AN INTRODUCTION TO THE CITY OF LONDON CORPORATION

1. Although little more than one mile square in size, the City of London is densely developed with 24,420¹ businesses providing employment for 483,000² people, which represents 9.0% of Greater London's employment. 1 in 63 of the UK's workforce is employed in the City. The City is a key driver of growth for the UK, contributing £47bn to the UK economy.
2. By contrast the residential population of around 7,500³ is relatively small. In addition, it is estimated that the City attracts some 18.8⁴ million visitors each year.
3. As the local authority for the "Square Mile" the City of London Corporation (the City Corporation) is the oldest continuous municipal democracy in the world and predates Parliament. While the City Corporation has a long history, with many traditions and ceremonies continuing to this day, it has a modern outlook that matches that of the City it serves.
4. A unique organisation with a diverse range of roles and responsibilities the City Corporation has a role and remit that goes beyond that of an ordinary local authority. In addition to the functions of a local and police authority, a range of specialist services are provided for businesses in the City and to its residents, workers and visitors. Many of the City Corporation's services are of wider regional and national importance including the Barbican Centre, the Old Bailey, three wholesale markets and the Animal Reception Centre at Heathrow.
5. Recognising that the Square Mile cannot work in isolation, the City Corporation is committed to working in partnership to improve the quality of life of, and increase the opportunities for the wider London community. This work ranges from encouraging corporate responsibility in City firms to assisting in education, promoting employability, jobs and growth.
6. The City Corporation plays a leading role in supporting and promoting the City as the world's leading international financial and business centre and in promoting the interests of the financial services sector in the City and the UK. This includes providing essential infrastructure maintenance, strategic economic development and encouraging inward investment. The City of London Police is a dedicated police force for the Square Mile and the national lead force for economic crime.
7. The City Fund covers the City Corporation's activities in its capacity as a local authority, police authority and port health authority. The other funds are Bridge House Estates and City's Cash. Bridge House Estates funds the maintenance of Tower, London, Southwark, Millennium and Blackfriars Bridges and the work of City Bridge Trust (London's largest independent grant-giving charity). City's Cash allows us to provide services that are of importance to Greater London as

well as to the City at little or no cost to the public. More information on the role and ongoing work of the City Corporation, can be found on City's website at www.cityoflondon.gov.uk¹.

8. The City's Corporate Plan 2018-23 sets out our Vision and Strategic Aims which drives our decisions making and resource allocations. Our vision is that:

The City of London Corporation is the governing body of the Square Mile dedicated to a vibrant and thriving City, supporting a diverse and sustainable London within a globally successful UK

9. This vision is supported by 3 strategic aims, which in turn are broken down into 12 outcomes (shown below) by which we will judge our success.

¹ The City of London Corporation is responsible for the maintenance and integrity of the corporate and financial information included on its website. Legislation in the United Kingdom governing the preparation and dissemination of financial information differs from legislation in other jurisdictions

Contribute to a flourishing society

1. People are safe and feel safe.
2. People enjoy good health and wellbeing.
3. People have equal opportunities to enrich their lives and reach their full potential.
4. Communities are cohesive and have the facilities they need.

Support a thriving economy

5. Businesses are trusted and socially and environmentally responsible.
6. We have the world's best legal and regulatory framework and access to global markets.
7. We are a global hub for innovation in finance and professional services, commerce and culture.
8. We have access to the skills and talent we need.

Shape outstanding environments

9. We are digitally and physically well-connected and responsive.
10. We inspire enterprise, excellence, creativity and collaboration.
11. We have clean air, land and water and a thriving and sustainable natural environment.
12. Our spaces are secure, resilient and well-maintained.

10. The Corporate Plan sets out our ambitious aspirations against what is likely to be another period of significant change on a global, national and regional level, bringing with it significant threats as well as opportunities. Preventing climate change, terrorism and cyber-crime, and countering their effects, will remain high priorities. So too will retaining the UK's competitiveness, in the context of Brexit, increases in the cost of living and reductions in public sector spending.

11. Disruptive changes, such as the digitisation of our work and personal lives, are likely to bring both threats and opportunities to our residents, workers, visitors, partners and our own organisation.

12. To ensure our response to these challenges and opportunities is robust and the objectives we have set ourselves are brought to life, all departments develop annual business plans to shape their services reflecting on the strategic direction of the organisation and changes in the external environment. Our strategic objectives and business plans are also linked to our performance development framework and staff appraisal process which ensure that there is a golden thread linking our strategy to operational activity and the development of one of our key assets, our staff.
13. The City is committed to equal opportunities for all employees. The Establishment Committee overseeing employee related issues for the City providing high-level Member oversight on equality and inclusion in employment issues. An officer led Equality and Inclusion Board has also been established to actively promote equality, diversity and inclusion in service delivery and employment practices. The Board is responsible for monitoring the delivery of the Equality and Inclusion Action Plan and progress against the Equality Objectives for 2016-20. This also includes addressing the City's gender pay gap, highlighted above.

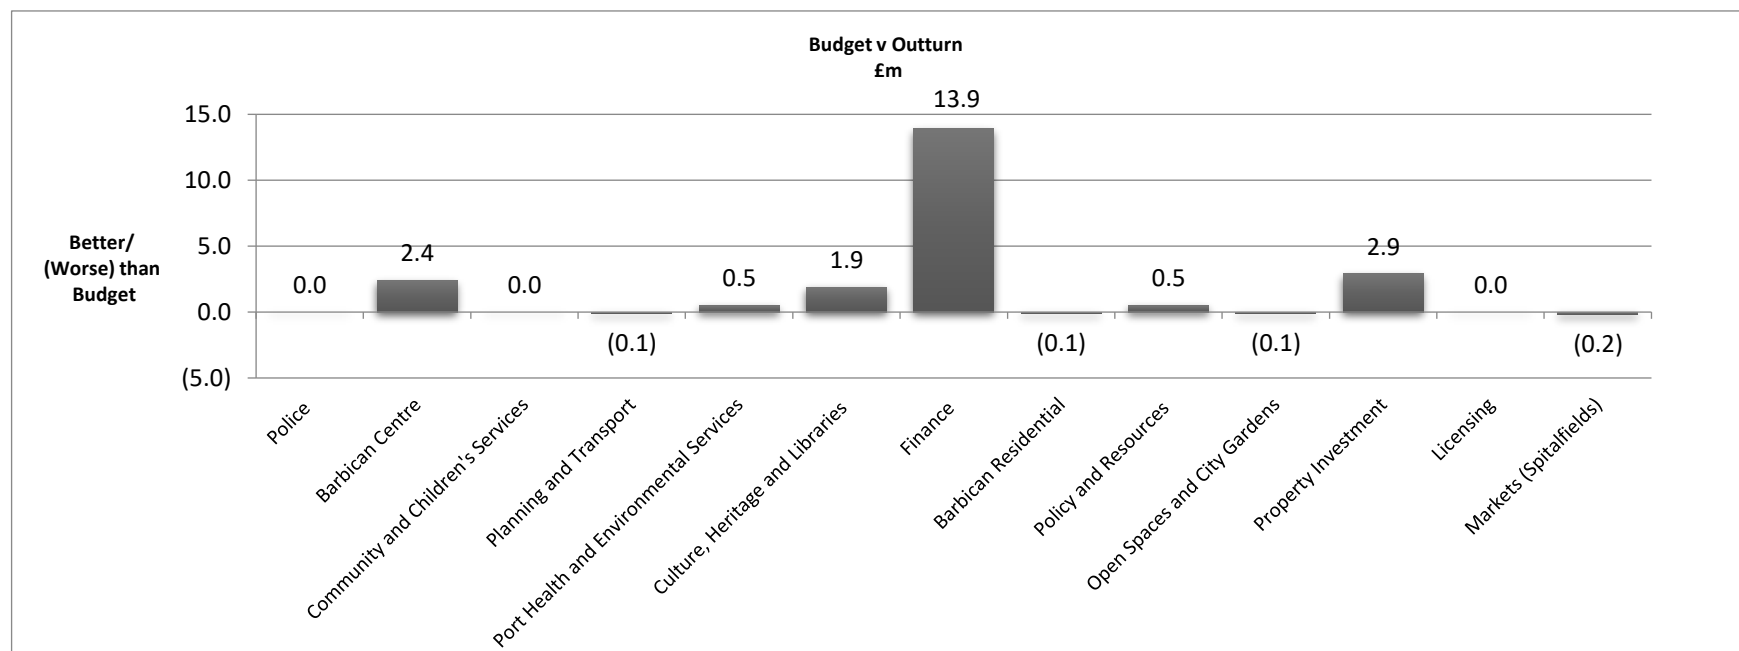

GOVERNANCE

14. A strong governance framework is present within the City, ensuring that its responsibilities and objectives are delivered in accordance with the law and proper standards; makes best use of public money, deliver continually improving services with risks managed appropriately. Details of this framework and how it operates within the City Fund can be found in the Annual Governance Statement which is included within the Statement of Accounts (see page 143-163).

FINANCIAL SUMMARY 2017/18

The resources available and how these are directed is a key factor in achieving of our stated goals. Our budget for 2017/18 was agreed by the Court of Common Council (the City's primary decision-making body) in February 2017 for both capital and revenue expenditure.

15. The overall position for the City Fund's revenue budget shows an underspend of £21.6m for the year, which is broken down below by Committee.

16. In line with previous years, the City's capital spend has been financed from its own resources or external contributions and therefore has not required any external financing i.e borrowing. This option will remain under review, especially considering the significant capital commitments the City is undertaking over the medium term. These are discussed in more detail in the outlook section below.

17. Along side the financial performance for the year, the City has achieved several notable successes in delivering services to residents, businesses and visitors. These include:

External Inspections

- City of London Police rated 'Good' by HMICFRS in its inspection of Police Effectiveness in preventing, investigating and tackling crime and antisocial behaviour.
- The Police also rated 'Good' by HMICFRS in its inspection of Police Efficiency in how it manages demand and resources.

Internal Performance Indicators

- During 2017-18 the City exceeded its target to recruit and appoint 100 apprentices.
- The percentage of carers who say they are extremely or very satisfied with the support or services they receive in the City is significantly higher than the national average, at 50% compared to 39% nationally.
- The rate for successful rent collection in the City remains exceptionally high at 98.6%, despite new challenges with the introduction of Universal Credit.
- 98% of adults and 100% of children were satisfied with the level of services in Public Libraries in the City.
- 87% of surveyed Cemetery and Crematorium visitors rated the features and facilities of the Cemetery as 'very good' or 'good'.
- New Spitalfields Market continued to meet its target to divert 100% of waste from landfill.
- 95% of justifiable noise complaints investigated by the Pollution Team resulted in a satisfactory outcome, against a 90% target.
- Whilst notifiable crimes increased by 8.1% (from 5,445 to 5,901), this was amongst the lowest increases nationally, placing the City of London Police in the top 5 performing forces.
- 80% of victims satisfied with the service received from the City of London Police.

Other Achievements

- The City Corporation won the RTPI Local Planning Authority of the Year 2017
- The Cleansing Team won the Most Effective Communications Campaign for the Coffee Cup Challenge.
- Four City buildings won RIBA London awards: 1 King William Street, 40 Chancery Lane, Leathersellers' Hall and 8 Finsbury Circus.
- The Transportation team won National Urban Design Awards 2018 for Aldgate.
- Winner RTPI Awards 2017: Green Roofs City of London.
- London in Bloom awards:
 - City of London – Overall winner in the Town category.
 - St Olave's Churchyard, Hart Street – Overall winner of Churchyard of the Year award.
 - Beech Gardens, the Barbican Estate and St Dunstan in the East all won Gold in the Small Park/Garden category.
- Cemetery and Crematorium awarded Green Flag and Green Flag Heritage status and Bunhill Fields Burial Ground awarded Green Flag Heritage status.
- The Air Quality Team supported volunteers and businesses in the creation and development of 19 'Clean Air Gardens' around the City throughout 2017 as part of City in Bloom.
- The Guildhall Art Gallery achieved its second highest annual footfall since it opened and a 15% increase in school visits; it was the third most visited attraction in London during London Open House weekend and received TripExpert's 2018 Experts' Choice Award.
- Guildhall Galleries (the collective of Guildhall Art Gallery, London's Roman Amphitheatre, Guildhall Great Hall, City of London Police Museum and City of London Heritage Gallery) received the Visit England Quality Rose Marque for the first time.

- LMA marked the 950th anniversary of the City of London's extensive archives through a programme of events and widening of digital access. A further 60,000 digital images were made available publicly including 950 'Digital Documents' (around 12,000 digital images) on the relaunched online catalogue.
- New Spitalfields Market won the prestigious Best Wholesale Market 2017 Award at The Great British Market Awards, organised by the National Association of British Market Authorities (NABMA).
- At the World Cargo Symposium, the Heathrow Animal Reception Centre (HARC) received a Certificate of Recognition for its work with the International Air Transport Association (IATA) to develop a new standardized global certification program to improve the safety and welfare of animals travelling by air.
- The Animal Health Team won an RSPCA Gold Footprint Award for its work and involvement with Animal Activity Licensing. This was part of the RSPCA Community Animal Welfare Footprints award scheme.

18. From both a financial and non-financial perspective, 2017-18 was a positive year for the City, achieving success across several different areas. Looking forward, there are a number of challenges in continuing to deliver successful outcomes across the diverse range of the City's activities.

STRATEGY AND RESOURCE ALLOCATION

19. The City's unique characteristics place it in an incomparable position to other local authorities due to its small geographical area, low residential populations and diverse range of services which operate at a local, regional and national level. These unique characteristics also translate into the City's funding arrangements where by returns generated from the City's investment property portfolio and the funds generated through Business Rates play a significant part in funding the City's activities. This structure brings its own challenges, which are reflected in the City's medium term financial plan. The City faces several decisions on how it continues to fund its activities especially in light of the major projects it is undertaking and the changing picture around the funding it has available.
20. Based on the current forecasts of Police and non-Police services, over the medium terms there is a substantial gap projected between available resources and projected expenditure, leading to the gradual reduction in unearmarked reserves as shown below.

City Fund Overall Revenue	18/19	19/20	20/21	21/22
	£'000	£'000	£'000	£'000
City Fund – non Police				
Current forecast (surplus)/deficit ¹	(16,700)	5,500	63,400	103,300
Unearmarked revenue reserves ²	(72,600)	(68,100)	(4,700)	0
City Fund – Police				
Current forecast (surplus)/deficit	0	0	4,100	4,800
Unearmarked Police revenue reserves ²	-	-	-	-

¹ Costs, including Major Projects, have been applied up to available reserves with assumption that the balance will be funded by borrowing.

² Unearmarked reserve were project at the MTFP planning and have been included here unaltered for consistency. The financial outturn for 2017/18 has differed from these projections therefore the reserve balances will differ.

21. For non-Police City Fund activity, the major contributor to the reducing unearmarked reserve balance is the inclusion of costs for the Museum of London relocation project and the Combined Court project. It has been assumed that the preference will be to utilise City Fund reserves prior to borrowing to fund these projects, though this is subject to the overall funding strategies for the projects, which are yet to be agreed. The anticipate cost of these projects across this period is £277m (the overall cost of these project to completion is £414m).
22. For the Police service, increasing demand and the changing nature of the Policing means changes are required to ensure the service can operate within the financial resources available. Whilst in the short term a balanced position has been reached, over the medium term a deficit position is projected against its limited reserve balances (the 2017/18 outturn for the Police shows a £6.9m unearmarked reserve balance available).
23. The Police have also taken on responsibility for the Action Fraud Service, which was transferred from the Home Office National Fraud Authority from 1 April 2014. Subsequently the service was subject to a procurement process which was won by IBM (UK) Ltd. The phasing of contract payments reflects IBM's significant mobilisation costs which could not be met from Police reserves. The costs were originally envisaged to all fall in 2016/17 but due to slippage on the project an additional cash flow loan of £5.2m was approved taking the total cash flow support to £11.7m. Repayments will fall between 2018/19 and 2023/24 and are partially reliant on the successful monetisation of the service.

24. In addition to these pressures, the City Corporation manages a number of risks for which a comprehensive Risk Management Strategy is in place. The Audit and Risk Management Committee monitors and oversees the strategy on a regular basis and undertakes a systematic programme of detailed reviews of each of the risks on the Corporate Risk Register. The Chief Officer Risk Management Group has a remit to ensure that risk management policies are applied, that there is an ongoing review of risk management activity and that appropriate advice and support is provided to Members and officers.

25. The Risk Management Strategy captures the following key objectives:

- Enables corporate, departmental and programme objectives to be achieved in the optimum way and to control risks and maximise opportunities which may impact on the City Corporation's success
- The City Corporation recognises its responsibility to manage risks and support a structured and focused approach that includes risk taking in support of innovation to add value to service delivery
- Risk Management is seen as an integral element of the City Corporation's culture

26. The Corporate Risk Register codifies key strategic risks and assigns responsibility to named Chief Officers to ensure appropriate mitigation action is taken. It includes risk in the areas listed below:

- Information Technology Service provision and security
- Road Safety
- Air Quality
- Resilience (emergency planning)
- Health and Safety
- Loss of business support for the City
- Safeguarding
- Funding Reduction (City Police

27. Further details on the Corporate Risk Register are available in the regular reports to Audit and Risk Management Committee at:

<http://democracy.cityoflondon.gov.uk/ieListMeetings.aspx?Committeed=244>

28. Departmental risk registers use the Corporation's Risk Management Strategy to ensure that there is a consistent approach to the way risks are described and scored. Top departmental risks are reported on a regular basis to Service Committees and the Audit and Risk Management Committee holds departmental risk challenge sessions with Chief Officers and their respective Committee Chairmen.

THE CITY FUND FINANCIAL STATEMENTS

1. The format and content of the financial statements set out in this publication is prescribed by the Chartered Institute of Public Finance and Accountancy Code of Practice on Local Authority Accounting in the United Kingdom 2017/18. They comprise core and supplementary statements together with supporting disclosure notes.

CORE STATEMENTS**Comprehensive Income and Expenditure Statement or CIES**

(page 12) - the cost of providing services in accordance with generally accepted accounting practices (GAAP) rather than the statutory amount to be funded from business rates, council tax and general government grants. The statutory position is shown in both the Expenditure and Funding Analysis and the Movement in Reserves Statement.

Balance Sheet

(page 14) – a “snapshot” at 31 March of the City Fund’s assets and liabilities matched by the reserves held. Reserves are categorised as usable (available to provide services subject to maintaining a prudent level and in some instances statutory limitations) and unusable which are mainly used to hold unrealised gains and losses.

Movement in Reserves Statement

(page 13) –sets out the change in the City Fund’s “net worth” over the year and analyses the movement between “usable reserves” and “unusable reserves”.

Cash Flow Statement

(page 15) - shows the change in cash and cash equivalents during the year and whether that change is due to operating, investing and financing activities. The net cash flow from operating activities is a key indicator of the extent to which services are funded by way of taxation and grant income or from the recipients of services provided. Investing activities represent the extent to which cash outflows have been made for resources which are intended to contribute to future service delivery.

Explanatory Notes to the Core Financial Statements are on pages 16 to 988. They include the **Expenditure and Funding Analysis** (Note 3, page 30) which shows how annual expenditure is used and funded from resources (government grants, rents, council tax and business rates) in comparison with those resources consumed or earned in accordance with generally accepted accounting practices. It also shows how this expenditure is allocated for decision making purposes between the City Corporation’s Committees. Income and expenditure accounted for under generally accepted accounting practices is presented more fully in the Comprehensive Income and Expenditure Statement.

Supplementary Financial Statements

Housing Revenue Account (HRA) (pages 99 to 105) –reflects a statutory obligation to maintain a separate revenue account for social housing.

Collection Fund (pages 1066 to 110) –a separate account setting out income collected from taxpayers and its distribution between the Government, the Greater London Authority and the City Corporation.

Police Pension Fund (pages 111 and 112) and **City Corporation Pension Fund** (pages 113 to 144) .

The City of London Corporation's Responsibilities

The City of London Corporation is required to:

- make arrangements for the proper administration of its financial affairs and to ensure that one of its officers has the responsibility for the administration of those affairs. This officer is the Chamberlain
- manage its affairs to secure economic, efficient and effective use of resources and safeguard its assets
- approve the Statement of Accounts

The Chamberlain's Responsibilities

The Chamberlain is responsible for the preparation of the Statement of Accounts in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2017/18 ("the Code").

In preparing this Statement of Accounts, the Chamberlain has:

- selected suitable accounting policies and then applied them consistently
- made judgments and estimates that were reasonable and prudent
- complied with the local authority Code.

The Chamberlain has also:

- kept proper accounting records which were up to date
- taken reasonable steps for the prevention and detection of fraud and other irregularities.

Chamberlain's Certificate

I certify that the Statement of Accounts gives a true and fair view of the financial position of the City Fund and the Pension Funds of the City of London Corporation at the reporting date and of its expenditure and income for the year ended 31 March 2018.

Dr Peter Kane
Chamberlain

Date: 31 March 2018

1. Accounting Policies

The accounting policies set out the specific principles, bases, conventions, rules and practices applied in preparing and presenting the financial statements.

1.1. General Principles

The Statement of Accounts summarises the City Fund transactions for the 2017/18 financial year and its position at the year end of 31 March 2018. The City Corporation is required to prepare the City Fund annual Statement of Accounts in accordance with proper accounting practices by the Accounts and Audit Regulations 2015. These practices primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2017/18 (the Code) issued by the Chartered Institute of Public Finance and Accountancy (CIPFA), supported by International Financial Reporting Standards (IFRS).

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

1.2. Accruals of Expenditure and Income

The accounts of the City Fund are maintained on an accruals basis. Consequently, activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:

- Revenue from the sale of goods is recognised when the significant risks and rewards of ownership are transferred to the purchaser and it is probable that economic benefits or service potential associated with the transaction will flow to the City Fund
- Revenue from the provision of services is recognised when the percentage of completion of the transaction can be measured reliably and it is probable that economic benefits or service potential associated with the transaction will flow to the City Fund
- Supplies are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption, they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where it is subsequently identified that debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected

1.3. Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours less cheques and BACS payments issued but not presented. Cash equivalents are highly liquid investments that mature in three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

1.4. Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the City Fund's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period and are disclosed in the notes.

1.5. Charges to Revenue for Non-current Assets

Services are debited with the following amounts to record the cost of holding non-current assets during the year:

- depreciation attributable to the assets used by the relevant service
- revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off
- amortisation of intangible assets attributable to the service.

The City Fund is not required to raise council tax to fund depreciation, revaluation and impairment losses or amortisation. However, if it had a borrowing requirement it would be required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement equal to an amount, the Minimum Revenue Provision (MRP), calculated on a prudent basis determined in accordance with statutory guidance. Depreciation, revaluation and impairment losses and amortisation would then be replaced by the MRP by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves.

1.6. Employee Benefits***(a) Short-term employee benefits***

Short-term benefits are those due to be settled within 12 months of the year end. They include such benefits as salaries, wages, paid annual leave and paid sick leave, bonuses and non-monetary benefits for current employees and are recognised as an expense for services in the year in which employees render service.

The cost of leave earned but not taken by employees at the end of the period is recognised within the Surplus or Deficit on the Provision of Services to the extent that employees are permitted to carry forward leave into the following period. However, statutory regulations require this cost to be reversed out of the accounts and this is achieved by crediting the revenue account for 'adjustments between accounting basis and funding basis under regulations' within the Movement in Reserves and debiting the 'statutory adjustments account' on the balance sheet.

(b) Termination benefits

Termination benefits are amounts payable as a result of a decision to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy in exchange for those benefits and are charged on an accruals basis to the appropriate service in the Comprehensive Income and Expenditure Statement at the earlier of when the authority can no longer withdraw the offer of those benefits or when the authority recognises costs for a restructuring. Where termination benefits involve the enhancement of pensions, statutory provisions require the City Fund Balance to be charged with the amount payable by the employer to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

(c) Retirement benefit costs**(i) Pension Costs – City of London Staff**

With the exception of serving police officers and teachers, City of London staff are eligible to contribute to the City of London Pension Fund, which is a funded defined benefits scheme. The estimated net deficit on the Fund is the responsibility of the City of London Corporation as a whole, as one employer, rather than the specific responsibility of any of its three funds (City Fund, City's Cash and Bridge House Estates). The Corporation and its three funds have a policy in place to share the net defined benefit cost of the pension fund across the three funds. As such the City Fund recognises the net defined benefit cost along with a share of scheme assets and scheme liabilities. The total net defined benefit cost is apportioned across the Corporation's three funds based on the proportion of pensionable payroll of each fund.

