

			<p>Sep. 2021</p>	<p>quality in the public realm remains.</p> <p>The experiment concluded on the 18<sup>th</sup> September. All measures have been removed and Beech St is now open to all vehicles. The gaps in the central reservation have been maintained, and as per the Road Safety Audit some safety measures in the form of “wands” have been implemented to protect cyclists from vehicles encroaching into the cycle lanes.</p> <p>The restriction on Fortune Street was removed by Islington on the 24<sup>th</sup> September.</p> <p>There are no initial analyses of traffic counts as these have been affected by southbound traffic on Aldersgate Street being diverted onto Beech Street due to utilities work. But the ANPR cameras are capturing the raw data.</p> <p>Traffic and noise surveys were successfully carried out in the last ten days of the experiment. This data is just being received for analysis. Air quality will be assessed over the coming months.</p> <p>The Project team are meeting regularly with the working group from the Barbican Association to consider options for the new phase of Beech St. A report setting out an approach for next Options for Beech Street will be submitted for December Committee. This will include traffic analysis and other monitoring data, along with the consultation results from the experiment.</p> <p>A comprehensive 6-week public consultation is expected to begin in late March 2022 (after the elections, in line with CoL legal advice), with the intention of a permanent scheme in summer</p>

			<p>May 2022</p>	<p>2022.</p> <p><b>Beech Street:</b>  At the meeting of Streets and Walkways on 3<sup>rd</sup> May officers informed Members of the public consultation timescales for Beech Street and the delay at the request of Islington to defer the public consultation until after local elections. Members will recall that officers meet regularly with their Islington counterparts, data on the experiment has been shared and Islington have shared feedback on the Fortune Street experiment. In these meetings Islington's position has been that the management of the Fortune Street traffic restriction was impractical and this was conveyed to Members on 3<sup>rd</sup> May.</p> <p>Whilst Islington had expressed a preference that the issues on Beech Street are dealt with through a joint area wide approach, i.e. over the medium term, City officers explained the December decision of City Members to consult on the Beech Street zero emission scheme as a permanent measure to address the air quality issues. We deferred our consultation at Islington's request until after local elections, but in a recent meeting Islington's Director of Climate Change and Transport expressed his view that the public consultation on Beech Street did not have Islington's support. Arrangements are being made for City Members to meet with Islington's Executive Member for Climate Change and Transport.</p> <p>Officers do not believe it is possible to proceed without Islington's support. There remains a significant risk that consultation cannot begin until after the summer.</p> <p>In terms of the current situation on Beech Street,</p>
--	--	--	-----------------	---

				<p>surveys show that over 80% of the traffic has returned to Beech Street and 70%+ on Golden Lane. On Beech Street, nitrogen dioxide levels have increased to the edge of the legal limits of 40 mg, these vary with seasonal conditions and reflect other changes in background NO2 from across London where many variables affect air quality.</p>
<p>15 Feb 2022 03 May 2022</p>	<p><b><u>TfL London Bridge Experimental Scheme</u></b></p>	<p>Executive Director, Environment</p>	<p>May 2022</p>	<p>An update has been provided on data relating to the London Bridge Experimental Scheme (including enforcement and traffic volumes): data suggested that around four overweight vehicles were travelling over the bridge per day. TfL is considering other approaches, including street design and greater penalties. The Corporation has expressed its concern to TfL around heavy traffic on Tower Bridge</p>
