CHB Pensions 009 McCloud Remedy	Cause: Implementation of the proposed remedy following new pension legislation and scheme specific regulations for the removal of age discrimination from the LGPS due to the McCloud judgement. Event: The impact of scheme amendments upon scheme members, Pensions Office and scheme employers due to implementation of the proposed remedy for McCloud. Effect: The Pensions Office is unable to adequately comply with legislative and regulatory amendments arising from the proposed McCloud remedy.		12	In December 2018, the Court of Appeal ruled that the “underpin protection” included in the 2014 LGPS reforms directly discriminated against some younger pension scheme members – this is now referred to as the McCloud Judgement or McCloud. On 15 July 2019 the government confirmed that the difference in treatment would be remedied in the LGPS and subsequently published a consultation document that set out options for how the government proposed to remove the discrimination. In February 2021 HM Treasury published its response to the		4	31-Aug-2025	

11-Aug-2022			consultation document and set out its preferred remedy choice. Further legislative changes are required before the remedy can be implemented, however, due to the complexity of the proposed remedy pension administrators and pension systems providers have commenced development of systems and processes based on current understandings to enable the remedy to be implemented. On 10 March 2022 the Public Services and Judicial Offices Act 2022 received Royal Assent. The main purpose of the Act was to support the implementation of the McCloud remedy, however further guidance and legislation is required before it can be applied directly to the LGPS. <u>The finalised LGPS (Amendment) (No.3) Regulations 2023 came into force from 1 October 2023 and amended the LGPS Regulations 2013 accordingly.</u> <u>Since this date, all new retirements have been calculated with reference to the Remedy.</u> <u>From August 2025 onwards, Annual Benefit Statements (ABS) should include information in respect of the McCloud Remedy for all affected members.</u> 24 Jan 2025

CHB Pensions 001 Insufficient Assets	Cause: The asset allocation of the Pension Fund portfolio is unable to fund long term liabilities due to market movements Event: There are insufficient assets to meet liabilities Effect: Reduced income or lower than anticipated growth. Participating employers are required to provide further funding through increased contributions to finance liabilities.		8	The Pension Fund's absolute return target has been set at 5.2% annually from 1st April 2020 by the Financial Investment Board (which is consistent with the strategy for funding the Fund's liabilities). As at <u>30 November 2024</u> 31 July 2024, the Fund is outperforming its absolute return target over all time horizons except three years. The Fund has produced a positive return over all time frames. This is largely as a result of global equity markets which have returned positively amid a resilient and generally solid economy, despite markets reacting to evolving monetary policies; major election results; and on-going geo-political tensions.		4	31-Mar-2025

CHB Pensions 001a	The Investment strategy of the Pension Fund is reviewed at least every three years following the triennial valuation with proper advice from the Investment Consultant.	The Pension Fund Investment Strategy was reviewed following the completion of the 2022 triennial valuation of the Fund's liabilities, by the Pensions Committee in September 2023. New Investments into Corporate Bonds, Renewable Infrastructure and broad private markets were agreed to ensure that the investment strategy remained appropriate in the context of the Fund's updated liabilities valuation and the current investment environment. <u>Subsequently in September 2024, the allocation to broad private markets was replaced by increasing the allocation to infrastructure which has a similar impact from a total Fund risk/return perspective.</u>	Caroline Al-Beyerty; Kate Limna	24-Jan-2025	31-Mar-2025

CHB Pensions 001b	The investment performance of the Pension Fund is measured against absolute return targets required to meet long term objectives. This will be reported to the Pensions Committee throughout the year and is supplemented by market insight from the Corporation's Investment Consultant who will assist any strategic decisions required in between the three-year formal strategy reviews.	The investment performance of the Pension Fund will be brought to each Pensions Committee for consideration.	Kate Limna	24-Jan- 2025	31-Mar- 2025