- The liabilities attributable to the City Fund are included on the balance sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions including mortality rates, employee turnover rates and projections of earning for current employees
- Liabilities are discounted to their value at current prices
- The assets attributable to the City Fund are included in the balance sheet at their fair value using estimated bid values where necessary

The change in the net pensions liability is analysed into the following components:

- Service cost comprising:
 - current service cost, the increase in liabilities as a result of years of service earned this year, allocated in the comprehensive income and expenditure statement to the services for which the employees worked
 - past service cost, the increase in liabilities as a result of a scheme amendment or curtailment whose effect relates to years of service earned in earlier years – debited to the surplus or deficit on the provision of services in the comprehensive income and expenditure statement as part of non-distributed costs
 - net interest on the net defined benefit liability is charged to the financing and investment income and expenditure line of the comprehensive income and expenditure statement. The interest is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability at the beginning of the period taking into account any changes in the net defined benefit liability during the period as a result of contribution and benefit payments

- Remeasurements comprising:
 - the return on plan assets, excluding amounts included in the net interest on the net defined benefit liability, charged to the pensions reserve as other comprehensive income and expenditure
 - actuarial gains and losses, changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions, charged to the pensions reserve as other comprehensive income and expenditure
- Contributions paid to the Pension Fund, cash paid as employer's contributions to the pension fund in settlement of liabilities, not accounted for as an expense

In relation to retirement benefits, statutory provisions require the City Fund unallocated reserve to be charged with the amount payable to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the movement in reserves statement, this means that there are transfers to and from the pension reserve to remove the notional debits and credits for retirement benefits and replace them with debits for cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year end. The negative balance that arises on the pension reserve thereby measures the beneficial impact to the City Fund unallocated reserve of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

(ii) Pension Costs – Police Officers and Judges

The Police Pension Scheme is unfunded. Prior to 1 April 2006 each police authority was responsible for paying the pensions of its own former employees on a "pay as you go" basis. Under the current arrangements the City Fund no longer meets pension costs directly; instead it contributes a percentage of police pay into the Police Pension Fund. At the year end the Police Pension Fund is balanced to zero by either receiving a contribution from the City Fund equal to the amount by which the amounts payable from the Pension Fund for the year exceed the amounts receivable or, by paying to the City Fund the amount by which sums receivable by the Pension Fund for the year exceed the amounts payable. Where the City Fund makes a transfer to the Pension Fund, the Home Office will pay an equivalent top-up grant to the City Fund. Where a transfer is made out of the Pension Fund, the City Fund must pay the amount to the Home Office.

The payment of pensions to former judges is the responsibility of the Treasury with the City of London reimbursing the Treasury for the City Fund's share of the liability. The City Fund's estimated liability has been determined by independent actuaries in accordance with IAS19.

The accounting treatment for the estimated liabilities on the Police and Judges schemes are similar to that outlined above for the City of London Pension Scheme.

(iii) Pension Costs - Teachers

The payment of pensions to former teachers under the Teachers' Pension Scheme is administered by Capita Teachers' Pensions on behalf of the Department for Education (DfE). The scheme provides defined benefits to members (retirement lump sums and pensions), earned as employees worked for the Authority. However, the arrangements for the teachers' scheme mean that liabilities for these benefits cannot ordinarily be identified specifically to the Authority. The scheme is therefore accounted for as if it was a defined contribution scheme and no liability for future

payments of benefits is recognised in the Balance Sheet. The Community and Children's Services line in the Comprehensive Income and Expenditure Statement is charged with the employer's contributions payable to Teachers' Pensions in the year.

1.7. Events After the Reporting Period

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

(a) Adjusting Events

Those that provide evidence of conditions that existed at the end of the reporting period – the Statement of Accounts is adjusted to reflect such events.

(b) Non-adjusting Events

Those that are indicative of conditions that arose after the reporting period – the Statement of Accounts is not adjusted to reflect such events, but, where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect. Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

1.8. Financial Instruments

(a) Financial Assets

Financial assets are classified into two types:

- loans and receivables – assets that have fixed or determinable payments but are not quoted in an active market
- available for sale assets – assets that have a quoted market price and/or do not have fixed or determinable payments

Loans and Receivables

Loans and receivables are recognised when the City Fund becomes party to a financial instrument contract (any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another) or, in the case of trade receivables, when the goods or services have been delivered. They are initially recognised at fair value, defined as the amount for which an asset could be exchanged or a liability settled, assuming the transaction was negotiated between parties knowledgeable about the market in which they are dealing and willing to buy/sell at an appropriate price, with no other motive in their negotiations other than to secure a fair price. After initial recognition they are measured at amortised cost using the effective interest method, less any impairment.

Available for Sale

Available for sale assets are recognised when the City Fund becomes a party to the contractual provisions of a financial instrument and are initially measured and carried at fair value. The City Fund has investments in money market funds and another small unquoted equity investment. Although they meet the definition of available for sale assets they are not adjusted for any movement in fair value as they are held at cost.

Impairment

At the end of the reporting period, the City Corporation assesses whether any of the City Fund financial assets are impaired. They are impaired and impairment losses recognised if there is objective evidence of impairment as a result of one or more events which occurred after the initial recognition of the asset and which has an impact on the estimated future cash flows of the asset. The impairment of receivables is based on the

age and type of each debt with the percentages applied reflecting an assessment of the recoverability. The loss is recognised in expenditure and the carrying amount of the asset is reduced through a provision for impairment of receivables. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through expenditure to the extent that the carrying amount of the receivable at the date of the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Where investments are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made (fixed or determinable payments), the asset is written down and a charge made to the Financing and Investment Income and Expenditure.

(b) Financial Liabilities

Financial liabilities are recognised when the City Fund becomes party to the contractual provisions of the financial instrument or, in the case of trade payables, when the goods or services have been received. Financial liabilities are de-recognised when the liability has been discharged, that is, the liability has been paid or has expired.

1.9. Interest Income

Interest is credited to the City Fund and Housing Revenue Account based upon average balances held by the Chamberlain, and invested by him in the London Money Markets.

1.10. Government Grants and Other Contributions

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as income at the date that the authority satisfies the conditions of entitlement to the grant/contribution, there is reasonable assurance that the monies will be received. Where a grant or contribution has been received but the conditions of entitlement have not been satisfied, the grant or contribution is treated as a receipt in advance.

(a) Revenue

Specific, ring-fenced, revenue grants are credited to the appropriate service revenue accounts. Non ring-fenced grants to finance the general activities of a local authority (e.g. Revenue Support Grant) are disclosed in the Comprehensive Income and Expenditure Account within taxation and non-specific grant income.

(b) Capital

Where a capital grant or contribution has been recognised as income in the Comprehensive Income and Expenditure Statement, and the expenditure to be financed from the grant or contribution has been incurred at the Balance Sheet date, the grant or contribution is transferred from revenue to the Capital Adjustment Account, reflecting the application of capital resources to finance expenditure. This transfer is reported in the Movement in Reserves Statement.

Where a capital grant or contribution has been recognised as income in the Comprehensive Income and Expenditure Statement, but the expenditure to be financed from that grant or contribution has not been incurred at the Balance Sheet date, the grant or contribution is transferred to the Capital

Grants Unapplied Account within the usable reserves section of the balance sheet reflecting its status as a capital resource available to finance expenditure. This transfer is reported in the Movement in Reserves Statement.

When, at a future date, the expenditure to be financed from the grant or contribution is incurred, the grant or contribution is transferred from the Capital Grants Unapplied Account to the Capital Adjustment Account, reflecting the application of capital resources to finance expenditure. This transfer is reported in the Movement in Reserves Statement.

1.11. Business Improvement Districts

A Business Improvement District (BID) scheme applies across an area of the City (Cheapside). The scheme is funded by a BID levy paid by non-domestic ratepayers. The Authority acts as principal under the scheme, and accounts for income received and expenditure incurred (including contributions to the BID project) within the relevant services within the Comprehensive Income and Expenditure Statement.

1.12. Community Infrastructure Levy

The City Corporation has elected to charge a Community Infrastructure Levy (CIL). The levy is charged on new builds (chargeable developments for the Authority) with appropriate planning consent. The City Corporation charges for and collects the levy, which is a planning charge. The income from the levy will be used to fund a number of infrastructure projects to support the development of the area. CIL is received without outstanding conditions; it is therefore recognised at the commencement date of the chargeable development in the Comprehensive Income and Expenditure Statement in accordance with the accounting policy for government grants and contributions set out above. CIL charges will be largely used to fund capital expenditure. However, a small proportion of the charges may be used to fund revenue expenditure.

1.13. Heritage Assets

Heritage assets are those assets intended to be preserved in trust for future generations because of their cultural, environmental or historical associations. Where the cost or value of heritage assets cannot be obtained at a cost which is commensurate with the benefits to the users of the financial statements, such assets will not be recognised in the Balance Sheet. The City Corporation does not consider the expense of obtaining information on cost or values to be justified and therefore recognises on the City Fund balance sheet only those heritage assets for which information on costs is readily available. The City Corporation considers that heritage assets will have indeterminate lives and high residual values; hence the City Corporation does not consider it appropriate to charge the City Fund depreciation for these assets (see note 16 for details of these assets).

1.14. Investment Property

Investment properties are those that are used solely to earn rentals and/or for capital appreciation. The definition is not met if the property is used in any way to facilitate the delivery of services or production of goods or is held for sale.

Investment properties are measured initially at cost and subsequently at fair value, being the price that would be received to sell such an asset in an orderly transaction between market participants at the measurement date. As a non-financial asset, investment properties are measured at highest and best use. Properties are not depreciated but are revalued annually according to market conditions at the year-end. Gains and losses on revaluation are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The same treatment is applied to gains and losses on disposal.

Rentals received in relation to investment properties are credited to the Financing and Investment Income line and result in a gain for the Unallocated Reserve. However, revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the Unallocated Reserve. The gains and losses are therefore reversed out of the Unallocated Reserve in the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any sale proceeds greater than £10,000) the Capital Receipts Reserve.

1.15. Contingent Assets

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the City Fund. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits or service potential will arise and the asset's value can be measured reliably, the debtor (or cash where consideration has been received) and the related revenue are recognised in the financial statements of the period in which the change in circumstances occurs. Where an inflow of economic benefits or service potential is probable (rather than virtually certain) and can be reliably measured, contingent assets are disclosed as notes to the accounts.

1.16. Contingent Liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the City Fund. Contingent liabilities are assessed continually to determine whether an outflow of resources embodying economic benefits or service potential has become probable. If it becomes probable that an outflow of future economic benefits or service potential will be required for an item previously dealt with as a note to the accounts, a provision is recognised in the financial statements for the period in which the change in probability occurs (except in circumstances where no reliable estimate can be made). Where a contingent liability exists, but a reliable estimate cannot be made, a note is disclosed in the accounts unless the possibility of an outflow of resources embodying economic benefits or service potential is remote.

1.17. Provisions

Provisions are made where an event has taken place that gives the City Fund a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. For instance, the City Fund may be involved in a court case that could eventually result in the making of a settlement or the payment of compensation from the City Fund. Provisions are charged as an expense to the appropriate service line in the Comprehensive Income and Expenditure Statement in the year that the City Fund becomes aware of the obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties. When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year – where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service. Where some or all of the payment required to settle a provision is expected to be recovered from another party (e.g. from an insurance claim), this is only recognised as income for the relevant service if it is virtually certain that reimbursement will be received if the City Fund settles the obligation.

1.18. Leases

Leases are classified as finance leases when substantially all the risks and rewards of ownership are transferred to the lessee. All other leases are classified as operating leases. Where a lease covers both land and buildings, the land and buildings elements are considered separately for classification. Freehold land has an indefinite life and the land within the lease is recorded as an operating lease unless it is an immaterial part of the lease.

(a) Finance Leases**(i) City Fund as Lessee**

The City of London recognises property, plant and equipment held under finance leases as assets at the commencement of the lease at amounts equal to its fair value and, where material, liabilities at the lower of the present value of the minimum lease payments or the fair value of the property. The asset recognised is matched by a liability for the obligation to pay the lessor. Minimum lease payments are apportioned between a finance charge (interest) and a reduction of the outstanding liability. The finance charge element is allocated to revenue and is calculated so as to produce a constant periodic rate of interest on the remaining balance of the liability. Where liabilities are immaterial, a liability is not recognised and the full rental is charged to revenue over the term of the lease.

(ii) City Fund as Lessor

Amounts due from lessees under finance leases are recorded in the Balance Sheet as a debtor at the amount of the net investment in the lease. The lease payments receivable are apportioned between repayment of the debtor and finance income. The finance income is credited to revenue and calculated so as to give a constant periodic rate of return from the net investment. The asset is written out of the balance sheet as a disposal. A gain, representing the net investment in the lease is credited to income and the difference shown as a gain or loss on disposal. Where the lessee acquires the asset through payment of a premium at the commencement of the lease, this is included as a capital receipt and there is no remaining finance lease asset.

(b) Operating Leases**(iii) City Fund as Lessee**

Rentals paid under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the services benefitting from use of the leased property, plant or equipment. Charges are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a rent-free period at the commencement of the lease).

(iv) City Fund as Lessor

Assets subject to operating leases are included in the Balance Sheet according to the nature of the assets. Rental income from operating leases is credited to the Comprehensive Income and Expenditure Statement. Credits are made on a straight-line basis over the period of the lease, even if the payments are not received on this basis (e.g. there is a premium paid at the commencement of the lease).

1.19. Overheads

The costs of support service overheads are generally apportioned between all services on the basis of employee time spent or other resources consumed on behalf of user services. Similarly, with the exception of vacant properties, the costs of support service buildings (including capital charges) are apportioned on the basis of the office area utilised by each service.

1.20. Property, Plant and Equipment

Property, plant and equipment comprises the following classes of tangible long-term assets; council dwellings, other land and buildings, leasehold improvements, vehicles plant and equipment, infrastructure assets, community assets, assets under construction and surplus assets.

(a) Recognition

Expenditure on the acquisition, creation or enhancement of property, plant and equipment is capitalised provided that the expenditure is material (generally in excess of £50,000) and the asset yields benefits to the City Fund, and the services it provides, for a period of more than one year. This excludes expenditure on routine repairs and maintenance of property, plant and equipment which is charged directly within service costs.

(b) Valuation

Property, plant and equipment are measured initially at cost, representing the cost directly attributable to acquiring or constructing the asset so that it is capable of operating in the manner intended. Assets are then carried in the Balance Sheet using the following measurement bases:

- Properties regarded as operational - current value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV), or where this cannot be assessed because there is no market for the subject asset, the depreciated replacement cost, based on modern equivalent assets, as an estimate of current value.
- Council dwellings – current value, determined using the basis of existing use value for social housing
- Non-operational assets under construction – historic cost
- Infrastructure, community and heritage assets - historic cost, net of depreciation, where appropriate
- Vehicles, plant and equipment - cost, net of depreciation, as a proxy for current value.
- Surplus assets – fair value, estimating highest and best use

All properties included on the balance sheet at current or fair value are revalued at least once within a five year period as part of a rolling programme with subsequent additions being included in the accounts at their cost of acquisition until the asset is next revalued. Revaluations are carried out sufficiently regularly to ensure that their carrying value is not materially different from their value at the year end.

(c) Revaluations

An increase arising on revaluation is taken to the revaluation reserve unless the increase is reversing a previous impairment loss charged to Surplus or Deficit on the Provision of Services on the same asset or reversing a previous revaluation decrease charged to Surplus or Deficit on the Provision of Services on the same asset, in which case it is credited to expenditure to the extent of the loss or decrease previously charged there.

Where the carrying amount of an item of property, plant and equipment is decreased as a result of a revaluation, i.e. a significant decline in an asset's carrying amount during the period that is not specific to the asset (as opposed to impairment – see below), the decrease is recognised in the Revaluation Reserve to the extent that there is a balance on the reserve for the asset and, thereafter, against the Surplus or Deficit on the Provision of Services. Legislation prescribes that revaluation gains or losses charged to Surplus or Deficit on the Provision of Services are not proper charges to the City Fund. Such amounts are transferred to the Capital Adjustment Account and reported in the Movement in Reserves Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal inception following implementation from the 2007 Statement of Recommended Practice. Gains arising before that date have been consolidated in the Capital Adjustment Account.

(d) Impairments

An impairment loss arises if the carrying amount of an asset exceeds its recoverable amount. This could be caused by such factors as a significant decline in an asset's value during the period (i.e. more than expected as a result of the passage of time, normal use or general revaluation), evidence of obsolescence or physical damage of an asset, a commitment by the authority to undertake a significant reorganisation, or a significant adverse change in the statutory or other regulatory environment in which the authority operates.

An annual assessment takes place as to whether there is any indication that an asset may be impaired. An impairment loss is recognised in the Revaluation Reserve to the extent that there is a balance on that reserve relating to the specific asset and thereafter to the Surplus or Deficit on the Provision of Services.

The reversal of an impairment loss previously recognised in Surplus or Deficit on the Provision of Services will not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. Any excess above this carrying amount is treated as a revaluation gain and charged to the Revaluation Reserve.

Legislation prescribes that impairment losses and reversal of impairment losses charged to Surplus or Deficit on the Provision of Services are not proper charges to the City Fund. Such amounts are transferred to the Capital Adjustment Account and reported in the Movement of Reserves Statement.

(e) De-recognition

The carrying amount of an item of property, plant and equipment is derecognised:

- on disposal, or
- when no future economic benefits or service potential are expected from its use or disposal

The gain or loss arising from de-recognition of an asset is the difference between the net disposal proceeds, if any, and the carrying amount of the asset.

The gain or loss arising from de-recognition of an asset is included in Surplus or Deficit on the Provision of Services under other operating expenditure.

Legislation prescribes that the gain or loss is not a proper charge to the City Fund or Housing Revenue Account. As a result, the City Fund or Housing Revenue Account is debited (in the case of a gain) or credited (in the case of a loss) with an amount equal to the gain or loss on disposal with the consequent entry being:

- an increase in the Capital Receipts Reserve of an amount equal to the disposal proceeds
- a charge to the Capital Adjustment Account of an amount equal to the carrying amount of the asset

If the asset derecognised was carried at a re-valued amount, an additional entry is required; the balance on the Revaluation Reserve is written off to the Capital Adjustment Account and reported in the Movement in Reserves Statement.

The Capital Receipts Reserve can only be used for new capital investment or set aside to reduce any underlying need to borrow (the capital financing requirement). A proportion of receipts relating to Housing Revenue Account disposals (75% for dwellings, 50% for land and other assets, net of statutory deductions and allowances) is payable to the Government.

(f) Depreciation

Depreciation is provided for on all property, plant and equipment with a finite useful life, other than freehold land. The depreciation charge is calculated by allocating the Balance Sheet value of the asset, less its residual value, to the periods expected to benefit from its use; generally the straight-line method has been adopted.

The costs of services include charges for depreciation for all property, plant and equipment used in the delivery of services based on the value of assets at the start of the year. Where the effects of major additions or disposals occurring during the year are material, these are also reflected in capital charges to service revenue accounts. Freehold land, certain community assets and assets under construction are not directly used in the delivery of services and therefore do not attract a charge for capital.

(g) ComponentsAssets other than Housing Revenue Account (HRA) Dwellings

Large assets, for example a building, are reviewed to ascertain whether differences in the useful lives of components would have a material impact on the level of depreciation and/or carrying value of the overall assets. These reviews are undertaken:

- when an asset is acquired
- when an asset is enhanced
- when an asset is revalued

Where there is a material impact on depreciation and/or the carrying value, the components are treated as separate assets and depreciated over their own useful economic lives.

HRA Dwellings

The components of HRA dwellings are reviewed at the same stages as indicated above. However, upon review, all the main components in HRA dwellings (e.g. roofs, windows, central heating, lifts and electrics) are treated as separate assets and depreciated over their own useful economic lives. This facilitates the use of the Major Repairs Reserve which is classified by Government as 'capital' funding.

1.21. Fair value measurement

The authority measures some of its non-financial assets such as surplus assets and investment properties and some of its financial instruments such as equity shareholdings at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- a) in the principal market for the asset or liability; or
- b) in the absence of a principal market, in the most advantageous market for the asset or liability.

The authority measures the fair value of an asset or liability using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

When measuring the fair value of a non-financial asset, the authority takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The authority uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Inputs to the valuation techniques in respect of assets and liabilities for which fair value is measured or disclosed in the authority's financial statements are categorised within the fair value hierarchy, as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities that the authority can access at the measurement date
- Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3 – unobservable inputs for the asset or liability

1.22. Reserves

Specific amounts have been set aside as reserves for future policy purposes or to cover contingencies. Details of the City Fund's earmarked reserves are set out in 10. Certain reserves are required by the Code to manage the accounting process for long-term assets and retirement benefits and do not represent usable resources. Details of these unusable reserves are set out in note 28.

1.23. Revenue expenditure funded from capital under statute

Legislation allows some expenditure to be classified as capital for funding purposes when it does not result in the expenditure being carried on the Balance Sheet as a long-term asset. The purpose of this is to enable it to be funded from capital resources rather than be charged to revenue and impact on that year's council tax. These items are generally grants and expenditure on property not owned by the authority and amounts directed under statute.

Such expenditure is charged to Surplus or Deficit on the Provision of Services in accordance with the general provisions of the Code. Any statutory provision that allows capital resources to meet the expenditure is accounted for by debiting the Capital Adjustment Account and crediting the City Fund unallocated reserve and inclusion as a reconciling item in the Movement in Reserves Statement.

1.24. Value Added Tax

Income and expenditure excludes any amounts related to VAT as all VAT collected is payable to HM Revenue & Customs and all VAT paid is recoverable from it.

1.25. Schools

The Code of Practice on Local Authority Accounting in the United Kingdom confirms that the balance of control for local authority maintained schools (i.e. those categories of school identified in the School Standards and Framework Act 1998, as amended) lies with the local authority. The Code also stipulates that those schools' assets, liabilities, reserves and cash flows are recognised in the local authority financial statements. Therefore schools' transactions, cash flows and balances are recognised in each of the financial statements of the authority as if they were the transactions, cash flows and balances of the authority.

1.26. Accounting for Council Tax and National Non Domestic Rates

The council tax and National Non Domestic Rates (NNDR) income included in the Comprehensive Income and Expenditure Statement is the City Fund's share of accrued income for the year. However, regulations determine the amount of council tax and NNDR that must be included in the City Fund. Therefore, the difference between the income included in the Comprehensive Income and Expenditure Statement and the amount required by regulation to be credited to the City Fund is taken to the Collection Fund Adjustment Account and included as a reconciling item in the Movement in Reserves Statement.

The Balance Sheet includes the City Fund's share of the end of year balances in respect of council tax and NNDR relating to arrears, impairment allowances for doubtful debts, overpayments and prepayments and appeals.

2. Prior Year Restatement

No prior year restatements have been required in these accounts.

3. Expenditure and Funding Analysis

2016/17				2017/18

Adjustments for Capital Purposes

This column adjusts for capital items which need to be included in the Comprehensive Income and Expenditure Statement such as:

- the net gain on the disposal of fixed assets
- revaluation gains or losses on investment properties
- income from capital grants

Net Changes for Pensions Adjustments

This column removes the employer pension contributions charges to services during the year and replaces them with pension related expenditure and income calculated in accordance with International Accounting Standard (IAS) 19 *Employee Benefits*.

Collection Fund Adjustment Account

This is a timing difference between what is chargeable under statutory regulations for business rates and council tax, which is largely based on estimates at the start of the year, and the income recognised under generally accepted accounting practices.

Other Adjustments

This column includes:

- the re-mapping of items reported to service committees to financing and investment income and expenditure in the Comprehensive Income and Expenditure Statement. Such items include income and expenditure relating to investment properties reported to the Property Investment Board, trading activities reported to the Markets Committee and interest on cash balances reported to Finance Committee
- the elimination of recharges between committees which would otherwise result in gross expenditure and income being overstated in the Comprehensive Income and Expenditure Statement

The above adjustments net to nil overall. The net difference remaining relates to accruals for the cost of annual leave entitlement earned but not taken in the year.

