Notes on significant variances

- 1. The overspend at quarter 2 is largely due to an unanticipated compensation payment for early surrender of lease at 15/17 Eldon Street. The forecast overspend increases due to some additional void costs, principally business rates at 1-7 Whittington Avenue, being incurred by year-end.
- 2. The savings achieved in quarter 2 and year-end are due to a vacant post and lower than anticipated reactive repairs and maintenance works. This is partly offset by a consequential reduction in service charge from the lower levels of works.
- 3. The underspend at quarter 2 is due to lower than anticipated reactive repairs and maintenance expenditure. This underspend reduces by year-end due to additional reactive work anticipated at the Central Criminal Court.
- 4. The underspend at quarter 2 is due to savings in employee budgets as a result of vacancies. This more than offsets a shortfall in fee income from property deals. This turns into an overspend at year-end partly due to continual shortfall on fees, but predominately due to the carry-forward of the City Surveyor's overspend from the last financial year.
- 5. Higher than anticipated reactive repairs and maintenance works explain the overspend both at quarter 2 and year-end. The City Surveyor has introduced measures to focus reactive spend only on essential works in order to reduce the anticipated year-end overspend.
- 6. The quarter 2 overspend can be attributed to repairs and maintenance spend on cyclical works running ahead of profile. The budget will catch up with these works by year-end where a near breakeven position is anticipated.
- 7. Savings on energy and slippage on repairs and maintenance schemes are the principal reasons for the underspend at quarter 2. These savings are both anticipated to reduce by year-end leaving an anticipated overspend at year end due to additional security costs.
