

Port Health & Environmental Services Committee – Outstanding Actions

Item	Date	Action	Officer(s) responsible	To be completed/ progressed to next stage	Progress Update
1.	15 January 2019	Measurement and mitigation options for operational rail noise from London Underground affecting the Barbican Estate	Executive Director of Environment	Ongoing	<p>LUL have now completed their Tunnel Vibration Investigation to understand the effect of moving the points and crossings (P&C) currently situated under Brandon Mews further west onto the floating slab track. The study has shown that moving the P&Cs would reduce noise experienced by residents in Brandon Mews markedly without causing a negative effect elsewhere. LUL also outlined the financial position TFL are facing and detailed the projects which are being prioritized for future spend. A letter seeking the commitment of TFL to prioritise this issue at a future date has been sent and circulated to this committee. A response was received on 15th May from the Deputy Mayor for Transport, this re-asserts the position that TfL will continue to look at ways to minimise the issue at this location such as regular track and asset maintenance, however with a commitment to review should its funding situation change.</p> <p>A letter seeking the commitment of TFL to prioritise this issue at a future date has been sent and circulated to this committee.
