecting to "save the synagogue". This is ridiculous, the synagogue is not going anywhere, it will not be touched. I hope city of london don't bow to nimbys.

Kind regards

hgh

10 December 2024

Dear Ms Tastsoglou,

Bury House, 1-4, 31-34 Bury Street, London EC3A 5AR: Response to Report to the Planning Application Sub-Committee

On behalf of our client, The S&P Sephardi Community, we write further to our previous letters dated 15 May 2024, 15 November 2024 and 28 November 2024, in relation to the planning application (ref. 24/00021/FULEIA) and the related Listed Building Consent application relating to the redevelopment of Bury House, 1-4, 31-34 Bury Street, EC3A 5AR.

In light of the extensive objections received by the City of London to this application (including over 1,400 public objections) it is disappointing to see that Officers recommend approval of these applications. We will not repeat our objections here but instead we make several observations and clarifications in relation to the content of the Committee Report.

We would also like to reiterate our strong concern regarding the date and timing of the Committee, taking into account the nature of the public objections, many of which come from the Jewish community. The Committee is to be held on Friday 13th December, which is one of the earliest Shabbats of the year. This makes it at best inconvenient for many objectors to attend or watch the Committee, and the situation is worsened by the fact that there is another large and contentious application on the agenda prior to the Bury Street applications. We have already alerted the City of London numerous times as to the difficulties that the timing of the Committee presents for our clients and the wider Jewish community.

In relation to the 574-page Committee Report, we make the following observations. To be clear, we maintain all of our previous objections and do not respond here to the content of the report (much of which we disagree with) - instead we largely focus on key factual, procedural points and clarifications.

- In the summary on page 3, the report refers to 'several objections' having been made by third parties, and on page 8 'a number of objections' is referred to. This wording is misleading and does not accurately convey the extent of public (over 1,400) and statutory objections that have been received in response to the application.

  We appreciate that the full extent of objections is set out elsewhere in the report and accompanying appendices, however due to the length of this document the accuracy of the summary is very important.

- Page 10 summarises the findings of BRE's Independent Review of the applicant's Lunar Transit Study prepared by GIA (this is repeated later in the report). The way that this is presented omits to mention BRE's conclusion that (our emphasis) '*the relative reduction in the hourly visibility of the lunar bracelet from the Synagogue courtyard would be significant with the proposed development in place*'. Rather, the report attempts to portray the impact as insignificant, through a selective presentation of figures.

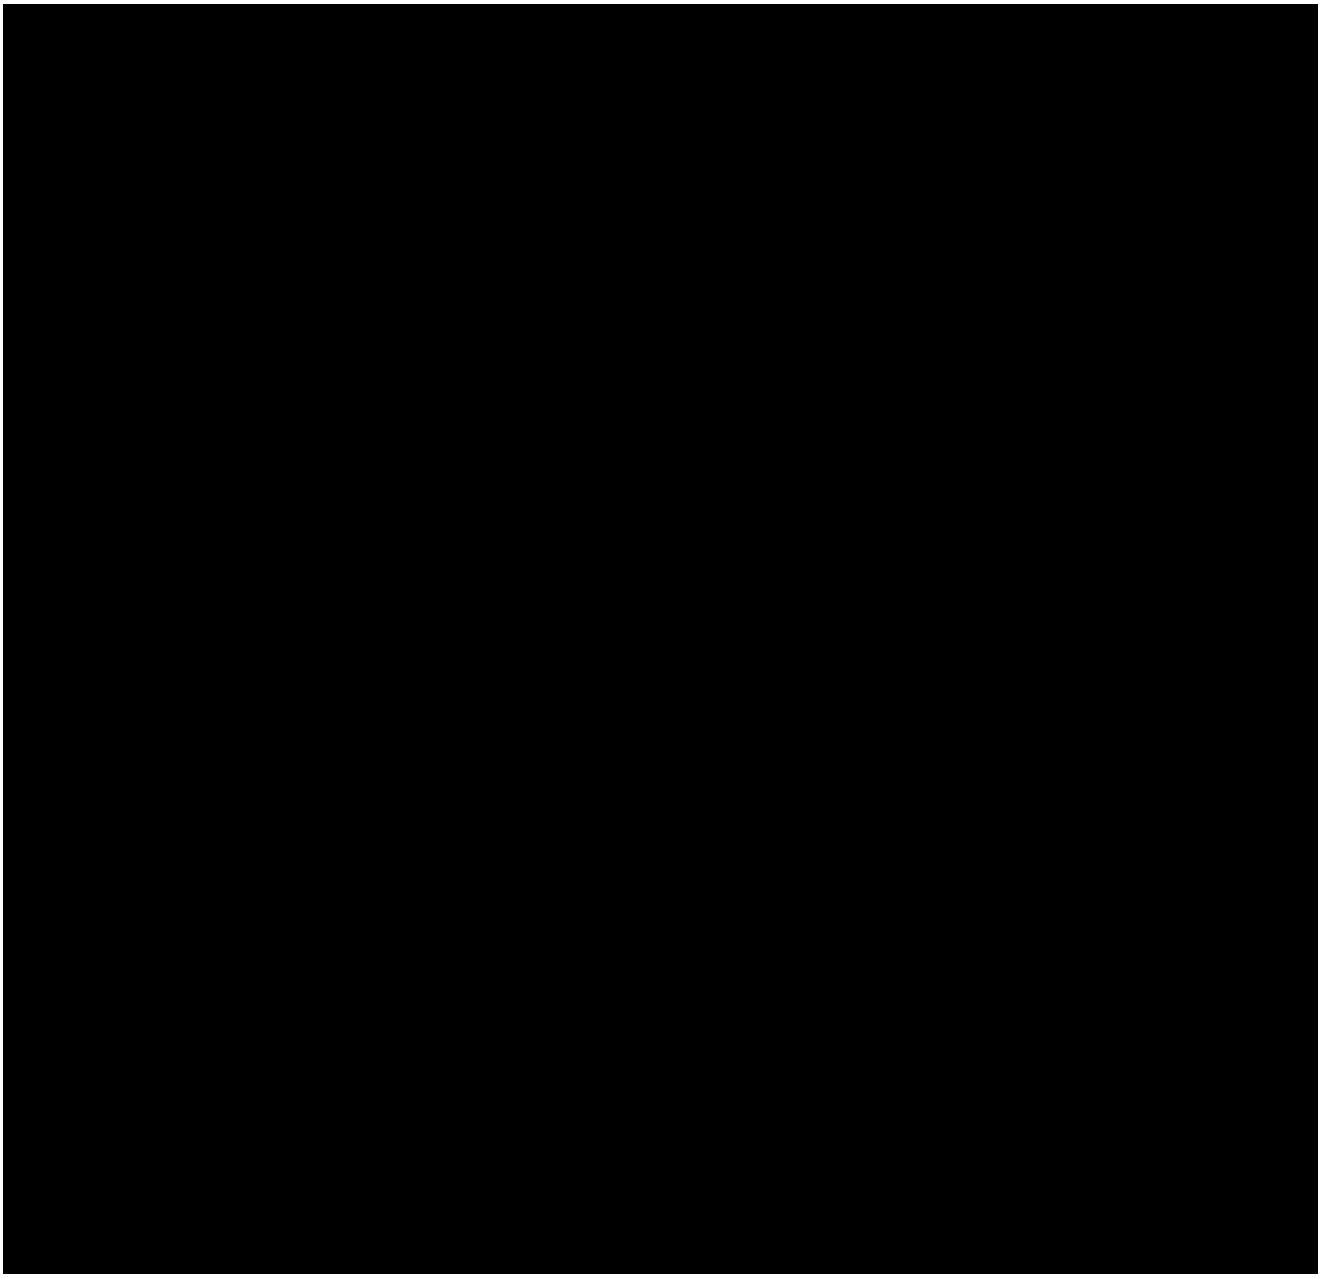
  We also strongly disagree with the statement that '*in theory there would always be enough visibility to recite the prayer*' (in the summary and paragraph 458). The Lunar Review prepared by Rabbi Shalom Morris and submitted alongside our objection dated 15th November 2024 found that, based on analysis of the GIA data, the proposed tower would result in the loss in the ability to recite the prayer in 3-5 months per year, causing a reduction in the occasions that the community are able to recite Kiddush Levana by between 33% and 55%.

- Paragraph 11 of the Committee Report states that the site is not located within the immediate setting of Bevis Marks Synagogue, as defined in the emerging Local Plan. There are extensive objections specifically regarding the immediate setting policy in the emerging Local Plan, therefore this should be given very little, if any, weight by Members when considering the applications (in accordance with paragraph 48 of the NPPF). 'Immediate setting' is not an established concept in heritage terms.

- Paragraph 182 states that Policy CS14(2) of the adopted Local Plan '*does not require that every application for a tall building in a conservation area must be refused; other factors should also be considered*'. In fact, Policy CS14 could not be clearer in its wording that all applications for tall buildings within conservation areas should be refused: '*To allow tall buildings of world class architecture and sustainable and accessible design in suitable locations and to ensure that they take full account of the character of their surroundings, enhance the skyline and provide a high quality public realm at ground level, by: (1) Permitting tall buildings on suitable sites within the City's Eastern Cluster. (2) Refusing planning permission for tall buildings within inappropriate areas, comprising: conservation areas [...]*'. The policy does not in fact indicate that other factors should be considered.

  Paragraph 182 also states that Policy CS14(1) is supportive of the proposal. CS14(1) refers to suitable sites within the City's Eastern Cluster, it is abundantly clear from CS14(2) that conservation areas are not considered suitable for tall buildings. Therefore we strongly disagree with the interpretation of policy CS14 which is set out in paragraph 182; in fact the proposal represents a head-on and unambiguous conflict with Policy CS14, which in our view is downplayed within the report.

- Paragraph 429 states '*it has been argued by S&PSC and other objectors that there is a 'sky view' of the Synagogue from the entrance to the courtyard, where the building is seen with clear sky above*'. This is a strange choice of wording - it is factual that there is a view of the sky from within the courtyard and this is not a subjective argument. Paragraph 429 and the following paragraphs seek to downplay the importance of the sky view, despite abundant evidence having been presented of both the practical and spiritual significance of this view, which we do not repeat here. We strongly disagree with the assertion in paragraph 449 that '*the proposal would, in most areas of the courtyard, be seen only as a glimpsed and partial presence*'.



- Paragraph 453 implies that the 'theme of objection' of the moon view was not raised as part of the S&P Sephardi Community's objections to the previous application at this site. This is inaccurate, page 16 of the Bevis Marks Synagogue Significance & Community Impact Study dated 7 April 2021 and submitted as an objection to the previous application clearly states that *'In fact, a special prayer (kiddush lebana) is recited each month upon only seeing the moon in the night sky, something we won't be able to do if buildings block out our views of the eastern and southern sky)'*. It is true that the objection relating to the moon view is more clearly articulated in relation to the present application; this is not a reason to downplay its importance, but instead a reason to pay closer attention.
- Paragraph 461 refers to a third-party review of the applicant's daylight/sunlight assessments. We have not been provided with a copy of this third-party review and it does not appear to be available on the planning register. We again request a copy of this document.
- Paragraph 1104 refers to a third-party review of the S&P Sephardi Community's independent daylight report. We note that this has now been uploaded to the planning register and is dated 9th December 2024, yet is summarised in the Officer's Report which was made public on Thursday 5th December. We note that we have not previously been provided with a copy of this report or had the opportunity to respond.
- As set out in the report we have submitted three letters of objection to date. However our second letter of objection dated 15th November 2024 does not appear to be included within the appendices/supporting documents presented to Members.

We look forward to your response on the matters raised above.

Yours sincerely,

[redacted]

You don't often get email from shahida.victor@greenhousesports.org. Learn why this is important

THIS IS AN EXTERNAL EMAIL

Dear Ms Tastsoglou,

I am writing to share my support for the planning application for Holland House(24/00021/ FULEIA and 24/00011/LBC).
Having connected with the team at Bury Street and after hearing about their proposals to establish a community hub at Holland House, I believe there is a wonderful opportunity to establish a truly inclusive community which breaks down barriers currently dividing people of different backgrounds.

My post code is NW1 5NS and I wish to ensure that my support for the above application is captured.

Yours sincerely,
Shahida Victor

Ms Anna Tastsoglou, Principal Planning Officer,
Environment Department
City of London
PO Box 270,
Guildhall,
London EC2P 2EJ

26 March 2024

Dear Ms Tastsoglou,

Re: Bury House, 31 Bury Street, EC31 5AR
Full Planning Permission reference: 24/00021/FULEIA (Bury House 1 - 4, 31 - 34 Bury Street) and
Listed Building Consent: 24/00011/LBC (Holland House 1 - 4, 32 Bury Street)

The planning application 24/00021/FULEIA and associated application for listed building consent 24/00011/LBC includes for the demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys; partial demolition of Holland House and Renown House; erection of four storey extension resulting in ground plus 8 storeys at Holland House; and a three storey extension resulting in ground plus 5 storeys at Renown House.

The LAMAS Historic Buildings Committee **object** to the planning application and for listed building consent application on the grounds of the harm it would cause to the Bevis Marks Synagogue, a Grade I listed designated historic asset, and the loss of significance of the Creechurch conservation area.

24/00021/FULEIA (Bury House 1 - 4, 31 - 34 Bury Street)
We have written on two previous occasions in 2021 expressing our objections to the planning applications submitted for 20/00848/FULEIA Bury House, 31 Bury Street, London, EC3A 5AR. As you will know, this scheme was subsequently refused in June 2022, with the reason cited as:

1. The development would adversely affect the setting of the Grade 1 listed Bevis Marks Synagogue and its setting and amenities by reason of the overbearing and overshadowing impact of the development on the courtyard of the Synagogue (which harms would not be outweighed by the public benefits of the proposal).

2. The development would adversely affect the setting of the Tower of London World Heritage Site by reason of the less than substantial harm caused to LVMF view 10A.1 from the Tower Bridge North Bastion and the resulting harm to the Outstanding Universal Value of the World Heritage Site, as highlighted by Historic England in their letter of objection.

The City of London Local Plan January 2015; Policy DM 12.2 Development in conservation areas identifies that: *Development in conservation areas will only be permitted if it preserves and enhances the character or appearance of the conservation area.*

Contrary to that stated in the applicants DAS Vol 1; page 14, the proposed development is within the Creechurch conservation area.

24/00011/LBC (Holland House 1 - 4, 32 Bury Street)
Holland House is a Grade II* listed building first listed in June 1972 and amended in September 1997. The scheme 24/00011/LBC proposes the partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys.

The City of London Local Plan January 2015; Core Strategic Policy CS12: Historic Environment identifies the need: *To conserve or enhance the significance of the City's heritage assets and their settings, and provide an attractive environment for the City's communities and visitors, by safeguarding the City's listed buildings and their settings, while allowing appropriate adaptation and new uses.*

Policy DM 12.2 Development in conservation areas, para 3.12.10 further identifies that: *In the design of new buildings or alteration of existing buildings, developers should have regard to the size and shape of historic building plots, existing street patterns and the alignment and the width of frontages, materials, vertical and horizontal emphasis, layout and detailed design, bulk and scale,*

Policy DM 12.3 Listed buildings states:

1. *To resist the demolition of listed buildings.*

2. *To grant consent for the alteration or change of use of a listed building only where this would not detract from its special architectural or historic interest, character and significance or its setting.*

Para 3.12.14 further identifies that: *Where extensions are proposed, in order to be acceptable, they should be located where they minimise the effect on the listed building concerned, and should always be appropriate in scale and character. The bulk, height, location and materials of roof extensions will be particularly critical and should be appropriate to the period and style of the building and its setting.*

This has been reinforced by the establishment of the Creechurch conservation area, which encompasses both the Grade II* Holland House and the Grade I listed Bevis Marks synagogue.

The application 24/00021/FULEIA for the demolition of Bury House and erection of a new building is, in our opinion, materially of little difference to the previous 2020 scheme. The committee therefore still remain of the opinion that:

1. The proposal for the 43-storey tower immediately adjacent to the grade I listed Bevis Marks Synagogue will still profoundly harm the exceptional significance of the Synagogue in its setting by further eroding its prominence in its immediate surroundings. The reason as stated in paragraph one of the letter of rejection therefore still relates .
2. Whilst it is acknowledged that the proposed building has a slightly amended profile, we do not consider that this provides sufficient mitigation to change the less than substantial harm on the London View Management Framework view as stated in paragraph two of the letter of rejection.

The application for listed building consent 24/00011/LBC for the partial demolition of the Grade II* Holland House and the construction of four further storeys would cause a significant detrimental effect on the Grade II* listed building, in contravention of Policy DM 12.3 Para 3.12.14

The proposed development is within the Creechurch conservation area, and in the opinion of the committee, will have a significant detrimental impact on the character and appearance of the conservation area, in contravention of Policy DM 12.2.

For the reasons set out above, the LAMAS Historic Buildings Committee therefore continue to object to the planning application and for listed building consent application on the grounds of the harm it would cause to the Bevis Marks Synagogue, a Grade I listed designated historic asset, and the loss of significance of the Creechurch conservation area.

Yours sincerely,

Vicki Fox (Hon. Secretary)
LAMAS – Historic Buildings & Conservation Committee

THE ROYAL PARKS

Anna Tastsoglou
Principal Planning Officer
Environment Department
City of London
PO Box 270
Guildhall
London
EC2P 2EJ

10 April 2024

Dear Anna Tastsoglou,

RE: Planning Application: 24/00021/FULEIA
Address: Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR
Proposal: Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works

Thank you for providing The Royal Parks (TRP) the opportunity to comment on the above-mentioned planning application.

