ENV-NE-COC 002 Negative impacts of visitor pressure 24-Feb-2022 Allan Cameron	<p>Cause: The sites are more popular than in previous years, linked to people enjoying local natural environments which are free of charge. Increased population and housing in the local area.</p> <p>Event: Long-term environmental damage, with a particular focus on protected landscapes and Sites of Special Scientific Interest (SSSI) which are not designed for such high visitor numbers.</p> <p>Effect: Ecological and environmental damage; reputational damage; loss of grants related to preservation; increased spend required to maintain sites/mitigate damage.</p>	 <p>Likelihood</p> <p>Impact</p>	12	<p>We are seeing a continual increase in visitor numbers and general population growth which we cannot influence. Therefore, we accept that we cannot reduce the possibility of the risk occurring. However, we continue to encourage people to use the sites responsibly.</p> <p>23 Feb 2024</p>	 <p>Likelihood</p> <p>Impact</p>	12		 Constant

ENV-NE-COC 004 Negative impacts of development and encroachment 24-Feb-2022 Allan Cameron	<p>Cause: Pressure on Planning Authorities to meet housing targets; failure to monitor and challenge housing and other development plans; lack of partnership working with Planning Authorities and inclusion in Local Development Plans; lack of resources to employ specialist support or carry out necessary monitoring/research.</p> <p>Event: Large housing or other developments on land affecting the sites.</p> <p>Effect: Increase in visitor numbers and general recreation pressure; potential decline in biodiversity due to disturbance and habitat quality; increase in air, light and noise pollution; decrease in water availability; increased hydrological pollution risk; increased traffic on local road network.</p>	<p>Lifehood Impact</p>	8	<p>Local plans continue to be developed and are scrutinised and commented on by officers when required. ENV-NE-COC 005 Negative impacts of pests and diseases 24-Feb-2022 Allan Cameron	<p>Cause: Inadequate biosecurity; purchase or transfer of infected plants, soil and animals. ‘Natural’ spread of pests and diseases from neighbouring areas e.g. Oak Processionary Moth (OPM); Ash Dieback; foot and mouth disease; and neospora.</p> <p>Event: Sites become infected by animal, plant or tree diseases.</p> <p>Effect: Service capability disrupted; ineffective use of staff resources; reputational damage; loss of species; temporary site closures and associated access; increased costs for reactive maintenance; threat to existing conservation status of sites, particularly those with woodland habitats.</p>		8	Ash Dieback: The cost of future Ash Dieback management is unknown; local risk budgets are not resourced sufficiently to meet costs. Local tree safety inspections deal with immediate risk, but we are unable to predict with any certainty the condition of trees and their likelihood of infection over the next two to three years. 23 Feb 2024		6	31-Mar-2025	Constant

ENV-NE-COC 001 Budget pressures 24-Feb-2022 Allan Cameron	Cause: Potential reduction in budget and income: reduction of income from car park charging; loss of income from rental properties. Event: Reduced budget and income. Effect: Potential staff reductions and inability to provide key services; financial failure; failure to achieve strategic objectives; significant reduction in service to users; reputational damage.		6	A Countryside Stewardship grant has been secured until 2026 and two vacant properties have been rented out, one with a long-term tenant until 2027, and the other on a rolling residential annual contract. These help to offset previous budget cuts. Car parking income was lower than estimated during 2022/23 (52% of estimated levels). The Assistant Director is currently reviewing income generation opportunities for The Commons. We will review the current and target risk scores again when the 2024/25 budgets are confirmed. 23 Feb 2024		6	Accept	 Constant