5. Expenditure and Income Analysed by Nature

City Fund income and expenditure included in the net cost of services is analysed as follows:

2016/17 £'m		2017/18 £'m
	Expenditure	
156.0	Employee expenses	173.5
154.1	Other service expenses	174.3
200.0	Crossrail	0.0
33.6	Support service recharges	36.8
26.6	Depreciation, amortisation and impairments	29.8
36.2	Interest payments	32.4
0.5	Precepts and levies	0.5
213.3	Business rates tariff and levy payments to Government	291.9
0.3	Payments to Government's housing capital receipts pool	0.3
(9.5)	Gain on the disposal of assets	(2.9)
811.1	Total expenditure	736.6
	Income	
(160.8)	Fees, charges and other service income	(186.1)
(5.1)	Interest and investment income	(4.3)
(257.4)	Business rates and council tax income	(369.7)
(189.2)	Government grants and other grants, contributions and reimbursements	(177.4)
(54.9)	Unrealised gains on revaluation of investment properties	(69.2)
(667.4)	Total Income	(806.7)
143.7	(Surplus) or Deficit on the Provision of Services	(70.1)

6. Critical Judgements in Applying Accounting Policies

In applying accounting policies authorities may have to make certain judgements about complex transactions or those involving uncertainty about future events. The critical judgement that management considers will have a material effect on the amounts recognised in the financial statements is the net deficit on the City of London Pension Fund. This is the responsibility of the City Corporation as a whole rather than the specific responsibility of any of its three funds. Therefore, the City Fund does not have an exclusive relationship with the Pension Fund and the portion of the Pension Fund net deficit relating to City Corporation employees engaged on City Fund activities is not separately identifiable. An apportionment is made based on employer's pension contributions paid by each of the three funds into the Pension Fund.

7. Assumptions Made About the Future and Other Major Sources of Estimation Uncertainty

The Statement of Accounts contains estimated figures that are based on assumptions made by the City Fund about the future or that are otherwise uncertain. The estimates and associated assumptions are continually reviewed and are based on historical experience and other factors including expectations of future events that are considered to be reasonable under the circumstances. However, because balances cannot be determined with certainty, actual results could be materially different from those estimates. Changes in accounting estimates may be necessary if there are changes in circumstances on which the estimate was based, or as a result of new information or more experience. The estimates and assumptions that have the most significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are:

(a) Business Rates

Since the introduction of the Business Rates Retention Scheme effective from 1 April 2013, Local Authorities are liable for successful appeals against business rates in their proportionate share. Therefore, a provision has been recognised for the best estimate of successful appeals up to 31 March 2018. The estimate has been calculated using the Valuation Office Agency (VOA) ratings list of appeals and the analysis of successful appeals.

(b) Pension Benefits

Estimation of the net liability to pay pensions depends on a number of complex adjustments relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on pension fund assets. A firm of consulting actuaries is engaged to provide the City Fund with expert advice about the assumptions to be applied.

The effect of changes in individual assumptions on the net pension liability can be measured, but are complex and interact in a complex manner. For example the actuary determines the appropriate discount rate at the end of each year after taking account of the yield from a high quality bond of appropriate duration, a 0.1% decrease in the discount rate assumption would result in an increase in the pension liabilities of City Fund of some £27.4.8m. Other key assumptions for pension obligations are based in part on current market conditions and demographic data. Additional information on pension schemes is given in notes 45 to 48.

(c) Property Valuations

The carrying values of property, plant and equipment and investment properties are primarily dependent on judgements of such variables as the state of the property market, location, asset lives, condition of the property, indices etc. Valuation is an inexact science with assessments provided by different surveyors rarely agreeing and with prices subsequently realised diverging from valuations. A reduction in estimated valuations would result in reductions to the Revaluation Reserve and/or a loss recorded as appropriate in the Comprehensive Income and Expenditure Statement. For example a 1% reduction in the value of investment properties would result in a £15.2m debit to "Financing and Investment Income and Expenditure" in the Comprehensive Income and Expenditure Statement. Conversely, an increase in value would result in increases to the Revaluation Reserve and/or reversals of previous negative revaluations to the Comprehensive Income and Expenditure Statement and/or gains being recorded as appropriate in the Comprehensive Income and Expenditure Statement.

However, the risk of material adjustments is mitigated by using the experience and knowledge of professional chartered surveyors, both in-house staff and external firms. In addition, tests are undertaken to ensure that variations between the valuations of different surveyors, and between valuations and actual prices, are within reasonable tolerances. Additional information on property asset valuation is provided in note 17.

(d) Arrears

At 31 March 2018, the City Fund had a balance for rents and sundry debtors of £39.2m. A review of the length of time past due and progress on recovery action suggested that an impairment allowance for doubtful debts of £5.6m was appropriate. If collection rates were to deteriorate an increase in the amount of the impairment of the doubtful debts would be required.

8. Events after the Balance Sheet Date

The Statement of Accounts was authorised for issue by the Chamberlain on 31 May 2018. Events after the balance sheet date and up to 31 May 2018 have been considered in respect of material impact on the financial statements. Events taking place after this date are not reflected in the financial statements or notes.

9. Adjustments between Accounting Basis and Funding Basis under Regulations

This note details the adjustments that are made to the total comprehensive income and expenditure recognised in the year in accordance with proper accounting practice to the resources that are specified by statutory provisions as being available to meet future capital and revenue expenditure.

The following sets out a description of the reserves that the adjustments are made against.

City Fund Balance

This is the statutory fund into which all receipts are required to be paid and out of which all liabilities are to be met in respect of the City Fund's activities as a local authority, police authority and port health authority, except to the extent that statutory rules might provide otherwise. These rules can also specify the financial year in which liabilities and payments should impact on the City Fund unallocated reserve, which is not necessarily in accordance with proper accounting practice. The City Fund Balance is not available to fund Housing Revenue Account (HRA) services. With this exception, the City Fund Balance therefore summarises the resources that the City Fund is statutorily empowered to spend on its services or on capital investment (or the deficit of resources that the City Fund is required to recover) at the end of the financial year.

Housing Revenue Account (HRA) Balance

The HRA Balance reflects the statutory obligation to maintain a revenue account for local authority council housing provision in accordance with Part VI of the Local Government and Housing Act 1989. It contains the balance of income and expenditure as defined by the 1989 Act that is available to fund the City Fund's HRA landlord function or (where in deficit) that is required to be recovered from tenants in future years.

Capital Receipts Reserve

This reserve holds the proceeds from the disposal of land or other assets, which are restricted by statute from being used other than to fund new capital expenditure or to be set aside to finance historical capital expenditure. The balance on the reserve shows the resources that have yet to be applied for these purposes at the year-end.

Capital Grants Unapplied

This reserve holds the grants and contributions received towards capital projects which have yet to be applied to meet expenditure. The balance is restricted by grant terms as to the capital expenditure against which it can be applied and/or the financial year in which this can take place.

Major Repairs Reserve

The City Fund is required to maintain this reserve, which controls an element of resources limited to being used on capital expenditure on HRA assets or the financing of historic capital expenditure by the HRA. The balance shows the resources that have yet to be applied at the year-end.

2017/18	Usable Reserves					Movement in Unusable Reserves £m

10. Transfers (to)/from Earmarked Revenue Reserves

This note sets out the amounts set aside within the City Fund Balance in earmarked revenue reserves to provide financing for future expenditure plans and the amounts posted back from earmarked reserves to meet City Fund expenditure in 2017/18.

	Notes	Balance at 31 March 2016 £m	Transfers Out 2016/17 £m	Transfers In 2016/17 £m	Balance at 31 March 2017 £m	Transfers Out 2017/18 £m	Transfers In 2017/18 £m	Balance at 31 March 2018 £m
Highway Improvements	(i)	(17.2)	3.4	(6.3)	(20.1)	4.7	(14.5)	(30.0)
Police Future Expenditure	(ii)	(4.1)	0.6	0.0	(3.5)	0.0	(3.4)	(6.9)
Crime Reduction Initiatives	(iii)	(3.6)	0.0	(0.1)	(3.7)	0.7	0.0	(3.0)
Crossrail	(iv)	(25.5)	25.5	0.0	0.0	0.0	0.0	0.0
Other Earmarked Reserves	(v)	(4.3)	2.1	(11.1)	(13.3)	1.5	(3.9)	(15.7)
Total		(54.7)	31.6	(17.5)	(40.6)	6.9	(21.9)	(55.6)

- (i) Highway Improvements - Created from on-street car parking surpluses to finance future highways related expenditure and projects as provided by section 55 of the Road Traffic Regulation Act 1984, as amended by the Road Traffic Act 1991.
- (ii) Police Future Expenditure - Revenue expenditure for the City Police service is cash limited. Underspendings against this limit may be carried forward as a reserve to the following financial year and overspendings are required to be met from this reserve.
- (iii) Under the guidelines of the Proceeds of Crime scheme funds received by the City Police must be ring fenced for "crime reduction initiatives".
- (iv) Crossrail - Funds set aside to contribute towards the City Fund's £200m commitment towards the Crossrail project were fully spent in 2016/17 when the payment was made.
- (v) Other Earmarked Reserves – The total for a number of relatively small reserves including service projects, VAT, the School's reserve and renewals and repairs.

11. Crossrail

In recognition of Crossrail's huge strategic importance to the City, the City Corporation agreed to make a £200m contribution from the City Fund towards the costs of the Crossrail project provided certain conditions were met. All the conditions were fulfilled by the end of 2016/17 and the payment was duly made in March 2017. The contribution is classed as revenue expenditure in the Comprehensive Income and Expenditure Statement as it does not result in the creation of a City Fund asset. However, under statutory provisions the City is able to capitalise this expenditure and this is included as one of the adjustments between the accounting basis and funding basis in the Movement in Reserves Statement.

12. Other Operating Income and Expenditure

2016/17 Net Expenditure/ (Income) £m		2017/18 Net Expenditure/ (Income) £m

* Revaluations at 1 April 2015 for surplus assets reflects the adoption of IFRS 13 valuation at highest and best use. This measure is recognised in the revaluation reserve.

Depreciation

The useful lives and depreciation rates generally used in the calculation of depreciation are listed below.

• General operational buildings	50 years
• Council Dwellings	125 years
• Leasehold improvements	10 – 30 years
• Certain “listed” operational buildings	75 – 125 years
• Infrastructure	10 – 25 years
• Heavy vehicles and plant	7 years
• Equipment	5 -12 years
• Cars and light vans	5 years
• Assets under construction	None
• Community Assets	None

Where there is a material impact on depreciation and/or the carrying value, components are treated as separate assets and depreciated over their own useful economic lives. Indicative economic lives of typical asset components include:

• Internal fit-out	10-25 years
• Plant and Machinery	15-25 years

Commitments

Significant capital commitments of some £7.1m were outstanding at 31 March 2018, detailed as follows:

- £2.7m outstanding in respect of the delivery of the new street lighting strategy
- £2.9m for the completion of works to Bishopsgate and 21 New Street to upgrade the police accommodation decant estate
- 1.5m relating to new windows and cladding on a block of dwellings at the Golden Lane Estate.

In addition, the City has committed to grant funding up to £30.4m to meet the initial design and planning costs of relocating the Museum of London to new premises at Smithfield. Of this initial sum, £xxx had been paid as at 31 March 2018. Should the decision to proceed be made, a significant funding commitment from the City will be required, with contributions from the Greater London Authority and fund-raising by the Museum.

The following have been revalued at 31 March 2018 in accordance with the Rolling Five Year Programme of Revaluation or to reflect material changes in value:

- Barbican Estate residential properties, baggage stores, and car bays
- Housing Dwellings (including guest flats)
- Artizan Street Community Centre
- Various Housing Commercial Properties (shops, garages and parking spaces etc)
- Properties at the City of London Cemetery and Crematorium
- Golden Lane Recreation Centre
- Barbican Centre, including the Barbican lending library
- Central Criminal Court
- Cleansing Depot and Offices at Walbrook Wharf
- Police Stations
- Aldgate Public Square Pavilion
- Spitalfields Market
- Surplus Properties
 - public conveniences
 - various properties on the Woodredon and Warlies Park Estate
 - disused areas identified for development on the Barbican Residential Estate
- Investment Properties
- Assets Held for Sale - land adjacent to the City of London Cemetery

The City Fund is not aware of any material change in value of any other assets and therefore the valuations have not been updated. The current asset values used in the accounts for the Barbican Centre, Central Criminal Court, Walbrook Wharf (depot and offices), Golden Lane Recreation Centre, Woodredon and Warlies Park, Cemetery and Crematorium, Police Stations and Section House, Barbican Hostel, Animal Reception Centre and the investment properties are based on assessments by external valuers. The firms of chartered surveyors who have prepared valuations for the City Fund are Jones Lang Lasalle Ltd, Cushman and Wakefield LLP, Gerald Eve and Savills.

All other asset values have been prepared by registered RICS valuers employed in the City Corporation's City Surveyor's Department.

16. Heritage Assets

The carrying value of heritage assets currently held in the Balance Sheet at historic cost is £8.9m (2016/17 £8.9m) which relates almost exclusively to one asset – the capital's only Roman Amphitheatre. The amphitheatre was discovered in Guildhall Yard during an archaeological dig taking place in preparation for a building project. In 2002, the doors to the amphitheatre opened for the first time in nearly 2,000 years.

The London Metropolitan Archives look after 105km of books, maps, films and photographs about London and Londoners dating from as far back as 1067. Guildhall Library also specialises in the history of London with a printing books collection from the 15th century onwards and many special collections including those devoted to Samuel Pepys, John Wilkes and Thomas More. Reliable valuations are not available for these assets and the cost of obtaining such valuations in order to recognise them on the balance sheet would outweigh the benefit of such recognition to the users of the financial statements.

Further information on the Roman Amphitheatre and the London Metropolitan Archives, including opening times and details of the collections held by the LMA, can be found on the City's website (www.cityoflondon.gov.uk).

17. Investment Properties

The following items of income and expense have been accounted for in the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement:

2016/17		2017/18
£m		£m
(54.5)	Income from investment properties	(59.2)
14.7	Operating expenses arising from investment property	16.3
(39.8)	Net gain	(42.9)

There are no restrictions on the City Fund's ability to realise the value inherent in its investment property or on the City Fund's right to the remittance of income and the proceeds of disposal.

The following table summarises the movement in the fair value of investment properties over the year:

2016/17 £m		2017/18 £m
1,366.7	Balance at start of the year	1,444.8
	Transfers	0.0
	Additions:	
33.2	Purchases	4.8
0.0	Construction	0.0
0.1	Subsequent expenditure	0.5
(10.1)	Disposals	(0.3)
	Revaluations:	
	Net gains from fair value adjustments	
54.9		69.2
1,444.8	Balance at end of the year	1,519.0

The fair values of investment properties have been based on a combination of:

- The market approach having regard to current market conditions, recent sales prices and lettings and other relevant information for similar properties in the area
- The income approach, by means of the discounted cash flow method, where the expected cash flows are discounted at a market rate to establish the present value of the net income stream.

This is in the context of the active property market that exists in the City of London.

As part of the annual valuation of our investment properties, our external valuers have determined a proportion of the portfolio has been valued on a level 3 basis. This means there some significant unobservable inputs which determine the value of these properties, namely the market rent and yield when using the valuation method highlighted above. The below table sets out the sensitivity of the property valuations to these inputs based on a +/- 0.25% change in yield and +/-5% change in market value. This on average generates a 6% change in the value of these properties.

Description of Assets	Assessed Valuation Range	Value 31 March 2018	Tolerance Range	
Investment Property	+/- 6%	1,218,154,000	1,291,243,240.00	1,145,064,760.00

18. Capital Expenditure and Capital Financing

The total amount of capital expenditure incurred in the year is shown, in the table below, together with the resources that have been used to finance it. Where assets are acquired under finance leases (see note 43) the transactions are considered to be the same as if the City Fund had purchased the assets and financed this by taking out a loan. Liabilities are therefore recognised for the same amount as the assets acquired under finance leases.

A nil or negative Capital Financing Requirement (CFR) indicates that the City Fund's provision for debt is equal to or greater than the debt incurred. Where capital expenditure is to be financed in future years by charges to revenue the expenditure results in a positive CFR, a measure of the capital expenditure incurred historically that has yet to be financed.

The £200m payment to Crossrail in 2016/17 was categorised as Revenue Expenditure Funding from Capital Under Statute (REFCUS) and is the reason for the significant change in capital expenditure between years.

2016/17 £m		2017/18 £m
(1.3)	Opening Capital Financing Requirement	40.6
	Capital Investment	
24.1	Property, Plant and Equipment	36.1
33.3	Investment Properties	5.3
0.0	Non-property Investments	0.0
	Intangible Assets	
203.7	Revenue Expenditure Funded from Capital Under Statute	8.2
	Sources of Finance	
0.0	Minimum Revenue Provison	(0.9)
(144.5)	Capital Receipts	(16.3)
(14.8)	Capital grants, contributions and donations	(17.3)
(59.9)	Direct revenue contributions	(11.1)
40.6	Closing Capital Financing Requirement	44.6

	Explanation of movement in year	
0	Minimum Revenue Provision	(0.9)
1.7	Assets acquired under finance leases	0.0
40.2	Increase in underlying need to borrow	4.9
41.9	Increase/(decrease) in Capital Financing Requirement	4.0

19. Financial Instruments

The financial instruments recognised in the City Fund financial statements include trade debtors and creditors, bank deposits and investments.

Categories of Financial Instruments

The financial instruments disclosed in the Balance Sheet are made up of the following categories:

Long Term	Current		Long Term	Current
31 March 2017	31 March 2017		31 March 2018	31 March 2018
£m	Restated £m		£m	£m
0.2	0.0	Investments	0.2	0.0
0.0	446.6	Unquoted equity investment at cost	0.0	471.5
0.0	250.4	Loans and receivables	0.0	214.5
0.2	697.0	Available for sale	0.2	686.0
		Total Investments		
18.7	41.1	Debtors	17.6	35.5
18.7	41.1	Loans and receivables	17.6	35.5
		Total Debtors		
0.0	(66.4)	Creditors	0.0	(56.7)
0.0	(66.4)	Financial liabilities at amortised cost	0.0	(56.7)
		Total Creditors		
(4.1)	0.0	Long Term Liabilities	(4.0)	0.0
(4.1)	0.0	Finance Leases	(4.0)	0.0
		Total Long Term Liabilities		

Investments

The City Fund's investments comprise cash that is not required for day to day purposes invested in deposits of varying fixed lengths and money market funds (including short dated bonds). Investment in money market funds are classed as available for sale financial assets as they are quoted in active markets. Loans and receivables are defined as financial assets that have fixed or determinable payments and are not quoted in an active market e.g. deposits

Income, Expense, Gains and Losses

The gains and losses recognised in the Income and Expenditure account in relation to financial instruments are made up as follows:

2016/17 Financial Assets Loans and Receivables £m		2017/18 Financial Assets Loans and Receivables £m
0.1	Impairment (gains)/losses	0.0
0.1	Total (Gains)/Losses in Surplus or Deficit on the Provision of Services	0.0
(5.1)	Interest Income	(4.2)
(5.1)	Total Income in Surplus or Deficit on the Provision of Services	(4.2)
(5.0)	Net gain for year	(4.2)

Fair Value of Assets and Liabilities

Financial liabilities, financial assets represented by investments and long term debtors are carried in the Balance Sheet at amortised cost. The fair value of trade and other receivables is taken to be the invoiced or billed amount. Short term debtors and creditors are carried at cost as this is a fair approximation of their value.

The City Fund's investments in the London money markets are predominately fixed rate and fixed length deposits. The carrying amount of the investments is assumed to be a reasonable approximation of fair value taking into account the period to maturity.

The fair value of long term debtors in relation to investment properties (comprising finance lease debtors) have been assessed based on the investment property fair values categorised within Level 2 of the fair value hierarchy (see accounting policy 1.21). Other long term debtors consist mainly of a loan to and finance lease debtor with the Museum of London. As there is no active market for these items the fair value is assumed to be the same as the carrying value categorised within level 3 of the fair value hierarchy.

31 March 2017			31 March 2018	
Carrying Amount £m	Fair Value £m		Carrying Amount £m	Fair Value £m
697.0	697.0	Investments	686.0	686.0
7.1	8.0	Long Term Debtors - investment properties	7.1	7.6
11.6	11.6	Long Term Debtors - other	10.5	10.5
715.7	716.6		703.6	704.1

20. Nature and Extent of Risks arising from Financial Instruments

The City Fund's activities expose it to a variety of financial risks:

- Credit risk – the possibility that other parties might fail to pay amounts due to City Fund
- Liquidity risk – the possibility that the City Fund might not have enough funds available to meet its commitments to make payments
- Market risk – the possibility that financial loss might arise as a result of changes in factors that affect the overall performance of the financial markets such as interest rates, stock market movements and foreign exchange rates

The City Corporation has adopted CIPFA's Treasury Management in the Public Services: Code of Practice and sets treasury management indicators to control key financial instrument risks in accordance with CIPFA's Prudential Code. The City Fund's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the resources available to fund services. Risk management is carried out by a central treasury team, under policies approved by the Court of Common Council in the annual treasury management strategy statement.

Credit Risk

Credit risk arises from deposits with banks, other financial institutions and other local authorities, as well as credit exposures to the City Fund's customers. Deposits are only made with Banks with a minimum Fitch "score" of Long term A and Short term F1 or are building societies with assets over £9bn (or which have a minimum credit rating "score" similar to that set for the banks). The City Fund also invests in money market funds, which are subject to a minimum credit rating of AAmmf (Fitch) or equivalent. In 2017/18 the City invested in two Short Dated Bond Funds. These financial instruments typically do not obtain their own standalone credit rating. The funds will invest in a wide array of investment grade instruments, which the City will actively monitor in terms of the fund's composition and credit quality of its underlying assets. The lending list is reviewed on a regular basis using advice from credit rating agencies and in-house judgements based partially on credit default swap rates.

The creditworthiness of the counterparties on the City Fund's lending list is carefully monitored. Security of the investments is the prime criteria when selecting investments with liquidity and yield being secondary and tertiary considerations. By the end of the year, the City Fund effectively had eleven potential borrowers in the form of UK banks and building societies and it has been necessary to maintain relatively high levels of individual maximum lending limits to accommodate lending requirements. The lending limits attributable to HSBC, Barclays, Goldman Sachs International Bank, Royal Bank of Scotland and Santander UK were maintained at maximum lending limits of £100m each, and Lloyds Bank was fixed at £150m (Lloyds being the City Corporations banker). The lending limit for the Nationwide Building Society was maintained at £120m. The maximum duration for such loans was fixed at three years. The lending limits for the Yorkshire, Coventry, Skipton and Leeds Building Societies were maintained at £20m each and the duration for such loans was fixed at 1 year. The list also contains three foreign banks with individual limits of £25m, being National Australia Bank, Australia and New Zealand Banking Group and Svenska Handelsbanken. The lending list also includes six highly rated money market funds (Aberdeen Sterling Liquidity Fund, CCLA, Deutsche Liquidity Fund, Federated Liquidity Fund, Standard Life Ignis Liquidity Funds, Invesco), three highly rated Ultra-Short Dated Bond Funds (Federated Sterling Cash Plus Fund, Standard Life Investments Short Duration Managed Liquidity Fund and Payden Sterling Reserve Fund) and most recently two Short Dated Bond Funds (Legal & General Short Dated Sterling Corporate Bond Index Fund and Royal London Investment Grade Short Dated Credit Fund). The City Corporation will also lend to other UK local authorities with a limit of £25m to any individual authority.

The City Fund's maximum exposure to credit risk in relation to its investments in banks, building societies, local authorities and money market funds cannot be assessed generally, as the risk of any institution failing to make interest payments or failing to repay the principal amount borrowed would be specific to each individual institution. No credit limits were exceeded during the reporting period and the City Fund does not expect any losses from non-performance by any counterparty in relation to outstanding deposits. As at 31 March 2018 the City Fund had some £738.2m in cash, cash equivalents and investments.