The Royal Parks is the charity responsible for managing London's Royal Parks on behalf of the Department for Culture, Media and Sport, and ultimately, the Crown. There are eight Royal Parks within Greater London covering almost 2,000 hectares. All of the Royal Parks are designated as Metropolitan Open Land (MOL) under Policy G3 of the London Plan (March 2021). MOL comprises strategic open land within the urban area that "*protects and enhances the open environment*".

THE ROYAL PARKS

The Regent's Park, Greenwich Park and St James's Park are designated heritage assets, being Grade I listed on Historic England's Register of Parks and Gardens, as well as Conservation Areas. In addition, Greenwich Park is a Special Area of Conservation and forms part of the UNESCO World Heritage Site of Maritime Greenwich, and Primrose Hill is a designated heritage asset.

One of The Royal Parks' charitable objects is to protect, conserve, maintain and care for the Royal Parks, including their natural and designed landscapes and built environment, to a high standard consistent with their historic, horticultural, environmental and architectural importance. This includes protecting them from potential harm – notably visual harm - caused by proposed development outside the Royal Parks.

Having reviewed the Heritage Statement submitted in support of this planning application, we believe that although the development may not be visible form The Regent's Park and St James's Park, it will be visible from Greenwich Park. This includes the view from the General Wolfe statue, which is a protected view, as set out in the London Plan.

In light of our charitable objects, TRP is concerned that the additional massing of the proposed development would be detrimental to the views and visual amenity experienced by visitors to the aforementioned Royal Parks. We therefore object to this planning application and hope that our comments will be considered in your determination.

We welcome the opportunity to comment further on this matter should the need arise. Please send your correspondence to estatesandprojects@royalparks.org.uk.

Yours sincerely,

Katherine Drew
Estates Manager

[redacted]

I write as the President of the Jewish historical Society of England to object to the development at 31 Bury Street London EC1 – Application Reference 24/00021/FULEIA

The Society's members include academic historians, teachers and researchers of history, with a deep understanding of the significance of Bevis Marks Synagogue to the history of the Jews, of London, and of the UK more broadly. We also wish to make some points regarding the planning aspects:

1. We support and endorse the comments made by SAVE in their response to consultation on the proposed Creechurch Conservation Area:

   The Bevis Marks Synagogue is one of the most important historic synagogues in the world, and of international significance. The sensitivity of its setting was a key reason for the refusal of recent plans to erect a 47 storey tower in place of the building at 31 Bury Street and a 27 storey immediately adjacent on Heneage Lane. On this basis, we consider the inclusion of 31 Bury Street, as presented in Options 2, 3 and now our proposed Option 3 Plus, to be both logical and justified. If the Synagogue is to be a fundamental feature of the proposed conservation area's special interest, including its immediate setting is both logical and necessary if the integrity of its grade I listing and the conservation area is to be enforceable. (SAVE Response to consultation – 1st November 2023)

2. Current City of London planning policy is not to allow tall buildings in Conservation Areas. The designation of this Conservation Area, as recently as January 2024, would therefore be rendered meaningless if the proposed development were to be granted consent. Further, it is quite clear that the proposal would be seriously harmful not only to Bevis Marks synagogue, but to other heritage assets within the Conservation Area.

3. In short, the proposed development would destroy the setting of the synagogue, overshadow the building and its courtyard, and significantly reduce its standing both nationally and locally.

4. The application is undoubtedly premature, pending adoption of the City Plan 2040, including the evaluation of locations suitable for tall buildings. This process should not be undermined by the grant of consent for a tall building in this totally unsuitable location.

5. The redevelopment of this site cannot be justified by the limited planning benefits which the developers are putting forward in support. The development would represent a clear breach of local Planning Policy, and of national policy

with regard to Conservation Areas and Heritage Assets, and the benefits offered fall far short of justifying these breaches.

6. We therefore respectfully request that permission is REFUSED.

We look forward to hearing from you.

Miri Rubin

President of the Jewish Historical Society of England

PLANNING APPLICATION (24/00021/FULEIA) - OBJECTION
BURY HOUSE, 31 BURY STREET

From:
PNatali
14LeasideAvenue
London
N103BU

Date: 2 April 2024

Application Reference:	24/00021/FULEIA
Address:	Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR
Proposal:	Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.
Case Officer:	Anna Tastsoglou

I object to this planning application (24/00021/FULEIA) at Bury House, 31 Bury Street.

I have previously objected to a similar application (20/00848/FULEIA) on the same site.

The previous application (20/00848/FULEIA) was refused on 22 June 2022 by the City Corporation, in part, because "*The development would adversely affect the setting of the Grade 1 listed Bevis Marks Synagogue and its setting and amenities by reason of the overbearing and overshadowing impact of the development on the courtyard of the Synagogue (which harms would not be outweighed by the public benefits of the proposal), contrary to Local Plan Policy CS10.1 (ensuring buildings are appropriate to the setting and amenities of surrounding buildings and spaces); Local Plan Policy CS12 (conserving or enhancing the significance of the City's heritage assets and their settings and providing an attractive environment to the City's communities) and London Plan Policy GG1 (Building strong and inclusive communities, promoting fairness, inclusivity and equality)*.".

The current application (24/00021/FULEIA) is of no greater merit than the previous, refused, application; the current application would also have an overbearing and overshadowing impact on the Synagogue and its courtyard and it would be at the expense of the Jewish community. I am therefore very concerned about the current application.

Bevis Marks is the oldest continually functioning Synagogue in the UK, with families able to trace their roots back to the early days of the community in the 17th century. It is an important part of this country's multi-faith heritage and is an active and vibrant Synagogue and community. It is a pity that the wannabe developer is seeking to obtain planning consent for a scheme that will be detrimental to the Synagogue, its community and its wider place in Britain's heritage.

My objections to the current proposals are many and include, in part, the following:

- The proposed 45 storey tower would completely overwhelm the Grade 1 Listed Synagogue building, which is of enormous historic and cultural significance.
- The proposed tower would overshadow the Synagogue and its courtyard for much of the day. It would further reduce the already minimal daylight that penetrates into the Synagogue, making it even more difficult to conduct worship. It would also reduce the ability for the Synagogue's courtyard to be used for rituals and celebrations.
- Although the wannabe developer's Design and Access Statement sets out (at 5.4a3) that the current proposals include a height reduction from the previous proposals such that, it is claimed "*The height reduction and stepped form of the upper sections are purposely designed to minimise any adverse impact to views from the [Synagogue's] courtyard*", this is disingenuous as the wannabe developer is incorrect *viz* in order to minimise any adverse impact to views from the Synagogue's courtyard there should be NO new development visible from the Synagogue's courtyard. (See also comments concerning light above.)
- Irrespective of any qualities of design or sustainability, a building of the size and scale proposed is simply inappropriate to be built so close to a Grade 1 Listed Synagogue building; a similar approach would not be permitted adjacent to St Paul's Cathedral and there is no good reason for such an approach to be acceptable adjacent to Bevis Marks Synagogue.
- The City of London's heritage, and the Jewish community's centuries old ability to worship at the Synagogue, should not suffer at the expense of alleged benefits that the wannabe developer contends might become available elsewhere in the area. Britain's Jewish community and its heritage do matter and must be preserved.
- The development site is within the Creechurch Conservation Area. Current planning policy is not to allow tall buildings in Conservation Areas, so there is a direct conflict between the proposed development and the statutory development plan. The City Corporation would be disingenuous were it, on the one hand, to create the Creechurch Conservation Area and, on the other hand, to remove the very restrictions pertaining to the Creechurch Conservation Area that benefit the Synagogue and its setting.

I request that the City Corporation rejects the proposed development.

Thank you for your attention.

15th March 2024

Dear Anna,

I am writing on behalf of the British American Project in support of WELPUT's proposals for the future development of Bury House, Holland House, and Renown House - planning application reference 24/00021/FULEIA.

The British-American Project (BAP) hosted a series of meetings at Holland House in 2023 in order to recruit new Fellows into our Transatlantic Leadership network. In total, we held seven meetings with roughly 50 participants, including many prospective new members, over the course of four days and all went flawlessly.

Making a strong first impression to these prospective members was important to us and Holland House delivered! Candidates and BAP Fellows alike all commented on such a beautiful and historic setting. The central London city location and professional boardroom setting was perfect for our needs. On one occasion, a meeting attendee was able to join virtually via Zoom and the availability of A/V facilities was also greatly appreciated.

As a mostly self-funded, value-led non-profit organisation, we are always looking for ways to conserve our scarce funds and finding suitable, affordable meeting space in London has been a constant challenge. Holland House is ideally situated to address this need with a central location, easy transport links, professional meeting rooms and lobby areas, and additional support facilities.

I sincerely hope you'll consider the benefits that organisations like BAP will gain through the continued use of Holland House when you are determining this WELPUT's application.

EAST LONDON COMMUNITY BAND

Together in music

25 March 2024

Dear Ms Tastoglou,

1-4, 31, and 33-34 Bury Street, London EC3A 5AR – Planning Reference 24/00021/FULEIA

I am writing on behalf of East London Community Band in support of the planning application being brought forward by WELPUT for the redevelopment of Bury House, Holland House and Renown House.

ELCB is a volunteer-run charity providing music-making opportunities for musicians of all ages and abilities. When it comes to performance spaces, affordable, secular spaces are very rare; we often hold our concerts in churches or school halls, which meet our budget but are often poorly lit, inadequately heated, and not fit for purpose. There is a notable dearth of spaces in the City to rehearse and perform free of charge.

On the 29th August 2023, we were invited to tour the spaces within the historic Holland House and to have a discussion about how we could utilise these spaces in future. Following this, on the 27th October 2023 we held our first band music and community social evening on the first floor of Holland House, something which we will look to doing more in future. We currently rehearse in a former Victorian school which is only partially accessible, which is an increasing concern as some of our members have restricted mobility. It is a key objective of our organisation to make our sessions available at an accessible site. The proposed development would be especially welcome particularly as the proposals include an auditorium space in a great, central London location.

I therefore welcome the proposed application in principle and hope the that the City of London Corporation will approve the proposals, which I hope will make a positive contribution to the long-term cultural success of the City.

Kind regards

Suzanne Gorman

Dear Ms Tastoglo,

I am writing on behalf of The Sapphire Employability and Wellbeing Academy in support of the redevelopment of Holland House.

Sapphire was opened in 2015 to help support families and individuals ages 5- 35 years old with all things related to employability and wellbeing such as housing support , food support , CV workshops, employment , and general work within the community to help benefit their day to day lives.

Places like Holland house let us continue our work in the community offering a free space where we can get together face to face and be comfortable within the space. Approving this will benefit not only the community but the charities that use the space.

At Sapphire we support the application which we can see being an incredible space where we can continue to support our young people.

Kind regards.

1-4, 31, and 33-34 Bury Street, London EC3A 5AR – Planning Reference 24/00021/FULEIA

Dear Ms Tastoglou,

I am writing on behalf of St Barnabas Primary Schools in support of the planning applications being brought forward by WELPUT for the redevelopment of Bury House, Holland House and Renown House.

The Learning Crowd invited us to attend a facilitated workshop for our year 6 students on the 21st June within the historic Holland House. The opportunity for the children to experience a different part of the City we feel it really helped to open their eyes to the world of work in an area which some may have felt was not open to them. The spaces within Holland House are unique and knowing we have such an impressive building within reasonably close proximity of St Barnabas - with spaces which we can use - is very exciting both for us as teachers and for our students.

Spaces such as Holland House do not become available very often, and the Applicant's approach, opening this up for members of the public to visit alongside providing workspace for schools and other educational charities, is to be applauded. The children have all passed on their feedback and the workshops we took part in were a real success! We will absolutely take advantage of the offer again in future.

We therefore support the application in principle, which I believe will make a positive contribution to the long-term economic success of this part of the city.

Kind Regards,

Lauren Castle
Head of School

Dear Anna,

I trust this message finds you well. I am writing regarding the planning application for Bury House, Holland House and Renown House (Planning application reference number: 24/00021/FULEIA).

Stagetext are a charity working for deaf access in the arts. We have a registered office in Colchester, but our staff work remotely and are based across the south of England. Earlier this year, Holland House generously allowed us to use their space, to deliver a training session, and for a team building day. This accessible and economic space was invaluable to us as a small organisation spread across a large geographic area.

Looking ahead, we are keen to develop our relationship with Holland House, and look forward to using the space again to support access in the arts, as well as our own team building and cohesion, which is fundamental for our continued success.

The planned development of Holland House would be incredibly useful for us in terms of connecting with local organisations and supporting Holland House with the accessibility of their plays and art exhibitions.

Thank you for considering our input. Please do not hesitate to reach out if you require further information, or if there is anything else we can do for you.

Warm regards,

Oliver Webster – [redacted]

Dear Anna Tastsoglou,

Subject: Letter of support for planning application reference number 24/00021/FULEIA

I am writing to express support for WELPUT applications to redevelop key locations. I was fortunate to be able to use one of these spaces to convene a meeting for my research team within UCL's Population, Policy and Practice Research and Teaching Department at UCL Great Ormond Street Institute of Child Health. We met on 15th December 2023 with 11 team members, using the Boardroom space at Holland House. I am grateful to the team for their kind offer to host us and for all their help in coordinating with us to host this event.

Our research team primarily focusses on addressing urgent issues in relation to children and young people's health and wellbeing and can directly impact policy and practice in key fields. Affordable spaces in a central location are rarely available to academic research teams, with limited funding outside of direct research activities, therefore this was a rare and unique opportunity to gather like-minded colleagues; to reflect as a team on our research findings and discuss future directions. This time was also utilized by UCL students to present and be supported, providing valuable experience to researchers just starting out in their career. The environment and welcoming of a setting is well established as an influence on the way people think, behave and can contribute and perform intellectually. How lucky we were to have this opportunity which helped across those domains. Further, bringing people into the city contributes both ways to the vitality and the excellence of this great City. My PhD students who are on relative low incomes really enjoyed it – and it certainly inspired.

Such spaces will be hugely impactful for future research endeavours, providing a space and opportunities to meet with key stakeholders, connect with researchers from other organisations and convene events to share project findings and generate impact.

We look forward to continuing to use Holland House in 2024, as well as following restoration of the beautiful heritage building.

Sincerely,

Dr Lee D Hudson

15 March 2024

Dear Ms. Tastsoglou

On behalf of the University of Liverpool Alumni Team, I would like to share my support for the proposals being brought forward by WELPUT (application reference 24/00021/FULEIA).

In September 2023, we were thrilled to host 'Getting Ahead London' at Holland House. For our event, we utilized several spaces within the beautiful, historic building to accommodate our students, graduates, and alumni speakers, totalling approximately 26 attendees. We used two of the seminar style rooms, kitchen, reception, and boardroom, which were all spacious areas that hosted our panel sessions and networking area, where our attendees had the opportunity to connect and share experiences.

The feedback we received from our attendees was extremely positive with many commenting on the comfortable facilities and the convenient, central location opposite the Gherkin.

Looking ahead, we hope to continue using Holland House, both in the short term and following restoration of Holland House, and delivery of the wider scheme. We are excited about WELPUT's proposals for the Site and the proposed new affordable and accessible spaces which will attract more education providers like ours, to the heart of the City.

Sincerely,

Samantha Riella

Dear Ms Tastoglou,

I am writing to express our support for the planning application (reference number 24/00021/FULEIA) for the redevelopment of Bury house, Holland house and Renown house which includes the cultural strategy around supporting the local community; schools and charities.

We at Mind in Brent, Wandsworth, and Westminster believe that Holland House has proven to be an exceptional venue for events, offering a conducive and versatile environment for different types of gatherings. We are confident that by considering Holland House as an alternative venue, Mind in Brent, Wandsworth, and Westminster can optimise our initiatives in the following areas:

- **Board Meetings:** Holland House provides a professional and tranquil setting, fostering an atmosphere conducive to strategic discussions and decision-making.
- **Team Away Days:** The surroundings of Holland House offer an ideal escape from the daily routine, promoting team building, collaboration, and creative thinking among staff members.
- **In-House Staff Training Sessions:** The facilities at Holland House can accommodate various training needs, providing a comfortable and focused environment for staff development.
- **External Corporate Training Programmes:** The versatile spaces available at Holland House are well-suited for hosting external corporate training programmes, including our specialised offerings like Mental Health First Aid.
- **Community Events:** Holland House offers a welcoming and inclusive space for hosting community events, such as art exhibitions and film screenings, allowing Mind in Brent, Wandsworth, and Westminster to engage with the local community in a meaningful way.

We are enthusiastic about the prospect of seeing Holland House become an additional space that we can use for the important work carried out by Mind in Brent, Wandsworth, and Westminster.

Yours sincerely,
Tom Acres

Subject: Letter of objection to planning application 24/00021/FULEIA

To members of the City of London Planning Committee

Wednesday the 24th of April 2024

Planning application 24/00021/FULEIA and listed building consent 24/00011/LBC

I am writing to object to the proposed new building and extensions of buildings that are the subject of planning application no. 24/00021/FULEIA and listed building consent 24/00011/LBC.

Last Thursday, the 18th of April, Rabbi Morris of the Bevis Marks Synagogue was invited to attend the City Deanery Clergy Chapter to tell us about the planning application for a 44 storey office block just a few metres from the synagogue. He explained that a very similar application had previously been rejected by the Planning Committee; that a Conservation Area had been proposed, but that the site of Bury House had been omitted from it; and that when that site was then included in the Conservation Area (which unusually still seems to permit new tall buildings) the new City Plan document relating to the Bevis Marks Synagogue's 'immediate setting' (document ED-HTB29) did not include the site of Bury House, which is where the 44 storey block would be built: a tall building that would substantially impact the synagogue and so should surely be included in the immediate setting—which would in turn suggest that the planning application should be rejected. I notice that the buildings adjacent to Bury House have also been omitted from the 'immediate setting', yet the planning application proposes adding additional floors to these, which would also substantially impact the synagogue, suggesting that these buildings too should be included in the immediate setting—which would again suggest that the planning application should be rejected.

