### **Main Report**

The City Bridge Trust Business Plan 2013-16 has been circulated to Members as a separate document from your main bundle of papers.

The format of the report is very similar to those you have approved in past years and contains all of the City of London Corporation required elements. The plan includes both headline information and detailed workplans, incorporating the Trust's eight key performance indicators. In particular this year the plan highlights the work on corporate philanthropy and social investment strategies both of which are developing an increasing profile within the Trust's overall portfolio of work.

It has been observed in the past that the CBT business plan is a longer document than is produced by some other parts of the City Corporation. However it has proved helpful in briefing new staff, grants committee members and others to use the business plan as a single point of information about the Trust, including a longer narrative about the way that the Trust works.

### **Recommendation**

**That Members approve the Business Plan 2013-16 as circulated.**