The City Fund does not generally allow credit for customers. Therefore, the potential maximum exposure to credit risk is with customers for which prudent provision for bad debts has been included within the accounts based on the length of time past due and progress on recovery action (see note 22). The past due but not impaired amount is summarised below.

Amount as at 31 March 2017 £m		Amount as at 31 March 2018 £m
14.8	Less than three months	17.7
1.2	Three to six months	1.3
0.7	Six months to one year	0.4
1.5	More than one year	2.5
18.2	Total	21.9

Liquidity risk

As the authority has ready access to borrowings from the money markets to cover any day to day cash flow need, and the Public Works Loans Board, for access to longer term funds. The authority is also required to provide a balanced budget through the Local Government Finance Act 1992, which ensures sufficient monies are raised to cover annual expenditure. There is no significant risk that it will be unable to raise finance to meet its commitments under financial instruments. At present, the City Fund has no borrowing exposure and has no plans to borrow to finance future capital expenditure. All trade creditors and other payables are due to be paid in less than one year.

Market risk

Interest rate risk

The authority is exposed to significant risk in terms of its exposure to interest rate movements on its investments. Movements in interest rates have a complex impact on the authority. For instance, a rise in interest rates would have the following effects:

- investments at variable rates – the interest income credited to the Income and Expenditure Account will rise
- investments at fixed rates – the fair value of the assets will fall (no impact on revenue balances).

The low interest rate environment persisting in 2017/18 continues to have an adverse impact on the income earnings of the City Fund and HRA, which is anticipated to continue in 2018/19, although longer term deals are entered into wherever possible to earn higher rates when available.

Changes in interest receivable on variable rate investments are posted to the Surplus or Deficit on the Provision of Services and affect the City Fund unallocated reserve. The Treasury Management Team has an active strategy for assessing interest rate exposure that feeds into the setting of the annual budget and which is used to update the budget quarterly during the year. According to this assessment strategy, if interest rates had been 1% higher with all other variables held constant, the financial effect at 31 March on investments with variable rates would be:

2016/17 £m		2017/18 £m
	Increase in interest receivable on investments held at variable rates	
1.9	City Fund	2.4
0.1	HRA	0.0
2.0	Total	2.4

The impact of a 1% fall in interest rates would be as above but with the movements being reversed.

Price risk

The City Corporation has no material investments in equity shares attributable to the City Fund.

Foreign exchange risk

The authority has no financial assets or liabilities denominated in foreign currencies and therefore has no exposure to loss arising from movements in exchange rates.

21. Long Term Debtors

31 March 2017 £m		31 March 2018 £m
13.8	Net Investment in Finance Leases	13.2
2.0	Loans to Museum of London (repayable by 2032)	1.8
2.6	Rent	2.3
0.2	Museum in Docklands Loan	0.1
0.1	Service Charge Loans	0.1
18.7		17.6

22. Debtors and Payments in Advance falling due within a year

31 March 2017		31 March 2018	
£m		£m	£m
27.5	Central Government Bodies		34.0
5.6	Greater London Authority		5.5
12.0	Rents	11.9	
(0.8)	less impairment allowance for bad and doubtful debts	(0.7)	
11.2			11.2
17.8	Sundry	28.4	
(2.4)	less impairment allowance for bad and doubtful debts	(4.9)	
15.4			23.4
5.4	City Fund's share of national business rates arrears	10.9	
(3.0)	less impairment allowance for bad and doubtful debts	(2.9)	
2.4			8.0
13.5	Investment property sale proceeds		0.0
0.6	Net Investment in Finance Leases		0.7
0.7	Season Ticket and Loans to Employees		0.7
8.8	Prepayments		9.3
85.7			92.8

The Code specifies that, except where information is not material, debtors should be analysed between the following categories; central government bodies, other local authorities, NHS bodies, public corporations and trading funds, and bodies external to general government (i.e. all other bodies). With the exception of central government bodies and the Greater London Authority, there are no material amounts due from other general government bodies.

23. Cash and Cash Equivalents

The balance of Cash and Cash Equivalents is made up of the following elements:

31 March 2017		31 March 2018
£m		£m
53.2	Cash at bank	55.1
53.2		55.1

24. Creditors and Receipts in Advance

31 March 2017		31 March 2018
£m		£m
(170.1)	Central Government Bodies	(128.1)
(78.3)	Greater London Authority and Transport for London	(119.2)
(20.8)	City Fund's share of national business rates creditors and receipts in advance	(29.1)
(8.4)	Deposits	(1.2)
(62.6)	Sundry	(60.1)
(32.6)	Receipts in advance	(23.0)
0.0	Spitalfields Market Tenants Fund	0.0
(372.8)		(360.7)

The Code specifies that, except where information is not material, creditors should be analysed between the following categories; central government bodies, other local authorities, NHS bodies, public corporations and trading funds, and bodies external to general government (i.e. all other bodies). With the exception of central government bodies, the Greater London Authority and Transport for London there are no material amounts due to other general government bodies. The City Fund acts as an agent; on behalf of central government and the Greater London Authority in collecting sums due from business rates; and on behalf of Transport for London by collecting Mayoral Community Infrastructure Levy (CIL) and Section 106 agreements planning obligations. Sums collected, but not yet paid over, by the City Fund as an agent for these bodies are included as creditors.

Sundry creditors include monies held on behalf of third parties by the City of London Police arising from its operational responsibilities and the year on year increase in sundry creditors is mainly due to the increase in these funds.

25. Provisions

	National Business Rates £m	City Fund Premium on Business Rates £m	Total
Balance at 1 April 2017	(80.2)	(2.4)	(82.6)
Appeals settled in 2017/18	25.4	0.9	26.3
Provisions made in 2017/18	(1.7)	(0.1)	(1.8)
Balance at 31 March 2018	(56.4)	(1.6)	(58.1)

With the introduction of the Business Rates Retention Scheme from 1 April 2013, Local Authorities are liable for successful appeals against business rates in their proportionate share. The City Fund's proportionate share is 30%. A provision is recognised for the best estimate of the City Fund's liability at the year-end for known appeals. The estimate has been calculated using the Valuation Office Agency (VOA) ratings list of appeals outstanding as at 31 March 2018 and an analysis of successful appeals in 2017/18.

26. Contingent Liabilities

There is a disagreement with a contractor as to whether or not certain work is inside or outside the scope of a contract. It is not known what the outcome of this dispute will be, but costs could be in the region of £2.6m.

27. Usable Reserves

Movements in the City Fund's usable reserves are detailed in the Movement in Reserves Statement on page 13 and Note10.

28. Unusable Reserves

31 March 2017 £m		Note	31 March 2018 £m
(305.6)	Revaluation Reserve	A	(325.5)
(1,994.5)	Capital Adjustment Account	B	(2,073.3)
1,220.3	Pensions Reserve	C	1,260.7
(0.7)	Collection Fund Adjustment Account	D	(6.5)

(14.3)	Deferred Capital Receipts Reserve	F	(13.7)
(1,091.9)	Total Unusable Reserves		(1,155.4)

A. Revaluation Reserve

The Revaluation Reserve contains the gains arising from increases in the value of Property, Plant and Equipment. The balance is reduced when assets with accumulated gains are:

- revalued downwards or impaired and the gains are lost
- used in the provision of services and the gains are consumed through depreciation, or
- disposed of and the gains are realised.

The Reserve contains only revaluation gains accumulated since 1 April 2007, the date that the Reserve was created. Accumulated gains arising before that date are consolidated into the balance on the Capital Adjustment Account (see note B).

2016/17 £m		2017/18	
		£m	£m
(301.9)	Balance at 1 April		(305.6)
(26.8)	Upward revaluation of assets	(39.0)	
10.3	Downward revaluation of assets and impairment losses not charged to the Surplus/Deficit on the Provision of Services	11.5	
(16.5)	Surplus on revaluation of non-current assets not posted to the Surplus or Deficit on the Provision of Services		(27.5)
4.2	Difference between fair value depreciation and historical cost depreciation	3.8	
0.0	Assets reclassified as investments		
8.6	Accumulated gains on assets sold or scrapped	3.8	
12.8	Amount written off to the Capital Adjustment Account		7.6
(305.6)	Balance at 31 March		(325.5)

B. Capital Adjustment Account

The Capital Adjustment Account includes entries for the financing of capital expenditure and other capital transactions. The account contains the amount of capital expenditure financed from revenue, capital receipts and other sources. It is reduced by the amounts provided for depreciation and for the write-down of revenue expenditure funded from capital under statute and adjustments for disposals of long-term assets. The account contains accumulated gains and losses on Investment Properties. It also contains revaluation gains accumulated on Property, Plant and Equipment before 1 April 2007, the date that the Revaluation Reserve was created to hold such gains.

2016/17 £m		2017/18	
		£m	£m
(1,959.7)	Balance at 1 April		(1,994.5)
	Reversal of items relating to capital expenditure debited or credited to the CIES:		
28.0	Charges for depreciation, impairment and revaluation losses of non-current assets	29.8	
(1.4)	Revaluation gains on Property, Plant and Equipment		
0.1	Amortisation of intangible assets		
203.7	Revenue expenditure funded from capital under statute	8.2	
21.7	Amounts of non-current assets written off on disposal or sale as part of the gain/loss on disposal to the CIES	5.6	
252.1		43.7	
(12.8)	Adjusting amounts written out of the Revaluation Reserve	(7.6)	
239.3	Net written out amount of the cost of non-current assets consumed in the year		36.0
	Capital financing applied in the year:		
(144.5)	Use of the Capital Receipts Reserve to finance new capital expenditure	(16.3)	
(4.7)	Use of the Major Repairs Reserve to finance new capital expenditure	(3.0)	
(14.7)	Capital grants, contributions & donations credited to the CIES that have been applied to capital financing	(15.7)	
(0.1)	Application of grants to capital financing from the Capital Grants Unapplied Account	(1.5)	
0.0	Statutory provision for the financing of capital investment charged against the General Fund and HRA balances	(0.9)	
(55.2)	Capital expenditure charged against the City Fund & HRA balances	(8.1)	
(219.2)			(45.6)
(54.9)	Movements in the market value of Investment Properties debited or credited to the CIES		(69.2)
(1,994.5)	Balance at 31 March		(2,073.3)

C. Pension Reserve

The Pensions Reserve absorbs the timing differences arising from the different arrangements for accounting for post-employment benefits and for funding benefits in accordance with statutory provisions. Post-employment benefits in the Comprehensive Income and Expenditure Statement are recognised as the benefits are earned by employees accruing years of service, updating the liabilities recognised to reflect inflation, changing assumptions and investment returns on any resources set aside to meet the costs. However, statutory arrangements require benefits earned to be financed as employer's contributions are paid to pension funds. The debit balance on the Pensions Reserve therefore shows a substantial shortfall between the benefits earned by past and current employees and the resources set aside to meet them. The statutory arrangements will ensure that funding will have been set aside by the time the benefits come to be paid. The negative pension reserve matches the estimated liabilities on the City of London (City Fund share), Police and Judges Pension Schemes as determined by independent actuaries using the projected unit method and in accordance with IAS19 (see notes 44 to 47).

2016/17 £m		2017/18 £m
1,018.9	Balance at 1 April	1,220.3
173.7	Remeasurements of the net defined benefit liability	8.0
64.8	Reversal of items relating to retirement benefits debited or credited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement	71.4
(37.1)	Employer's pension contributions less direct payments to pensioners payable in the year	(39.0)
1,220.3	Balance at 31 March	1,260.7

D. Collection Fund Adjustment Account

The Collection Fund Adjustment Account manages the differences arising from the recognition of national business rates and council tax income in the Comprehensive Income and Expenditure Statement as it falls due from business rate and council tax payers compared with the statutory arrangements for paying across amounts to the City Fund from the Collection Fund.

2016/17 £m		2017/18 £m
(25.9)	Balance at 1 April	(0.7)
25.2	Amount by which national business rates and council tax income credited to the Comprehensive Income and Expenditure Statement is different from national business rates and council tax income calculated for the year in accordance with statutory requirements	(5.8)
(0.7)	Balance at 31 March	(6.5)

E. Accumulated Absences Account

The Accumulated Absences Account absorbs the differences that would otherwise arise on the City Fund unallocated reserve from accruing for compensated absences earned but not taken in the year, e.g. annual leave entitlement carried forward at 31 March. Statutory arrangements require that the impact on the City Fund unallocated reserve is neutralised by transfers to or from the Account.

2016/17 £m		2017/18	
		£m	£m
3.0	Balance at 1 April		2.9
(3.0)	Settlement or cancellation of accrual made at the end of the preceding year	(2.9)	
2.9	Amounts accrued at the end of the current year	2.8	
(0.1)	Amount by which officer remuneration charged to the CIES on an accruals basis is different from the remuneration chargeable in the year in accordance with statutory requirements		(0.1)
2.9	Balance at 31 March		2.8

F. Deferred Capital Receipts Reserve

The Deferred Capital Receipts Reserve holds the gains recognised on the disposal of non-current assets but for which cash settlement has yet to take place. Under statutory arrangements, these gains are not treated as usable for financing new capital expenditure until they are backed by cash receipts. When the deferred cash settlement eventually takes place, amounts are transferred to the Capital Receipts Reserve.

2016/17 £m		2017/18 £m
(31.6)	Balance at 1 April	(14.3)
17.3	Cash payments in relation to deferred capital receipts	0.6
0.0	Transfer of deferred sale proceeds credited as part of the gain/loss on disposal to the CIES	0.0
(14.3)	Balance at 31 March	(13.7)

29. Cash Flow Statement – Operating Activities

The cash flows for operating activities include the following item:

2016/17 £m		2017/18 £m
(5.1)	Interest received	(4.2)

The surplus on the provision of services has been adjusted for the following non-cash movements:

2016/17 £m		2017/18 £m
(26.6)	Depreciation, impairments and impairment reversal	(29.8)
(0.1)	Amortisation	0.0
(33.8)	Increase in creditors	(13.4)
5.3	Increase in debtors	16.6
0.1	Increase in inventories	(0.0)
(27.8)	Movement in pension liability	(32.4)
(21.7)	Carrying amount of non-current assets sold	(5.6)
54.9	Movement in investment property values	69.2
(0.7)	Deferred credits	(14.9)
(36.2)	(Increase)/Decrease in contributions to provisions	24.5
0.0	Other non-cash items charged to the net surplus or deficit on the provision of services	0.0
(86.6)		14.2

The surplus on the provision of services has been adjusted for the following items that are investing and financing activities:

2016/17 £m		2017/18 £m
40.3	Proceeds from the sale of property, plant and equipment, investment property and intangible assets	8.5
34.6	Capital grants credited to the net surplus or deficit on the provision of services	21.0
74.9		29.5

30. Cash Flow Statement – Investing Activities

2016/17 £m		2017/18 £m
56.3	Purchase of property, plant and equipment, investment property and intangible assets	30.4
(24.5)	Movement in short-term and long-term investments	(11.0)
(34.4)	Proceeds from the sale of property, plant and equipment, investment property and intangible assets	(21.0)
0.0	Income from finance lease	
(57.0)	Other receipts from investing activities	(10.9)
(59.6)	Net cash outflows/(inflows) from investing activities	(12.4)

31. Cash Flow Statement – Financing Activities

2016/17 £m		2017/18 £m
(55.9)	Billing Authorities - Council Tax and NNDR Adjustments	36.6
(12.0)	Difference between cash collected on behalf of the Mayor of London under the Community Infrastructure Levy and the amount paid to the Greater London Authority	0.0
0.0	Difference between cash collected on behalf of the Mayor of London under Crossrail planning obligations (Section 106 Agreements) and the amount paid to Transport for London	0.0
(67.9)	Net cash inflows from financing activities	36.6

32. Trading Operations

	2017/18
	£m
Spitalfields Market	
Turnover	(7.3)
Expenditure	6.4
Surplus	(0.9)

Spitalfields Market is a horticultural market serving wholesalers, retailers and caterers from London and a wide area in the Home Counties.

33. Agency Services

The City Fund carries out certain work on an agency basis for which it is fully reimbursed. Revenue and capital work costing £1.1m (2016/17: £1.5m) was undertaken on behalf of Transport for London. These sums were fully reimbursed.

34. Members' Allowances

Members do not receive any remuneration from the City of London for undertaking their duties. However, Members may claim travelling expenses in respect of activities outside the City and receive allowances in accordance with a scale when attending a conference or activity on behalf of the City Corporation. These costs, totalling £5246 (2016/17: £3,874) across all of the City's activities, were met from the endowment funds of the City Corporation and not charged to the City Fund.

35. Remuneration of Senior Employees

Tables 1 to 3 set out the information required in accordance with the Accounts and Audit Regulations 2015 for 2017/18 and 2016/17 respectively.

The number of officers whose remuneration, excluding employer's pension contributions, were £50,000 or more grouped in rising bands of £5,000 is set out in Table 1. Officers have been classified between those employees charged wholly to the City Fund, including Police officers, and those employees charged partly to the City Fund and partly to other funds of the City Corporation. The numbers include those officers required to be separately disclosed and set out in Tables 2 and 3.

The information in table 1 relates to those officers' full salary and not just the part charged to the City Fund.

Table 1 – Remuneration in bands - Where there are no officers in a band, that band has not been included in the table.

Salary Range £	Wholly charged to City Fund				Partially Charged to City Fund

37. Audit Fees

Costs incurred in relation to the audit of the Statement of Accounts, certification of grant claims and statutory inspections provided by the City Fund's external auditor, BDO LLP are set out below. Audit Fees of £21,000 (2016/17: £21,000) in respect of the City of London Pension Fund are met by the Pension Fund and are not included in the table.

2016/17 £'000		2017/18 £'000
86.4	External audit services carried out by the appointed auditor under the National Audit Office Code of Audit Practice in accordance with the Local Audit and Accountability Act 2014.	86.4
11.2	Certification of grant claims and returns by the appointed auditor	11.4
11.3	Non-audit fees - other grant and certification fees	11.3
108.9		109.1

38. Dedicated Schools Grant

In 2017/18, the City Fund received a specific grant from the Department for Education, the Dedicated Schools Grant (DSG), of £2.75m (2016/17: £2.41m). DSG is ring-fenced and can only be applied to meet expenditure properly included in the Schools Budget as defined in the School Finance (England) Regulations 2011. The Schools Budget includes elements for a range of education services provided on an authority-wide basis and for the Individual School Budget for maintained schools.

Details of the deployment of DSG receivable for 2017/18 are as follows:

2017/18	Schools Budget Funded by DSG		
	Central Expenditure £m	Individual School Budget £m	Total £m
Final DSG for 2017/18 before Academy recoupment	0.91	1.84	2.75
Academy Figure recouped for 2017/18	0.00	0.00	0.00
Total DSG after Academy recoupment for 2017/18	0.91	1.84	2.75

40. Grants and Contributions Received in Advance

A number of grants and contributions have yet to be recognised as income as they have conditions attached to them which if they are not met will require the monies to be returned to the provider. The balances at the year-end are as follows:

Long Term

31 March 2017 £m		31 March 2018 £m
	Capital Grants and Contributions Receipts in Advance	
108.2	S106/S278 Capital Contributions	102.8
2.8	Department for Education	0.0
0.3	Other	0.0
111.3	Total	102.8

41. Deferred Credits

Premiums received at the commencement of operating leases for investment properties are effectively rents received in advance and are released to revenue on a straight line basis over the lease term.

31 March 2017 £m		31 March 2018 £m
	Deferred Credits	
(152.4)	Rents Received in Advance	(167.3)
(152.4)	Total	(167.3)

42. Related Party Transactions

The City Fund is required to disclose information on material “related party transactions” with bodies or individuals that have the potential to control or influence the authority or be controlled or influenced by the authority.

Disclosure

Members are required to disclose their interests and these can be viewed online at www.cityoflondon.gov.uk.

Members and Chief Officers have been requested to disclose related party transactions of £10,000 or more in 2017/18 including instances where their close family has made transactions with the City of London.

- During 2017/18 the following transactions have been disclosed to date. Due to delays in the process not all submissions have been received so further information will be disclosed in the final set of accounts. the City Corporation nominates six Members to the various committees of London Councils and another Member declared that he has an independent place on a number of Committees. London Councils was paid £328,000 for various subscriptions and services;
- the City Corporation nominates a Member to the Local Government Association which was paid £23,676 for subscriptions, conference fees and services;
- five Members and one Chief Officer are Directors of the ‘Lord Mayors Show Ltd’. The company paid the City Fund £11,400 for the provision of services. The City Fund paid the company £15,000 for artwork and participation fees;

During 2016/17 the following transactions were disclosed;

- the City Corporation nominates six Members to the various committees of London Councils and another Member declared that he has an independent place on a number of Committees. London Councils was paid £218,000 for various subscriptions and services;
- the City Corporation nominates a Member to the Local Government Association which was paid £20,000 for subscriptions, conference fees and services;
- five Members and one Chief Officer are Directors of the 'Lord Mayors Show Ltd'. The company paid the City Fund £12,000 for the provision of services. The City Fund paid the company £16,000 for artwork and participation fees;
- two Members declared interests in PwC LLP which was paid £933,000 for consultancy services. £33,000 was received from the company for the hire of an event space;
- a Member is a Director/Shareholder of Keepmoat Regeneration Ltd which provided services to the City Fund at a cost of £4,352,000;
- a Member is a Board Member of London and Partners which was paid £80,000 for participation in exhibitions and partnership fees;
- a Member declared that a member of their family worked for Knight Frank which was paid £81,000 for services;
- two Members are Trustees of Guildhall School Trust which paid £13,000 to the City Fund for catering services;
- a Member is a Trustee of East London NHS Foundation Trust which received £58,000 from the City Fund for mental health reablement and Looked After Children services;
- a Member is a Governor of Prior Western Primary School which was paid £21,000 for children's centre and administration services and received £42,000 for unused childcare places;
- a Member is a Board Member of the International Dispute Resolution Centre Ltd which paid £343,000 in lease charges to the City Fund;
- a Member is a trustee of the Museum of London which received a grant of £5,292,000 and which paid £1,318,000 to the City Fund in finance lease and loan payments;
- a Member is CEO of AON UK Ltd which made a £30,000 contribution to Sculpture in the City;
- a Member declared that a member of their family is a partner in Simmons & Simmons LLP which paid £24,000 for a Barbican Corporate Membership

All transactions complied with the City of London's procedures and there were no outstanding balances at year end.

Related Party Transactions with the Museum of London

The Museum of London is financed by the City of London and the Greater London Authority with the latter being the major funder and is subject to common control by central government. The City of London's contribution in 2017/18 was £5.3m (2016/17: £5.3m). Half of the appointments to the Board are made by the City of London. However, the City of London does not exercise control of the Museum. Amounts due from the Museum of London at 31 March 2018 are shown in notes 21 and 22.

Related Party Transactions with City's Cash and Bridge House Estates

During 2017/18 & 2016/17 there were no significant transactions between the City Fund and the other main funds of the City Corporation.

There were no outstanding balances at year end.

Entities Controlled or Significantly Influenced

Barbican Theatre Productions Limited is a company limited by guarantee engaged with the production of theatre events on behalf of the Barbican Centre. All directors of the company are officers of the City Corporation based at the Barbican Centre. The company falls within the group boundary of the City Fund on the grounds of control and significant influence. However, group accounts are not necessary as, due to the elimination of group transactions on consolidation, the interest is not deemed sufficiently material.

Related Party Transactions Disclosed Elsewhere in the Accounts

The UK government has significant influence over the general operations of the City Fund. It is responsible for providing the statutory framework within which the City Fund operates, provides the majority of its funding in the form of grants and prescribes the terms of many of the transactions that the City Fund has with other parties (e.g. council tax bills, housing benefits). Grants from government departments are shown in Note 39. Amounts due to and from central government departments at 31 March 2017 are shown in notes 22 and 24 respectively.

Disclosures are made in respect of other public bodies which are subject to common control by central government in other parts of the accounts as follows:

Precepts from other Authorities

Pension Fund

43. LeasesFinance Leases*City Fund as Lessee*

Nine property agreements have been classified as finance leases – five relating to operational properties and four in respect of investment properties. In addition, as part of the City of London contract for its cleansing services, the vehicles owned by the contractor but which are used exclusively on the City of London contract have been classified as finance leases.

