Date approved:	

Predicted A-Level grades are an extremely important part of monitoring performance in the Sixth Form and are an integral part of the process of supporting applications for Higher Education and other opportunities beyond school.

- A-Level predictions are based on the professional opinion of the staff by reference to evidence of performance, achievement and potential.
- A-Level predictions are provided on two occasions in the Sixth Form:-
 - The first occasion is as Internal Predictions in January of Year 12. These predictions are to help students and their parents make an informed decision about their Year 13 choices.
 - The second occasion is as Final Predictions in June of Year 12. These are accompanied by teachers' UCAS subject references. These predictions are included in the students' UCAS and Higher Education applications.
- Revisions to predicted grades may only be made after these dates in exceptional circumstances.
- It is school policy to ensure that parents and pupils know the predictions, the reasons for them and any remedial action that may be recommended in the light of these predictions.
- Year 12 internal exams will be taken into account when teachers make final predictions, but achievement in the internal exams should not be presumed to be the same as the predicted grade at A-level. A predicted grade at A-level could be lower or higher than that achieved in the Year 12 internal exams. The second year of A-level courses are more demanding and staff take this into account.

- The precise nature and weighting of the evidence on which predictions are based is at the discretion of individual departments but it will normally include all aspects of classwork including attendance and punctuality in completing assignments, homework, tests and examinations.
- The policy for predicted grades for international applications follows the guidelines above, remaining the same as for all UK applications.