As I was listening to Rabbi Morris at that meeting I could not help drawing the conclusion that the property developer that has submitted the planning application might have achieved a substantial level of influence in the City of London Corporation. I had no evidence that this was the case, but my long experience of relationships between local authorities and property developers during eighteen years as Rector of the parish that includes the Greenwich Peninsula suggests that that could be a possible explanation for the initial Conservation Area plan omitting the site of the planning application, and for the Immediate Setting of the synagogue omitting the same site. Clearly an investigation is required to ensure that the developer has not been able to exert undue influence on the City of London Corporation before any decision is taken about the planning application.

This morning I visited the synagogue and explored the surrounding streets. It was immediately clear to me that to locate a 44 storey building on the site of Bury House, and to add additional floors to adjacent buildings, would, in the context of existing tall buildings, completely hem in the synagogue and remove most of its natural light. This unique synagogue, a Grade I building that has been in constant use by the Jewish community for over three hundred years, and that unusually for a historic City building has its original interior intact, would experience significant harm, as would the community that uses it.

I understood from Rabbi Morris that the developer has offered space for community use in the buildings that it now owns. What it might have failed to realise is that temporary community benefit can never substitute for permanent community and heritage harm, which is what it is planning to inflict on London's Jewish community and on its synagogue: an unconscionable thing to do, particularly at such a complex and difficult time for London's Jewish community.

Please, for the sake of the City's heritage, and for the sake of its Jewish community, reject this planning application; forbid the building of new tall buildings in conservation areas; and do all you can to protect the precious heritage that the City of London Corporation holds in trust for London and its people.

Yours sincerely

Malcolm Torry

City of London
PO Box 270
Guildhall
London EC2P 2EJ

13.05.24

Dear Ms Tastsoglou

RE: Planning Application: 24/00021/FULEIA
Address: Bury House 1 - 4, 31 - 34 Bury Street London EC3A 5AR

I am writing to register the Foundation for Jewish Heritage's **strong objection** to the above application. Our objection relates to the negative impact that the proposed development would have on the Grade I listed Bevis Marks Synagogue (NHLE List Entry Number: 1064745). Bevis Marks is the oldest surviving synagogue in the UK and is arguably the most important Jewish heritage site in the country. The Synagogue is of exceptional significance both to the UK's Jewish community and in the history of the City of London, in which Sephardic Jews played a pivotal role.

In respect of the previous application, our trustee Esther Robinson Wild wrote a comprehensive objection dated 01.02.21. All of the points made in this document apply to the new application.

In addition, we would like to make the following points in support of our objection to the new application:

1. The alterations made to the proposal since the previous application **do not address the grounds on which it was refused,** including the unacceptable impact on the Synagogue. We welcomed the planning committee's refusal of the previous application and can see no reason for this decision to be undone by the new application. Indeed, the subsequent creation of the Creechurch Conservation Area and the widening of the new proposal's footprint strengthen the case for refusal.

2. The Foundation's previous objection stated that we expected a robust and thorough assessment of the significance of a Grade I listed heritage asset which may be impacted by a major development of this nature and that we were concerned by the absence of such. We remain concerned that **no such assessment has been adequately carried out.**

   The Environmental Statement Volume 2: Heritage, Townscape and Visual Impact Assessment submitted with this application includes a single page heritage assessment devoted specifically to Bevis Marks Synagogue (sections 8.124-8.139). It includes no attempt to assess the evidential or communal significance of the site, points raised in our previous objection. The assessment is incomplete and inadequate for a Grade I listed site of outstanding historical interest.

Foundation for Jewish Heritage
Reg. Charity No: 1162111

We again call for a thorough Statement of Significance for Bevis Marks Synagogue to be prepared along with a robust assessment of potential harms to significance caused by the proposed development.

3. We fundamentally disagree with the assumption of the heritage assessment that the setting of Bevis Marks Synagogue makes no contribution to its significance, and that therefore the proposed development would result in 'no harm' to significance. We fully support Historic England's position that the setting does in fact contribute to the significance of the Synagogue. We believe that the proposed development will cause **substantial harm to the setting of Bevis Marks Synagogue.**

4. The proposed development sits within the Creechurch Conservation Area, which was created in part to achieve '*Fuller recognition of the Jewish history of the locality*' (Creechurch Conservation Area Proposal, City of London Corporation, December 2023). The application must be determined in accordance with the City of London Local Plan 2015. Core Strategic Policy CS14: Tall Buildings clearly states that the City will **refuse planning permission for tall buildings in conservation areas.**

   The proposed development would contravene both CS14 and DM12.2 which states that development in conservation areas will only be permitted if it preserves and enhances the character or appearance of the conservation area.

5. The proposed development would mean that the Synagogue's courtyard would be **overlooked to an unacceptable extent**. The visualisation of the view from the courtyard submitted with the proposal (Environmental Statement Volume 2: Heritage, Townscape and Visual Impact Assessment, View 45a proposed, pp211-212) shows how there would be views into the courtyard from the majority of floors of the proposed Bury House.

   The Synagogue courtyard was designed as a **secluded, peaceful and private space for spiritual practice.** and has been used in this way for three centuries. The overlooking of the courtyard would represent a very substantial change to the privacy and intended atmosphere of the space.

   While we agree with the Environmental Statement that the change to the view from and into the courtyard will be 'large', we **strongly disagree** with the assessment of the view as being of only 'medium' sensitivity, and find it difficult to understand the conclusion that the effect would be 'moderate' and 'beneficial'.

6. The Foundation for Jewish Heritage is concerned with the conservation of Jewish built heritage. It is not a religious organisation; therefore we defer to the congregation of Bevis Marks Synagogue in assessing the impact of the proposal on their religious practice. We fully support the congregation's position that the proposed development would have a **serious, negative impact on their ability to carry out religious rituals.**

We hope that the reasons for our objection will considered in your determination and would welcome the opportunity to provide further comments if needed.

Yours sincerely,

Katherine Findlay
Projects Officer

Email: anna.tastsoglou@cityoflondon.gov.uk

Dear Anna,

Re: Planning Application Reference: 24/00021/FULEIA.

I have delayed my response to this Planning Application as it is so inappropriate and in such conflict with its surroundings that I was hoping that the applicant would see sense and withdraw this ridiculous application. Disappointingly as this is not the case, I would firstly draw your attention to the fact that this application is no better in its negative impact than the last application by this applicant, refused only two years ago by the City. The reasons for that refusal are abundantly clear and just as relevant to this current application.

Consequently, I write to object in the strongest terms to the application for the proposed redevelopment of 31 Bury Street ("the Scheme"). The construction of a 45-storey tower on this site will cause wholly unacceptable "substantial" harm to the neighbouring Grade I listed Bevis Marks Synagogue and the Creechurch Conservation Area within which both the Synagogue and the application site now sit..

The main points of my objection and opposition to the Scheme are as follows:

The proposed 45-storey tower on this site would result in **substantial harm** both to the setting of the Grade I listed Synagogue and to the wider Creechurch Conservation Area. This tall office tower, so close to the synagogue, would both block the sky view and overshadow the Synagogue and its courtyard. The sky view is of great importance for reasons of religious ritual. Adequate daylight and sunlight are vital to enable the building (which largely relies on natural light and candles) to function as a place of worship; and to enable both the building and its courtyard to continue to support the many community activities which have been ongoing for over three centuries. **This is totally unacceptable.**

The Scheme is in direct conflict with the Statutory Development Plan. The application site is within the recently created Creechurch Conservation Area. Local Plan Policy CS14 provides that planning permission for tall buildings should be refused within inappropriate areas, which specifically includes Conservation Areas. The benefits claimed by the Developer for what is an ordinary office redevelopment, do not begin to outweigh the fundamental conflict with the Development Plan.

As noted above, the City rejected a very similar scheme at 31 Bury Street only two years ago. The Scheme makes only a modest reduction in height to 45 storeys and has a larger footprint than the previous scheme which was rejected. On a point of principle, the City must show **consistency in its decision-making** by refusing this latest scheme. The principle and desirability of consistency in planning decision-making is well established, and the City should always set an example in such matters.

To add weight to this point, since the previous Bury Street application was refused, the City has adopted the Creechurch Conservation Area. That decision, supported by the Conservation Area Appraisal, reflected the uniqueness of the Synagogue and purported to protect it and its setting. The City specifically decided that the boundary of the Conservation Area should include the Bury Street site and recognised the importance of the Synagogue's wider setting. This point was accepted by the Chairman of Planning in answer to a question from Alderman Jones at the Court of Common Council on Thursday 7th March 2024.

To approve this Scheme, in conflict with the Development Plan and these previous decisions, would be **inconsistent and undermine confidence in the planning process**.

With regard to its **Public Sector Equality Duty**, the City must consider the disproportionate negative impact this Scheme would have on the Jewish Community of Great Britain which worships at the Synagogue and for whom the Synagogue and surrounding Jewish sites hold incalculable religious and historic value. This point is reinforced by the strength of objections received so far.

In conclusion, to approve this scheme would be an act of vandalism and heathenism, seemingly reflecting a lack of historical, cultural and religious understanding by the Corporation, and its failure to appreciate the significance of the Synagogue as the oldest and most important Sephardi Jewish Synagogue within the UK, as well as the most important Anglo-Jewish site within the UK, which has been in continuous use as a place of worship for over 300 years.

The Jewish Community has been forced to fight repeated planning battles through no fault of its own. If the City wishes to uphold its legal duties and stand by its Jewish community it will **reject the proposal.**

It is a **matter of outrage** that the Chair of Policy, the "Political Leader" of the City, has recently declared a pecuniary interest in this development as a Director of JBP, a public affairs and lobbying company, employed on this project by the Developer. Although the Policy Chair does not sit on the Planning and Transportation Committee, he is highly influential within the Corporation, chairs the Policy and Resources Committee and is a member of the Local Plans Sub-Committee. These oversaw both the creation of the Conservation Area (which was originally intended to exclude the 31 Bury Street site, until there was overwhelming consultee rejection of that approach) and draft new City Plan (which seeks to **undermine** the importance of Bevis Marks as a historic place of worship, by **limiting its protection** only to an artificially concocted "immediate setting" - a term which is not recognised in Conservation and Planning Law - and by removing the general presumption against tall buildings in Conservation Areas).

The Corporation's international reputation hinges upon it behaving with the utmost probity, and holding itself to the highest standards. What is happening here is in danger of seriously undermining that reputation.

Yours sincerely

Sir Michael Bear

Bevis Marks Synagogue - Planning Application Ref: 24/00021/FULEIA

To the Planning Committee:

Introduction

It is only four years since a 48-storey office building was proposed about 25 metres away at 31 Bury Street. After a world-wide campaign, which I understand generated more objections that the City Corporation has previously experienced, it refused permission; primarily because of the unacceptable impact on the synagogue.

Yet here we are again. The synagogue is again under threat.

I have visited the historic Bevis Marks Synagogue as a member of The Arts Society. I was delighted to learn it is a Grade 1 listed building dating from 1701. As the first purpose-built synagogue erected in England after Jews were re-admitted by Oliver Cromwell in 1656, and being the only European synagogue building to have been continuously holding regular services for over 320 years, it is of major historical importance.

It is my understanding that the architect was Master Builder Joseph Avis, a Quaker. He and his craftsmen had worked for Sir Christopher Wren. The building thus has architectural as well as religious significance. Its age and history make Bevis Marks of major symbolic value to Jewry as does St Paul's Cathedral to the Christian community. It is important to understand that Bevis Marks is not a museum, it is a living, vibrant community which would be affected by this development if allowed.

Action

It is essential that the City Corporation, known for it environmental sensitivity, refuses the planning application (24/00021/FULEIA). Otherwise, approval of this 43-storey tower block will make a mockery of the City's 2023 listing in 'The Creechurch Conservation Area'. It would be a historical travesty.

The Development

1). It is clear that the height and bulk of this proposed 43 storey tower block will completely dwarf and overshadow Bevis Marks Synagogue - a Grade 1 building of architectural and historic interest in a Conservation Area.

2). The proposed 43 storey tower will overshadow and seriously impair forever the existing limited area of natural sky which enters the Synagogue's courtyard. Lighting is condusive and central to people who wish to pray in their place of worship. I understand that because of the historic nature of the synagogue installing additional electric lights is not feasible.

3). I understand that in 2023, the Creechurch Conservation Area was approved by the

City of London Council so as to protect Bevis Marks and the Grade 11 St. Botolp's-without-Aldgate from development.. Therefore, if the City Corporation approves this development it will be contrary to its own planning statutory development plan.

4). The developers are claiming to provide substantial planning benefits that will outweigh any harm sustained to the synagogue. Unfortunately many developers make similar claims which regrettably later are unviable once construction proceeds. If claims made by this developer cannot be guaranteed how will the Corporation prevent irrevocable damage to the Synagogue's loss of amenity and purpose? The danger is that the historic Bevis Marks could thus face a threat of closure, a tragedy for this architectural gem and precious piece of religious heritage.

It is obviously essential for the Corporation of London to resist this potential vandalism.

Yours sincerely

Stanley Gelbier, HonFFPH, MA, PhD, FDS, FCGDent FAAHD, DDPH, DHMSA

City of London Conservation Area Advisory Committee

Department of the Built Environment,
Corporation of London,
P.O. Box 270,
Guildhall,
London EC2P 2EJ

8th May 2024

Dear Sir/Madam,

At its meeting on 25th April 2024 the City of London Conservation Area Advisory Committee considered the following planning application and reached the decision given below:

C.64 24/00021/FULEIA - Bury House 1 - 4, 31 - 34 Bury Street, London EC3A 5AR
Creechurch Conservation Area/Aldgate Ward. No Ward Club rep.
Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/cafe (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

The Committee strongly objected considering that the development proposals would result in the gross overdevelopment of this site in the Creechurch Lane Conservation Area, with a significantly negative impact on the character and appearance of the immediate Conservation Area and its setting. The proposals were considered to be highly damaging to the local townscape quality in the nearby street-scene context, with harmful consequences for important listed buildings that were in close proximity. The lack of architectural quality and refinement of the proposals was noted, together with their significant negative impact on wider townscape views and heritage context of the site's City/central London location.

I should be glad if you would bring the views of the Committee to the attention of the Planning and Transportation Committee.

Yours faithfully,

[redacted]

Mrs. Julie Foxa
Secretary

re.: Application (24/00021/FULEIA). 31 BURY STREET

I have just discovered that you have received another application to amend the Creechurch Conservation Area and am writing again to express my great disappointment and opposition to the proposal. I cannot see any specific improvements over the previous submission. This proposal continues to be out-of-keeping with the conservation of a Grade-1 listed building, while remaining the most important Jewish site in the UK.

The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. Such a proposal would never be considered within the vicinity of St Paul's Cathedral and should certainly not be permitted just metres from British Jewry's 'Cathedral' synagogue, particularly along its sensitive southern exposure.

I urge you to refuse this application.

Thank you for your attention.

From: [redacted]
[redacted] PLN - Comments
Subject: Comment re Planning Application 24/00021/FULEIA
Date: 21 May 2024 18:13:39

THIS IS AN EXTERNAL EMAIL

Dear Sirs

I wish to register my objection to planning application 24/00021/FULEIA– Bury House

My comment is as follows

I am once again horrified that the proposed developers, West End of London Property Unit Trust (Welput), could even think to apply to put up this proposed large and overbearing building comprising four basement levels and ground floor plus 47 upper storeys while also increasing the height of both Holland House and Renown House as all three buildings are within 25 metres of a 323-year-old synagogue of importance and historic interest and within the Creechurch Lane Conservation Area. The existing building Bury House is just eight floors.

Bevis Marks Synagogue is the oldest Synagogue in Great Britain and is still used as an active place of worship. The Grade 1 listed, plain rectangular building of red brick with modest dressings of Portland stone and two tiers of windows is unchanged since being built in 1701. The internal fittings, some of which predate the building, include seven large brass chandeliers, which are not electric as one would expect but are still lit with real wax candles.

It is unacceptable that the proposed buildings, the largest with its 47 floors and very close proximity, will completely overshadow the two-storey synagogue in its historic courtyard setting and the Beadle's House which dates from about 1890 and has been used as the rabbi's house for some years. It has been calculated that the synagogue will be in the shadow of the proposed buildings from the early afternoon onwards.

This proposal should be greatly reduced in size in order to obtain planning permission. Should that happen, particular attention must be paid during construction to possible damage to the fabric of the synagogue by ground heave, noise during synagogue services, vibration, dust and any other such annoyances.

For the above reasons and as with the previous similar planning application I believe that the current proposed plans must not be approved as they stand.

Yours faithfully

Leon Malins

THIS IS AN EXTERNAL EMAIL

Dear Sir/Madam
I'm writing to express my strong opposition to the above application (24/00021/FULEIA). I am a member of the Southend on Sea Jewish community and am disappointed to see this new proposal, particularly after its refusal two years ago, and the recent adoption of the Creechurch Conservation Area. This

new application, barely changed since the last time it was submitted, is not in keeping with the conservation of a Grade-1 listed building, which is now also in a conservation area, and is the most important Jewish site in the UK. The new tower, to the synagogue's immediate south, would dominate the setting of the synagogue, block out the religiously important southern sky-view, and overshadow the synagogue and its courtyard, dwindling its remaining light. This kind of proposal would never be considered within the vicinity of St Paul's Cathedral, and should certainly not be permitted just metres from British Jewry's Cathedral synagogue, particularly along its sensitive southern exposure. I urge you to refuse this application.