The assets acquired under these leases are carried as Property, Plant and Equipment and Investment Properties in the City Fund's Balance Sheet at the following net amounts:

31 March 2017 £m		31 March 2018 £m
2.5	Property, Plant and Equipment	2.5
0.4	Other Land and Buildings	0.3
48.7	Vehicles, Plant and Equipment	48.7
51.6	Investment Properties	51.5

The rental payments for most of the property leases are immaterial, the highest being £600 per annum. Consequently, no liabilities are recognised in the balance sheet for these leases and the rental payments are met in full from revenue over the terms of the leases rather than being apportioned between finance charges (interest) and reductions in the outstanding liabilities.

For two investment property leases and the vehicles the City Fund will make payments over the term of the leases to meet the costs of the long term liabilities and the finance costs payable.

The leases are carried under other long term liabilities on the balance sheet:

31 March 2017 £m		31 March 2018 £m
3.2	Investment Property	3.1
0.9	Cleansing Vehicles	0.9
4.1	Long Term Liabilities	4.0

The minimum lease payments in relation to the investment property are:

Total Future Minimum Lease Payments	Present Value of Future Lease Payments		Total Future Minimum Lease Payments	Present Value of Future Lease Payments
31 March 2017 £m	31 March 2017 £m		31 March 2018 £m	31 March 2018 £m
0.1	0.0	Not later than one year	0.1	0.0
0.5	0.0	Later than one year and not later than five years	0.5	0.0
13.9	3.7	Later than five years	13.4	3.7
14.5	3.7		14.0	3.7

There are no commitments in respect of finance leases entered into before the year end but whose term has yet to commence.

City Fund as Lessor

The City Fund has a gross investment in finance leases relating to the minimum lease payments expected to be received over the remaining terms. There is no residual value anticipated for the properties when the leases come to an end. The minimum lease payments comprise settlement of the long-term debtor for the interest in the properties acquired by the lessees and finance income that will be earned by the City Fund in future years whilst the debt remains outstanding. The gross investment is made up of the following amounts:

31 March 2017 £m		31 March 2018 £m
	Finance lease debtor (net present value of minimum lease payments)	
0.6	current	0.7
13.7	non-current	13.1
31.3	Unearned finance income	30.8
0.0	Unguaranteed residual value of property	0.0
45.6	Gross investment in the lease	44.6

The gross investment in the leases and the minimum lease payments receivable will be received over the following periods:

Gross Investment in Lease	Net Present Value of Minimum Lease Payments		Gross Investment in Lease	Net Present Value of Minimum Lease Payments
31 March 2017 £m	31 March 2017 £m		31 March 2018 £m	31 March 2018 £m
1.0	0.6	Not later than one year	1.0	0.6
3.4	1.9	Later than one year and not later than five years	3.0	2.0
41.2	11.8	Later than five years	40.5	11.8
45.6	14.3		44.5	14.4

The minimum lease payments receivable are not contingent on events taking place after the lease was entered into, such as adjustments following rent reviews. Income from investment properties is set out in note 17.

Operating Leases

City Fund as Lessee

The future minimum lease payments due under non-cancellable leases in future years are:

31 March 2017 £m		31 March 2018 £m
2.3	Not later than one year	2.3
8.0	Later than one year and not later than five years	6.4
11.3	Later than five years	11.0
21.6		19.7

City Fund as Lessor

The City of London has granted leases in respect of a number of City Fund properties, principally Investment Properties, which are treated as operating leases. The future minimum lease payments receivable under non-cancellable leases in future years are:

31 March 2017 £m		31 March 2018 £m
53	Not later than one year	49
183	Later than one year and not later than five years	183
3,026	Later than five years	2,886
3,262		3,118

The minimum lease payments receivable do not include rents that are contingent on events taking place after the lease was entered into, such as adjustments following rent reviews.

44. Pension Schemes

As part of the terms and conditions of employment of its employees, the City Fund makes contributions towards the cost of post-employment benefits. Employees are members of the following pension schemes:

- The City of London Corporation Pension Scheme
- The Police Pension Schemes (1987, 2006 and 2015)
- The Judges Pension Scheme
- The Teachers' Pension Scheme.

These schemes provide defined benefits to members (retirement lump sums and pensions), earned as employees working for the City Corporation. Notes 45 to 48 provide further information on each of the above schemes.

45. City of London Corporation Pension Scheme

The City Corporation Pension Scheme (the "Scheme") is operated under the regulatory framework for the Local Government Pension Scheme (LGPS) with policy determined in accordance with the Pension Fund Regulations. It is a funded defined benefit scheme, meaning that the employers and employees pay contributions into a fund calculated at a level intended to balance the pension liabilities with investment assets. Prior to 1 April 2014, LGPS pension benefits were based on final pensionable pay and length of pensionable service. From 1 April 2014, the scheme became a career average scheme.

The City Corporation administers the Scheme on behalf of its participating employers. The City Corporation's Establishment Committee is responsible for personnel and administration matters, whilst its Financial Investment Board is responsible for appointing fund managers and monitoring performance. The principal risks to the authority of the scheme are the mortality rate assumptions, statutory changes to the scheme, structural changes to the scheme (i.e. large scale withdrawals from the scheme), changes to inflation, bond yields and the performance of the equity investments held by the scheme.

As an employer participating in the Scheme the City Corporation's estimated share of the net deficit is the responsibility of the City Corporation as a whole. The Corporation and its three funds have a policy in place to share the net defined benefit cost of the pension fund across the three funds. As such the City Fund recognises the net defined benefit cost along with a share of scheme assets and scheme liabilities. The total net defined benefit cost is apportioned across the Corporation's three funds based on the proportion of pensionable payroll of each fund.

Disclosures in relation to City Corporation and the City Fund's share of the overall scheme which satisfy the requirements of a defined benefit pension scheme are set out in this note. This information is not used to determine the employer's pension contribution rate. This is calculated at the triennial valuation and updated by any subsequent interim valuations. The most recent triennial valuation was as at 31 March 2016 and informed consideration of the level of employer's pension contribution to be charged from 1 April 2017 to 31 March 2020.

Assets and Liabilities in Relation to Retirement Benefits

a. Reconciliation of present value of the scheme liabilities

CITY OF LONDON CORPORATION	CITY FUND SHARE 51%		CITY OF LONDON CORPORATION	CITY FUND SHARE 51%
31 March 2017 £m	31 March 2017 £m		31 March 2018 £m	31 March 2018 £m
(1,211.2)	(605.6)	1 April	(1,476.8)	(753.1)
(28.3)	(14.4)	Current Service Cost	(43.9)	(22.4)
(43.2)	(22.0)	Interest Cost	(39.6)	(20.2)
		Remeasurement gains/losses:		0.0
33.8	17.2	Actuarials Gains/losses arising from demographic assumptions	0.0	0.0
(276.0)	(140.8)	Actuarials gains/losses arising from changes in financial assumptions	42.6	21.7
24.3	12.4	Other Actuarial Gains/Losses	0.0	0.0
0.0	(12.1)	Change in proportion allocated to City Fund	0.0	0.0
(0.8)	(0.4)	Past Service Cost, including curtailments	(0.5)	(0.3)
0.0	0.0	Liabilities extinguished on settlements	0.8	0.4
33.0	16.8	Benefits paid	33.1	16.9
(8.9)	(4.5)	Contributions from scheme participants	(9.6)	(4.9)
0.5	0.3	Unfunded Pension Payments	0.5	0.3
(1,476.8)	(753.1)	31 March	(1,493.3)	(761.6)

Liabilities are discounted to their value at current prices, using a discount rate of 2.6% (based on the annualised Merrill Lynch AA rated corporate bond yield curve where the spot curve is assumed to be flat beyond the 30 year point).

b. Reconciliation of fair value of the scheme assets

CITY OF LONDON CORPORATION	CITY FUND SHARE 51%		CITY OF LONDON CORPORATION	CITY FUND SHARE 51%
31 March 2017 £m	31 March 2017 £m		31 March 2018 £m	31 March 2018 £m
730.2	365.0	1 April	878.9	448.2
26.2	13.4	Interest on Assets	23.8	12.1
		Remeasurement gains/losses:		
122.3	62.4	Return on Assets less interest	(4.3)	(2.2)
5.1	2.6	Other actuarial gains/losses	0.0	0.0
0.0	7.3	Change in proportion allocated to City Fund	0.0	0.0
(0.5)	(0.3)	Administration expenses	(0.7)	(0.4)
20.3	10.4	Contributions by Employer	27.5	14.0
8.9	4.5	Contributions by Scheme Participants	9.6	4.9
(33.6)	(17.1)	Benefits Paid	(33.6)	(17.2)
0.0	0.0	Settlement Prices Received/(Paid)	(0.5)	(0.2)
878.9	448.2	31 March	900.7	459.2

Scheme assets consist of the following categories, by proportion of the total assets held:

31 March 2017 %		31 March 2018 %
65	Equity Investments	65
0	Cash	1
5	Infrastructure	6
30	Absolute return portfolio	28
100		100

The analysis of investments held and valuations are included in the accompanying Pension Fund accounts.

c. Overall net deficit

CITY OF LONDON CORPORATION	CITY FUND SHARE 51%		CITY OF LONDON CORPORATION	CITY FUND SHARE 51%
31 March 2017 £m	31 March 2017 £m		31 March 2018 £m	31 March 2018 £m
(481.0)	(240.6)	1 April	(597.9)	(304.9)
(265.6)	(147.5)	change in liabilities	(16.5)	(8.5)
148.7	83.2	change in assets	21.8	11.0
(597.9)	(304.9)	31 March	(592.6)	(302.4)

Basis for Estimating Assets and Liabilities

The liabilities have been valued by the City of London's independent consulting actuaries (Barnett Waddingham) using the projected unit method, based upon the latest full valuation of the scheme as at 31 March 2016 and updated to the balance sheet date. The main assumptions used in the calculations are as follows:

2016/17		2017/18
	Mortality assumptions:	
	Life expectancy in years from age 65	
	Retiring today	
23.8	Men	23.9
25.2	Women	25.2
	Retiring in 20 years	
25.2	Men	25.3
26.7	Women	26.7
3.6%	Rate of Inflation - RPI	3.3%
2.6%	Rate of Inflation - CPI	2.3%
4.1%	Salary Increases	3.8%
2.6%	Pension Increases	2.3%
2.7%	Discount Rate	2.6%
50.0%	Take-up of option to convert annual pension into retirement lump sum	50.0%

Impact on defined benefit obligation from changes to actuarial assumptions

The estimation of the defined benefit obligations is sensitive to the actuarial assumptions set out above. The following table, prepared on an actuarial projected unit basis, shows the impact on the defined benefit obligation from changes to various actuarial assumptions. The sensitivity analyses have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period and assumes for each change that the assumption analysed changes while all the other assumptions remain constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be interrelated.

Change in assumptions at 31 March 2018

	CITY OF LONDON		CITY FUND	
	Increase £m	Decrease £m	Increase £m	Decrease £m
0.1% change in rate for discounting scheme liabilities	(26.9)	27.4	(13.7)	14.0
0.1% change in rate of increase in salaries	2.8	(2.8)	1.5	(1.4)
0.1% change in rate of increase in pensions	24.6	(24.2)	12.6	(12.3)
One year change in rate of mortality assumption	56.3	(54.2)	28.7	(27.6)

Impact on the City Fund's Cash Flows

The objectives of the scheme are to keep employers' contributions at as constant a rate as possible. The Corporation has agreed a deficit recovery period of 20 years from 2015/16 with the scheme's actuary. Funding levels are monitored on an annual basis.

The liabilities show the estimated underlying commitments that the City Fund has in the long run to pay post-employment (retirement) benefits. The net liability of £302.4m has a substantial impact on the net worth of the City Fund as recorded in the Balance Sheet. However, statutory arrangements for funding the deficit mean that the financial position of the City Fund remains sound. The deficit will be made good by increased contributions over the remaining working life of employees, as assessed by the scheme actuary.

The total employer contributions expected to be made to the scheme for the City of London Corporation across all its funds in the year to 31 March 2019 are £26.7m (estimated City Fund Share £13.6m).

The scheme actuary has estimated that the weighted average duration of the defined benefit obligation for scheme members is 19 years.

46. The Police Pension Scheme

There are three Police Pension Schemes - the 1987 Scheme, the 2006 Scheme and the 2015 Scheme. Except where otherwise stated, the "Police Pension Scheme" is used generically to cover all the schemes. The Police Pension Scheme is defined benefit and unfunded. It is administered by the City of London in accordance with Home Office regulations and is not a multi-employer scheme. The Scheme is funded on a pay as you go basis, with the employer contributing a percentage of police pay into the Pension Fund and the Home Office meeting the balance. At the year end the Police Pension Fund Account is balanced to nil by either receiving a contribution from the City Fund equal to the amount by which the amounts payable from the Pension Fund for the year exceed the amounts receivable or, by paying to the City Fund the amount by which sums receivable by the Fund for the year exceed the amounts payable. Where the City Fund makes a transfer in to the Pension Fund, the Home Office will pay an equivalent top-up grant to the City Fund. Where the City Fund receives a transfer from the Pension Fund, the City Fund must pay the amount to the Home Office. The Police Pension Scheme 2015 came into effect from 1 April 2015 and any benefits accrued from that date will be based on career average revalued salaries, with exceptions for those members that have transitional protection in their existing scheme. The last full valuation of the Police Pension Scheme was at 31 March 2012 by the Government Actuary's Department and set contributions for the period 1 April 2015 to 31 March 2019. A combined actuarial valuation as at 31 March 2016 is currently being undertaken.

Liabilities in Relation to Retirement Benefits

As the scheme is unfunded, it has no assets.

Reconciliation of present value of the scheme liabilities

31 March 2017		31 March 2018
£m		£m
(776.3)	1 April	(912.9)
(13.3)	Current Service Cost	(15.9)
(27.5)	Interest Cost	(24.3)
	Remeasurement gains/losses:	
40.4	Actuarials Gains/losses arising from demographic assumptions	(17.9)
(162.8)	Actuarials gains/losses arising from changes in financial assumptions	25.3
0.0	Other Actuarial Gains/Losses	(35.1)
29.9	Benefits paid	28.1
(3.8)	Contributions from scheme participants	(3.8)
0.5	Injury Benefits Paid	0.6
(912.9)	31 March	(955.9)

Basis for Estimating Liabilities

The liabilities have been valued by the City of London's independent consulting actuaries (Barnett Waddingham) using the projected unit method, based upon the last full valuation of the scheme updated to the balance sheet date. The main assumptions used in the calculations are as follows:

2016/17	Mortality assumptions:	2017/18
	Life expectancy in years from age 65	
	Retiring today	
21.7	Men	21.7
24.0	Women	24.0
	Retiring in 20 years	
23.1	Men	23.2
25.5	Women	25.6
3.6%	Rate of Inflation - RPI	3.3%
2.6%	Rate of Inflation - CPI	2.3%
4.1%	Salary Increases	3.8%
2.6%	Pension Increases	2.3%
2.7%	Discount Rate	2.6%

Impact on defined benefit obligation from changes to actuarial assumptions

The estimation of the defined benefit obligations is sensitive to the actuarial assumptions set out above. The following table, prepared on an actuarial projected unit basis, shows the impact on the City Fund's defined benefit obligation from changes to various actuarial assumptions. The sensitivity analyses have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period and assumes for each change that the assumption analysed changes while all the other assumptions remain constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be interrelated.

Change in Assumptions at 31 March 2018**Impact on the Defined Benefit Obligation in the Scheme**

	Increase £m	Decrease £m
0.1% change in rate for discounting scheme liabilities	(18.0)	18.3
0.1% change in rate of increase in salaries	1.1	(1.1)
0.1% change in rate of increase in pensions	17.2	(16.9)
One year change in rate of mortality assumption	38.2	(36.7)

Impact on the City Fund's Cash Flows

The liabilities show the estimated underlying commitments that the City Fund has in the long run to pay post-employment (retirement) benefits. The net liability of £955.9m has a substantial impact on the net worth of the City Fund as recorded in the Balance Sheet. However, statutory arrangements for funding the deficit mean that the financial position of the City Fund remains sound. Future contributions are expected to be met by an annually assessed grant from the Home Office.

The total employer contributions for the combined position of the Police Pension Schemes 1987, 2006 and 2015 for the year to 31 March 2018 are expected to be £5.9m and the expected top up grant from the Government is £18.3m.

The scheme actuary has estimated that the weighted average combined duration of the defined benefit obligation for the schemes is 19 years.

47. Judges Pension Scheme

The Judges Pension Scheme is defined benefit and unfunded. The scheme is subject to the provisions of the Judicial Pensions and Retirement Act 1993. The Treasury is responsible for payment of Judges' pensions and the City of London reimburses them in accordance with regulations made under the Act.

Liabilities in Relation to Retirement Benefits

As the scheme is unfunded, it has no assets.

Reconciliation of present value of the scheme liabilities

31 March 2017 £m		31 March 2018 £m
(2.0)	1 April	(2.5)
(0.2)	Current Service Cost	(0.2)
(0.1)	Interest Cost	(0.1)
	Actuarials Gains/losses arising from demographic assumptions	
	Remeasurement gains/losses:	
(0.3)	Actuarials gains/losses arising from changes in financial assumptions	0.1
0.1	Benefits paid	0.1
(2.5)	31 March	(2.6)

Basis for Estimating Liabilities

The liabilities have been valued by the City of London's independent consulting actuaries (Barnett Waddingham) using the projected unit method, based upon the last full valuation of the scheme updated to the balance sheet date. The main assumptions used in the calculations are as follows:

2016/17	Mortality assumptions:	2017/18
	Life expectancy in years from age 65	
	Retiring today	
23.8	Men	23.9
25.2	Women	25.2
	Retiring in 20 years	
25.2	Men	25.3
26.7	Women	26.7
3.3%	Rate of Inflation - RPI	3.4%
2.3%	Rate of Inflation - CPI	2.4%
3.8%	Salary Increases	3.9%
2.3%	Pension Increases	2.4%
2.3%	Discount Rate	2.5%

Impact on defined benefit obligation from changes to actuarial assumptions

The estimation of the defined benefit obligations is sensitive to the actuarial assumptions set out on the previous page. The following table, prepared on an actuarial projected unit basis, shows the impact on the City Fund's defined benefit obligation from changes to various actuarial assumptions. The sensitivity analyses have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period and assumes for each change that the assumption analysed changes while all the other assumptions remain constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be interrelated.

Change in Assumptions at 31 March 2018**Impact on the Defined Benefit Obligation in the Scheme**

	Increase £m	Decrease £m
0.1% change in rate for discounting scheme liabilities	(0.03)	0.03
0.1% change in rate of increase in salaries	0.00	(0.00)
0.1% change in rate of increase in pensions	0.03	(0.03)
One year change in rate of mortality assumption	0.11	(0.10)

Impact on the City Fund's Cash Flows

The liabilities show the estimated underlying commitments that the City Fund has in the long run to pay post-employment (retirement) benefits. The net liability of £2.6m has an impact on the net worth of the City Fund as recorded in the Balance Sheet. However, the City Fund has set aside funds in an earmarked reserve to assist with meeting its share of liabilities.

The scheme actuary has estimated that the weighted average combined duration of the defined benefit obligation for the scheme is 13 years.

48. Transactions Relating to Post-employment Benefits within the Financial Statements

The Teachers' Pension Scheme is accounted for as if it is a defined contribution scheme and no liability for future payments of benefits is recognised in the Balance Sheet. The Children's and Education Services line in the Comprehensive Income and Expenditure Statement is charged with the employer's contributions payable to Teachers' Pension Scheme in the year.

Retirement benefits from schemes accounted for on a defined benefit basis (City of London, Police and Judges) are recognised in the Net Cost of Services when they are earned by employees, rather than when the benefits are eventually paid as pensions. However, the charge against council tax is based on cash payable in the year, so the real cost of retirement benefits is reversed out of the City Fund and Housing Revenue Account via the Movement in Reserves Statement.

The cumulative amount of actuarial gains and losses recognised in Other Comprehensive Income and Expenditure in the actuarial gains or losses on pensions assets and liabilities line was at 31 March 2018 a loss of £8m and at 31 March 2017 was a loss of £173.7m.

The tables on the following pages summarise the entries in the financial statements for the City of London, Police and Judges Schemes.

The amount included in the Balance Sheet arising from the City Fund's estimated obligation in respect of the defined benefit plans is as follows:

31 March 2017 £m		31 March 2018 £m
	Present Value of the defined benefit obligation	
(750.0)	City of London Pension Scheme - City Fund	(758.7)
(909.5)	Police Pension Schemes	(944.1)
(2.5)	Judges Pension Scheme	(2.6)
	Fair Value of plan assets	
448.2	City of London Pension Scheme - City Fund	459.2
	Present value of unfunded obligation	
(3.1)	City of London Pension Scheme - City Fund	(2.9)
(3.4)	Police Pension Schemes	(11.8)
(1,220.3)	Net liability on balance sheet	(1,260.9)

There are no outstanding or pre-paid employee contributions at the balance sheet date.

49. Trust Funds

In its capacity as a local authority, the City of London acts as a custodian trustee for two trust funds; the City of London Corporation Combined Education Charity and Keats House. In neither case do the funds represent assets to the City Fund and therefore they have not been included in the Balance Sheet.

Keats House (charity registration number 1053381)

Established in 1996, the objective of the Trust is "to preserve and maintain and restore for the education and benefit of the public Keats House as a museum and live memorial to John Keats and as a literary meeting place and centre". As at 31 March 2017 the Trust's net assets were £0.3m (2017: £0.2m).

The City of London Corporation Combined Education Charity (charity registration number 312836)

Established in 2011 through the amalgamation of the Higher Education Research and Special Expenses Fund, the Archibald Dawnay Scholarships, the Robert Blair Fellowship and the Alan Partridge Smith Bequest, the objective of the Trust is to further the education of persons attending or proposing to attend secondary, further or higher educational institutions by the provision of grants or financial assistance. Also to provide grants for staff at maintained schools & Academies in the boroughs of London to undertake studies to further their development as teachers. As at 31 March 2018 the Trust's net assets were £1.2m (2017: £1.1m).

The HRA Income and Expenditure Statement shows the economic cost in the year of providing housing services in accordance with generally accepted accounting practices, rather than the amount to be funded from rents and government grants. Authorities charge rents to cover expenditure in accordance with regulations; this may be different from the accounting cost. The increase or decrease in the year, on the basis on which rents are raised, is shown in the Movement on the HRA Statement.

Income and Expenditure Statement

at 31 March 2017	253.5	39.8	0.8	4.7	298.4

6. Housing Asset Valuation

Dwellings are valued at their 'existing use with vacant possession' and then reduced to reflect 'existing use for social housing'. The reduction is a measure of the economic cost of providing council housing at less than open market rents. Under Government guidance issued in 2010/11, the applicable social housing 'adjustment factor' is 75% +/- 5%. The estimated vacant possession value of HRA dwellings is £788.8m (prior year: £845m) which has been reduced by 70% to £238m (prior year: £253.5m) to reflect social housing use. Other land and buildings are assessed at existing use value.

7. Investment Property

2016/17		2017/18
£m		£m
5.2	Balance at start of the year	5.6
	Revaluations:	
0.4	Net gains from fair value adjustments	(0.9)
5.6	Balance at end of the year	4.7

8. Major Repairs Reserve

2016/17		2017/18

1. Income from Business Rates

The Local Government Finance Act 1988 replaced the Locally Determined Non-Domestic Rate with a National Non-Domestic Rate (NNDR) set by the Government. In addition to the NNDR, there is a discounted rate for small businesses known as the Small Business Non-Domestic Rate (SBNDR). In 2017/18 the City of London set a non-domestic rating multiplier of 0.484(48.9p in the £) and a small business non-domestic rating multiplier of 0.471 (47.1p in the £). This comprises the NNDR and SBNDR multipliers of 0.479 and 0.466 respectively, plus a premium of 0.5p in the £ to provide additional funding to enable the City Corporation to continue to support Police, security, resilience and contingency planning at an enhanced level.

In addition, for those business premises which have a rateable value of more than £70,000, the Greater London Authority (GLA) is levying a business rate supplement (BRS) multiplier of 2p in the £ for the 2017/18 financial year to finance the Crossrail project. The City Corporation collects the BRS on an agency basis on behalf of the GLA.

