

**Port Health & Environmental Services Committee – Outstanding Actions**

Item	Date	Action	Officer(s) responsible	To be completed/ progressed to next stage	Progress Update
1.	15 January 2019	<b>Measurement and mitigation options for operational rail noise from London Underground affecting the Barbican Estate</b>	Executive Director of Environment	Ongoing	<p>LUL have now completed their Tunnel Vibration Investigation to understand the effect of moving the points and crossings (P&amp;C) currently situated under Brandon Mews further west onto the floating slab track. The study has shown that moving the P&amp;Cs would reduce noise experienced by residents in Brandon Mews markedly without causing a negative effect elsewhere. LUL also outlined the financial position TFL are facing and detailed the projects which are being prioritized for future spend.</p> <p>A letter seeking the commitment of TFL to prioritise this issue at a future date has been sent and circulated to this committee. A response was received on 15<sup>th</sup> May from the Deputy Mayor for Transport, this re-asserts the position that TfL will continue to look at ways to minimise the issue at this location such as regular track and asset maintenance, however with a commitment to review should its funding situation change.</p> <p>A high-level CIL request for the LUL track works has been submitted and will be considered for prioritisation and LUL have been asked to consider whether a part funding arrangement (if alternative funding could be sourced) would facilitate the prioritisation of the works.</p>

2.	9 July 2024	<b>The Committee to be updated following investigation into break in service to the Out of Hours Noise Service.</b>	Executive Director of Environment	Completed	An email update was sent to Member of the Committee on 18 <sup>th</sup> July 2024.
