BEMS Upgrade Project – Phase 1

Appendix 3. Additional project detail

A3.1. Brief description of project

The City Surveyor's Corporate Energy Team has oversight of the Building Energy Management System (BEMS) which monitors and controls the HVAC plant (& other engineering systems) across the CPG estate. We have commissioned a contractor to conduct a condition survey of 3 of the highest priority sites in terms of business criticality and vulnerability to system failure. Guildhall Yard East (GYE), London Metropolitan Archives and Walbrook Wharf make up Phase 1. This is the first phase of a larger estate-wide upgrade BEMS upgrade project. The estimated energy and maintenance cost savings resulting from the upgrade of these sites comes to approx. £57,989.42

Table 1 presents a breakdown of key project figures.

Please note: This project isn't an energy efficiency (spend to save) project, but it will provide energy and maintenance savings as a by-product. It is also an enabling project for future energy efficiency projects. It is an essential project to ensure continuity of business operations for these CPW buildings. If the current obsolete BEMS fails, the buildings can't be heated/cooled properly, life safety systems could be prevented from working correctly etc.

A3.3. Procurement strategy/route to market

It is proposed the project procured either through a Mini Competition via the Intermediate Works Framework or an open tender if the expertise is not available in the Framework.

A3.4. Delivery period and key dates

The below table presents two timelines: fast and slow. The fast timeline reflects the potential where risks do not cause undue project delays.

Fast	Gateway 2	
31/03/2021	Corporate Project Board	
14/04/2021	Project Sub Committee