2016/17 £m		2017/18 £m
(960.7)	National Business Rates	(1,134.7)
0.0	Government transition scheme	0.0
(960.7)	Non-domestic rates income after transition scheme	(1,134.7)
42.8	Less: Voids	43.4
13.4	Mandatory and discretionary relief	22.4
1.7	Partly occupied allowance	1.2
(902.8)	Net income from national business rates	(1,067.6)

2. Calculation of Council Tax

The Local Government Finance Act 1992 introduced the Council Tax from 1 April 1993, replacing the Community Charge. The Act prescribes the detailed calculations that the City of London, as a billing authority, has to make to determine the Council Tax amounts. The City of London set a basic amount of £857.31 for a Band D property.

To this £857.31 is added £73.89 in respect of the precept from the Greater London Authority to arrive at the total Council Tax of £931.20 for a Band D property in 2016/17. Prescribed proportions are applied to this basic amount to determine the Council Tax amounts for each of the bands as follows:

BAND	Proportion	Council Tax £
A	6/9	620.80
B	7/9	724.27
C	8/9	827.73
D	9/9	73.89
E	11/9	1,138.13
F	13/9	1,345.07
G	15/9	1,552.00
H	18/9	1,862.40

3. Tax Bases 2017/18

The table below shows the number of chargeable dwellings in each valuation band converted to an equivalent number of Band D dwellings. The totals for each area are described as "aggregate relevant amounts". These amounts, multiplied by the collection rate of 95%, produce the tax base for each of the areas shown.

BAND	MIDDLE TEMPLE	INNER TEMPLE	CITY AREA EXCLUDING TEMPLES	TOTAL CITY AREA
A	0.00	0.00	1.88	1.88
B	0.00	0.00	126.68	126.68

TAX BASES	68.74	84.79	6,906.86	7,060.39

4. City Fund Offset

To reflect the unique characteristics of the square mile, the Government allows the City Fund to retain an amount from the NNDR paid by City businesses.

5. Surplus for the Year

The surplus for the year on Business Rates of £19.5m (2016/17: deficit of £80.9m) relates solely to National Business Rates.

-
- i. The Police Pension Fund was established under the Police Pension Fund Regulations 2007 (SI 2007 No. 1932).
 - ii. It is a defined benefits scheme, administered internally by the City of London and all City of London police officers are eligible for membership of the pension scheme.
 - iii. The fund's financial statements have been prepared using the accounting policies adopted for the City Fund financial statements set out on pages 16 to 29. The fund's financial statements do not take account of liabilities to pay pensions and other benefits after the period end. Information on the long-term pension obligations can be found in the City Fund financial statements (see notes 44 to 48).
 - iv. Under the rules of the scheme, members may elect to commute a proportion of their pension in favour of a lump sum. Where a member has taken a commutation option, these lump sums are accounted for on an accruals basis from the date the option is exercised.
 - v. Transfer values represent the capital sums in respect of members' pension rights either received from or paid to other pension schemes in respect of members who have joined or left the service.
 - vi. The scheme is unfunded and consequently has no investment assets. Benefits payable are funded by contributions from employers and employees and any difference between benefits payable and contributions receivable is met by a top-up grant from the Home Office.
 - vii. Employees' and employer's contribution levels are based on percentages of pensionable pay set nationally by the Home Office and are subject to triennial revaluation by the Government Actuary's Department.
 - viii. The account is prepared on an accruals basis and normal contributions, both from the members and the employer, are accounted for in the payroll month to which they relate.

1. Description of the City of London Pension Fund

The City of London Pension Fund is part of the LGPS and is administered by the City of London. The City of London is the reporting entity for this pension fund.

The City of London Pension Fund is a funded defined benefits scheme established in accordance with statute. With the exception of serving police officers, teachers and judges who have their own schemes, all City of London staff are eligible for membership of the Local Government Pension Scheme (LGPS).

Benefits include retirement pensions and early payment of benefits on medical grounds and payment of death benefits where death occurs either in service or in retirement. The benefits payable in respect of service from 1st April 2014 are based on career average revalued earnings and the number of years of eligible service. Pensions are increased each year in line with the Consumer Price Index.

The Fund is governed by the Public Service Pensions Act 2013 and the following secondary legislation:

- The LGPS Regulations 2013 (as amended)
- The LGPS (transitional Provisions, Savings and Amendment) Regulations 2014 (as amended) and
- The LGPS (Management and Investment of Funds) Regulations 2016.

The Fund is administered internally by the City of London. The Fund's investments are managed externally by several fund managers with differing mandates determined and appointed by the City of London.

2. Membership of the Fund

Membership of the LGPS is voluntary and employees are free to choose whether to join the scheme, remain in the scheme or make their own personal arrangements outside the scheme. Organisations participating in the City of London Pension Fund include:

- Scheduled bodies, which are local authorities and similar bodies whose staff are automatically entitled to be members of the Fund
- Admitted bodies, which are other organisations that participate in the Fund under an admission agreement between the Fund and the relevant organisation. Admitted bodies include voluntary, charitable and similar bodies or private contractors undertaking a local authority function following outsourcing to the private sector.

The following table summarises the membership numbers of the scheme:

3. Accounting Policies

- i. The pension fund statements have been prepared in accordance with the following Regulations: the LGPS Regulations 2013 (as amended), the LGPS (Transactional Provisions, Savings and Amendments) Regulations 2014 (as amended), the LGPS (Management and Investment of Funds) Regulations 2016; and with the guidelines set out in the Code of Practice on Local Authority Accounting in the United Kingdom 2017/18 having regard to the Statement of Recommended Practice, Financial Reports of Pension Schemes (2015).
- ii. The pension fund accounts are accounted for on an accruals basis for income and expenditure, with the exception of transfer values in and out, which are accounted for on a cash basis.
- iii. The fund's financial statements do not take account of liabilities to pay pensions and other benefits after the period end.
- iv. Financial assets are included in the net assets statement on a fair value basis as at the reporting date. A financial asset is recognised in the net assets statement on the date the fund becomes party to the contractual acquisition of the asset. From this date any gains or losses arising from changes in the fair value of the asset are recognised in the fund account.
- v. The values of investments as shown in the net assets statement have been determined at fair value in accordance with the requirements of the Code and IFRS13 (see Note 12). For the purposes of disclosing levels of fair value hierarchy, the fund has adopted the classification guidelines recommended in Practical Guidance on Investment Disclosures (PRAG/Investment Association, 2016).
- vi. Acquisition costs are included in the purchase costs of investments.
- vii. Assets and liabilities in overseas currencies are translated into sterling at the exchange rates ruling at the balance sheet date. Transactions during the year are translated at rates applying at the transaction dates. Surpluses and deficits arising on conversion are dealt with as part of the change in market values of the investments
- viii. The cost of administration is charged directly to the fund.
- ix. Income from investments is accounted for on an accruals basis. Investment income arising from the underlying investments of the Pooled Investment Vehicles is typically reinvested within the Pooled Investment Vehicles and reflected in the unit price.
- x. The change in market value of investments during the year comprises all increases and decreases in the market value of investments held at any time during the year, including profit and losses realised on sales of investments and unrealised changes in market value.
- xi. Normal contributions, both from members and employers, are accounted for in the payroll month to which they relate at rates as specified in the rates and adjustments certificate. Additional contributions from employers are accounted for in accordance with the agreement under which they are paid, or in the absence of such agreement, when received.

- xii. Under the rules of the Scheme, members may receive a lump sum retirement grant in addition to their annual pension. Lump sum retirement grants are accounted for from the date of retirement. Where a member can choose to take a greater retirement grant in return for a reduced pension these lump sums are accounted for on an accruals basis from the date the option is exercised.
- xiii. Transfer values represent the amounts received and paid during the year for members who have either joined or left the fund during the financial year and are calculated in accordance with the Local Government Pension Scheme Regulations 2013. Individual transfers in/out are accounted for when received/paid, which is normally when the member liability is accepted or discharged.
- xiv. Administration and investment management expenses are accounted for on an accruals basis. Expenses are recognised net of any recoverable VAT.
- xv. Where an investment manager's fee note has not been received by the balance sheet date, an estimate based upon the most recent available equivalent trailing reporting period is used for inclusion in the fund account.

4. Critical Judgements in applying Accounting Policies

The net pension fund liability is recalculated every three years by the appointed actuary, with annual updates in the intervening years. The methodology used is in line with accepted guidelines.

This estimate is subject to significant variances based on changes to the underlying assumptions which are agreed with the actuary and have been summarised in Note 18.

These actuarial revaluations are used to set future contribution rates and underpin the fund's most significant investment management policies, for example in terms of the balance struck between longer term investment growth and short-term yield/return.

5. Assumptions made about the future and other major sources of Estimation Uncertainty

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities at the year-end date and the amounts reported for the revenues and expenses during the year. Estimates and assumptions are made considering historical experience, current trends and other relevant factors. However, the nature of estimation means that the actual outcomes could differ from the assumptions and estimates.

The items in the net assets statement at 31 March 2018 for which there is a significant risk of material adjustment in the forthcoming financial year are as follows:

Item	Uncertainties	Effect if actual results differ from assumptions
Actuarial present value of promised retirement benefits (Note 18)	Estimation of the net liability to pay pensions depend on a number of complex judgements relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on pension fund assets. A firm of consulting actuaries is engaged to provide the fund with expert advice about the assumptions to be applied	The effects on the net pension liability of changes in individual assumptions can be measured. For instance: <ul style="list-style-type: none"> • a 0.1% increase in the discount rate assumption would result in a decrease in the pension liability of £30m • a 0.1% increase in assumed earnings inflation would increase the value of liabilities by approximately £3m • a one-year increase in assumed life expectancy would increase the liability by approximately £61m.
Private equity investments (Note 13)	Private equity investments are valued at fair value in accordance with International Private Equity and Venture Capital Valuation Guidelines (2012). These investments are not publicly listed and as such there is a degree of estimation involved in the valuation.	Private equity investments are valued at £29m in the financial statements. There is a risk that this investment may be under or overstated in the accounts by £7m.
Infrastructure investments (Note 13)	Infrastructure investments are valued using assumptions about the Fund's underlying equity and debt instruments cash flow forecasts and discount rates.	Infrastructure investments are valued at £58m in the financial statements. There is a risk that this investment may be under or overstated in the accounts by £9m.

6. Events after the reporting date

There are no major post balance sheet events.

The Pension Fund's investment policies are focussed on capital accumulation in pooled vehicles and private equity investments. Dividends and interest are typically retained at pool level. Where any shortfall of the Net Deductions on Contributions and Benefits Paid was previously covered by investment income, it is intended that the Fund will sell holdings in the pooled vehicles, as necessary, to cover any shortfalls. There are no limitations imposed by the fund managers on the selling of these pooled vehicle funds.

12. Investment Assets**a. Reconciliation of movements in Investments**

The table below shows the movement in Market Values by asset type between 1 April 2017 and 31 March 2018.

13. Fair Value – Basis for Valuation

The basis of the valuation of each class of investment asset is set out below. There has been no change in the valuation techniques used during the year. All assets have been valued using fair value techniques which represent the highest and best price available at the reporting date.

Item	Valuation Hierarchy	Basis of valuation	Observable and unobservable inputs	Key sensitivities affecting the valuations provided
Pooled Investments - Equity Funds (UK and Global)	Level 2	Closing bid price where bid and offer prices are published Closing single price where single price published	NAV-based pricing set on a forward pricing basis	Not required
Pooled Investments – Multi-Asset Funds	Level 2	Closing bid price where bid and offer prices are published Closing single price where single price published	NAV-based pricing set on a forward pricing basis	Not required
Private equity	Level 3	Comparable valuation of similar companies in accordance with International Private Equity Valuation Guidelines.	EBITDA multiple Revenue multiple	Valuations could be affected by material events occurring between the date of the financial statements provided and the pension fund's own reporting date, by changes to expected cashflows, and by any differences between audited and unaudited accounts

Item	Valuation Hierarchy	Basis of valuation	Observable and unobservable inputs	Key sensitivities affecting the valuations provided
Infrastructure Funds	Level 3	Discounted Cashflows applied to equity and debt instruments. The Funds determine fair value for these securities by engaging external valuation services.	Cash flow forecasts Discount rates	Valuations could be affected by material events occurring between the date of the financial statements provided and the pension fund's own reporting date, by changes to expected cashflows, and by any differences between audited and unaudited accounts

a. Fair Value Hierarchy

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

Level 1

Financial instruments at level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 must be traded in active markets, this includes quoted equities, quoted fixed securities, quoted index linked securities and exchange traded unit trusts.

Level 2

Financial instruments at level 2 are those where quoted market prices are not available for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value. Products classified as level 2 comprise open ended pooled investment vehicles which are not exchange traded, unquoted bonds and repurchase agreements.

Level 3

Financial instruments at level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include private equity investments and infrastructure funds which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investment in private equity and infrastructure funds are based on valuations provided by the general partners to the private equity funds in which City of London Pension Fund has invested.

These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines, which follow the valuation principles of IFRS and US GAAP. Valuations are typically undertaken annually at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

Guidance released by the Pensions Research Accountants Group (PRAG) in 2016 provides further clarification on the classification of Pooled Investment Vehicles as level 1, 2 and 3. Pooled funds that are not quoted on an exchange are classed as level 2, as these do not meet the definition of level 1 investment: *The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.*

15. Risk and Risk Management

The Pension Fund's primary long-term risk is that its assets will fall short of its liabilities (i.e. promised benefits payable to members). Therefore, the aim of investment risk management is to minimise the risk of an overall reduction in the value of the Fund and to maximise the opportunity for gains across the whole fund portfolio.

The fund's investments are actively managed by ten main external fund managers who are charged with the responsibility to increase asset values, whilst maintaining market risk to acceptable levels. They achieve this mainly through diversification of stock portfolios across several geographical locations, various industrial sectors and asset classes. The managers' investing practices are controlled by pre-defined levels of tolerance.

Concentration risk is also controlled and monitored with a maximum proportion cap over the levels held in individual stocks as a set percentage of each manager's overall portfolio of stocks.

As part of each of the external fund managers' investing there is also a strict adherence to the principles of liquidity risk management in order to ensure cash flow requirements are met as and when they fall due.

All of the investing policies and practices are reviewed regularly after thorough consideration of economic and market conditions, and overall care is taken to identify, manage and control exposure to the price movements of several categories of investments.

16. Sensitivity Analysis

Following analysis of historical data and expected investment return movement during the financial year, in consultation with the fund's investment advisors, Mercer Ltd, the City of London Corporation has determined that the movements in market price risk set out in the table below are reasonably possible for the 2017/18 reporting period. The potential price changes disclosed below is consistent with a multi-year one-standard deviation movement in the value of the assets. The sensitivities are consistent with the assumptions contained in the investment advisor's most recent review. This analysis assumes that all other variables, in particular foreign currency exchange rates and interest rates, remain the same.

Potential Market Movements (% Change)

Asset Type	31 March 2017	31 March 2018
Developed market global equities	17.05%	16.70%
Emerging market global equities	29.00%	28.50%
Hedge funds (proxy for Multi-asset funds)	7.60%	7.50%
Private Equity	24.30%	24.20%
Unlisted infrastructure	15.00%	14.80%

Had the market price of the fund investments increased/decreased in line with the above, the change in the net assets available to pay benefits in the market price would have been as follows (the prior year comparator is shown below).

Price Risk (as at 31 March 2018)

Asset Type	Value £m	Change %	Value on Increase £m	Value on Decrease £m
Developed market global equities	603.1	16.70%	703.8	502.4
Emerging market global equities	15.1	28.50%	19.4	10.8
Hedge funds (proxy for Multi-asset funds)	277.2	7.50%	298.0	256.4
Private Equity	29.2	24.20%	36.3	22.1
Unlisted infrastructure	57.9	14.80%	66.5	49.3
Total Assets	982.5		1,124.0	841.0

Price Risk (as at 31 March 2017)

Asset Type	Value £m	Change %	Value on Increase £m	Value on Decrease £m
Developed market global equities	606.5	17.05%	709.9	503.1
Emerging market global equities	4.1	29.00%	5.3	2.9
Hedge funds (proxy for Multi-asset funds)	284.8	7.60%	306.4	263.2
Private equity	20.9	24.30%	26.0	15.8
Unlisted infrastructure	48.4	15.00%	55.7	41.1
Total Assets	964.7		1,103.3	826.1

Currency Risk

Currency risk represents the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The fund is exposed to currency risk on financial instruments owned directly or through a pooled structure, that are denominated in any currency other than the functional currency of the fund (UK sterling). The following table summarises the position as at 31 March 2018. Following analysis of historical data, the fund custodian BNY Mellon have provided the currency exposure and volatility data included in the table below.

Currency Risk (as at 31 March 2018)

The following analyses show a comparison of the sensitivities as at 31 March 2018.

Currency	Value £m	Change %	Value on Increase £m	Value on Decrease £m
Australian Dollars	7.1	3.50%	7.3	6.9
Brazilian Real	1.7	5.82%	1.8	1.6

United States Dollars	220.3	2.67	226.2	214.4
Overseas Total	311.0		319.6	302.4
UK Investments & Cash	653.7			
Overall	964.7			

Liquidity Risk

Liquidity risk represents the risk that the Fund will not be able to meet its financial obligations as they fall due. Officers monitor cash flows and takes steps to ensure that there are adequate cash resources to meet the fund's commitments. The fund has immediate access to its cash holdings.

Liquid assets are those that can be converted to cash within three months, subject to normal market conditions. As at 31 March 2018, liquid assets were £895.2m representing 91% of total fund assets (£895.2m at 31 March 2017 representing 93% of the Fund at that date). These investments can in fact be liquidated within a matter of days.

17. Funding Arrangements

In accordance with statutory regulations a triennial valuation of the Pension Fund was completed by the City's independent consulting actuaries, Barnett Waddingham LLP, as at 31 March 2016 using the projected unit method and the resulting employers' contribution were implemented for the three financial years commencing 1 April 2017.

The main funding assumptions which follow were incorporated into the funding model used in the 2013 and 2016 valuations (Consumer Price Inflation has been used as basis to reflect the actuarial assumption in real terms):

	March 2013 % p.a.	Real % p.a.	March 2016 % p.a.	Real % p.a.
Financial Assumptions				
Discount Rate	6.0	3.3	5.7	3.3
Retail Price Inflation	3.5	0.8	3.3	0.9
Consumer Price Inflation	2.7	-	2.4	-
Pension Increases	2.7	-	2.4	-
Pay Increases (Short Term)	1.0	(1.7)	*	
Pay Increases (Long Term)	4.2	1.5	3.9	1.5

* CPI for the period 31/03/2016 to 31/03/2020. The discount rate reflects the asset allocation embedded in fund's long-term strategy, the below table outlines how these assumptions translate into an overall discount rate assumption.

Future assumed returns at 2016	Percentage of Fund %	Return Assumption %	Real (relative to CPI) %
Gilts	-	2.4	-
Cash	-	1.8	(0.6)
Bonds	-	3.3	0.9
Equities	55	7.4	5.0
Property	10	5.9	3.5
Absolute return fund – inflation plus 3.7%	15	6.1	3.7
Absolute return fund – LIBOR plus 4.5%	20	6.3	3.9
Expenses (deduction)		(0.2)	

Neutral estimate of discount rate based on long-term investment strategy		6.7	4.3
Prudence Allowance		(1.0)	(1.0)
Discount Rate		5.7	3.3

Demographic assumptions

The demographic assumptions used are consistent with those used for the most recent Fund valuation, which was carried out as at 31 March 2016, hence they are different from those used for the 2015/16 statement of accounts. The post retirement mortality tables adopted are the S2PA tables with a multiplier of 80%, for males and 85% for females. These base tables are then projected using the CMI 2015 Model, allowing for a long-term rate of improvement of 1.5% p.a.

Life expectancy from age 65		31 March 2016	31 March 2013
Retiring today	Males	24.3	23.0
	Females	25.8	25.4
Retiring in 20 years	Males	26.5	24.8
	Females	28.1	27.3

Commutation assumption

As part of the 2016 valuation the actuary performed an analysis of retirement patterns using the new universal data extract. This analysis revealed that members on average exchanged pension to get approximately 50% of the maximum available cash on retirement.

50:50 membership

The actuary has assumed that existing members will continue to participate in their current section.

Funding Position at Valuation date

The valuations at 31 March 2013 and 31 March 2016 revealed that the relationship between the values placed on the assets held by the fund and the liabilities accrued in respect of pensionable service at that date were as follows:

Past Service Liabilities	March 2013 £m	March 2016 £m
Active Members	278.8	308.9
Deferred pensioners	158.1	185.1
Pensioners	392.7	451.6
Total	829.6	945.6
Assets	(701.8)	(796.3)
Deficit	127.8	149.3
Funding Level	85%	84%

Based on the above data the derivation of the basic rate of employer's contribution is set out below:

	March 2013 Contribution rate %	March 2016 Contribution rate %
Future service funding rate	11.5	12.8
Past service adjustment	5.5	8.2
Total contribution rate	17.0	21.0

The past service adjustment assumes that the deficit is recovered over a 20 year period in the March 2013 valuation and a 17 year period in the March 2016 valuation.

Having considered the basic rate of employer's contributions above, the City of London Corporation set contribution rates applicable to its employees of 21.0% for each of the financial years 2017/18 to 2019/20. Exceptions are City Academy who pay 17.1% p.a. and Museum of London which has certified stepped contributions of 15.1% in 2017/18, 15.6% in 2018/19 and 16.1% in 2019/20.

Of the employers' contributions receivable in 2017/18, amounting to £8.82m, the amounts attributable to "deficit funding" are as follows:

	Future Funding	Past-service Deficit Funding	Total Contributions
	£m	£m	£m
Administering Authority			
City of London	16.35	10.49	26.84
Scheduled Bodies			
Museum of London	0.73	0.47	1.20
Multi-Academy Trust	0.02	-	0.02
Admitted Bodies			
Irish Society	0.02	0.01	0.03
Agilisys	0.09	0.05	0.14
City Academy -Southwark	0.20	0.12	0.32
Other	0.16	0.11	0.27
	17.57	11.25	28.82

18. Funded Obligation of the Overall Pension Fund

31 March 2017 £m		31 March 2018 £m
1,606.0	Present Value of the defined benefit obligation*	1,627.0
(963.5)	Fair Value of Fund Assets (bid value)	(988.2)
642.5	Net Liability	638.8

*The present value of the funded obligation consists of £1,572.8m in respect of vested obligations and £54.2m in respect of non-vested obligations (2016/17: £1,546.2m and £59.8m respectively).

The above figures show the total net liability of the Fund as at 31 March 2018 and have been prepared by the fund actuary (Barnett Waddingham LLP) in accordance with IAS26. In calculating the disclosed numbers, the value of Fund's liabilities calculated for the funding valuation as at 31 March 2016 have been rolled forward, using financial assumptions that comply with IAS19.

at 31 March 2017		Assumptions	at 31 March 2018	
% pa	*Real % pa		% pa	*Real % pa
3.6	1.0	RPI increase	3.3	1.0
2.6	-	CPI increase	2.3	-
4.1	1.5	Salary increase	3.8	1.5
2.6	-	Pension increase	2.3	-
2.7	0.1	Discount Rate	2.6	0.3

* Consumer Price Inflation has been used as basis to reflect the actuarial assumption in real terms.

19. Current assets

Current assets include cash balances of £6.7m at 31 March 2018 (£2.3m at 31 March 2017).

20. Current liabilities

Current liabilities represent accruals for investment management expenses, custodian fees and pension payroll transactions.

21. Additional Voluntary Contributions

Market Value 31 March 2017 £m		Market Value 31 March 2018 £m
1.4	Prudential	1.6
0.5	Standard Life Investments	0.5
0.3	Equitable Life	0.3
2.2		2.4

AVC's are Additional Voluntary Contributions and are managed externally and independently from the rest of the Pension Fund. They are paid by members to the Corporation and transferred directly to the relevant Fund Managers – Prudential, Standard Life Investments and Equitable Life. AVC's of £0.43m were paid in 2017/18 (2016/17: £0.54m).