Regards

Colin Baum

15 May 2024

Dear Ms Tastoglou,

Bury House, 1-4, 31-34 Bury Street, London EC3A 5AR: Objection on behalf of The S&P Sephardi Community

On behalf of our client, The S&P Sephardi Community, we are writing to formally object to the planning application (ref. 24/00021/FULEIA) and the related Listed Building Consent application relating to the redevelopment of Bury House, 1-4, 31-34 Bury Street, EC3A 5AR.

The proposals will have a substantial and wholly unacceptable impact on the historic, Grade I Listed Bevis Marks Synagogue and the Creechurch Conservation Area within which it sits; and an unacceptable impact upon other heritage assets in the vicinity. A previous application at this site (ref. 20/00848/FULEIA) was refused only two years ago on the basis of harm to Bevis Marks Synagogue and to the Tower of London World Heritage Site. Put simply, the revised proposals do not overcome this heritage harm or come anywhere close to delivering sufficient public benefits to outweigh it. On this basis and in accordance with planning policy, the applications should be refused.

Significance of Bevis Marks Synagogue

Bevis Marks Synagogue is a hugely significant building both within the City of London and on a national level, recognised by its Grade I Listed status. The building dates back to 1701 and is the oldest and most historically significant synagogue in the country, often referred to as the 'Cathedral' Synagogue due to its significance within the Jewish faith. It is widely recognised as being of outstanding communal, architectural, artistic, historic and archaeological significance. The Synagogue stands within a courtyard which functions as part of the Synagogue and is of great value to the community as a social and religious space, for gathering before and after services and for holding events.

From an artistic and architectural perspective, the Synagogue is an excellent example of a simple, non-Anglican, 17th Century place of worship. The carpentry in the interior is of a very high quality and many original features remain. It is a building of enormous and profound significance. It has been continuously in use for worship since its construction and its discreet location within a courtyard open to the sky symbolises the complex history of Jewish people in Britain. The religious experience of the building is fundamental to its overall significance, alongside its architectural and historic significance.

When considering the impacts of the proposals on Bevis Marks Synagogue, it is necessary to understand and appreciate specific Jewish historical, cultural and religious considerations, such as the spiritual significance of the sky view and of natural light within the Synagogue.

The sky view at Bevis Marks is central to a number of rituals. The Jewish Sabbath concludes at the appearance of three stars which first appear in the darkening eastern sky. The beginning of each new Jewish (lunar) month is marked by the appearance of the new moon, at which time a special prayer (*kiddush lebana*) is recited. Should the view of the eastern and southern sky be erased, a highly important dimension of the Synagogue would be lost too.

The spiritual significance of natural daylight within the Synagogue must also be understood. The reading of printed texts is intrinsic to Jewish worship and the Synagogue was originally designed to admit plentiful light for this purpose. The only artificial light sources are candles and limited electrical lighting which was installed decades ago before the building was listed. The Synagogue has already experienced a substantial reduction in natural light as a result of the construction of other buildings. Further deterioration of the natural light will have profound implications for the religious value of the Synagogue as a spiritual space and house of Jewish prayer.

A letter from Rabbi Joseph Dweck, the Senior Rabbi of the S&P Sephardi Community of the United Kingdom, is enclosed at Appendix 2 which further explains the significance of the sky view and natural light at Bevis Marks to religious services and heritage. It is within this context and recognising the unique and outstanding significance of this Grade I Listed Building that the proposed development at Bury Street must be considered.

The Proposed Development

The proposed development comprises the demolition of Bury House and construction of a 43-storey tower, the partial demolition of Holland House and Renown House and extensions to both buildings, for office, flexible retail/café and flexible community/education/cultural/amenity uses.

Although the applicants make much of the evolution of the proposal from the previous version, in essence it is little different. A reduction in height of 19m is of no consequence when the remaining height is 178.7m, and the two high-level setbacks similarly make little or no difference to the proposed building's impact.

Indeed, the new proposal is even more damaging than its failed predecessor. The site now sits within a Conservation Area, to which statutory protection applies. Furthermore, it involves substantial alteration and extension to the Grade 2* Listed Holland House, which is a very significant heritage asset in its own right.

Planning Policy Context

Planning policy at all levels seeks to protect designated heritage assets from harmful impacts of development. Section 66 of the Town and Country Planning Act 1990 (as amended) states that:

*"In considering whether to grant planning permission for development which affects a listed building or its setting, the local planning authority, or as the case may be, the Secretary of State shall have **special regard to the desirability of preserving the building or its setting** or any features of special architectural or historic interest which it possesses".*

Section 72 of the Act states that the local planning authority also has a duty to pay special attention to *"the desirability of **preserving or enhancing the character or appearance**"* of a Conservation Area.

The Planning (Listed Buildings and Conservation Areas) Act 1990 is equally relevant. It states:

*"In the exercise, with respect to any buildings or other land in a conservation area, of any functions under or by virtue of any of the provisions mentioned in subsection (2), **special attention** shall be paid to the desirability of **preserving or enhancing the character or appearance** of that area."*

Paragraph 205 of the NPPF states that when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation, with regard to the importance of the asset, irrespective of the level of harm. Paragraph 206 states that substantial harm to assets of the highest significance including Grade I listed buildings should be *"**wholly exceptional**"*.

Paragraph 207 of the NPPF states that:

*"Where a proposed development will lead to substantial harm to (or total loss of significance of) a designated heritage asset, local planning authorities should **refuse consent**, unless it can be demonstrated that the substantial harm or total loss is **necessary** to achieve **significant public benefits** that outweigh that harm or loss'.*

Policy HC1 (Heritage Conservation and Growth) of the London Plan states that:

*"Development proposals affecting heritage assets, and their settings, should **conserve their significance**, by being sympathetic to the assets' significance and appreciation within their surroundings. The **cumulative impacts of incremental change** from development on heritage assets and their settings should also be **actively managed.**"*

National and regional policy is reflected in policies DM12.1-DM12.3 of the adopted Local Plan and policies HE1-HE3 of the emerging Local Plan. Policy CS14 of the adopted Local Plan clearly states that proposals for tall buildings within conservation areas should be refused; it seeks to:

*"allow tall buildings of world class architecture and sustainable and accessible design in **suitable locations** and to ensure that they **take full account of the character of their surroundings**, enhance the skyline and provide a high quality public realm at ground level, by:*

*[...] **Refusing planning permission for tall buildings within inappropriate areas, comprising: conservation areas;** the St. Paul's Heights area, St. Paul's protected vista viewing corridors; and Monument views and setting, as defined on the Policies Map."*

It is notable that since the refusal of the previous application at Bury Street, the Creechurch Conservation Area was formally designated in January 2024, which encompasses both the site at Bury Street and the Bevis Marks Synagogue. The designation of the Conservation Area and the boundary chosen sought to achieve[1]:

1. A 'core' of special architectural and historic interest;
2. Fuller recognition of the Jewish history of the locality; and
3. A coherent and logical boundary which appropriately reflects the extent of the special architectural and historic interest of the Creechurch locality.

The Corporation's original proposal to exclude the site of 31 Bury Street from the Conservation Area was withdrawn following overwhelming consultee support for the proposed Conservation Area but objection to this aspect.

Another relevant change since the refusal of the previous application at Bury Street is the progress of the emerging City Plan which is now the subject of a Regulation 19 consultation (between 18 April and 31 May 2024). Our client has previously raised concerns about elements of the draft Plan and will respond to the consultation separately. We will not go into detail on these matters in this response; however there are two particular matters of concern:

1. The 'immediate setting' of Bevis Marks Synagogue identified in the draft plan. There is no statutory or other authority for the concept of 'immediate' setting, so the existence of this policy is questionable. However, should a specific setting policy be included in the adopted plan, it should recognise the setting of the Synagogue in its entirety, and particularly the importance of the sky view, in a similar manner to how views to and from The Monument are recognised.
2. The plan proposes to drop a long-standing presumption against tall buildings in Conservation Areas (as set out in Policy CS14 of the adopted Plan).

Paragraph 48 of the NPPF states:

"Local planning authorities may give weight to relevant policies in emerging plans according to:

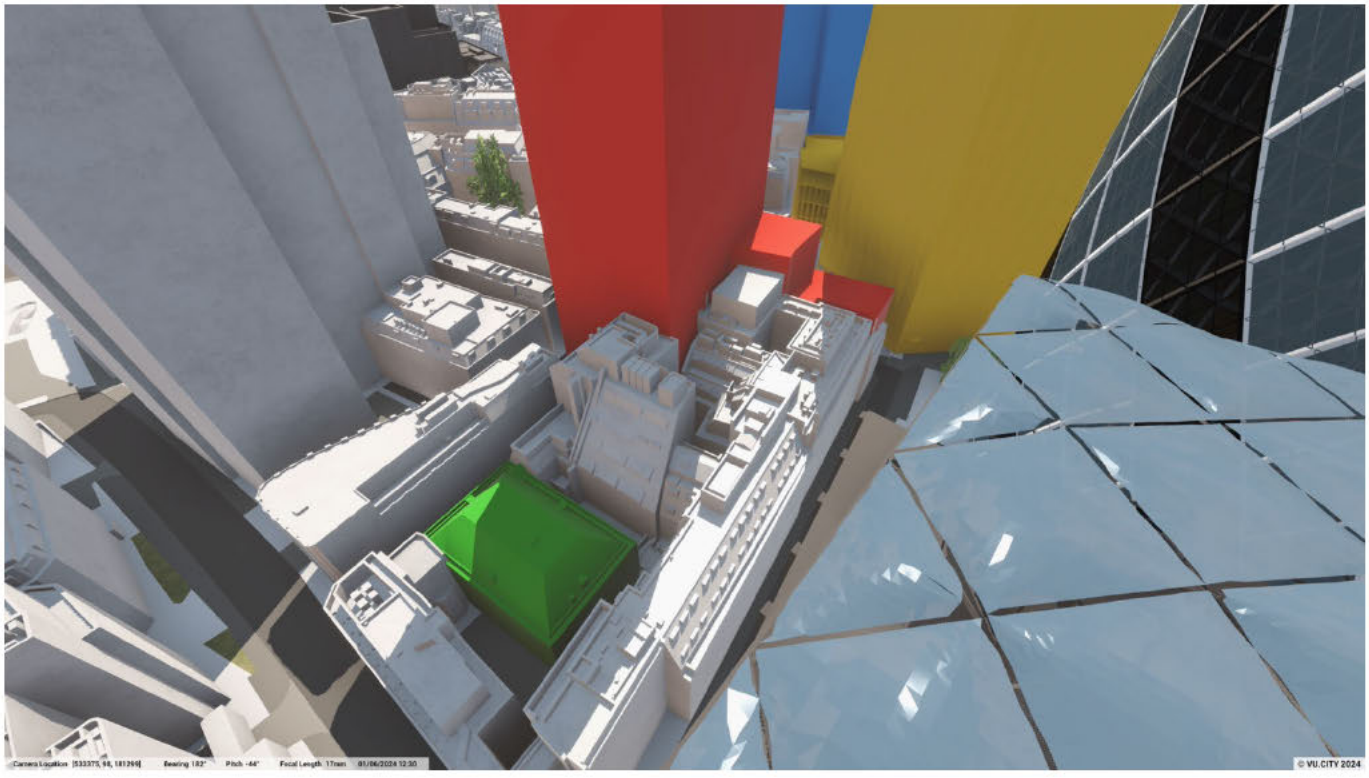
a) The stage of preparation of the emerging plan (the more advanced its preparation, the greater the weight that may be given);

b) The extent to which there are unresolved objections to relevant policies (the less significant the unresolved objections, the greater the weight that may be given) …"

In this case, very limited weight should be given to the policies in the emerging Local Plan, on the basis that it is at Regulation 19 stage and has not yet been submitted for examination, and that there are significant unresolved objections from our client and other stakeholders, relating to the fundamentally important matters set out above among other issues.

[1] CCA Proposal Presented to the Planning and Transportation Committee on 12th December 2024

Impact of the Proposals on Bevis Marks Synagogue



The application site is located only about 25m from Bevis Marks Synagogue at the closest point. This is shown graphically in the VuCity image reproduced as Figure 1 below.

The previous application at this site (ref. 20/00848/FULEIA) was refused on the basis of harm to the Bevis Marks Synagogue and the Tower of London. The first reason for refusal was:

"The development would adversely affect the setting of the Grade 1 listed Bevis Marks Synagogue and its setting and amenities by reason of the overbearing and overshadowing impact of the development on the courtyard of the Synagogue (which harms would not be outweighed by the public benefits of the proposal), [...]

Our client does not consider that the amended proposals overcome this reason for refusal. The impact of the current proposals on the Synagogue is summarised below, specifically in terms of its setting and daylight, sunlight and overshadowing.

Figure 1: VuCity Image of the Proposals (in red) - Bevis Marks Synagogue indicated in green

Heritage Impact and Setting

A Heritage Assessment of the proposed development has been prepared by Alec Forshaw, who was the author of the option three proposal for the designation of Creechurch Conservation Area (the option which was eventually endorsed by the City of London) (Appendix 1). He has a deep understanding of the local context and significant experience; in addition, he was previously the Principal Conservation and Design Officer for the neighbouring London Borough of Islington and has written widely on historical and architectural matters.

The Heritage Assessment concludes that the proposals would result in harm as follows:

- **Substantial harm** to the significance of Bevis Marks Synagogue and its setting. The report concludes that "*By reason of its height and proximity the proposed tower will overwhelm the Synagogue. The visual and psychological impact on the courtyard would be catastrophic, equally severe as the previously refused scheme*". The assessment explains that the impact on the Synagogue and its courtyard is both tangible and intangible; and that the applicant has demonstrated a lack of understanding of the significance of the Synagogue and its courtyard.
- **Substantial harm** to the character and appearance of the Creechurch Conservation Area. The report states that: "*were the proposed development to be allowed it would render the designation of the Creechurch Conservation Area virtually meaningless and to have made the whole designation and consultation process a worthless exercise*".
- **A moderately high degree of less than substantial harm** to the setting of St Katherine Cree church.
- **A moderate degree of less than substantial harm** to the setting of Grade I Listed St Botolph's.
- **A high degree of less than substantial harm** to Holland House as a result of alterations to its fabric, plan form and integrity, and the impact on its setting as a result of the proposed tower.
- **A minor degree of less than substantial harm** to the setting of Aldgate School.
- **A moderately high degree of less than substantial harm** to the setting of 2-16 Creechurch Lane.
- A serious incursion into the backdrop of the Tower of London which will cause harm to its setting.
- **A moderately high degree of less than substantial harm** to the Port of London Authority Building.
- **A moderately low degree of less than substantial harm** to the setting of 38 St Mary Axe.
- **A moderate degree of less than substantial harm** to the setting of Lloyd's Avenue Conservation Area.
- **A high degree of less than substantial harm** to Renown House as a result of the demolition of key features of the building and the impact on its setting as a result of the proposed tower.
- **A moderately high degree of less than substantial harm** to the Rabbi's House and Vestry and 2 and 4 Heneage Lane.
- **A moderately high degree of less than substantial harm** to the setting of Cree House, 18-20 Creechurch Lane, Fibi House, 22-24 Creechurch Lane, Sugar Bakers' Court, 12-14 and 27-31 Mitre Street.

The Heritage Assessment also assesses the claimed heritage benefits of the proposed development. In summary regarding the proposed benefits:

- The proposed repairs and renovations to Holland House should be regarded as routine and not a benefit (and it will suffer a high degree of less than substantial harm from the proposed works);

- The proposed reinstatement of Heneage Lane is at a different angle from the original lane and it would be gated and closed at night; the claim that this is being restored is historically inaccurate and misleading;

- The proposed reinstatement of St James Court significantly reduces the size of the existing open courtyard which sits more accurately on the original site of James Court. This causes heritage harm rather than a benefit.

Overall, the proposed development is considered to cause substantial harm to the Creechurch Conservation Area and substantial harm to the Bevis Marks Synagogue, and several cases of less than substantial harm to a range of designated and undesignated heritage assets. Cumulatively, the degree of harm is serious and must be given very great weight. The public benefits claimed by the applicant go nowhere near to outweighing the harm, and this is discussed further below.

Daylight, Sunlight and Overshadowing

A Daylight Sunlight and Overshadowing Report has been prepared by GIA and submitted on behalf of the Applicant.

Daylight

The report acknowledges at paragraph 6.8 that *'the existing baseline daylight values within the Central Room and Gallery [in Bevis Marks Synagogue] are already very low'*.

GIA has carried out a VSC assessment to demonstrate the changes to daylight at Bevis Marks Synagogue as a result of the proposed development. It initially considers the 'consented baseline', assessing the future daylight levels with surrounding consented developments built out, but without the proposed development. The report explains that when surrounding consented developments are built, the Synagogue will experience a 19.1% reduction from the existing baseline in terms of daylight to the central room, and a 20% reduction to the gallery.

When the proposed development is taken into account, the Synagogue would experience a further 10.5% reduction from the consented baseline in the central room, and a further 10% from the consented baseline in the gallery.

The GIA report says that the proposals would have a lower quantitative impact on daylight at the Synagogue than other consented developments and implies that this is of no consequence, which is misleading and downgrades the cumulative impact. However:

a) The fact that the Synagogue is already going to experience loss of daylight is not an argument in favour of the Applicant; rather, it demonstrates the need to protect the precious remaining daylight and for the current proposals to come under even greater scrutiny. If a developer proposed a polluting factory close to an area of ecological importance, no one would rationally argue that its impact on the ecological area mattered less because the habitat was already vulnerable. The very opposite is the case.

b) No account is taken of the fact that the Synagogue is illuminated primarily by natural light and by candles, or that the reading of printed scripts is fundamental to worship. This is one of the most natural light-sensitive places in London.

c) The Synagogue is simply labelled as a "religious" building, disregarding the fact that it is also the centre of a thriving community.

