22/23 represented a foundational year for the new Division and focussed around understanding existing issues and developing potential solutions. 23/24 will see the implementation of many of those solutions and focus on embedding change whilst building the capacity and capability to develop our strategic long-term ambitions.

- The City Corporation is confident project and programmes represent best value and deliver the intended benefits
- Project governance is risk-based and enables Members to focus on strategic issues and areas of high risk and/or value
- Members are assured that lower risk/value projects are well managed and that an effective assurance framework exists to identify any potential issues or risks
- Officers are empowered to effectively manage the projects they are responsible for, to take prompt decisions to manage operational risks and, are enabled by corporate systems and financial processes
- The Corporation is clear on the role of the PMO ecosystem and its capacity to fulfil this role effectively
- The project delivery operating model represents value for money with a clearly articulated value proposition

## Our People

This division brings together teams that previously sat within different departments and there has been a need to develop a shared vision and common understanding of purpose. The next step is to review the size and shape of the team to ensure it is set up to deliver that vision.

- Continue to embed the newly recruited Transformation and improvement team
- Define requirements and develop the business case to ensure the PMO has the capacity and capability needed
- Embed head of profession function and develop corporate project and programme management capability

Project Governance – 10 staff members and matrix management of COL wider PMO community