In accordance with Regulation 4(1) (b) of the Pension Scheme (Management and Investment of Funds) Regulations 2016, the contributions paid, and the assets of these investments are not included in the Fund's Accounts.

22. Related Party Transactions

The City of London Pension Fund is administered by the City of London Corporation. Consequently, there is a strong relationship between the local authority and the pension fund.

During the reporting period, administration expenses which were charged to the fund amounted to £0.7m (2016/17: £0.7m). This includes £0.5m (2016/17: £0.5m) of City of London Corporation staff salaries.

The Corporation is also the single largest employer of members of the pension fund and the employer contributions paid by it was £26.9m in 2016-17 (2016/17: £20.8m).

23. Key Management Personnel

The key management personnel of the fund are the Chamberlain, Deputy Chamberlain, Corporate Treasurer, Head of Pensions Administration and Group Accountant for Pensions and Treasury Management. Total remuneration payable to key management personnel is set out below

31 March 2017 £m		31 March 2018 £m
0.1	Short-term benefits	0.2
0.1		0.2

24. Contingent Liabilities and Contractual Commitments

Outstanding capital commitments (investments) at 31 March 2018 totalled £8.8m (31 March 2017: £27.1m). These commitments relate to outstanding call payments due on unquoted limited partnership funds held in the private equity and infrastructure parts of the portfolio. The amounts 'called' by these funds are irregular in both size and timing over a period of between four and six years from the date of each original commitment.

To be completed on completion of the audit.

Scope of Responsibility

1. The City of London Corporation is a diverse organisation with three main aims: to support and promote the City as the world leader in international finance and business services; to provide modern, efficient and high quality local services, including policing, within the Square Mile for workers, residents and visitors; and to provide valued services, such as education, employment, culture and leisure to London and the nation. Its unique franchise arrangements support the achievement of these aims.
2. Although this statement has been prepared to reflect the City of London Corporation in its capacity as a local authority and a police authority, the governance arrangements are applied equally to its other funds – City’s Cash and Bridge House Estates.
3. The City of London Corporation (“the City Corporation”) is responsible for ensuring that its business is conducted in accordance with the law and proper standards; that public money is safeguarded and properly accounted for, and used economically, efficiently and effectively; and that arrangements are made to secure continuous improvement in the way its functions are operated.
4. In discharging this overall responsibility, the City Corporation is responsible for putting in place proper arrangements for the governance of its affairs and facilitating the effective exercise of its functions, which includes arrangements for the management of risk.
5. The City Corporation has approved and adopted a code of corporate governance which is consistent with the principles of the CIPFA/SOLACE ¹³Framework *Delivering Good Governance in Local Government*. A copy of the code is on the City Corporation’s website at www.cityoflondon.gov.uk. This statement explains how the City Corporation has complied with the code and also meets the requirements of regulation 6(1) of the Accounts and Audit (England) Regulations 2015, which requires all relevant bodies to prepare an annual governance statement.

The Purpose of the Governance Framework

6. The governance framework comprises the systems and processes by which the City Corporation is directed and controlled and its activities through which it accounts to, engages with and leads its communities. It enables the City to monitor the achievement of its strategic objectives and to consider whether those objectives have led to the delivery of appropriate, cost-effective services.
7. The system of internal control is a significant part of that framework and is designed to manage all risk to a reasonable level. It cannot eliminate all risk of failure to achieve policies, aims and objectives and can therefore only provide reasonable rather than absolute assurance of effectiveness. The City Corporation’s system of internal control is based on an ongoing process designed to identify and prioritise the risks to the achievement of its policies, aims and objectives, to evaluate the likelihood of those risks being realised and the impact should they be realised, and to manage them economically, efficiently and effectively.

¹³ CIPFA is the Chartered Institute of Public Finance and Accountancy
SOLACE is the Society of Local Authority Chief Executives

8. The governance framework has been in place at the City Corporation for the year ended 31 March 2018 and up to the date of approval of the statement of accounts.

Key Elements of the Governance Framework

Code of Corporate Governance

9. The principles of good governance are embedded within a comprehensive published Code of Corporate Governance. This code covers both the local authority and police authority roles, and links together a framework of policies and procedures, including:
- Standing Orders, which govern the conduct of the City Corporation's affairs, particularly the operation of Committees and the relationship between Members and officers;
 - Financial Regulations, which lay down rules that aim to ensure the proper management and safeguarding of the City Corporation's financial and other resources;
 - Terms of reference for each Committee;
 - A Scheme of Delegations, which defines the responsibility for decision-making and the exercise of authority;
 - A Members' Code of Conduct, which defines standards of personal behaviour;
 - A Standards Committee whose role is to promote high standards of member behaviour and to deal with complaints made against Members, and register of interests, gifts and hospitality;
 - A Code of Conduct for employees;
 - The Corporate Plan 2015-19;
 - A corporate complaints procedure, operated through the Town Clerk's Department, with a separate procedure in the Department of Community and Children's Services to comply with the relevant regulations, and a separate complaints process in respect of complaints about the City of London Police;
 - A corporate Project Toolkit and other detailed guidance for officers, including procedures and manuals for business-critical systems;
 - An anti-fraud and corruption strategy, including: anti-bribery arrangements; a social housing tenancy fraud, anti-fraud and prosecution policy; and a whistleblowing policy;
 - A Risk Management Strategy;
 - Job and person specifications for senior elected Members and the Court of Aldermen; and
 - A protocol for Member/officer relations.

10. The City Corporation's main decision-making body is the Court of Common Council, which brings together all of its elected members. Members sit on a variety of committees which manage the organisation's different functions, and report to the Court of Common Council on progress and issues as appropriate. The Town Clerk and Chief Executive is the City Corporation's statutory head of paid service, and chairs the Chief Officers Group, and the Summit Group, which is the primary officer decision-making body. In 2015/16 a new officer governance framework was introduced, comprising four Chief Officer Strategic Steering Groups, reporting to the Summit Group, although, following the substantive development of the new Corporate Plan 2018-23, three of these groups have ceased to meet. The Comptroller and City Solicitor discharges the role of monitoring officer under the Local Government and Housing Act 1989.
11. The Court of Common Council is defined as the police authority for the City of London Police area in accordance with the provisions of the City of London Police Act 1839 and the Police Act 1996.
12. The role of the police authority is to ensure that the City of London Police runs an effective and efficient service by holding the Commissioner to account; to ensure value for money in the way the police is run; and set policing priorities taking into account the views of the community. These, and other key duties, are specifically delegated to the Police Committee. The Police Committee has the following Sub Committees and Boards to provide enhanced oversight in specific areas of police work:
 - The Professional Standards and Integrity Sub Committee has responsibility for providing detailed oversight over professional standards and integrity within the Force, and examines the casework of every single complaint recorded by the Force;
 - The Performance and Resource Management Sub Committee monitors performance against the Policing Plan and oversees management of risk, human and financial resources;
 - The Economic Crime Board considers matters relating to the Force's national responsibilities for economic crime and fraud investigation; and
 - The Police Pensions Board assists the City of London Police in securing compliance with pension scheme regulations and other legislation relating to the governance and administration of the scheme.
13. Under the Localism Act 2011, the City Corporation is under a duty to promote and maintain high standards of conduct by Members and co-opted Members. In particular, the Court of Common Council must adopt and publicise a code dealing with the conduct that is expected of Members when they are acting in that capacity, and have in place a mechanism for the making and investigation of complaints. The Court approved a revised Code of Conduct in March 2018, following a review by the Standards Working Party.
14. The City Corporation has appropriate arrangements in place under which written allegations of a breach of the Member Code of Conduct can be investigated and decisions on those allegations taken. A Complaints Procedure is in place and following a review a revised model will come into force in the 2018/19 municipal year. A Dispensations Sub Committee exists for the purposes of considering requests from Members for a dispensation to speak or vote on certain matters (where they have a disclosable pecuniary interest and are otherwise prevented from participation) being considered at Committee meetings. Elected and co-opted Members are invited to review and update their Member Declarations on an annual basis (although there is no statutory requirement to do so).
15. Under Section 28 of the Localism Act, the City Corporation is required to appoint at least one Independent Person to support the standards arrangements. The Court of Common Council has made three appointments to the position of Independent Person.

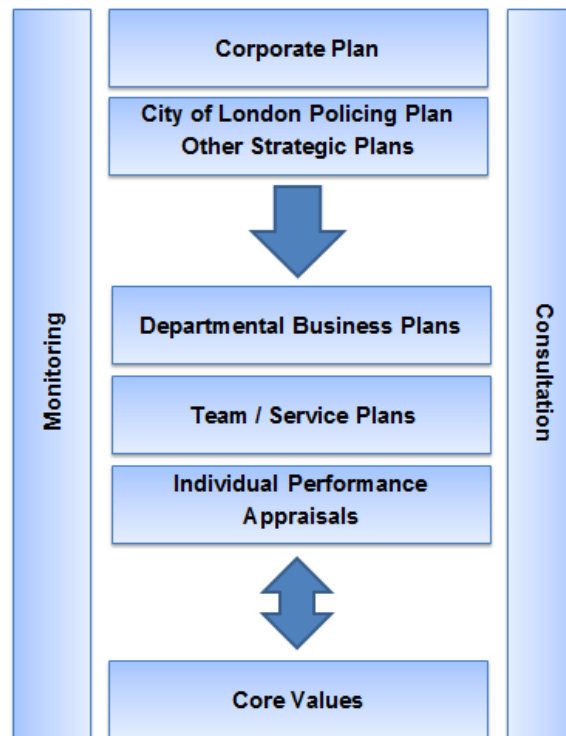

16. The Localism Act also requires the City Corporation to prepare and publish a Pay Policy Statement each year, setting out its approach to pay for the most senior and junior members of staff. The Pay Policy Statement for 2017/18 was agreed by the Court of Common Council in March 2017 and published on the City Corporation's website.
17. To assist in meeting the City Corporation's obligations under the Bribery Act 2010, officers with decision-making powers in relation to higher risk activities are required to make an annual declaration to confirm that they have met the requirements relating to potential conflicts of interest, as set out in the Employee Code of Conduct, and to confirm that they have not engaged in any conduct which might give rise to an offence under the Act.
18. As a result of the Protection of Freedoms Act 2011-12, revisions were agreed to the City Corporation's policy and procedures in respect of the Regulation of Investigatory Powers Act 2000 (RIPA), which regulates surveillance carried out by public authorities in the conduct of their business. A report was made in September 2017 to the Policy and Resources Committee on the City Corporation's use of RIPA powers. In September 2015, the Office of the Surveillance Commissioners conducted an inspection of the City Corporation's arrangements. The inspector concluded that the City Corporation is keen to set and maintain standards and has a sound RIPA structure, with good policies and procedures.

Standards Committee

19. The Standards Committee oversees the conduct of Members in all areas of the City of London Corporation's activities be it local authority, police authority or non-local authority functions. Its main responsibility is to promote and maintain high standards of conduct by elected Members and Members co-opted on to City of London Committees.
20. Its functions include:
 - monitoring and regularly reviewing the operation of the Code of Conduct for Members and related procedures;
 - considering any alleged breaches of the Code;
 - monitoring Members' declarations to ensure compliance with both the statutory and local registration requirements;
 - regularly reviewing the complaints procedure and dispensations arrangements; and
 - submitting an annual report to the Court of Common Council.
21. During 2016/17, the Standards Committee commissioned an independent, broadly-based review of the arrangements in place for addressing matters connected with the conduct of Members (including co-opted Members) under the Localism Act 2011, with particular focus on the Complaints Procedure (relating to alleged breaches of the Members' Code of Conduct). A Member Working Party was formed to review the resulting report and how the recommendations in the report might be progressed and implemented. The Working Party's recommendations were considered and adopted by the Court of Common Council, with changes due to be implemented during the 2018/19 municipal year. The Committee undertakes an annual review of the Protocol on Member/Officer Relations. Five allegations of breaches of the Members' Code of Conduct were made to the Committee during 2017/18.

22. Following the March 2017 Ward elections, 26 new Members were elected to the Court of Common Council. A comprehensive package of learning and development was offered to all new and returning Members and included briefing sessions on corporate planning, the Member Code of Conduct and the Member/Officer Protocol, as well as other aspects of the governance framework i.e. how decisions are taken, Standing Orders and financial regulations.
23. Four by-elections were held in 2017/18 and returned a total of three Aldermen and one new Member of the Court of Common Council. Two further Aldermen were returned in 2017/18 following uncontested elections.

Business Strategy and Planning Process

24. The City Corporation has a clear hierarchy of plans, setting out its ambitions and priorities:
- The Corporate Plan, 2015-19, shows how the City Corporation will fulfil its role as a provider of services both inside and outside of the City boundaries. The Corporate Plan 2015-19 includes a statement of the City's Vision, Strategic Aims, Key Policy Priorities, Core Values and Behaviours. It has since been

replaced by a new Corporate Plan covering the period 2018-23, which was approved by Court of Common Council on 8th March 2018 and introduced on 1st April 2018.

- The City of London Policing Plan details the policing priorities and shows how these will be delivered over the coming year. It also contains all the measures and targets against which the Police Committee hold the City of London Police to account.
 - Other corporate plans and strategies are mentioned elsewhere in this document.
25. Plans and strategies are informed by a range of consultation arrangements, such as City-wide residents' meetings, representative user groups and surveys of stakeholders. The City Corporation has a unique franchise, giving businesses (our key constituency) a direct say in the running of the City, and a range of engagement activities, including through the Lord Mayor, Chairman of Policy and Resources Committee and the Economic Development Office. An annual consultation meeting is held for business rates and council tax payers.
26. The Health and Social Care Act 2012 transferred responsibility for health improvement of local populations to local authorities in England, with effect from 1st April 2013. The new duties included the establishment of a Health and Wellbeing Board, which provides collective leadership to improve health and wellbeing for the local area.

Information Management Strategy

27. The Information Management Strategy (approved October 2009) sets out the headline approach to information management in the City Corporation. It summarises the current position, gives a vision of where we want to be and proposes a set of actions to start us on the path to that vision. The Strategy defines our approach to the other key elements for information management, in particular data security and data sharing. The Information Management Strategy is being updated and refreshed with a new Information Management Strategy to be published in 2018 alongside recommendations for a new Information Management Operating Model.
28. Overall responsibility for Information Management Governance and cyber-security is vested in the Information Technology (IT) Sub Committee. The Information Management Governance Steering Group reports to the Strategic Resources Group and the IT Steering Group, both chaired by the Chamberlain. Both groups report to the Summit Group and the IT Sub Committee. The Comptroller and City Solicitor is now the Senior Information Risk Owner (SIRO) and work continues to identify Information Asset Owners (IAO) within departments and build an information asset register.
29. The Corporation has undertaken a thorough review and update of its policies and procedures in preparation for the coming into force of the General Data Protection Regulation (GDPR) on 25th May 2018, together with a programme of training for officers and members.

Financial Management Arrangements

30. The Chamberlain of London is the officer with statutory responsibility for the proper administration of the City's financial affairs. In 2010 CIPFA issued a *"Statement on the Role of the Chief Financial Officer in Local Government"*¹⁴ which defines the key responsibilities of this role and sets out how the

¹⁴ Updated in 2016

requirements of legislation and professional standards should be met. The City's financial management arrangements conform to the governance requirements of the Statement. The Chamberlain also fulfils the role of Treasurer of the Police Authority.

31. The system of internal control is based on a framework of regular management information, financial regulations, administrative procedures (including segregation of duties), management supervision, a system of delegation and accountability, and independent scrutiny. In particular the system includes:
 - a rolling in-depth survey of the City Corporation's forecast position over a five-year period;
 - comprehensive budget setting processes;
 - monthly, quarterly and annual financial reports that indicate performance against budgets and forecasts;
 - access by all departmental and central finance staff to systems providing a suite of enquiries and reports to facilitate effective financial management on an ongoing basis;
 - ongoing contact and communication between central finance officers and departmental finance officers;
 - clearly defined capital expenditure guidelines;
 - formal project management disciplines;
 - the provision of high quality advice across the organisation;
 - an internal audit service combining in-house staff with external knowledge and expertise;
 - insuring against specific risks;
 - scrutiny by Members, OFSTED, CQC, HMICFRS, other inspectorates, External Audit and other stakeholders; and
 - requests for Members and Chief Officers to disclose related party transactions including instances where their close family have completed transactions with the City Corporation.
32. The City Corporation has a long-standing and in-built culture of maximising returns from its resources and seeking value for money. It assesses the scope for improvements in efficiency /value for money at a corporate and service level by a variety of means, including improvement priorities set by the Policy and Resources Committee through the annual resource allocation process, and internal examination and review by the Efficiency and Performance Sub Committee.
33. The Efficiency and Performance Sub Committee also has responsibility for monitoring and oversight of the delivery of the service based review savings and increased income, and the cross-cutting efficiency reviews, and continues to challenge the achievement of value for money, helping to embed further a value for money culture within the City Corporation's business and planning processes.
34. Following approval by the Court of Common Council in October 2016, an Efficiency and Sustainability Plan for the City Corporation was submitted to and accepted by the Department for Communities and Local Government (now the Ministry for Housing, Communities and Local Government). This provided a

degree of certainty over central government funding for the period from 2016/17 to 2019/20. It also establishes a framework for continuous efficiency improvement beyond 2017/18 when the current service based review programme will be substantially complete, including a 2% per annum budget reduction target that will deliver sufficient efficiencies across the City Corporation's funds from 2018/19 to sustain these budgets over the medium term and allow for planned investment in services through the Priorities Investment Pot.

35. In anticipation of the completion of the service based review programme, a new methodology for identifying cross-cutting efficiencies was piloted in 2017. The pilot for the Chief Officer Peer Review was completed in July 2017 and the methodology was refined for the wider roll out made up of 3 additional groups. Sessions began in October 2017 and the final meetings were completed in March 2018. The focus of these sessions was to discuss how each Chief Officer can make their departments more innovative, collaborative and agile whilst delivering the required 2% per annual budget reductions. These sessions aimed to help Chief Officers develop their business plans to make efficiency savings or generate income to help meet the requirements of the Efficiency and Sustainability Plan and achieve better alignment of activities to the outcomes in the Corporate Plan.
36. Chief Officers have been presenting the outputs of their Peer Reviews, in the form of plans, to Summit Group and then, if recommended by Summit Group, to Efficiency and Performance Sub-Committee. A summary of the Chief Officer Peer Review outputs will be reported to Efficiency and Performance Sub-Committee in quarter 1 of the 2018/19 financial year.
37. For non-Police services, the local government settlement in autumn 2017 was challenging but fell within the prudent assumptions included with the City's financial forecast. Subject to there being no significant adverse changes in financial planning assumptions across the period, forecasts indicate a surplus across the period to 2021/22, although from 2019/20, the inclusion of funding for the Museum of London and Combined Courts relocation projects will move the fund into a deficit position.
38. The economic outlook and public finances remain uncertain following the EU Referendum and there is no guarantee that government funding will be not be revised further downwards in later years. The Ministry of Housing, Communities and Local Government is currently consulting on a Fair Funding Review that will recalculate the baseline grant for City Fund from 2020/21. This may also coincide with a move to greater business rates retention nationally, currently under consideration by the Government. The position is being monitored on an ongoing basis.
39. The City Corporation is participating in a pilot scheme for business rate devolution during 2018/19 with all 32 London Boroughs and the Greater London Authority, involving the establishment of a business rates pool. The proposal was approved in December 2017. The scheme has a financially neutral starting point but enables any year-on-year growth in rates revenue to be retained within London. Some of this will be used to establish a strategic investment fund and the rest will be shared among participating authorities.
40. The City of London Police manages its budget on a ring-fenced basis. The Court of Common Council agreed to increase the Business Rates Premium from April 2016 with the additional income, estimated at £1.6m a year, being allocated to the Police to cover emerging cost pressures relating to security. Nevertheless, the underlying financial position remains challenging with deficits forecast across the period and reserves exhausted during 2018/19.
41. The Force has a forecast deficit in subsequent years arising from increasing demand and the changing nature of policing. The Force is in the process of implementing recommendations following the Deloitte Demand and VfM review which was commissioned by the Commissioner and Chamberlain during 2017/18 to address the underlying budget deficit. Additional support is being provided by the City Corporation for capital investment priorities over the

period between 2017/18 and 2022/23 totalling £17.5m plus some further IT and pension costs. The Force and the City Corporation are also investigating areas for greater collaboration, including the development of a Joint Contact and Control Room as part of the Secure City programme.

42. The Police Performance and Resource Management Sub Committee's responsibilities include overseeing the Force's resource management in order to maximise the economic, efficient and effective use of resources to deliver its strategic priorities; monitoring government and other external agencies' policies and actions relating to police performance; overseeing the Force's risk management arrangements; and ensuring that the Force delivers value for money. The Sub Committee also receives regular updates on the work of internal audit in relation to the Force and inspection reports from HMICFRS.
43. The Policy and Resources Committee determines the level of the City Corporation's own resources to be made available to finance capital projects on the basis of a recommendation from the Resource Allocation Sub Committee. Ordinarily, such projects are financed from capital rather than revenue resources, and major projects from provisions set aside in financial forecasts.
44. The City Corporation has a number of procedures in place to ensure that its policies and the principles that underpin them are implemented economically, efficiently and effectively. This framework includes:
 - Financial Strategy - This provides a common base for guiding the City Corporation's approach to managing financial resources and includes the pursuit of budget policies that seek to achieve a sustainable level of revenue spending and create headroom for capital investment and policy initiatives;
 - Budget policy - The key policy is to balance current expenditure and current income over the medium term. Both blanket pressure and targeted reviews are applied to encourage Chief Officers to continuously seek improved efficiency;
 - Annual resource allocation process - This is the framework within which the City Corporation makes judgements on adjustments to resource levels and ensures that these are properly implemented;
 - Corporate Property Asset Management Strategy - This aims to ensure that the City Corporation's operational assets are managed effectively, efficiently and sustainably, in support of the organisation's strategic priorities and business needs;
 - Capital project evaluation, management and monitoring - The City Corporation has a comprehensive system of controls covering the entire life cycle of capital and major revenue projects; and
 - Treasury Management and Investment Strategies - Setting out the arrangements for the management of the City Corporation's investments, cash flows, banking and money market transactions; the effective control of risks associated with those activities; and the pursuit of optimum performance consistent with those risks.
45. Consideration is given to efficiency during the development and approval stages of all major projects, with expected efficiency gains quantified within reports to Members.
46. The performance of the City Corporation's financial and property investments is monitored and benchmarked regularly, both in-house and independently, through experts in the field.

47. The City Corporation's project management and procurement arrangements provide a consistent approach to project management and co-ordination of the portfolio of projects across the organisation. The Projects Sub Committee meets monthly to ensure that projects align with corporate objectives and strategy, and provide value for money.

Risk Management

48. In May 2014, the Audit and Risk Management Committee approved a new Risk Management Strategy which set out a new policy statement and a revised framework, which aligns with the key principles of ISO 31000: Risk Management Principles and Guidelines, and BS 31100: Risk Management Code of Practice, and defines clearly the roles and responsibilities of officers, senior management and Members. The Strategy emphasises risk management as a key element within the City's systems of corporate governance and establishes a clear system for the evaluation of risk and escalation of emerging issues to the appropriate scrutiny level. The Strategy assists in ensuring that risk management continues to be integrated by Chief Officers within their business and service planning and aligned to departmental objectives.
49. The Risk Management Group, consisting of senior managers representing all departments, including the City of London Police, meets twice annually. The group is a considerable driver in promoting the application of consistent, systematic risk management practices across the organisation. Strategic decisions on risk management are made by the Summit Group on a quarterly basis. Oversight of corporate risk is provided by the Chief Officers' Group and the Audit and Risk Management Committee. These arrangements have been strengthened with the establishment of a Chief Officer Risk Management Group. This meets quarterly to review, in depth, the corporate risk register and report their findings to the Summit Group when they consider the quarterly risk update report. In addition to receiving quarterly risk update reports, the Audit and Risk Management Committee has adopted a cycle of regular departmental risk challenge sessions, with Chief Officers and their respective Committee Chairmen, which take place prior to their meetings. During 2017/18, the Committee has undertaken 14 deep-dive reports, including fire safety in the City Corporation's residential blocks, fire safety in general, information security (including cyber-security), the General Data Protection Regulation, police funding and road safety.
50. The Committee has also introduced the regular reporting of top departmental risks to every Service Committee.
51. The corporate risk register contains thirteen risks, including two new risks which have been added during the last year.
52. During 2016/17 an external review was undertaken of the City's risk management arrangements. An improvement plan was developed and is currently being implemented:
- Mandatory risk management training was delivered, during the second half of 2017, to the City Corporation's top 120 managers. In addition, there were several departmentally focussed risk management training sessions for other managers and staff. The regular monthly manager and staff business risk management training sessions have been run as part of the corporate training programme.
 - Using the services of an external risk consultancy practice, the City Corporation has developed an understanding of its organisational risk appetite. Work is now in hand to assess its most significant risks against the appetite levels.
 - To improve the sharing of risk information and encourage co-operation between the various risk disciplines within the City Corporation (Resilience, H&S, IT, City Procurement, Internal Audit, Anti-Fraud, Corporate Performance), a new Risk Specialism group now meets on a quarterly basis.

