The consultant felt that, in appropriate cases, the applicant should be asked to provide a radiance study.</p> <p>In view of this, the Member asked Officers to undertake, when future applications were received in which daylight will be an issue, to ask the applicant to prepare a radiance study to be provided to this Committee so that Members could make an informed assessment of the issue.</p>	<p>UPDATE (21 September 2021) - The Chief Planning Officer and Development Director underlined that, ultimately, Officers would be producing a planning advice note in order to create more clarity on the methodology and that they were still working through this with the BRE and other stakeholders to deliver this. He added that, to date, Officers had not had any pushback from the industry when requiring the provision of radiance studies for relevant planning applications.</p> <p>To be completed: Further report to Committee setting out/providing updates on these points by Winter 2021.</p> <p>Radiance assessments continue to be requested and submitted with planning applications. An update on the use of this methodology will be incorporated into the abovementioned report to Committee setting out options for a new advice note/guidance.</p>

		<p>The Chief Planning Officer agreed that now would be an appropriate time to fundamentally review the DBE Users Panel and look again at how best to engage with all stakeholders given that DBE no longer existed as a department with a new, wider Environment Department with a wider remit now established. He reported that work on this was already being undertaken at present and that a key element of this would be a review of the Statement of Community Involvement. It was hoped that Officers would be in a position to report back to Committee on this in Autumn 2022 as to future options around receiving feedback about how engagement with various stakeholders could be improved.</p>