Sunlight and Overshadowing

The GIA report also considers overshadowing to the Synagogue courtyard. It concludes that the sunlight availability is already very limited in the courtyard, compared to what would be expected in an unobstructed open space. This is a false comparison to make in a dense urban setting like the City. It claims that already consented schemes would result in a 30-minute loss of sunlight in the courtyard on average, reducing the maximum hours to only 1.5 hours in June. The proposed development would effect a further reduction of up to 19 minutes, which it considers to be a 'marginal' reduction.

This is a glib value judgement. The fact the courtyard receives any sun makes it a valuable asset for the community uses that take place there. Losing a further 20% would undermine the benefit and utilisation of the outdoor space for that purpose.

The loss of nearly a fifth of the sunlight within the courtyard cannot rationally be considered to be of little consequence in the context of an already very low level of sunlight. Furthermore, the courtyard is treated as though it is mere circulation space, and the Synagogue is labelled only as a "religious" building. No account is taken of the fact that the courtyard space is used intensively for rituals, and for family and community activities; or that it is the only space - and indeed the original planned space - from which this remarkable heritage asset can be viewed.

Night Sky

When considering the night sky visibility, a fisheye view has been shown from three viewpoints within the courtyard; in two of these the proposed development is visible and covers part of the sky view. However, the fisheye view is not comparable to the way in which the night sky is experienced by the human eye. A more accurate view is shown in the applicant's TVIA (Figure 2 below). This shows how the proposed development would have a significant impact in blocking views of the sky from the courtyard.

None of the analysis addresses the critical religious and cultural significance of the sky view. Although very different in certain respects, there is a parallel to be drawn with Stonehenge, where the view of the sun on Midsummer's Day is essential to an understanding of the significance of this monument. Likewise, the iconic silhouette of the Taj Mahal against the sunset gives the viewer a feeling of spiritual uplift: they are no longer simply observing a fine building.

At Bevis Marks, the view of the passage of the moon across the night sky (as shown in Figure 3) is highly symbolic and intimately related to the traditions and rituals of the Synagogue, and is a most important aspect of the heritage value of the building.

Figure 2: Existing vs Proposed (cumulative) view from Bevis Marks Synagogue courtyard (Source: TVIA, The Townscape Consultancy)

Figure 3: Stills showing the passage of the moon across the sky as viewed from the courtyard

Overall, the GIA report is a typical attempt to employ technical analysis to distract the reader from the uncomfortable truth: that daylight and sunlight and the sky view are very important both to the functioning and the heritage significance of the Synagogue; that the Synagogue's daylight and sunlight is already substantially compromised; and that the proposed development would make the situation substantially worse.

Equalities

Section 149 of the Equality Act (2010) requires public authorities to have due regard to equality considerations when exercising their functions, including decision making on planning applications. An Equality Statement has been prepared by Quod and submitted on behalf of the applicant.

This Equality Statement considers the impact of the proposals on the Synagogue as a place of worship and acknowledges that the amenity of the Synagogue may be affected by the proposals, however it is said this "*would not preclude the use of these spaces for religious ceremonies*". There is no mitigation proposed.

It is considered by our client that the Equality Statement is inadequate in assessing the proposed impacts of the development on the operation of the Synagogue. A Protestant community could hold a Holy Communion service in a dark room or a disused factory. However, to do so would be strip the service of the many layers of ceremony and spectacle that make the difference between something that is a mere performance and something that carries cultural and spiritual significance. What is at stake here is the very qualities that make the Synagogue both a thriving centre of the Jewish community and the embodiment of a set of 300-year-old traditions. The author of the assessment does not demonstrate any understanding of these matters.

Not only does the Equality Statement demonstrate a lack of understanding of the impact of the proposals on the Synagogue. It implies that the impact of the proposals on the Synagogue is outweighed by other factors such as the increased provision of commercial floorspace. This may be relevant to the planning balance, but it has no place in an Equality Statement. The Statement is fundamentally flawed and certainly should not be relied upon by Officers to demonstrate their compliance with Section 149 of the Equality Act.

Planning Balance

The proposed development has been found to result in substantial harm to both Bevis Marks Synagogue and the Creechurch Conservation Area. Therefore, as per paragraph 207 of the NPPF, the application should be refused unless it can be demonstrated that the substantial harm or total loss is necessary to achieve significant public benefits that outweigh that harm.

Chapter 6 of the submitted Planning Statement sets out a series of economic, social and environmental benefits which are alleged to result from the proposed development.

The PPG[2] explains that "public benefits" should be of a nature or scale to be of benefit to the public at large and not just a private benefit.

A number of the benefits claimed by the applicant. It claims that the proposed development would make a meaningful contribution to strategic policy objectives of the Eastern (City) Cluster including delivery of additional office floorspace. However, this is spurious. Policy CS14 is clear that tall buildings should not be permitted in Conservation Areas, and the policy towards the Eastern (City) Cluster (Policy CS7) is clear that tall buildings will be restricted to appropriate sites, respecting the *"conservation of heritage assets and their settings and taking account of their effect on the wider London skyline and protected views"*.

[2] Paragraph: 020 Reference ID: 18a-020-20190723

Other claimed "benefits" include:

- Provision of affordable workspace.
- Aspiration to achieve a BREEAM 'Outstanding' rating.
- Delivery of 619 sqm of high-quality public realm.
- Urban Greening Factor of at least 0.31.
- Delivering a building that is 28.6% more efficient in terms of overall regulated operational carbon compared to the existing individual buildings.

These are not public benefits. They are simply normal policy requirements without which no large office building would be allowed anywhere in the City. Furthermore, an "aspiration" must be viewed with scepticism.

The financial "benefits" relating to S106 and CIL payments are not public benefits either: they are payments required to mitigate the impact of the development; they should be considered as neutral within the planning balance:

- CIL payments of over £10m.
- Comprehensive S106 package including contributions to affordable housing, security and skills training.

The following claimed heritage "benefits" would in fact cause heritage harm (see above):

- Reintroduction of the historic Heneage Lane. *This would be open only between 7am and 11pm, and not on the original alignment.*
- Re-establishment of St James' Court, a new pocket park. *This would be smaller, and not on the original site.*
- Restoration of and sensitive extensions to Holland House. *Renovation is a routine responsibility and many of the proposed alterations would cause harm.*

Of the remaining claimed benefits, a number are not 'true' public benefits and should not be given weight in the planning balance:

- Public art in Heneage Arcade. *This is not 'public' but located in a privately owned arcade which is shut between the hours of 11pm to 7am.*
- Aspiration to achieve other voluntary ratings such as NABERS 5*, Active 'platinum', Wired 'platinum', and Well 'Platinum'. *Mere "aspirations" should not be taken into account.*
- Dedicated cycle repair and wellness space at lower ground floor level; operation of a social enterprise which trains young unemployed adults to service office tenants' bikes. *This cannot be said to be of a scale which would benefit the public at large, as required by the PPG. Only office tenants would be likely to benefit.*

We comment on other claimed "benefits" as follows:

- Employment opportunities during the construction (270 FTE jobs over 4.8 years) and operational phase (up to 2,470 jobs). The construction phase benefits are temporary and therefore should be afforded limited weight. *The operational jobs are capable of being achieved on many other, less sensitive, sites.*
- Replacement of obsolete office space with over 34,000sqm of new high quality office space, which will meet a specific local demand for smaller floorplates. *There is no convincing evidence that the existing building is incapable of re-use, and its demolition would in any event release embodied carbon, which is a disbenefit.*
- Delivery of a new high-quality tall building and wider transformative reimagination of an urban block. *There are many other less sensitive sites where a high quality tall building could be delivered. This urban block, which is part of a Conservation Area, does not need "transformative reimagination".*
- Significant spending of new employees on-site which would equate to between £5.8m and £7.6m annually (an increase of £4.8m to £6.7m over the existing site). *As with operational jobs, this expenditure is capable of being achieved through the redevelopment of many other, less sensitive, sites.*
- Provision of 1,176 sqm of 'community workspace' at 50% market rent for qualifying occupiers or zero rent for charities. *This is a potential public benefit, though it is unclear whether it would meet a specific need. It could also be delivered on another, less sensitive site.*
- Provision of 1,072 sqm of publicly accessible space over three floors at the 'Holland House Hub' which will be free to use for community, multi-faith, cultural and education groups. *This is a potential public benefit. It could also be delivered on another, less sensitive site.*
- Provision of 'Creechurch Hall' a 339 multi-functional auditorium space delivering a range of uses such as lectures, sports and performances, for use by office tenants as well as members of the public for free at defined times. *The use of Creechurch Hall by members of the public is a potential public benefit, though it is unclear whether it would meet a specific need and it is unclear when or how often the 'defined times' would be. It could also be delivered on another, less sensitive site.*
- Provision of small and flexible retail space at ground floor level to meet local worker, visitor and residential needs. *There is no shortage of such space within the City.*
- Off-site public realm enhancement along Bury Street. *There is no need for such enhancement within what is a Conservation Area.*
- Greater than 300% biodiversity net gain. *A sensitive re-use of the existing buildings could achieve a substantial increase in BNG.*

The Heritage Assessment at Appendix 1 identifies that the scheme will cause substantial heritage harm on two counts, to Bevis Marks Synagogue and the Creechurch Lane Conservation Area. In addition, it will cause less than substantial harm on a number of counts to a range of heritage assets. Substantial harm to even one heritage asset would require "wholly exceptional" justification under the NPPF; here, the cumulative harm is such that it is difficult to envisage the sort and scale of public benefits that would have to be generated.

The package of public benefits proposed by the applicants does not add up to anything like this level of justification. They are typical benefits which any major commercial scheme would be expected to deliver, and they are generally exaggerated. Furthermore, they are not unique to the site at Bury Street, and they could be delivered elsewhere within the City of London without causing substantial heritage harm.

The previous application at this site was correctly refused on the basis of heritage harm including to Bevis Marks Synagogue. The level of harm is now significantly greater because a new heritage asset - the Creechurch Conservation Area - has come into existence. The revised proposals do not begin to overcome the heritage harm or deliver sufficient public benefits to outweigh it. On this basis and in accordance with planning policy, the application should be refused.

We reserve the right to add to this objection or submit further supporting material in due course.

Yours sincerely,

Roger Hepher

Appendix 1 – Heritage Assessment Prepared by Alec Forshaw

HERITAGE ASSESSMENT V3 ON BEHALF OF THE SEPHARDI COMMUNITY BEVIS MARKS
WITH REGARDS TO PROPOSED DEVELOPMENT AT BURY HOUSE, 1-4 and 31-34 BURY STREET
PLANNING APPLICATION REF: 24/00021/FULEIA
LISTED BUILDING CONSENT REF: 24/00011/LBC

SCOPE OF THIS REPORT

1. This report, prepared on behalf of the Sephardi Community Bevis Marks focusses on the heritage impacts of the proposals within the local and immediate area, including the Tower of London. It does not consider the potential impacts on long-distance or riverside views of St Paul's Cathedral. These matters are left to Historic England and the Greater London Authority who have a particular remit and expertise in this field, and to other London boroughs such as Lambeth and Southwark whose own protected local views may potentially be affected.

DESCRIPTION OF PROPOSALS

2. Planning permission is sought for: "Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7 metres AOD); partial demolition of Holland House and Renown House: restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05 metres AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49 metres AOD); interconnection of the three buildings; use of the buildings for office, flexible retail/café, and flexible community/education/cultural/amenity uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works."
3. Listed Building Consent is sought for: "Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works."
4. Overall, the scheme provides 34,584 square metres of office which includes 1,176 square metres of 'community workspace'; 1,411 square metres of flexible community/education/cultural space which includes a 339 square metre auditorium; 504

square metres of retail space; 4,794 square metres of plant and service accommodation. The total floorspace is 41,293 square metres, compared with 11,339 square metres in the existing three buildings.

BACKGROUND TO THE CURRENT PROPOSALS

5. In October 2020 an application was submitted for the demolition and redevelopment of Bury House, 31 Bury Street, for a 49 storey office tower. Despite officer recommendation for approval this application was refused by the City Corporation in June 2022, on two grounds, namely harm to the setting and amenities of the Grade 1 listed Bevis Mark Synagogue by reason of the overbearing and overshadowing impact on the courtyard of the Synagogue, and harm to the setting of the Tower of London World Heritage Site, neither of which were outweighed by public benefits.

6. Since then, the current applicant has acquired the adjoining properties of Holland House, 1-4 and 32 Bury Street, and Renown House, 33-34 Bury Street which are now included in this new application. Holland House is a statutorily listed building, and the proposals now require both planning permission and listed building consent.

7. The whole of the site has been included in the new Creechurch Conservation Area, approved by the City Corporation in December 2023 which necessarily introduces additional policy and heritage considerations to the previous scheme.

POLICIES TO PROTECT THE HISTORIC ENVIRONMENT

8. The following statutes, policies and guidance are relevant:

Planning (Listed Buildings and Conservation Areas) Act 1990

Under Section 66 (1) the Local Planning Authority has a statutory duty in considering whether to grant planning permission for development which affects a listed building or its setting to have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest that it possesses.

Under Section 72 (1) in considering whether to grant planning permission for development within a conservation area special attention shall be paid to the desirability of preserving or enhancing the character or appearance of that area.

Chapter 16 of National Planning Policy Framework 2023

National Planning Practice Guidance

The London Plan 2021

City of London Plan 2015

Draft New City Plan 2040 (emerging policies pre-Regulation 19)

Supplementary Planning Guidance SPDs

ASSESSMENT OF HERITAGE ASSETS AND THEIR SIGNIFICANCE

9. In order to evaluate the impact of potential development on heritage assets it is important to understand their heritage significance. The National Planning Policy Framework Annex 2 states that significance is the value of a heritage asset to this and future generations because of its heritage interest. The interest may be archaeological, architectural, artistic or historic. Significance derives not only from its physical presence but also from its setting. These criteria accord broadly with those set out in historic England's Conservation Principles, namely evidential, historical, aesthetic and communal.

1. DESIGNATED HERITAGE ASSETS

Creechurch Conservation Area

10. The Creechurch Conservation Area was designated by the City Corporation on 11th January 2024. The designation was subject to very widespread public consultation in 2023 which drew an unprecedented response both from the public as well as very many heritage bodies and sources of expertise.

11. Having initially proposed a very small area, which excluded 31 Bury Street, the City planning officer was persuaded that other options should be consulted upon. A larger area (Option 3) was adopted in line with the great majority of public opinion. It was concluded in the Creechurch Conservation Area Proposal Report December 2023 that this would achieve (1) A 'core' of special architectural and historic interest (2) Fuller recognition of the Jewish history of the locality (3) A coherent and logical boundary which appropriately reflects the extent of the special architectural and historic interest of the Creechurch locality

12. The Report also states that 31 Bury Street is "instrumental in defining the end of Heneage Lane, is physically attached to the Grade II* listed Holland House and makes a more coherent boundary at this point of the Conservation Area". The whole of the application site, including 31 Bury Street, lies within the new Conservation Area. A Management Plan is in the process of preparation but has not yet been subject to public consultation.

13. The City Planning officer's designation report in January 2024 noted the special architectural and historic interest of the area, "experienced through both character and appearance, in particular the strong and visible associations with the Roman and medieval City wall, Holy Trinity Priory and the rich Jewish history of the area exemplified by Bevis Marks Synagogue, the characterful group of historic warehouses that illustrate the area's later development, and the rich sense of diverse historic uses, and in particular faiths exemplified by the historic places of worship."

14. It is considered that the Creechurch Conservation Area has a **HIGH** level of significance in terms of the archaeological, architectural and historic criteria set out in paragraph 9 above. The communal/cultural/artistic significance of the area is **VERY HIGH** owing to the outstanding importance of the area to the establishment, development and on-going activities of the Jewish community.

Bevis Marks Synagogue

15. Listed Grade I the Bevis Marks Synagogue is of **VERY HIGH** significance. Built in 1699-1701 it is the oldest synagogue in the country and the only synagogue in Europe that has held regular services continuously for over 300 years. It represents tangible evidence for the historic and on-going relationship that the Jewish community has had with this part of the City. It is a unique centre for traditional Jewish worship and ceremony and draws a large congregation from across London and beyond. It also attracts visitors from all over the world, and current development of a museum and visitor will likely greatly increase their number.

16. The courtyard of the Synagogue is extremely important to its heritage significance, a matter that is under-appreciated by the applicant. This paved space not only provides the immediate setting for the Synagogue itself (built as was required in 1699 so as not to front directly onto a street) but it also serves as an important place of assembly, congregation and ritual. Open sky views from this secluded setting are extremely important to the character and appearance of the courtyard itself, as well as to the Synagogue Building. The sky view is not just a matter of physical setting but is also of great symbolic and ritualist importance, and a major part of the intangible cultural significance of the heritage asset. The current improvement and renovation work due to be completed shortly will further enhance the appearance and accessibility of the courtyard.

St Katharine Cree

17. Listed Grade I the church of St Katharine Cree predates the Great Fire of London, and is one of the 'anchor' heritage assets in the locality. It is of **VERY HIGH** architectural, historic and archaeological significance. Its tower is an important townscape feature and is silhouetted against clear sky in views from Leadenhall Street. Its setting is an important part of its significance.

St Botolph's Aldgate

18. Listed Grade I the church of St Botolph's Aldgate possesses **VERY HIGH** architectural and historic significance. The tower and spire rise prominently from the body of the church into open clear sky and have a landmark quality. It is noted as having

Skyline Presence in the City Corporation's Protected View SPD 2012. Its setting is therefore a very important part of its significance.