CHB Pensions 010 Targeted returns	Cause: Fund managers (including the London CIV) fail to achieve the targeted investment returns because • unsuitable fund managers are appointed, • individual fund managers underperform against the benchmarks agreed by the Committee, • aggregate fund manager performance fails to achieve the long-term targets • Number of investors in a fund may diminish below a minimum level causing the fund to close. Event: Failure to be seen to manage the funds responsibly. Effect: Supervisory intervention over management of the Funds.		6	The performance of fund managers and their aggregate performance is reported against target to the Pensions Committee. The Pensions Committee will set a diversified investment strategy to mitigate volatility and as such it expects different parts of the strategy to outperform at different times. The Strategic Asset Allocation was revised in September 2023. Following the revised Strategic Asset Allocation, which agreed investment into three new asset classes including Corporate Bonds in September 2023, the Pension Fund invested into the LCIV Buy and Maintain funds (Corporate bonds) in December 2023. In January 2024, the Pension Fund committed £75m to the LCIV Renewable Infrastructure Fund (of which c.£5m has been drawn down as at July 2024) and in July 2024, the M&G UK Residential Fund		6	31-Mar-2025

CHB Pensions 010b	Under the Government pooling agenda, London CIV is the asset pool operator for London LGPS funds. The LCIV holds monthly updates for Shareholders advising on latest developments for examples, product development and ESG/Climate related actions.	At the August November 2024 monthly meeting, the LCIV had one no change to the monitoring status of funds (LCIV Emerging Market Equity Fund which was downgraded) but were keeping a close watch on how Fund Manager performance. The Pension Fund is not invested in this fund. At a meeting in late 2022, the investors in the Global Alpha Growth Fund (of which there were 5) were advised that should the number of investors fall below 3, an orderly exit from the fund may be considered. CHB Pensions 006 Employer Insolvency	Cause: Processes not in place to capture or review covenant of individual employers. Event: Employer becomes insolvent or is abolished with insufficient funding to meet liabilities. Effect: Fund would pick up the liabilities potentially leading to increased contribution rates for other employers.	 Likelihood Impact	4	Since 2013 the LGPS regulations generally require all admission bodies to enter into an indemnity or bond to cover the possibility of an employer becoming insolvent or prematurely leaving the Fund. This would mean the Fund and the remaining employers would have to meet the outgoing employer's liabilities in the Fund. The actuary assesses the value of these risks to the Fund and sets the value for a bond, generally for a three-year period. It is generally a requirement of the City of London for all new admission agreements to have a bond and the responsibility of the admission body to arrange and regularly reassess the bond. CHB Pensions 008 Pension Scheme Administratio n	Cause: (i) Ineffective succession planning. (ii) Inadequately trained staff. (iii) Absences/increased staff turnover. (v) Data Accuracy. (vi) Lack of resources. Event: The failure of administrators to accurately calculate and pay the correct level of benefits. Effect: (i) Inaccurate benefits paid or delayed. (ii) Increased costs. (iii) Financial penalties/ sanctions.	 Likelihood Impact	4	The Regulations of the Local Government Pension Scheme (LGPS) set out how LGPS pensions should be calculated; the procedures to be followed in certain circumstances (i.e. normal retirement and ill health retirement); the timeframes/deadlines to be adhered to; and the notifications to be provided to Scheme members. Other bodies such as the Pensions Regulator, HM Revenue & Customs, the Office of National Statistics and the Financial Conduct Authority also impose rules that work alongside the Scheme Regulations or may even supersede them. Incorrect member data, lack of administrative knowledge and skills could lead to incorrect calculation of pension benefits and delays in payment. CHB Pensions 002c	Checking for errors or inconsistencies in valuation extract report before submission to the Actuary.	Officers review data quality prior to submission to the actuary. Additionally, scheme member data is submitted separately from employer level cash flow data, which are held on two distinct management information systems. As a result, errors are more easily identified during the valuation process itself. For example, if the scheme member data demonstrates that a given number of scheme members belonging to a single employer retired during the valuation period then this should also be evident from the benefit payments reported in the cash flow data.