- Further, the corporate risk register will be reviewed following the adoption of the new Corporate Plan 2018-23.

Health & Safety and Wellbeing

53. The Health & Safety at Work etc. Act 1974 requires the City as an employer to ensure that it implements systems for the protection of its staff and others affected by its activities. The City Corporation health and safety management system is aligned to HSG65, the Health and Safety Executive's guidance document on the essential philosophy of good health and safety. The City Corporation systems will remain aligned with this guidance, to ensure that safety becomes part of normal business by applying a practical, sensible and common-sense approach.
54. Corporate Risk 09 concerns the City's Health and Safety Management System and its application. Effective health and safety management enables innovation, growth and enhances productivity, as well as helping the City Corporation to achieve its strategic objectives.
55. Driving is the one of the most hazardous work activities, contributing to far more accidental deaths and serious injuries than all other work-related tasks. The City Corporation introduced a *Corporate Transport Policy* along with associated procedures and guidance to manage occupational road risk. Embedding of the policy continues, with a focus during 2017 on assuring compliance across the organisation.
56. There is an established annual inspection and audit programme for property and people health and safety - for example audit, inspections and compliance checks have focused on water hygiene (legionella), fire safety, asbestos management, workplace transport and lone working/preventing violence. These are currently considered to be the City Corporation's areas of higher risk profile.
57. The Pentana Risk Management Information System is used to manage significant health and safety risks. Pentana enables departments to highlight their safety risks as a 'Top X' risk, emphasising any activities with considerable implications that are un-mitigated, or where there is a lack of clarity. Significant fire safety support has been provided to several departments, including the Barbican Centre, Department for Community and Children's Services and Mansion House/Central Criminal Court.
58. The City Corporation has reviewed its processes and procedures relating to fire safety in its residential blocks, with particular emphasis on:
- Fire Risk Assessments (FRAs);
 - Communication with residents;
 - Fire safety maintenance and improvement works; and
 - Potential future improvement works.
59. As a result, a number of steps have been taken to further enhance the safety of the City Corporation's residential portfolio and its residents, including:
- Commissioning and completing new, more detailed and intrusive, Type 3 FRAs for all residential blocks to provide a greater level of assurance in relation to fire safety. An action plan has been implemented to deal with the recommendations arising from the Type 3 FRAs;
 - Developing and implementing a Fire Safety Communications Plan;

- A detailed assessment of the various fire safety maintenance and improvement works that could help further enhance the safety of residents; and
 - Implementing a door replacement programme to ensure that the front entrance doors and frames to all City Corporation social housing flats provide up to 60 minutes fire resistance.
60. The City Corporation will also, subject to any planning restrictions, retro-fit automatic water fire suppression systems (sprinklers) to the five social housing high-rise tower blocks in its portfolio. It has also commenced a programme of one-hour visits to all tenanted properties, which will include a risk assessment on the dwelling, the provision of fire safety advice to householders and identification of any support needs.
61. The CityWell wellbeing strategy is a strong employee brand and has helped embed the wellbeing programme at the City Corporation. The CityWell programme has been re-focused on mental health as the top priority with mandatory training for managers supported by a wider health promotion and wellness programme.
62. The City Corporation has established key performance indicators for health and safety including accident/incident reporting and investigation. The health and safety professionals have supported departments with their more challenging and/or significant health and safety investigations. This has helped to ensure that lessons are learned and are fed back into the development of the health and safety management system.

Business Continuity

63. The Civil Contingencies Act 2004 requires the City Corporation, as a Category 1 responder, to maintain plans to ensure that it can continue to exercise its functions in the event of an emergency. The City Corporation is required to train its staff responsible for business continuity, to exercise and test its plans, and to review these plans on a regular basis. Business Continuity Leads retraining is planned for roll-out in 2018/19.
64. The City Corporation has an overarching Business Continuity Strategy and Framework and each department has their own business continuity arrangements. Both corporate and departmental arrangements are regularly reviewed to ensure they align with the relevant risk registers and business objectives. Officers from the different departments share best practice and validate their arrangements through the Emergency Planning and Business Continuity Steering Group, which sits on a quarterly basis. New arrangements that seek to increase the resilience of the City Corporation's technology infrastructure have been introduced and technical tests are being carried out to ensure their robustness. These arrangements seek to ensure that the Guildhall can no longer be a potential single point of failure for the City Corporation's IT provision. The move to a more resilient backbone should enhance the continuity of service for remote workers, and at other sites, even if the Guildhall is affected.
65. Business Continuity testing is undertaken periodically by departments, with the intention of testing their ability to cope under pressure. Testing scenarios are based on adverse effects and 'worst case' events which aim to limit 'Business as Usual' operations, and are derived from departmental emergency management and business continuity plans, national and local risk register documentation, previous lessons learned and horizon scanning events. Testing is undertaken in formats including live play exercise, table top / workshop, and seminar/discussion exercises, and is based on objectives which aim to be specific, measurable, achievable, realistic and targeted towards departmental functions. Information is captured throughout testing and fed back to the departments being exercised. Reports are produced and any lessons learned are sought to be implemented.
66. Programme management of the City Corporation's business continuity management system (BCMS) lies with the Resilience Planning Team, and all departments play a role in it. In 2014, the City Corporation's resilience arrangements (including its BCMS) were reviewed by peers from other Central London

local authorities. This review was part of a regular assurance process linked to the Minimum Standards for London (which set out London's core resilience capabilities). The Team continues its on-going work with the IT service provider Agilisys to ensure robust business continuity plans dovetail between IT functions and critical services.

67. The City continues to experience an array of protests and demonstrations, as it is a desirable location for protest groups to maximise publicity both nationally and globally. However, by working with business and emergency service partners to ensure robust Business Continuity and emergency response plans are in place, the City Corporation maintains 'business as usual', and thus its reputation of working with and supporting business and local communities.

Role of Internal Audit

68. Internal Audit plays a central role in providing the required assurance on internal controls through its comprehensive risk-based audit programme, with key risk areas being reviewed annually. This is reinforced by consultation with Chief Officers and departmental heads on perceived risk and by a rigorous follow-up audit and spot checks regime.
69. The internal audit process is supported, monitored and managed by the Audit and Risk Management Committee in accordance with the Public Sector Internal Audit Standards. An Audit Charter established in 2013 was updated and agreed by the Audit and Risk Management Committee in May 2017 and again in March 2018. This defines the role of internal audit, and sets out accountability, reporting lines and relationships that internal audit has with the Audit and Risk Management Committee, Town Clerk and Chief Executive, Chamberlain and Chief Officers.
70. The Internal Audit Section operates under the requirements of the Public Sector Internal Audit Standards (PSIAS). The City of London's internal audit function was subject to an External Quality Assessment by Mazars LLP in February 2017 and assessed as "generally conforms" to the new standard. A number of recommendations identified during the review are currently being addressed to ensure that the Internal Audit Section fully conforms to the new standards.
71. The anti-fraud and investigation function continues to be effective in identifying and investigating allegations of fraud and corruption, with mature processes in place to tackle fraud across the City Corporation's social housing estates; along with conducting a wide range of risk based anti-fraud and awareness activities. The Audit and Risk Management Committee is provided with six-monthly anti-fraud and investigation update reports which detail the anti-fraud and investigation activity undertaken by the Anti-Fraud Team and provides progress against the strategic pro-active anti-fraud plan.

Performance Management

72. The corporate business planning framework sets out the planning cycle with clear linkages between the different levels of policy, strategy, target setting, planning and action (the "Golden Thread").
- All departments are required to produce annual departmental business plans for approval by the relevant service committee(s). These are all clearly linked to the overall Corporate Plan and show key objectives aligned with financial and staffing resources.
 - All departmental business plans are reviewed for compliance with the corporate business planning framework, and regular meetings are held between the Corporate Strategy and Performance Team and business planners.
 - All departments are required to report regularly to their service committees with progress against their business plan objectives and with financial monitoring information.

- Performance and Development Appraisals are carried out for all staff, using a standard set of core behaviours. The appraisals are used to set individual objectives and targets and to identify learning and development needs that are linked to business needs. Pay progression is linked to performance assessments under the appraisal process.
73. Performance is communicated to Council Tax and Business Rate payers through the City-wide residents' meetings, the annual business ratepayers' consultation meeting and regular electronic and written publications, including an annual overview of the accounts.
74. In tandem with the development of the new Corporate Plan 2018-23, approved by the Court of Common Council in March 2018, a new corporate performance management framework has been developed, to be rolled out across the City Corporation during 2018/19. These will shortly be supported by a new appraisals process and set of corporate behaviours.

Audit and Risk Management Committee

75. The Audit and Risk Management Committee is an enhanced source of scrutiny and assurance over the City Corporation's governance arrangements. It considers and approves internal and external audit plans, receives reports from the Head of Audit and Risk Management, external audit and other relevant external inspectorates, including HMICFRS, as to the extent that the City Corporation can rely on its system of internal control. The Committee reviews the financial statements of the City Corporation prior to recommending approval by the Finance Committee and considers the formal reports, letters and recommendations of the City Corporation's external auditors. The Committee also monitors and oversees the City Corporation's Risk Management Strategy. The Committee undertakes a systematic programme of detailed reviews of each of the risks on the City Corporation's Corporate Risk Register.
76. During 2017/18, the Committee continued its schedule of departmental risk challenge sessions. The Committee reviews the risks and risk management process for each department, on a rota basis, with one or two departments being invited to each meeting. These reviews are attended by the relevant Chairman and Chief Officer, with support and challenge applied so that risks are fully understood, and clear mitigation plans are in place. The Committee has also actively promoted a process for the regular reporting of top departmental risks to Service Committees, to encourage all Members to engage with the management of risk.
77. The Committee has strongly supported the internal audit function by setting clear performance expectations for Chief Officers in the timely implementation of audit recommendations, as well as ensuring internal audit's independence is fully recognised. It has reviewed the outcome of the Service Based Review of the internal audit function and is overseeing the adoption of a more efficient approach to the targeting of internal audit resources.
78. The Committee has a link to the Police Performance and Resource Management Sub Committee through the appointment of two of its members to this Sub Committee.
79. The Committee has supported the management of the Information Security corporate risk, highlighting the mandatory awareness training for all staff, resulting in a significant increase in the percentage of staff fully completing this training.
80. The Committee has taken a keen interest in cyber-security risks and remains committed to supporting the continuous development of cyber security across the City Corporation, including the incorporation into the City Corporation's controls of lessons learned from good practice elsewhere in the private and public sectors.

Review of Effectiveness

81. The City Corporation has responsibility for conducting, at least annually, a review of the effectiveness of its governance framework including the system of internal control. The review of effectiveness is informed by the work of the internal auditors and managers within the authority who have responsibility for the development and maintenance of the governance environment and also by comments made by the external auditors and other review agencies and inspectorates.
82. Processes that have applied in maintaining and reviewing the effectiveness of the governance framework include scrutiny primarily by the Policy and Resources, Finance, Police, Audit and Risk Management, Investment, and Standards Committees; and the Resource Allocation, Police Performance and Resource Management, and Efficiency and Performance Sub Committees.
83. This review of the main elements of the City Corporation's governance framework has not identified any significant issues for reporting to senior management.

Head of Internal Audit's Opinion

84. The Public Sector Internal Audit Standards require the Head of Internal Audit to deliver an annual internal audit opinion and report that can be used by the City Corporation to inform its Annual Governance Statement. The Head of Internal Audit is satisfied that sufficient quantity and coverage of internal audit work and other independent assurance work has been undertaken to allow him to draw a reasonable conclusion as to the adequacy and effectiveness of the City's risk management, control and governance processes. In his opinion, the City Corporation has adequate and effective systems of internal control in place to manage the achievement of its objectives. In giving this opinion he has noted that assurance can never be absolute and, therefore, only reasonable assurance can be provided that there are no major weaknesses in these processes.
85. Notwithstanding this overall opinion, internal audit's work identified a number of opportunities for improving controls and procedures, which are documented in each individual audit report. Four areas reviewed in 2017/18 resulted in 'red' (limited) assurance opinions. These relate to internal audit reviews undertaken of: Members and Officers Declarations of Interests; Open Spaces Repairs and Maintenance; Barbican Centre Retail and Bars and Guildhall School of Music and Drama Catering. All reports and recommendations have been accepted by management and implementation of the recommendations will be verified by internal audit follow up.

Future Work Programme

86. The governance framework is constantly evolving due to service and regulatory developments and assessments. Improvement plans have been compiled in response to the reports and assessments summarised above. Controls to manage principal risks are constantly monitored, in particular for services with statutory responsibilities for the safety of vulnerable people. The City Corporation proposes over the coming year to take the following steps to maintain, develop and strengthen the existing governance framework:
 - Review the City Corporation's governance arrangements against the requirements of the CIPFA/Solace framework *Delivering Good Governance in Local Government 2016*.
 - Roll out the refreshed Corporate Plan, for the period 2018-23, and both develop and begin collecting data against a set of outcome-based measures for the whole City Corporation, that demonstrate impact and progress towards delivering the Plan.

- Undertake an annual update for the registration and publication of declarations of interest by the City Corporation's Members and Co-opted Members.
- Deliver the benefits from the programme of cross-cutting efficiency and effectiveness reviews resulting from the service based review, the 2% budget efficiency target and the Chief Officer Peer Reviews.
- Publish a new Information Management (IM) Strategy with recommendations for an Information Management Operating Model, which will require:
 - the set-up of an IM organisation with additional job roles.
 - a change to the method of information management in the City Corporation.
 - specific projects and "units of work" to be delivered in 2018/19.
- Implement the new risk appetite framework for the City Corporation, which reflects its capacity to manage risk and willingness to take risk in order to meet the strategic objectives.
- Review the corporate risk register following the adoption of the City Corporation's new Corporate Plan.
- Review project and programme governance arrangements, to improve the handling of corporate and departmental projects, including reviewing the terms of reference of relevant governance groups and a process for escalating risks to the appropriate levels.
- Investigate ISO22301 accreditation for our business continuity services.
- Extend the remit of the Audit & Risk Management Committee to undertake periodic reviews of the risk management procedures, financial capabilities, controls, and safeguarding procedures of the City of London School, the City of London School for Girls, the City of London Freeman's School, the City of London Academies Trust (including its embedded academies) and the City Academies that are free-standing entities.

This annual governance statement was approved by the City Corporation's Audit and Risk Management Committee on 29 May 2018.

The City Fund Accounts and Pension Fund Accounts were considered and approved by the Finance Committee on the XXXX.

Jeremy Paul Mayhew MA, MBA
Chairman of the Finance Committee

Jamie Ingham-Clarke Deputy
Deputy Chairman of the Finance Committee

Accruals	The accounting treatment, where income and expenditure is recorded when it is earned or incurred, not when money is paid or received.
Actuarial gains and losses	For a defined benefit pension, changes in actuarial deficits or surpluses that arise because: <ul style="list-style-type: none">• events have not coincided with the actuarial assumptions made for the last valuation (known as experience gains and losses) or• the actuarial assumptions have changed.
Actuary	A person who assesses risks and costs, in particular those relating to life assurance and investment policies, using a combination of statistical and mathematical techniques.
Bid Price	The price a buyer is willing to pay.
Bridge House Estates	A charitable trust relating to the maintenance and support of five City of London owned bridges and the making of grants for the benefit of Greater London, particularly for the provision of transport, and access to it, for the elderly and disabled. The trust is accounted for separately and does not form part of the City Fund statements although references are made to Bridge House Estates in certain parts of the statements.
Capital adjustment account	Records the resources set aside to finance capital expenditure partly offset by the consumption of long-term assets based on historic costs (e.g. historic cost depreciation, historic cost impairment losses caused by consumption of economic benefits and revenue expenditure funded from capital under statute over the period that the City benefits from the expenditure).
Capital charge	A charge to service revenue accounts to reflect the cost of property, plant and equipment used in the provision of services.
Capital expenditure	Expenditure on the acquisition of a long-term asset or expenditure that adds to and not merely maintains the value of an existing long-term asset.
Capital receipts	The proceeds from the sale of a long-term asset such as land or council houses. Capital receipts can only be used for capital purposes e.g. funding capital expenditure or repaying debt.

City's Cash	The existence of City's Cash can be traced back to the fifteenth century and it has built up from a combination of properties, lands, bequests and transfers under statute since that time. It is accounted for separately and does not form part of the City Fund statements, although references are made to City's Cash in certain parts of the statements. The fund is now used to finance activities mainly for the benefit of London as a whole but also of relevance nationwide. These services include the work of the Lord Mayor in promoting UK trade overseas, numerous green spaces and work in surrounding boroughs supporting education, training and employment opportunities.
Creditors	Individuals or organisations to which the City Fund owes money at the end of the financial year.
Collection Fund	Statutory account showing transactions in relation to the collection of Council Tax, payments to the Greater London Authority and the administration of the National Non-Domestic Rate.
Community assets	Assets that the City of London intends to hold in perpetuity, that have no determinable useful life, and that may have restrictions on their disposal. Examples of community assets are parks and gardens or historic buildings.
Current asset	An asset which will be consumed or cease to have value within the next accounting period; examples are stock and debtors.
Current liability	An amount which will become payable or could be called in within the next accounting period; examples are creditors and cash overdrawn.
Current service cost (pensions)	The increase in the present value of a defined benefit scheme's liabilities expected to arise from employee service in the current period.
Curtailment (pensions)	For a defined benefit scheme, an event that reduces the expected years of future service of present employees or reduces for a number of employees the accrual of defined benefits for some or all of their future service. Curtailments include: <ul style="list-style-type: none"> • termination of employees' services earlier than expected, for example as a result of discontinuing an activity, and • termination of, or amendment to, the terms of a defined benefit scheme so that some or all future service by current employees will no longer qualify for benefits or will qualify only for reduced benefits.
Debtors	Individuals or organisations that owe the City Fund money at the end of the financial year.

Deferred capital receipts	These result mainly from loans to the Museum of London plus outstanding loans in respect of past sales of council dwellings to tenants who were unable to obtain a building society loan or other external means of financing. Their indebtedness is reflected in the balance sheet under long term debtors. This account shows the amount to be paid on deferred terms and is reduced each year by repayments made.
Defined benefit scheme	A pension or other retirement benefit scheme other than a defined contribution scheme. Usually, the scheme rules define the benefits independently of the contributions payable, and the benefits are not directly related to the investments of the scheme. The scheme may be funded or unfunded.
Defined contribution scheme	A pension or other retirement benefit scheme into which an employer pays regular contributions fixed as an amount or as a percentage of pay and has no legal or constructive obligation to pay further contributions if the scheme does not have sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.
Depreciation	The loss in value of an asset due to age, wear and tear, deterioration or obsolescence.
Direct revenue financing	Expenditure on the provision or improvement of capital assets met directly from revenue account.
Donated assets	Assets transferred at nil value or acquired at less than fair value.
Expected rate of return on pensions assets	For a funded defined benefit scheme, the average rate of return, including both income and changes in fair value but net of scheme expenses, expected over the remaining life of the related obligation on the actual assets held by the scheme.
Experience gains or losses	In pensions accounting, the element of actuarial gains and losses that relates to differences between the actual events as they have turned out and the assumptions that were made as at the date of the earlier actuarial valuation.
Fair value	Fair value is generally defined as the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's-length transaction.
Heritage assets	A tangible asset with historical, artistic, scientific, technological, geophysical or environmental qualities that is held and maintained principally for its contribution to knowledge and culture.
Impairment	A reduction in the value of an asset below its carrying amount on the balance sheet.
Infrastructure assets	Long-term assets that are inalienable, expenditure on which is recoverable only by continued use of the asset created. Examples are highways, footpaths, bridges and sewers.

Intangible assets	A non-physical item where access to future economic benefits is controlled by the local authority. An example is computer software.
Pensions interest cost	For a defined benefit scheme, the expected increase during the period in the present value of the scheme liabilities because the benefits are one period closer to settlement.
Investment properties	Interest in land or buildings that are held for investment potential.
Levies	These are charges incurred by the City of London to meet London-wide services. They include payments to the London Boroughs Grants Committee, the Environment Agency and the London Planning Advisory Committee.
National Non-Domestic Rate (NNDR)	A flat rate in the pound set by the Government and levied on businesses who occupy offices and buildings within the City. The income is collected by the City of London and is passed on to Central Government.
Net current replacement cost	The cost of replacing a particular asset in its existing condition and in its existing use.
Net realisable value	The open market value of an asset in its existing use (or open market value in the case of non-operational assets) less the expenses to be incurred in realising the asset.
Non-operational assets	Long-term assets held but not directly occupied, used or consumed in the delivery of service. Examples are investment properties.
Past service cost (pensions)	For a defined benefit scheme, the increase in the present value of the scheme liabilities related to employee service in prior periods arising in the current period as a result of the introduction of, or improvement to, retirement benefits.
Projected unit method	<p>An accrued benefits valuation method in which the scheme liabilities make allowance for projected earnings. An accrued benefits valuation method is a valuation method in which the scheme liabilities at the valuation date relate to:</p> <ul style="list-style-type: none"> the benefits for pensioners and deferred pensioners (i.e. individuals who have ceased to be active members but are entitled to benefits payable at a later date) and their dependants, allowing where appropriate for future increases; and the accrued benefits for members in service on the valuation date. The accrued benefits are the benefits for service up to a given point in time, whether vested rights or not. Guidance on the projected unit method is given in the Guidance Note GN26 issued by the Faculty and Institute of Actuaries.

Provision	<p>An amount set aside in the accounts for liabilities of uncertain timing or amount that have been incurred. Provisions are made when:</p> <ul style="list-style-type: none">• the City of London has a present obligation (legal or constructive) as a result of a past event;• it is probable that a transfer of economic benefits will be required to settle the obligation; and• a reliable estimate can be made of the amount of the obligation.
Reserves	<p>Reserves are reported in two categories in the Balance Sheet of local authorities:</p> <ul style="list-style-type: none">• Usable reserves - surpluses of income over expenditure and amounts set aside outside the definition of a provision and which can be applied to the provision of services. Certain reserves are allocated for specific purposes and are described as earmarked reserves.• Unusable reserves - those that cannot be used to provide services. This category of reserves include adjustment accounts which deal with situations where statutory requirements result in income and expenditure being recognised against the City Fund or HRA balance on a different basis from that expected by accounting standards.
Revaluation Reserve	<p>Represents increases in valuations of assets since 1 April less amounts written off due to the 'additional depreciation' (including impairment due to consumption of economic benefit) arising because property, plant and equipment are carried at a revalued amount rather than historic cost. It can also include reductions in values to investment properties where the reductions are not considered to be permanent.</p>
Revenue expenditure	<p>The day to day running costs relating to the accounting period irrespective of whether or not the amounts due have been paid. Examples are salaries, wages, repairs, maintenance and supplies.</p>
Revenue expenditure funded from capital under statute	<p>Legislation allows some expenditure to be classified as capital for funding purposes when it does not result in the expenditure being carried on the Balance Sheet as a long-term asset. The purpose of this is to enable it to be funded from capital resources rather than be charged to revenue and impact on council tax. These items are generally grant payments and expenditure on property not owned by the authority.</p>
Scheme liabilities	<p>The liabilities of a defined benefits pension scheme for outgoings due after the valuation date. Scheme liabilities measured using the projected unit method reflect the benefits that the employer is committed to provide for service up to the valuation date.</p>