Holland House

19. Listed Grade II*, Holland House is of **VERY HIGH** architectural significance, identified as one of the 'standout buildings in the locality'. It also has **HIGH** historic significance owing to the circumstances of its construction. It does not possess any special cultural or communal significance.

Aldgate (formerly Sir John Cass) School

20. Listed Grade II* as a fine example of the 'Wrennaissance' style and for internal elements of outstanding interest, including 17th and 18th century fabric from other buildings, Aldgate School has **VERY HIGH** architectural, artistic and historic significance. Located on the site of the former Priory it has **HIGH** archaeological significance. Its setting is an important part of its significance. A sense of openness is retained in the playgrounds. The building is prominent within the locality and is the focus of a number of views from surrounding streets and open spaces.

2-16 Creechurch Lane

21. Listed Grade II, these fine five-storey former tea warehouses have **HIGH** architectural and historic significance, which 'gives a typical flavour of the locality'.

Tower of London

22. One of London's four UNESCO World Heritage Sites, the Tower of London is of **VERY HIGH** significance on all four heritage interest criteria. Its setting is also of **VERY HIGH** significance, particularly views from the south and east.

Port of London Building 10 Trinity Square

23. Listed Grade II* the prominent square stepped tower is identified as a City landmark and skyline feature in the Protected Views SPD.

38 St Mary Axe

24. Listed Grade II this well-proportioned stone-faced commercial building, designed by Sir Edwin Cooper in 1922, has **HIGH** architectural significance.

Lloyd's Avenue Conservation Area

25. The Lloyd's Avenue Conservation Area, designated in 1981 and enlarged in 2007, is focussed on the Edwardian street of Lloyd's Avenue, but also extends to include buildings on the north side of Fenchurch Street. Noted for its consistent scale, architectural style and materials it has **HIGH** architectural and historic significance. Elaborate stone dormers and turrets contribute to a dramatic roofscape on Fenchurch Street. The setting of the Conservation Area is also an important part of its significance with regards to views into and out of the Conservation Area.

2. NON-DESIGNATED HERITAGE ASSETS

Renown House 33-34 Bury Street

26. Recognised in the City Planning Officer's Creechurch Conservation Area designation report for its good quality carved stone detail, making an effective contrast with Holland House and forming a strong corner to the bend in the street, Renown House has **MODERATE** architectural and historic significance

Rabbi's House and Vestry, 2 and 4 Heneage Lane

27. Sitting either side of the east elevation onto Heneage Lane of the Grade I Synagogue the red-brick 19th century Rabbi's House and the Vestry are important to the ensemble of religious buildings and have **MODERATELY HIGH** architectural, historic and cultural significance.

Cree House 18-20 Creechurch Lane; Fibi House 22-24 Creechurch Lane; Sugar Bakers' Court; 12-14 and 27-31 Mitre Street

28. A coherent group of unlisted 19th and 20th century brick-built warehouse buildings of generally four storey scale which possess good architectural detailing and proportion, and make an important contribution to the local townscape. They have **MODERATELY HIGH** architectural and historic significance.

IMPACT OF THE PROPOSAL ON HERITAGE ASSETS

Creechurch Conservation Area

29. The proposed scale of development will have a very harmful impact on the character and appearance of the Conservation Area. The planning officer's designation report notes that the existing 31 Bury Street forms the corner with Creechurch Lane and is important in

framing Heneage Lane. Similarly, the height, mass and scale of other post-war buildings in the Conservation Area, such as 33 Creechurch Lane, 5-10 Bury Street, 32-40 Mitre Street, 10-16 Bevis Marks, 71-77, 78-79 and 80 Leadenhall Street and Cunard House are considered to be sympathetic to their context. All these buildings, despite having no particular architectural merit, are noted for maintaining the historic building line and the prevailing scale of street blocks. The existing 31 Bury Street does exactly that.

30. The only existing tall building within the Conservation Area, One Creechurch Place, is included because of its historic association with the site of the Great Synagogue, although the building itself does not contribute positively to the character and appearance of the area. The Planning Officer's report does refer to the 2017 consent (which has been granted a Certificate of Lawful Development) to redevelop 24 Bevis Marks with a 19 storey office building, but it should be noted that this is immediately next to the much taller 70 St Mary Axe, and so immediately in its shadow. The proposed tower at 31 Bury Street has a very different context, next to Holland House, Cunard House and the warehouses in Creechurch lane.

31. The designation report notes that Bury Street forms an obvious division between the more historic granular scale to the east and the much larger and more modern scale of the City Cluster. There is no case whatsoever for allowing a tall building on the north side of Bury Street. The height scale and mass of the proposed tower will overwhelm the Conservation Area, from almost every possible direction. Views 46 and 58 of the applicant's HTVIA illustrates the impact that will be had on Creechurch Lane, Mitre Street, Heneage Lane, Bevis Marks and Bury Street. While it might be argued that some individual views cause less than substantial harm in their own right, the continuum of views down so many streets from within and into the Conservation Area from outside will result in a cumulative impact that causes **substantial harm** to the character and appearance of the Conservation Area. Indeed, were the proposed development to be allowed it would render the designation of the Creechurch Conservation Area virtually meaningless and to have made the whole designation and consultation process a worthless exercise. As a precedent it would potentially undermine the ability to preserve and enhance any of the City's conservation areas, and indeed have implications nationwide.

Bevis Marks Synagogue

32. By reason of its height and proximity the proposed tower will overwhelm the Synagogue. The visual and psychological impact on the courtyard would be catastrophic, equally severe as the previously refused scheme. The serious incursion into the open sky views will fundamentally undermine the intrinsic secluded and dignified quality of the space. The loss of light to the interior of the Synagogue is also a major concern. The

impact on the Synagogue and its courtyard will be both tangible and intangible, as explained in the assessment of significance in paragraphs 15 and 16 above.
33. The applicant's HTVIA includes Views 45A and 45B, deemed by the applicant to be of 'medium' sensitivity, and where the impact is described as 'moderate and beneficial'. Such an analysis demonstrates a complete lack of understanding by the applicant of the significance of the Synagogue and its courtyard.
34. The setting of the east elevation of the Synagogue fronting Heneage Lane will also be harmed, being totally dominated by the new tower, although no view is provided of this in the applicant's HTVIA.
35. Overall, the proposals cause **substantial harm** to the significance of the Synagogue and its setting.
36. The harm caused will also do much to spoil Bevis Marks as a potential visitor attraction which in turn will harm the City Corporation's ambitions to increase tourism.

St Katharine Cree

37. No verified view has been provided by the applicant from the south side of Leadenhall Street looking northwards down Creechurch Lane. (View 46 in the HTVIA does not cover this). This important view is flanked on the right by the charming tower of the church, seen against clear sky, and on the left by Cunard House, with the view terminated by the existing 31 Bury Street. The massive height of the proposed tower will radically alter this view and cause a **moderately high** degree of **less than substantial harm** to the setting of St Katharine Cree.
38. It is unclear whether the proposed tower will also impinge into the existing secluded space of the churchyard to the rear of Mitre Street and Creechurch Lane which is surrounded at present by low buildings. No verified view has been provided from the southern side of the churchyard.

St Botolph's

39. Although some of the HTVIA views presented by the applicant show that the tower and spire of St Botolph's Church is already impacted by the 19 storey mass of One Creechurch Place, it is considered that the much greater height and prominence of the proposal, almost immediately behind, will further erode the landmark qualities of St Botolph's. View 38 has been taken from a position where the new tower will arguably be covered by other proposed tall buildings behind. No view has been provided further west along Aldgate which would show that the proposed tower at 31 Bury Street will rise significantly above One Creechurch Place and challenge the landmark quality of St Botolph's. It will cause a **moderate** degree of **less than substantial harm** to the setting of

this Grade I building and will diminish the skyline presence identified in the Protected View SPD.

Holland House

40. The proposal involves radical alterations to the fabric, plan form and integrity of Holland House. The demolition of most of the east elevation, the insertion of a large new staircase, the capping off and enclosure of the internal lightwell and the opening up of its floor plans to link continuously with the new building at 31 Bury Street and the rebuilt Renown House will greatly change and reduce the individual identity of Holland House. The proposals effectively subsume Holland House into one huge floorplate building running across the entire application site. These appear to be major and irreversible changes.

41. The four-storey roof extension is out of proportion with the original five storey building, appearing top heavy. This is clearly apparent in Views 42, 43 and 60 of the applicant's HTVIA.

42. The setting of Holland House is massively affected by the proposed tower. Despite the vertical format of Views 43 and 60 they do not manage to include the full height of the tower. While One Creechurch Place is visible in the existing View 60, the impact of the proposal, immediately adjacent to Holland House, will be far greater.

43. The immediate setting of the south elevation of Holland House will also be severely harmed by the scale and proximity of the new tower at 31 Bury Street. This is shown in the illustrative CGIs Figures 6.6, 6.8 and 6.10 of the applicant's HTVIA Volume 2. The height and scale of the undercroft is completely out of proportion to Holland House, and the existing forecourt between 31 Bury Street and Holland House is substantially reduced in width. View 58 shows how the existing Bury House is sympathetic in scale to Holland House, whereas in the proposal it will appear visually crushed by the overwhelming scale of its neighbours.

44. Overall, the proposals cause **high** degree of **less than substantial harm** to the significance of this designated heritage asset.

Aldgate School

45. The comparatively modest height (19 storeys) of One Creechurch Place is already visible as a backdrop to views of the school from Aldgate, and has a negative impact. View 41 of the HTVIA, looking down Mitre Street, shows how much taller the new tower will be, having an additional negative impact, by increasing the undesirable sense of enclosure and overlooking. It will cause a **minor** degree of **less than substantial harm** to its setting.

2-16 Creechurch Lane

46. The existing massing of 31 Bury Street, occupying the corner with Creechurch Lane, provides a sympathetic scale and context to the five storey scale of 2-16 Creechurch Lane. The setting of these fine warehouse buildings will be adversely affected by the proposed tower which will become an overpowering presence in the street. It will cause a **moderately high** degree of **less than substantial harm** to the setting of these listed buildings.

Tower of London

47. It is acknowledged that Historic England is the heritage body best equipped to comment on the impact of the proposals on the Tower of London World Heritage Site. Several views provided in the applicant's HTVIA clearly show that the proposal will be a serious incursion into the backdrop which will cause harm to the setting of the Tower of London.

48. The applicant's justification that the new tall building will be part of the northern 'foothills' of the City Tower Cluster seems a tenuous and unconvincing argument. Far from softening the existing edge provided by curved form of 30 St Mary Axe (the'Gherkin') the new tower at 31 Bury Street as seen in View 9 makes a very undesirable intrusion into LVMF 10.1A, reducing the prominence of the south-west turret of the White Tower. Views 25, 26, 27, 28 and 30 show how the existing curved edge of 30 St Mary Axe will be negated and exceeded by the new tower, appearing as a taller outlier to the cluster.

49. The HTVIA also provides views from within the precincts of the Tower. View 23, from the Inner Ward, shows how the proposed tower will intrude into the existing clear sky above the east end of the Royal Chapel. View 24 shows the tower rising above 2 Tower Green. View 49 demonstrates that the proposed tower will fill the existing clear gap between the town houses and the tower of the Royal Chapel, a view of 'high sensitivity'. View 51 shows incursion into the existing clear sky above the Watergate.

50. The applicant's assertion that the proposed tower would signify a new 'edge' to the City Tower Cluster is highly contentious; indeed, the opposite is likely. If approved it would likely set a precedent for allowing further towers in the Conservation Area, including for example 33 Creechurch Lane.

Port of London Authority Building 10 Trinity Square

51. Views 28 and 50 of the HTVIA show how the new tower will impinge on the skyline presence of the landmark tower of the PLA Building. It will cause a **moderately high** degree of **less than substantial harm** to this aspect of its heritage significance.

38 St Mary Axe

52. View 55 of the HTVIA shows that the existing clear sky view above the listed 38 St Mary Axe will be infringed by the proposed tower. No other proposed or approved tall buildings are visible in this view from Clerks Place. Owing to the narrow nature of St Mary Axe this is the only long view of the frontage. The proposal will cause a **moderately low** degree of **less than substantial harm** to the setting of this designated heritage asset.

Lloyd's Avenue Conservation Area

53. The Lloyd's Avenue Conservation Area Character Summary and Management Strategy SPD, adopted in January 2012, identifies various views within the Conservation Area which are important to its character and appearance and its heritage significance : "The double curve of Lloyd's Avenue creates a series of subtly different views north along Lloyd's Avenue, with each building viewed obliquely and collectively in groups. At the top of the street, Furness House, 105-106 Fenchurch Street, has a dominant presence and terminates the view with its imposing central pedimented bay being gradually revealed upon approach".

54. Views 40 and 52 in the applicant's HTVIA show that the proposed tower at 31 Bury Street will form a very prominent backdrop to the existing continuum of views. It will appear as an intrusive and alien element in a remarkably unified existing townscape and will cause a **moderate** degree of **less than substantial harm** to the setting of the Lloyd's Avenue Conservation Area.

Renown House 33-34 Bury Street

55. The proposal involves the retention of only the two stone street facades of Renown House. The existing mansard roof, dormer windows, prominent chimney stack and the complete interior of the building are to be demolished. The proposed additional vertical floor harms the architectural proportions and balance of the original design and appears crudely detailed. The ungainly proportions of the proposal are apparent in View 59 of the HTVIA, seen from Cunard Place. The additional mansard and dormers are also poorly detailed, unsympathetic to the Edwardian character of the building. New floor levels are inserted to line through with the rest of the development and will result in bulkheads crossing the existing window openings, as shown in Figures 6.3, 6.5. 6.11 and 6.12 of the HTVIA.

56. The setting of Renown House will also be overwhelmed by the roof extensions to Holland House and the height of the tower. This harmful impact is illustrated in Figure 6.1 and Views 42 and 60 of the applicant's HTVIA, and although they do no show the full height of the tower. Views 42 and 59 show how the existing chimney stack and pots of Renown House are currently seen against the sky, something that is completely lost in the

proposal. The scheme will cause a **high** degree of **less than substantial harm** to this non-designated heritage asset.

Rabbi's House and Vestry, 2 and 4 Heneage Lane

57. The massive scale of the proposed tower at the southern end of Heneage Lane will dominate the townscape of Heneage Lane whose existing modest scale is an inherent part of its charm. The proposal will result in a **moderately high** degree of **less than substantial harm** to these non-designated heritage assets which front onto Heneage Lane either side of the east end of the Synagogue.

Cree House, 18-20 Creechurch Lane; Fibi House, 22-24 Creechurch Lane; Sugar Bakers' Court; 12-14 and 27-31 Mitre Street

58. This important group of late 19th century warehouses sits directly opposite and very close to the existing 31 Bury Street which at present is a consistent scale with its neighbours. While View 41 of the HTVIA is taken from Leadenhall Street, no closer view down Mitre Street has been provided which would show how the existing 31 Bury Street is an entirely appropriate scale relating to the Mitre Street warehouses. The massive height and scale of the proposed tower and its base will dominate and overpower the existing townscape and will result in a **moderately high** degree of **less than substantial harm** to the setting of these non-designated heritage assets.

COMPLIANCE WITH POLICY

59. It is considered that there is clear conflict with the statutory duties to protect the significance of listed buildings and to preserve and enhance the character and appearance of the Creechurch Conservation Area.
60. The proposal breaches Policy D9 of the London Plan which require the protection of heritage assets
61. The proposal conflicts with Local Plan policies to conserve and enhance the City's conservation areas. The proposal conflicts with Local Plan Policy CS14 (2) which states that tall buildings are not appropriate within conservation areas. While the draft City Plan 2040 proposes to change that policy it can be given very little weight at this stage.
62. The proposal conflicts with Local Plan Policy CS13 (2) to protect City landmarks and skyline features.
63. The proposals conflict with policies that seek to protect the setting of the Tower of London World Heritage Site.

ASSESSMENT OF HERITAGE BENEFITS PROPOSED BY THE APPLICANT

64. The applicant suggest that a number of public benefits will be provided by the development including some that are claimed to be heritage benefits. These are addressed and evaluated below.

65. Repairs and renovations are proposed to internal and external features of Holland House. This should all be regarded as routine repair and upgrading which any responsible owner of a listed building would automatically undertake. The assertion in Paragraph 2.32 of the applicant's Planning Statement that repairs to the faience tiles of Holland House can only be viably funded and delivered through the wider redevelopment of the site seems fanciful and hard to prove. The £ 4 million cost estimated by the applicant for faience repairs, window upgrades and renovation of internal spaces must be tiny fraction of the budget for the extensive works and extensions to Holland House, let along to the scheme as a whole.

66. The applicant claims to be reinstating the southern arm of the original historic Heneage Lane. The proposed ground floor plan shows that the new retail arcade running beneath the new tower does not in fact line up with Heneage Lane, but dog-legs to the east and is at a different angle. The original medieval Heneage Lane ran dead straight from Bevis Marks to Bury Street. No clear view through from the north end of Heneage Lane would be provided by the proposal. Furthermore, the applicant states that it will be gated and closed at night.

67. Similarly, the proposed reinstatement of James Court is both historically inaccurate and misleading. The reality of the proposal is a two-storey undercroft or arcade below the tower, separated from the street by the supporting structure of the tower. It is likely to a singularly unattractive place for the general public. It significantly reduces the size of the existing open courtyard between the existing 31 Bury Street and Holland House, which more accurately sits on the original site of James Court. The bombastic architectural treatment of the new building greatly changes the existing pedestrian townscape of narrow streets and pavements that characterise the area. The height and proportion of this undercroft and its columns is completely out of scale with Holland House. There are no heritage benefits provided here, only harm existing heritage assets.

