Recommendations

1. Approval track, next steps and requested decisions

Project Description: The design and installation of a highquality Audio-Visual solution for Meeting Rooms across the City Of London Police estate, allowing the effective use of Microsoft Teams, including audio and video meetings as well as the ability to live stream and record meetings.

Funding Source: This project is funded via the 2020/21 Loan facility provided by City Fund for Police and approved by Resource Allocation Sub-Committee on the 9th July 2020. It was previously approved as part of a portfolio of capital investment by the Police Authority Board on 22 January 2020. Approval to carry forward the loan funding into 2021/22 was agreed by Resource Allocation Sub Committee on 2nd March 2021 and approval to its release has been delegated to the Chamberlain and CoLP Chief Operating Officer following agreement of this gateway report.

Next Gateway: Gateway 6

- 1. Approve a project budget of £123.2k (excluding risk)
- 2. Approve a costed risk provision of £12.3k with draw down to be delegated to CoLP Chief Operating Officer.
- That Option 1 for the installation of audiovisual equipment to the City of London Police estate is approved

2.	Budget
_	Daagot

PROJECT	Category	TOTAL	
---------	----------	-------	--

	Equi	ipment	£77,000
	Cab	ling and installation	£46,200
	Risk		£12,300
			£135,500
3. Governance	Senior Responsible Officer : Jonathan Chapman,		
arrangements	Interim Head of Police	IT	
	Project Manager: Delivery of the project will be managed by RedSixty, with oversight by the Head of Police IT (interim)		
	Service Committee : P	Police Authority Board	
4. Progress reporting	Monthly updates to be provided via Project Vision and any project changes will be sought by exception via Issue Report to Spending and Projects Sub Committees		

Project Summary

5. Context	 Microsoft Teams functionality is currently being introduced to the City of London Police under the IT Modernisation Programme providing a range of collaboration functions, including audio and video conferencing capabilities
	 The force currently have very limited and outdated collaboration tools within only a few of their meeting rooms making group collaboration both internally and externally virtually impossible affecting both operational capability and reputation.
	3. The Capital bid for funding to deliver improved Audio-Visual capability was made prior to the COVID-19 outbreak. Since the outbreak and the extended necessity for non-uniformed staff to work remotely, the demand of audio-visual capability such as Microsoft Teams meetings has increased dramatically.
	4. With non-uniformed staff continuing to work from home wherever possible, equipping the meeting rooms will improve the capability of officers on-site and remote to collaborate.
	 The solution will also enable briefings to be conducted with uniformed officers simultaneously across multiple locations enabling social distancing.
	 This project follows on from similar work across the Guildhall. The project has been timed to follow on from the IT Modernisation programme now in the last stages of delivery for the Police.
6. Brief description of project	 The project includes the design and implementation of an audio and video conferencing solution to key meeting

7. Consequences if project not approved	rooms across the City of London Police estate including New Street, Bishopsgate and GYE. • The solution will require an element of cabling, which will utilise the existing data ports where possible • The solution would utilise the existing functionality of Microsoft Teams to record meetings, provide transcriptions and live stream meetings if required. • The solution will allow the decommission and removal of an existing ageing solution enabling Audio-Visual capability between COLP offices only If the project was not approved, the force would not benefit from the advanced collaboration opportunities provided by the Teams functionality, and limit capability to work more closely and
	effectively with the City Corporation, other forces, government departments and other national and local agencies. The force would also not benefit from the ability to give Audio-Visual briefings across the estate.
8. SMART project objectives	 To provide the functionality to establish and join meetings through Microsoft Teams, if required. To significantly reduce the need for physical officer attendance at meetings, allowing Officers to remotely join the Teams meeting for the relevant items only. The impact of Coronavirus has led to a redetermining of the rooms to be addressed, with several additional rooms being identified. Meeting rooms across the estate have now been surveyed and a delivery cost per room determined. Information from the survey, including suitability, cost and business benefit have been considered and the proposal offers the best operational advantage for the force within the budget. The project will deliver Audio-visual capability into proposed rooms at the three keys sites during the period July to August 2021
9. Key Benefits	 Allow the effective use of Microsoft Teams within key meeting / briefing rooms and offices at Bishopsgate, New Street and GYE – including audio and video calls, as well as content sharing The proposed solution would expand upon the existing use of Microsoft Teams currently being introduced to the City of London Police under the IT Modernisation Programme, allowing Officers to participate in the meetings, both in person and remotely. This would support more efficient use of officer time in particular, if they were not required to be physically present at all meetings. Support the video recording of staff briefings, including the enablement of transcription. Support the live streaming of staff briefings Provide greater resilience for meetings and briefings in the future, where all participants are unable to attend

	 Replace an ageing solution currently used for audio- visual connectivity between a limited number of internal meetings rooms only 	
10. Project category	6. Improvements in productivity/efficiency	
11. Project priority	B. Advisable	
12. Notable exclusions	Custody Suite and Interview rooms have been excluded from the project due to the need for additional health and safety considerations.	