68. Proposed works to the public highway are outside the ownership of the applicant and are the remit of the City Corporation. Demolition and construction work is likely to severely damage the existing pavements and carriageways, and the developer would normally be expected to pay for their reinstatement to the City's required standards without this being considered a public benefit.

69. The applicant claims that the design of the new tower will be of exceptional quality which will enhance the setting of Holland House, but there is little in the submitted

drawings to support this. No amount of modelling or material finishes can overcome the entirely inappropriate scale and massing of the proposed new building. In any event good design in a fundamental requirement of all development and is not in itself a public benefit.

BALANCING HARM AGAINST PUBLIC BENEFIT

70. Paragraph 205 of NPPF states that "when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial, total loss or less than substantial harm to its significance". Many of the heritage assets affected by the proposals are of the highest possible heritage significance and their conservation must therefore be accorded very great weight. Although the applicant repeated states that great weight should be given to the postulated public benefits, there is nothing in NPPF to support that.

71. Paragraph 206 states that any harm to the significance of a designated heritage asset, including development within its setting, should require clear and convincing justification. Substantial harm to grade II buildings should be exceptional; substantial harm to Grade I buildings should be wholly exceptional.

72. Paragraph 207 states that where development will lead to substantial harm to a designated heritage asset, consent should be refused unless it can be demonstrated that the substantial harm is necessary to achieve the substantial public benefits that outweigh that harm.

73. Paragraph 208 states that where development will lead to less than substantial harm to a designated heritage asset, this harm should be weighed against the public benefits of that proposal.

74. It is considered that the cumulative and high degree of harm to a such a large and widespread number of designated heritage assets far outweighs the alleged public benefits that the applicant claims will arise from the proposed development.

CONCLUSION

75. Paragraph 203 of NPPF requires Local Planning Authorities when determining applications to take account of: a) the desirability of sustaining and enhancing the significance of heritage assets and putting them to viable uses consistent with their conservation: b) the positive contribution that conservation of heritage assets can make to sustainable communities including their economic vitality: and c) the desirability of new development making a positive contribution to local character and distinctiveness.

76. The proposed development fails to meet any of these criteria. As concluded above, the scheme is considered to cause substantial harm to the Creechurch Lane Conservation Area and to the Bevis Marks Synagogue. In addition there are multiple cases of less than substantial harm to a wide range of designated and undesignated heritage assets, some of the very highest significance including the Tower of London World Heritage Site. Cumulatively the degree of harm is serious, and must be given very great weight. The public benefits claimed by the applicant, including alleged heritage benefits, go nowhere near to outweighing the harm.

77. There were very good reasons for refusing the previous proposals for 31 Bury Street, namely the adverse impact on Bevis Marks Synagogue and the protected views of the Tower of London. These reasons continue to apply to the current scheme, augmented by the additional harm now caused to the new Creechurch Conservation Area, Holland House and Renown House. It is strongly recommended that the planning and listed building consent applications be refused.

22nd April 2024

Alec Forshaw, together with Esther Robinson, was the author of the Option Three proposal for the designation of Creechurch Conservation Area, the option that was eventually approved by the City Corporation. He was Principal Conservation and Design Officer for the London Borough of Islington, where he worked from 1975 – 2007. He has written widely on historical and architectural matters, including *New City, Contemporary Architecture in the City of London* (2013), *The Barbican, Architecture and Light* (2015), and *Smithfield, Past, Present and Future* (2015). He gave evidence on behalf of SAVE Britain's Heritage in support of the City of London's refusal of planning and listed building consent at the Custom House Public Inquiry in February 2022.

בס"ד

Centrality of Sky View at Bevis Marks to Religious Services and Heritage

Given the concerning plight under which Bevis Marks Synagogue, the oldest continuously used synagogue in the world finds itself, I offer here some core points based in millennia-old Jewish law that is central to the synagogue's function and vitality.

1. The spiritual significance of the sky view at Bevis Marks has been inscribed into the material fabric of the building. In Hebrew, the synagogue is known as Sha'ar Hashamayim (Gate of Heaven). These words – Sha'ar Hashamayim - are carved in stone above the entrance gate, and painted above the synagogue's doors. They originate in the Biblical episode of Jacob's dream of a ladder with angles ascending and descending. Upon waking Jacob exclaimed: 'How awesome is this place, it is none other than the House of G-d and the Gate of Heaven'.[1] For this reason 'Gate of Heaven' is considered a euphemism for a 'House of G-d': Adjacent Aldgate and Bishopgate may have been the gates into the City of London, but the synagogue was the 'Gate of Heaven' for the City's Jews. The experience of 'heaven' is currently felt upon entering the quiet courtyard of Bevis Marks Synagogue, and seeing the sky around it, particularly as it frames the synagogue itself to its immediate south.
2. The sky view in the courtyard at Bevis Marks serves important ritual purpose as the sky view is central to Jewish practice. Jews are always looking up in a sense, to judge their religious timings and rhythms. One which occurs weekly is the Sabbath. The Sabbath does not officially end at any specific time on the clock per se (it was kept for generations before the invention of any clock). Rather, it is determined ended when the average person can see three medium sized stars in the sky[2]. While we do tend to rely on the clock when it is cloudy out, it is still very much part of our conscious inspection regarding the sabbath times. This timing is central for many other aspects of ritual and worship. For example, reciting the *Shema Yisrael* which is an obligation every evening must be done only after 3 medium sized stars are seen in the sky[3].
3. Similarly, the beginning of each new Jewish (lunar) month is marked by the appearance of the new moon. Each month, about a week after seeing the new moon, we then say a

[1] Genesis 28:16-17

[2] BT, Shabbat, 35b; Maimonides, MT, Shabbat, 5:4; Shulhan Arukkh, Orah Haim, 235:1.

[3] MT, Keriat Shema, 1:9; Shulhan Arukh 235:1.

4. special blessing over the new moon[4]. This is done by going outside and finding the moon in the sky in order to say the prayers. If there is considerable obstruction it renders it impossible to perform this monthly ritual. We pray that as the moon steadily grows more and more full, so should the Jewish people, and so too we should be renewed just as the moon is constantly renewed. If there is constant physical obstruction to the sight of the moon from the synagogue grounds it would severely affect this monthly ritual and cause a great lack in the normal and usual synagogue services. Should buildings block out views of the eastern and southern sky, this ritual would be lost to the synagogue community.
5. Importantly, the sky view is critical to ensuring that enough daylight reaches the interior of the synagogue to enable the community to pray there even on dark winter days, and to retain the existing spiritual qualities of the building. The reading of a large quantity of printed texts by all present is intrinsic to Jewish worship and light levels must be maintained to enable this critical ability.
6. Finally, in general windows with their sky views are essential to a synagogue. This is expressed primarily in the Babylonian Talmud (Berakhot, 31a) in its referencing of verse 6:11 from the book of Daniel. The Talmud states: 'Rabbi Ḥiyya bar Abba said: One should always pray in a house with windows, as it is stated regarding Daniel: "And when Daniel knew that the writing was signed, he went to his house. In his attic there were open windows facing Jerusalem, and three times a day he knelt upon his knees and prayed and gave thanks before his God, just as he had done before." Likewise, the pre-eminent Jewish legal authority Rabbi Yosef Karo (Bet Yosef, OH:90) asserted that windows enable one to see the sky, look heavenward during prayer, and experience humility. If the windows are all obstructed it shuts the synagogue away from the outside world and considerably damages the entire environment and ambience that is meant for a synagogue.
7. This requirement to pray in a house with windows further reflects the fact that the observance of Jewish rituals is shaped by the positions of the sun and moon in the sky across the day, month and year. For example, Jewish prayer times are determined by the daily course of the sun: its journey from east to west over the southern horizon determines the times of our prayers, and is the inspiration for much of our liturgy. For this reason, the morning service (Shahrit) begins with the blessing, 'Blessed are you G-d who is sovereign over the universe, who fashions light and creates darkness…who brings light over all of the land and refreshes creation each day…Blessed are you G-d who creates the luminaries.' Later in the morning, when light currently shines into our

[4] BT, Sanhedrin, 42a; MT, Berakhot, 10:16; SA, Orah Haim, 426

8. courtyard and penetrates into the synagogue, it casts its glow across the pews, creating warmth on the faces of congregants, and lifting their thoughts skyward. On Yom Kippur, the darkening light and the glow of candles in the evening is a sign that the Gates of Mercy are about to close. In this way, the changing presence of light in the synagogue is intimately connected to the spiritual experience of worshippers. Any change to the current sky view would have profound implications for the religious value of the synagogue as a spiritual space and house of Jewish prayer.
9. Originally, the courtyard on three sides ensured that the synagogue windows were completely unobstructed, maximising the daylight admitted. Since then, the construction of higher buildings in the surrounding area which encroach upon the synagogue's sky view has reduced the amount of direct sunlight and reflected light entering the synagogue through these windows, significantly darkening the interior. Nevertheless, when looking out from the synagogue gallery windows one can still see the sky on both sides. Any further encroachment on the synagogue sky view is likely to make that impossible, blocking direct light and reducing the amount of reflected light that reaches the interior to a dangerously low level that threatens the synagogue's ability to function.
10. Finally, Circumcision is a foundational ritual in Judaism since only after he is circumcised is a Jewish boy considered to have joined the Jewish community: it is a medical procedure carried out on a baby's eighth day by a trained professional called a mohel. Ample light is essential to perform this ritual safely, but recent testimony from mohels who have conducted circumcisions in Bevis Marks confirms that any further reduction to light levels would render this impossible. Bevis Marks Synagogue contains two historic circumcision chairs from the seventeenth and eighteenth centuries, testifying to the long history of circumcision here. Ending the practice of circumcision at Bevis Marks would mark a significant rupture in three hundred years of tradition, harming the synagogue's significance as a place of worship and communal life.

As it is clearly evident, the above is just a selection of a vast legal system that is dependent on a profound connection with the observation of the celestial bodies and the movement of the earth in space and around the sun. For this to be cut off or obstructed, terribly damages and severely inhibits the *élan vital* of the community.

Joseph Dweck

15 May 2024

Ref: 24/00021/FULEIA

Dear Ms Tastsoglou,

I'm writing to object in the strongest terms to the proposed redevelopment at 31 Bury St. I write as a private resident in the City of London and as the rabbi of the Bevis Marks Synagogue.

I object due to the **substantial harm** the proposed tower would have on the functioning and viability of the synagogue, its Heritage Centre, its enormous heritage value, and on me as a local resident. The developers treat the synagogue as a heritage asset but fail to address the harm their proposal would cause to the synagogue's primary function as a house of worship and community space. The harm caused by this proposed development, both in its own account and due to the cumulative effect of previously built and consented tall buildings around the synagogue, puts at risk the core purpose of the Bevis Marks Synagogue as a fully functioning place of Jewish worship. Thus, the harm that puts this at risk must be classified as **substantial harm**, or even **total loss of significance**.

Before delineating my concerns, it is necessary to state that this process has caused significant distress within the Jewish community. Any consultation would be challenging, but to have to repeat this process for an application which is clearly inappropriate and has already been rejected is oppressive in nature. In fact, this is now the fifth consultation that our community has needed to engage in over these matters over the past two years. Each consultation further drains our resources and places an immense burden on our community. We are disappointed that repeated efforts to work collaboratively with the Corporation have failed to result in policies that prevent this kind of harmful application from coming forward, something which we earnestly hope can still be rectified.

For clarity, each time we seem to have achieved a desired result, the Corporation has pulled back.

1. When proposing a Conservation Area, there was an inexplicable attempt by the Corporation to exclude 31 Bury St from this area.
2. Only weeks after adopting the CA with 31 Bury St included, the Corporation published its draft local plan which proposes to remove a previous restriction on tall buildings in Conservation Areas.

3. In putting forward an ‘immediate setting’ protection scheme for the synagogue in the draft local plan (a concept invented by the City, which has no legal status), the City has attempted to deny the impact of a tower at 31 Bury St on the synagogue, despite robust professional representations made by scholars to explain the harm that a tall building at that site would cause. While the policy gives the impression of protecting the synagogue, in effect it justifies substantial harm to it.

In total, these moves may be construed by some to be in support the applicant, despite the harm their proposal would cause to the synagogue. I hope this has not been wilful, but it does reflect a general ignorance for Judaism and Jewish culture, a serious inadequacy for the City which I hope this consultation will help with addressing.

I now attempt to explain my views in an organised manner.

1. It is difficult to overestimate the significance of Bevis Marks Synagogue as the first purpose-built Jewish house of worship in England following the 1656 resettlement. It is also the only non-Christian house of worship in the City of London. Finally, and perhaps more importantly, due to the Holocaust and other Jewish expulsions in other places around the world, it is the only surviving synagogue in the world to have maintained regular worship dating back to 1701. It is therefore of the highest significance locally, nationally and internationally.
2. Furthermore, the synagogue maintains a unique form of Jewish worship, that of the Spanish & Portuguese Jews. Many of its melodies, traditions and rituals are preserved only within this congregation, making its maintenance of great importance to the preservation of its unique intangible heritage which would otherwise be lost.
3. The synagogue receives low levels of light, but just enough to maintain Jewish worship which requires sufficient light for young and old alike to be able to read hundreds of pages of prayers. However, it cannot absorb further reductions before the maintenance of this worship becomes untenable. The noticeable impact on light reduction from 1 Creechurch makes clear that this impact is real. The developer’s admittance of reduction in our light levels affirms this reality. However, its dismissal of these reductions as minor or negligible is detached from the reality we face where further reductions are unacceptable as the cumulative impact of yet another reduction cannot be further tolerated. When light levels are poor, each further reduction, even amounts that in other contexts would be considered minor, in this context will be perceptible and several damaging. Without doubt then, with respect to internal light levels, the proposed tower would cause **substantial harm**, by risking the viability of use of Bevis Marks Synagogue for its original purpose, as a place of Jewish worship.
4. As reported during the last application by Dr Joseph Spitzer, president of the Initiation Society which oversees Jewish ritual circumcision in the UK, any further reduction in light levels will make it impossible to continue to safely carry out ritual circumcision, a

core marker of Jewish identity. The existence of multiple historic circumcision chairs in the collection of Bevis Marks Synagogue testifies to the long history of this ritual being performed at Bevis Marks Synagogue, as it continues to be maintained at the synagogue even until today. Rendering the performance of this important Jewish marker impossible at Bevis Marks Synagogue would surely be a **substantial harm**.

5. The location of the proposed tower along the southern horizon, adds to the **substantial harm** it would cause to the use of Bevis Marks Synagogue as a synagogue and to our worshipping community. Each month, Jews gather outside after dark to recite *kiddush levana*, as the moon's waxing crescent appears in the night sky. This proposed tower will obstruct our visibility of this phenomenon, making it impossible to recite this prayer. This is a direct obstruction to our freedom of worship as we have enjoyed it in this place since 1701.

6. The courtyard is also an important part of the community space, as a location where we celebrate festivals (such as Succot), hold receptions (for weddings and after services) and conduct events (such as BBQs and socials for City workers). The overshadowing of this space would significantly harm the amenity use of this space, particularly during the Spring/Summer months when it is more often utilised.

7. The courtyard is also an essential part of the visitor experience of our new visitor centre. It is where visitors will first enter, purchase admission, begin their audio guide, study a bronze map of the site and surrounding area, and study the exterior of the synagogue. The courtyard is a destination in its own right, not just a passage to the synagogue. The courtyard will also be used as part of our cafe. A decrease in amenity of this space risks the viability of our new venture, which in turn places the future viability of the synagogue at risk. It is a shared human experience that people don't tend to enjoy spaces that are in the shadows. As such the proposed tower would make the space unwelcoming and unappealing to visitors and community members alike, removing its significance. This impact must be considered **significant harm**.

8. Developers have admitted that the proposed tower would reduce light levels in the Beadle's House, but have discounted these harms due to their identification of the upper floors as bedrooms. However, on account of the bright light in these upper floors, they are utilised throughout the day as rooms for reading (with reading chairs), a key need for a rabbi as study is a religious requirement, and as a playroom for the rabbi's family. The Beadle's house is therefore used throughout the day and reductions in its remaining best light must be considered a **significant harm** to both a **resident** and to the **heritage** of this historic property.

9. A near identical tower proposal for this site was rejected in 2021. The reason cited on that occasion was the harm it would cause to the synagogue's setting. This new submission is little changed in any way that reduces the harm it would cause to the above as it would continue to dominate and overshadow the synagogue site, detracting from the significance of the synagogue and its courtyard.

10. Indeed, since then, the City of London established the Creechurch Conservation Area, further increasing the threshold for allowing harm to sites within the CA, most notably the Grade-1 listed Bevis Marks Synagogue.

11. Beyond this, the Conservation Area report identified as significant the townscapes down Heneage Lane and down Mitre St, both of which culminate in Bury House. The report noted the sense of coherence of these streets due to the similar scale of the buildings along them. A tower at 31 Bury St would destroy this historic character and is therefore completely out of step with the new Conservation Area. As such, it would cause **significant harm** to the Conservation Area as a whole.

12. Most clearly, there is a provision in the current local plan that bars tall buildings in Conservation Areas, making it difficult to understand how this application moved beyond the pre-app stage of planning. Regardless, for this reason alone it should be refused out of hand. Furthermore, the possibility that this policy may be removed from the Local Plan 2040 has no bearing at this point, especially when considering that it is not without considerable controversy, which according the planning guidelines means it cannot be relied upon at this stage in the local plan process before adoption.

13. Furthermore, that Local Plan states that while the eastern cluster is designated for tall buildings, not every site within it will be appropriate for tall buildings. If this isn't the case example for that I can't understand where it wouldn't be acceptable.

14. For the purpose of clarity, I wish to confirm the near-constant anticipated use of the synagogue site for religious, communal and tourist purposes. Some of this may not be self-evident due to the impact of covid and the launch of our NLHF supported redevelopment project which began in 2020 and continues. As a result, we've had to step back from much of our usual activity, in anticipation of a large increase in activity from pre-2020 numbers. This will include daily worship, both in the morning and midday, and on the Sabbath and Jewish festivals. Furthermore, we will regularly conduct evening events, and weekend weddings. Finally, our visitor centre will be opened Sunday-Friday, welcoming at least 25,000 visitors a year including thousands of local school-children. All of these activities will be harmed in different ways by the proposed tower.

15. It is unconscionable that at a moment when Bevis Marks Synagogue is about to embark on a new chapter of vitality in its storied history, that the City of London would approve a development that puts its very future at risk, and certainly places it in a more challenging situation. This would be far from celebrating the synagogue's heritage and ongoing contribution to the City of London.

16. The synagogue as a whole should be seen as one of the best expressions of the 'Destination City' vision, and harm to it must be avoided.

17. The generic public benefits offered by the developers do not in any way counteract the **substantial and enduring harm** their proposed tower would cause to the

synagogue and its functioning as a living place of Judaism, one of the most unique synagogues in the world. Permission would further chip away at the ability of Bevis Marks Synagogue to function as a synagogue, placing it at existential risk of becoming yet another 'heritage asset'. Once the unbroken chain of worship is broken, it can never be repaired, and all that Bevis Marks Synagogue is and represents will be lost to history.

18. With further regard to the proposed benefits made by the applicant, making use of lower floors for charities does not justify the construction of a tower. These benefits could equally be offered even with a shorter building, just as they are currently being offered to charities with the current Holland House building. Furthermore, the charity space is in Holland House, which is adjacent to Bury House. Just because the developers own both properties, the use of Holland House does not constitute a public benefit to the Bury St application that should justify the **substantial harm** that Bury House would cause to the Bevis Marks Synagogue. In addition, the use of this space by non-local charities does not justify harm to a local community (Bevis Marks) who should be the primary concern of neighbouring developers, not sidestepped as this proposal tries to do. Finally, these benefits are not unique, and could equally be offered in any other scheme. Therefore they are not a justification to cause harm to the functioning and setting of the synagogue, a site that irreplaceable and altogether unique, and is of the highest level of significance.

In sum, this scheme is so ludicrously inappropriate that I can't believe developers have not withdrawn their application. If we were in a court, I'd ask the City to throw out the application as frivolous. Save that, I implore the Corporation to refuse this application and once and for all protect the integrity and future of Bevis Marks Synagogue

In sincerity and friendship,

Rabbi Shalom Morris

Address: Holland House 1 - 4, 32 Bury Street London EC3A 5AW
Application Ref: 24/00011/LBC and 24/00021/FULEIA

Proposal: Restoration works to Holland House including removal and reinstatement of external faience together with the removal and replacement of existing concrete beam; partial demolition to facilitate interconnection with the neighbouring proposed new building and the construction of a four storey roof extension resulting in ground plus 8 storeys; together with internal alterations including truncation of the existing lightwell, reconfiguration of partitions, installation of a new staircase, servicing and all other ancillary and associated works.

Demolition of Bury House and erection of a new building comprising of 4 basement levels, ground plus 43 storeys (178.7m AOD); partial demolition of Holland House and Renown House; restoration of existing and erection of four storey extension resulting in ground plus 8 storeys at Holland House (48.05m AOD) and three storey extension resulting in ground plus 5 storeys at Renown House (36.49m AOD); interconnection of the three buildings; use of the buildings for office (Class E(g)), flexible retail/café (Class E(a)/E(b)), and flexible community/education/ cultural/amenity (Class F2(b)/ F1(a)- (e)/ E(f)/ Sui Generis) uses; and provision of a new covered pedestrian route, cycle parking and facilities, landscaping and highway improvements, servicing and plant and all other ancillary and other associated works.

Statutory Remit: Historic Buildings & Places (formerly the Ancient Monuments Society) is a consultee for Listed Building Consent applications, as per the *Arrangements for handling heritage applications – notification to Historic England and National Amenity Societies and the Secretary of State (England) Direction 2021*. We are concerned with historic assets of all types and all ages, including conservation areas and undesignated heritage.

Comments: Thank you for notifying HB&P about the above applications. I apologise for the delay in responding. HB&P have reviewed the documentation available online and provide the following objection to the proposal.

Holland House is a Grade II* listed building constructed between 1914-1916 and designed by the eminent architect Hendrik Petrus Berlage for a shipping company. Berlage was a major architect in the Netherlands and Holland House was a rare commission in England. Berlage took inspiration from the works of pioneering American architect Louis Sullivan. It is noted for its pronounced vertical ribs, faience cladding and its elaborately tiled entrance lobby, and is one of the first steel framed structures within the City. Holland House is also a key contributory building within the newly established Creechurch Conservation Area.

The adjacent Renown House is a non-designated heritage asset constructed in 1912, designed by Delissa Joseph for the Bunge & Co import-export trading business. The building contributes to the setting of Holland House and character of the Creechurch Conservation Area.

HB&P objects to the proposed four-storey extension to both Holland House and Renown House. It is an intrusive, bulky, and top-heavy addition to both buildings that fails to respect their proportions and scale. The extension would result in the loss of historic fabric, particularly within Holland House at roof level and the rear wall to provide open floors and connections to the new proposed tower at No. 31 Bury Street. The cumulative impact of the loss of so much building fabric, as well as the damaging additions has a considerably negative impact on the integrity of this heritage asset and its historic architectural interest.

The construction of the 43-storey tower at 31 Bury Street would have a significant impact on the appearance and special architectural and historic character of the Creechurch Conservation Area. The concept of a tower with a conservation area predominantly characterised by low and medium height buildings would compromise this character and cause irreparable harm to the setting of several key listed buildings, including Holland House and the Bevis Marks Synagogue

Policy: The total inappropriateness of a tower within a conservation area is clearly stated in the City of London's Adopted Local Plan (2015), notably Core Strategic Policy CS10: Design, which requires "that the bulk, scale, massing and height of buildings are appropriate to the character of the City and the setting and amenities of surrounding buildings and spaces". Policy CS14: Tall buildings states "Refusing planning permission for tall buildings within inappropriate areas, comprising of conservation areas".

Chapter 16 of the NPPF (2023) manages change within the historic environment. Paragraph 205 states that "When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation". And at Para 206: "Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification."

Section 16 (2) of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires that, in considering whether to grant listed building consent for any works the local planning authority shall have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses.

Recommendation: The proposal is clearly contrary to the local plan and to national planning policy by virtue of the tower's scale and height, and by the extent and bulk of the alterations and additions proposed to the grade II* Holland House. It should therefore be refused.

Regards

Ross Anthony

Anna Tastoglou
City of London Corporation
Department of Planning and Transportation
PO Box 270
Guildhall
London
EC2P EJ

Dear Ms Tastoglou,

I am writing on behalf of ClusterFlux Theatre Company to express our strong support for the planning application being proposed by WELPUT for the redevelopment of Bury House, Holland House, and Renown House.

ClusterFlux is dedicated to creating innovative multimedia theatre that resonates with contemporary audiences through a blend of live sound production, physical choreographies, song, and original text. Our development to date has been supported by New Diorama Theatre, CPT and Theatre Deli. We have been awarded Curious Directives inaugural Hypothesis Grant, LPS' Seeding Space, and an Arts Depot Residency. Our critically acclaimed show PLEASE LEAVE (a message) was shortlisted for the Untapped Award.

Since the beginning of the year, we have been utilising the spaces within Holland House every Monday evening to develop new works and rehearse for our upcoming international debut at the Amsterdam Fringe in September. During this time, we have achieved significant milestones, including writing an animation short, adapting our debut show for students who subsequently performed it at the Massachusetts Drama Festival, and initiating the development of a new show.

The availability of this space has been invaluable to our creative process and to the growth of our company. In a sector where free and regular rehearsal space is a rarity, the opportunity to work at Holland House has been crucial, not only for us but for other emerging theatre companies like Junk Theatre. The theatre industry is currently facing significant challenges, and spaces like these are essential for nurturing new talent and ensuring the continued vibrancy of the sector.

The redevelopment of Holland House offers a unique opportunity to support the unmet demand for affordable creative workspaces in the City. This initiative would not only benefit local artists and companies like ours but also contribute to the cultural landscape and attractiveness of the area.

We wholeheartedly support the application in principle and urge the City to approve these proposals. We believe that this redevelopment will make a lasting and positive impact on the cultural fabric of our community.

Kind Regards,

Christopher Whyte
Co-Director
ClusterFlux Theatre Company

THE HONOURABLE COMPANY OF MASTER MARINERS

The Honourable Company of Master Mariners is a City of London livery company, its membership primarily comprising senior Merchant Navy and Royal Navy officers but drawn also from the wider maritime sector. The Company (https://hcmm.org.uk) sets and maintains professional standards through the Chartered Master Mariner and Mentoring Schemes while also offering educational opportunities for schools and support through its charitable activities.

Formed in 1926, the Company had the title 'Honourable' conferred upon it by HM King George V in 1928, an accolade previously bestowed on only the Honourable Artillery Company and the Honourable East India Company. In 1932, the Court of Aldermen of the City of London granted the Honourable Company of Master Mariners (HCMM) livery status, the first so recognised for 84 years. Her Majesty The Late Queen, Master of the Merchant Navy and Fishing Fleets for the whole of her reign, was the HCMM's Patron from accession in 1952, while His late Royal Highness The Duke of Edinburgh, Lord High Admiral of the United Kingdom, was also the HCMM's Admiral. Since May 2024, the HCMM's Patron has been His Majesty The King.

1. REPRESENTATION ON APPLICATION REF. NO. 24/00021/FULEIA

BURY HOUSE 1 - 4, 31 - 34 BURY STREET, LONDON EC3A 5AR

1.1 Its background and purpose outlined above compel the HCMM to register an objection to this planning application centred on No. 31 Bury Street EC3. In this, it wishes to remind the City of London Corporation that on 7th April 2021, it objected similarly to the original application for this site, 20/00848/FULEIA. The HCMM did so not only in defence of the Bevis Marks Synagogue, the most directly impacted, but also the other heritage assets that would be affected by the development, not least those of Trinity Square and the Tower of London World Heritage Site with which it has particular association. These were also the key reasons given by members of the Corporation's Planning and Transportation Committee in refusing the original application at its meeting on 5th October 2021. Moreover, the HCMM later voted with the majority in delineating the conservation area around the Synagogue that now appears to have been ignored by the Corporation. As a City livery company, the HCMM cannot take lightly the need to respond in this situation.

1.2 'Skyscraper' is a term little recognised now as of maritime origin. In the days of square-rigged ships such as tea clippers racing to be first back in London in the 1850s and 1860s, every breath of wind was sought when becalmed. Extra sails would be added up the masts, the seventh and last being the skyscraper. Irony is thus added in this present context, but the HCMM again cites the City's maritime past and present in support of its objection to this revised application which offers only the most marginal modification.

1.3 In 2022, the Corporation launched Destination City, currently promoted as '*The City is the birthplace of London with a unique and diverse offer. Destination City will celebrate, promote, and support the Square Mile's unrivalled history and heritage'*. In fact, from the sea and Thames came the maritime trade out of which the City and so much more grew. It is hoped that the later pages here, outlining a little of that *'unrivalled history and heritage'',* may illustrate the difficulty of attempting to reconcile the Corporation's apparent valuing of heritage with its contradiction as embodied in this application.

1.4 The estate agents' mantra, it is said, is 'Location, location, location' but the more appropriate term is 'context'. Without expertise in the fields of architecture and construction, the HCMM is content to defer to the conservation bodies and specialists. Instead, it is in particular regard to the wider significance and context of the application that it is opposed by the HCMM.

1.5 London, especially the City, is built on maritime trade with much of Britain's maritime past and present to be seen in EC3 alone. The maritime sector remains a significant business presence in the City while the City's worldwide standing as a banking, finance and insurance centre is in turn rooted in maritime trade. In 1694 with the Royal Navy's financial security the aim since re-equipping was needed yet its capitalisation was beyond the Government, the Bank of England was established. The new bank attracted a loan of £1,200,000 (195,265,744 in 2024) raised by subscription. Links with the sea continue today to be commercially and strategically vital to the UK's economy and defence. Current events in the Red Sea demonstrate the rôle of and the country's reliance upon the Merchant Navy and Royal Navy. The supply chain does not consist of just the internet and motorways, some 95% of UK global trade being by sea.

1.6 The Destination City website lists '*Attractions; Experience; Food & Drink; Galleries; Green Spaces; Museums; Restaurants; Shopping; Stay; Theatres and Wellbeing'* as the areas of interest on offer. Despite the '*unrivalled'* claim cited above, heritage is not mentioned. Further, the term appears only twice in the whole website. This, in referring to the City Visitor Trail which invites such to *'feast on the culture, history and heritage'* while noting *'grand heritage hotels' are* available. History itself fares little better. The '*City of London timeline'* within '*Our Story'* on the website records but one maritime date, publication of the first Lloyd's Register in 1764 and omits the two World Wars but does mention the Bevis Marks Synagogue's opening in 1701.

2. REPRESENTATION ON APPLICATION 24/00011/LBC

HOLLAND HOUSE 1 - 4, 32 BURY STREET LONDON EC3A 5AW

2.1 Similarly, what the application proposes for Holland House suggests indifference to its importance, the HCMM thus being obliged to oppose the application. Wm H Muller & Co, a Dutch shipping company, chose Hendrik Berlage to design its London offices in Bury Street. Known as the 'father of Modern architecture' in The Netherlands, the result is said to have been the first steel-framed building in Europe. Berlage is believed to have taken inspiration from the work of American architect Louis Sullivan on a visit to the USA in 1911. External walls of grey-green terracotta or faience tiles, made in Delft and shipped in company vessels, top a black granite base. A merchant ship sculpted by the Dutch artist Joseph Mendes da Costa appears at the southeastern corner of the Grade II*-listed building. Construction of the office block, begun in 1914 and completed in 1916, was made possible during the First World War only by The Netherlands' neutrality. It is thought to be the sole building erected in the City during the War.

2.2 In turn, that provides another maritime link, this time with Liverpool Street station. The Netherlands' neutrality in the First World War allowed North Sea ferry services to continue, albeit resented by Germany. Amongst the refugees and occasional business passengers were those of more clandestine intent. Dutch operators' eventual withdrawal from the crossing then left only the Harwich-Rotterdam sailings by the Great Eastern Railway Steamship Company. One of its captains was Charles Fryatt of the Mercantile Marine, renamed as the Merchant Navy in 1928. Several times from March 1915, German submarines ordered Fryatt to stop his unarmed ship but instead he made to ram the U-boats or outran them, outraging Germany. Around 0300 on 22nd June 1916, German naval vessels stopped Fryatt and the SS Brussels outbound to Harwich. The ship, 45 crew, including five stewardesses, and 100 refugee passengers were taken to Bruges and interned. On 27th July, two hours after a summary court martial, Fryatt, despite being a civilian non-combatant, was shot by firing squad. On 7th July 1919, Fryatt's body was repatriated by Royal Navy destroyer, escorted by two more, to Dover and by train to Charing Cross. The purple-lined luggage van used had served previously for nurse Edith Cavell's coffin and in 1920 for that of the Unknown Warrior. On 8th, Fryatt's coffin was drawn by Royal Navy ratings on a gun carriage, a State funeral honour, to St Paul's for the service, hundreds of thousands lining the streets. The burial was in Dovercourt, Harwich, Fryatt's home. A hospital and pub there bear his name but reaction to what so many newspaper headlines declared as his *'murder'*, finds it too in Belgium, the USA, South Africa, Mauritius, Australia and New Zealand. In the Canadian Rockies, Mount Fryatt is close to Brussels Peak, named after his ship, while his memorial is on Liverpool Street station. Unusually for the First World War period, Fryatt's portrait appears on this in bronze relief. Beneath, the dedication reads *'From the neutral admirers of his brave conduct and heroic death. The Netherlands section of the League of Neutral States July 27th 1917.'* More than Holland House's architectural features would be lost were this application approved.

3. BACKGROUND

3.1 For the Corporation to envisage not just once but twice such a threat as the Bury Street development to the Bevis Marks Synagogue, one of the City's most historic buildings and of international significance, more than questions its apparent commitment to protect its heritage. Adding colour, charm and character to the City, heritage is an asset which also adds interest, attracts visitors and earns revenue and respect. Albeit seeming to share those aims, Destination City appears limited in its vision. While the HCMM might be expected to champion maritime heritage, within it are the City's origins too yet it ignores them. Visiting Tower Bridge from the City means crossing Tower Hill whereon The Merchant Navy Memorial. Initially unveiled in 1928, The Times' then described its location as *'at the hub, as it has been said, of maritime England '*. Similarly, when unveiling the Second World War section in 1955, HM The Late Queen said *'It is fitting that in this place, which for centuries has been at the very heart of the maritime life of our nation, there should stand this memorial…' Even* TfL recognises its importance by naming it on its Legible London maps in the vicinity, including in the City. TfL each November further honours the 36,000 commemorated on The Merchant Navy Memorial when Tower Hill becomes one of the ten stations replacing the standard platform logo with the 'poppy roundel' in remembrance. Tower Hill is in Tower Hamlets. Why is the City Corporation, keen Tower Bridge should be visited, nonetheless unwilling to mention another borough? Might it be a reminder that the heritage within the City belongs to more than the Corporation?