Options Appraisal

T	
13. Overview of options	Option 1 – Recommended The design and installation of a high-quality Audio-Visual solution for meeting and briefing rooms across the Police estate- allowing the effective use of Microsoft Teams including audio-visual meetings as well as the ability to live stream and record meetings. The project aims to deploy the same solution across the police estate as has recently been introduced within Guildhall for CoL. This solution is understood, tried and tested, and as a single solution adds no further complexity to support. As part of the survey, a recommendation has been made as to the appropriate devices needed per room to enable maximum efficiency for that room. The project will deliver Teams meeting room capabilities to: • Eight Meeting rooms across the ground, first, second, third and fourth floors at New Street. • Six meeting rooms across the first and fourth floors at Bishopsgate • Eleven meeting rooms and offices across the first, second, third and fourth floors at GYE. • A further four pod rooms at GYE will be equipped with screens, allowing agile workers to connect laptops for collaboration work.
	The equipment will be procured under existing catalogue frameworks. Implementation and project management will be conducted by the same company that delivered the solution into Guildhall, RedSixty under an existing contract with Sykes.
	Option 2 –Continue with existing highly limited Audio-Visual set up, between limited rooms on the estate.
14. Risk	Overall project risk: Low
	The approach is consistent with industry practice using tried and tested tools, the requirements are well understood.

Costings are based upon catalogue prices for equipment and quotation under existing contracts for implementation. As such the scheme is considered as low risk.
A room by room costing has been provided as part of the survey. Whilst a site survey has been completed on each room, there
may be additional cabling requirements in some of the rooms due to the structure of the buildings.

Resource Implications

15. Total estimated	For recommended option 1			
cost	Total estimated cost (excluding risk): 123,200K			
	Total estimated cost (includin	g risk): 135,	500 <i>K</i>

		Option 1	Option 2
•	Design Summary	The design and installation of a high- quality Audio Visual solution for Meetings Rooms across the City of London Police offices - allowing the effective use of Microsoft Teams, including audio and video meetings as well as the ability to live stream and record meetings.	Do nothing
•	Scope and exclusions	 The project will deliver Teams meeting room capabilities to: Eight Meeting rooms across the ground, first, second, third and fourth floors at New Street. Six meeting rooms across the first and fourth floors at Bishopsgate Eleven meeting rooms and offices across the first, second, third and fourth floors at GYE. A further four pod rooms at GYE will be equipped with screens. Use of video-conferencing within key meeting and briefing rooms at Bishopsgate, New Street and GYE. Use of presentations and content sharing within meeting and briefing rooms 	NA NA

Project Planning	 Recording and Live Streaming of meetings within meeting and briefings rooms. Custody suite and interviews rooms are excluded from this project as there are additional health and safety requirements to be considered. 	
Programme and key dates	Installation will run from July 2021 to August 2021 and will be coordinated with City of London Police, working around operational requirements.	NA
Delivery Team	The project will be delivered by RedSixty Ltd through existing contract provision with Sykes.	NA
Risk implications	Overall project risk: Low This project is considered low risk, given it entails the installation of proven technology and approaches. • A site survey of each room to be equipped has been conducted, so requirements relating to room size, shape and complexity have been understood. • Delivery of the project is subject to availability of the equipment to be	NA

	T	
	 There may be slight fluctuation in the pricing for the equipment to be implemented Restrictions preventing access to the buildings and rooms for installation may provide challenges to the delivery timescale. Co-ordination of delivery will need to consider use of operational rooms, although the current usage of meetings rooms is light as a result of COVID restrictions. The structure of the buildings, may require small changes to the cabling costs. 	
• Benefits	 Allow the effective use of Microsoft Teams within key meeting / briefing rooms across the COLP estate. including audio and video calls, as well as content sharing Support the ability for uniformed officers and Staff to participate in meetings and briefings remotely Support the video recording of meetings and briefings including the enablement of transcription Support the live streaming of meetings and briefings Replace ageing solution providing internal audio-visual capability 	Short term cost avoidance
